- #11  x 2
- #14  x 1

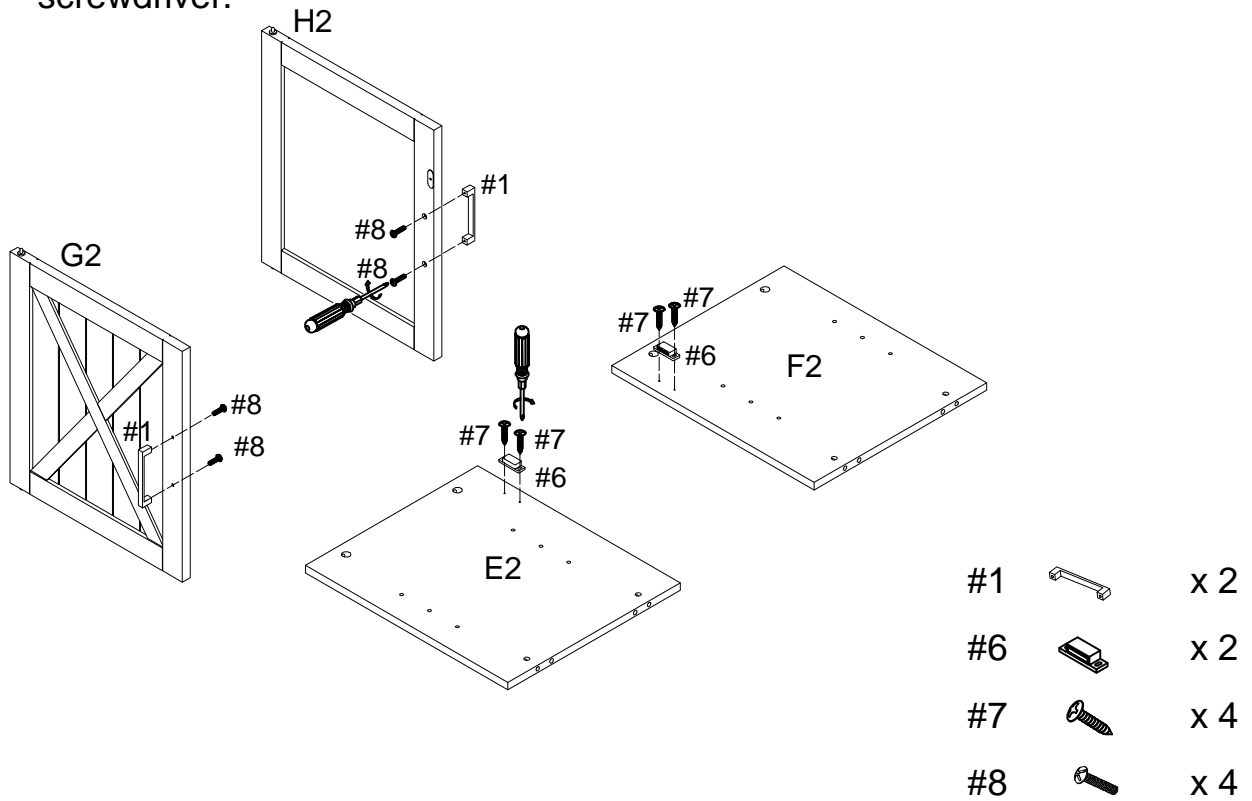

Step 2. Insert cam bolts (part #2) into pre-drilled holes of panels (parts A2, B2, C2, E2 & F2) using phillips head screwdriver.

Note: Do not over tighten cam bolts. Stop tightening once threads on cam bolt are no longer visible.

Step 3. Attach magnets (part #6) to partition panels (parts E2 & F2) using short screws (part #7) and phillips head screwdriver. Attach handles (part #1) to doors (parts G2 & H2) using round head bolts (part #8) and phillips head screwdriver.

