business@regopantes.com

Introduction

RegoPantes provide high quality products guaranteed by our educated farmers. We make direct transaction with farmers, without any unnecessary intermediaries. We presented best quality products with competitive prices, yet also fair prices for farmers. With the latest technology, order process is so easy, so does the delivery process.

B2B

RegoPantes Business

service for business partners in culinary who demand fresh agricultural products come directly from the farm.

business.regopantes.com

B2C

RegoPantes Farmer's

Connecting Farmers with customers Directly on our platform

regopantes.com

Harga Pantas

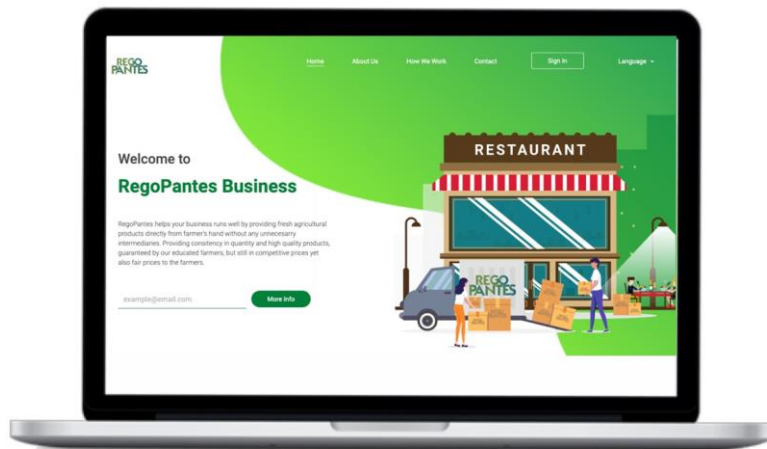

Harga Pantas means a fair price for farmers and customers. **RegoPantes cut the unnecessary intermediaries in transactions between farmers and customers.** Intermediaries in that transaction make the prices very high on customers but very low on farmers. We brings Harga Pantas to make a fair prices for both.

Regopantes Online B2B Services

2,765 farmers sell

January 2019, initiate B2B
6,353 farmers sell June 2020

Farmers income
increasing 17%

Farmers income
increasing 26%

Capacity in average
2.5 tons/month

Farmers income
increasing 2,200% or 22x

Capacity in average
55 tons/month

**175 outlets served with
monthly revenue has
reach more than USD
100,000**

Empowerment Value of Farmers

Added value for farmers not just only on their income side, but also supply chain management knowledge and implementation

o Quality Control

Farmer itself do the quality control before send the product

o Direct Delivery to Client through Logistics App Platform

Farmers send the product directly to client's drop point as per time requested by our internal logistics platform within maximum 24 hours after harvest, all the confirmed order will be confirmed by using our logistics apps

o Warehousing Management

Not only check the product standard based on client's requested, our farmers do the warehousing management and pack the product properly to send the product on their community warehouse. They also build their community warehouse themselves

o Special Product Treatment

Special product treatment is needed by some product, the farmers do the treatment as well to minimize the waste.

Minimize The Wasting Product

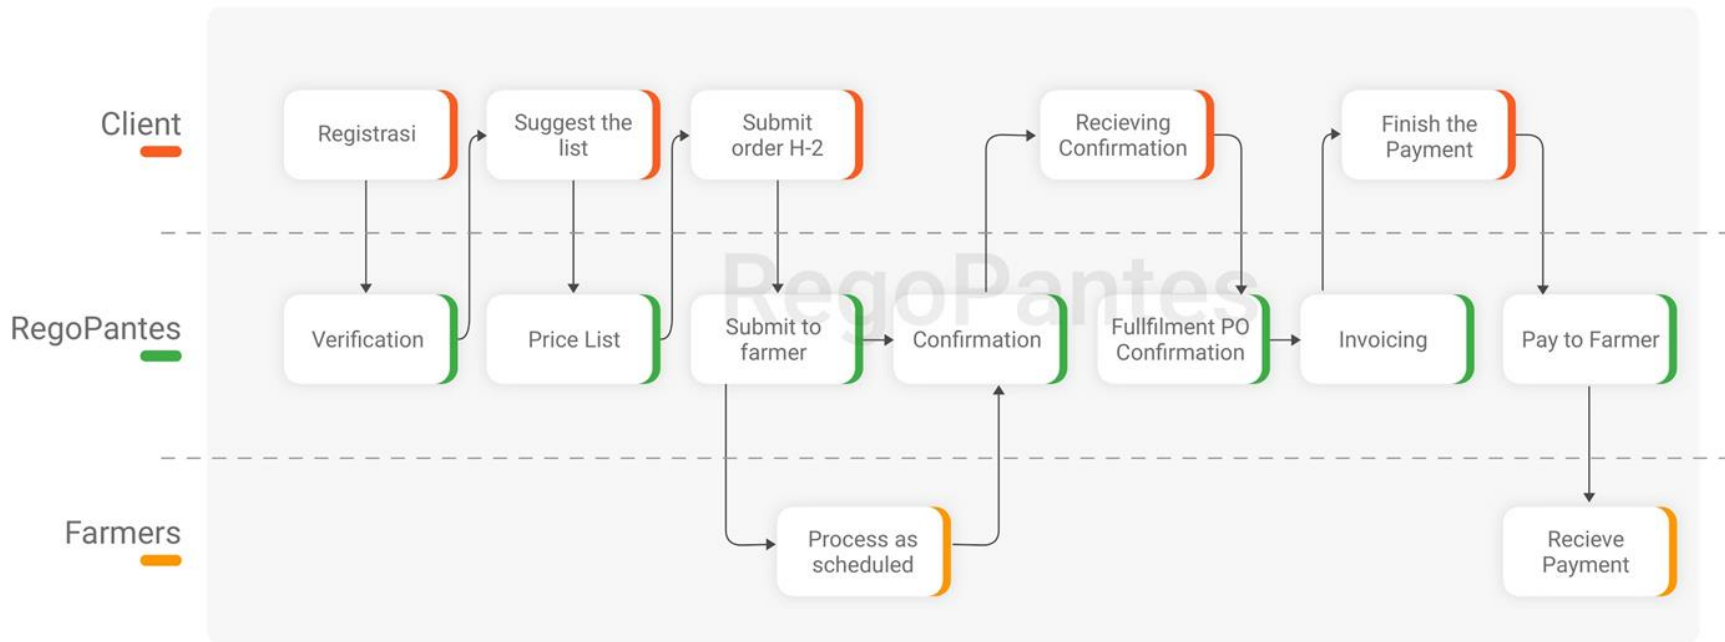

Since the farmers do the activity themselves, the process that we made is simplify the process and time so it minimizes the waste product.