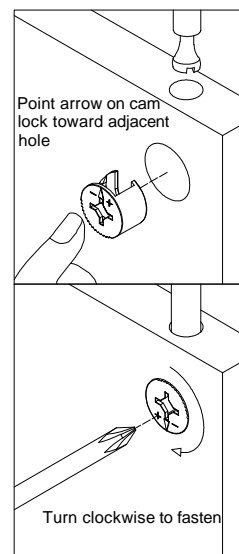

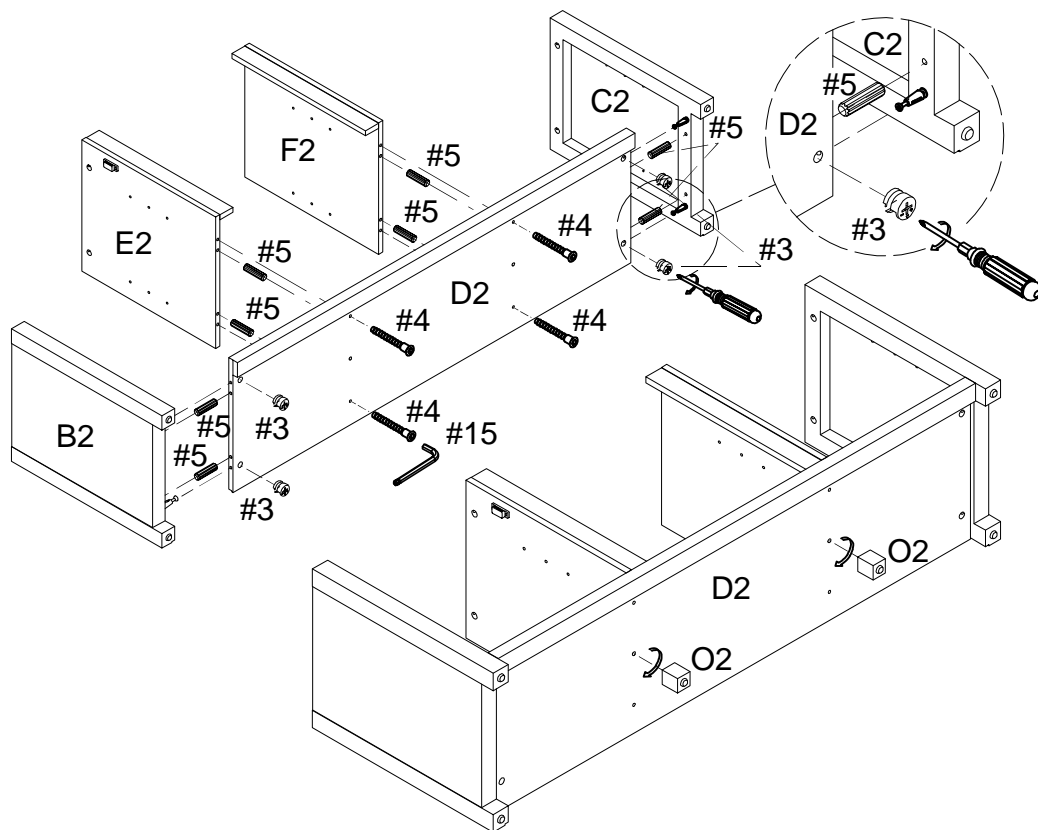

Step 4. Attach vertical rails (part M2) to partition panels (parts E2 & F2) using cam locks (part #3), wood dowels (part #5) and phillips head screwdriver. Attach top rail (part N2) to top panel (part A2) using wood dowels (part #5), long screws (part #9) and phillips head screwdriver.

Note: Cam locks must rotate a full 180°. See pictured insert.

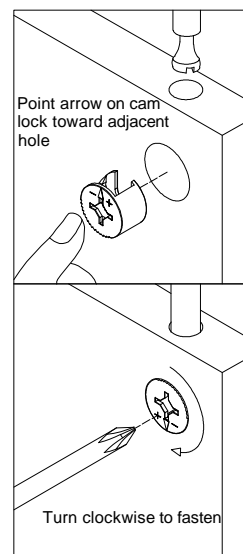

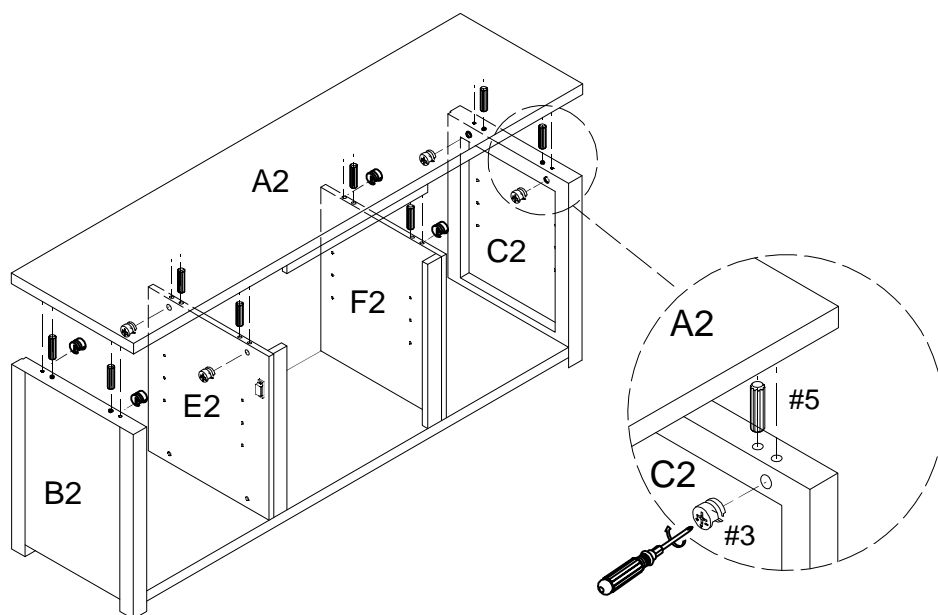

Step 5. Attach partition panels (parts E2 & F2) to bottom panel (part D2) using tapping bolts (part #4), wood dowels (part #5) and allen wrench (part #15). Attach left panel (part B2) and right panel (part C2) using cam locks (part #3), wood dowels (part #5) and phillips head screwdriver. Attach support legs (part O2) to bottom panel (part D2).

If you would like to add an electric fireplace (\*Not Included), please follow step 11.

NOTE: Be sure top and bottom pin hinges are fully extended to secure doors in place.
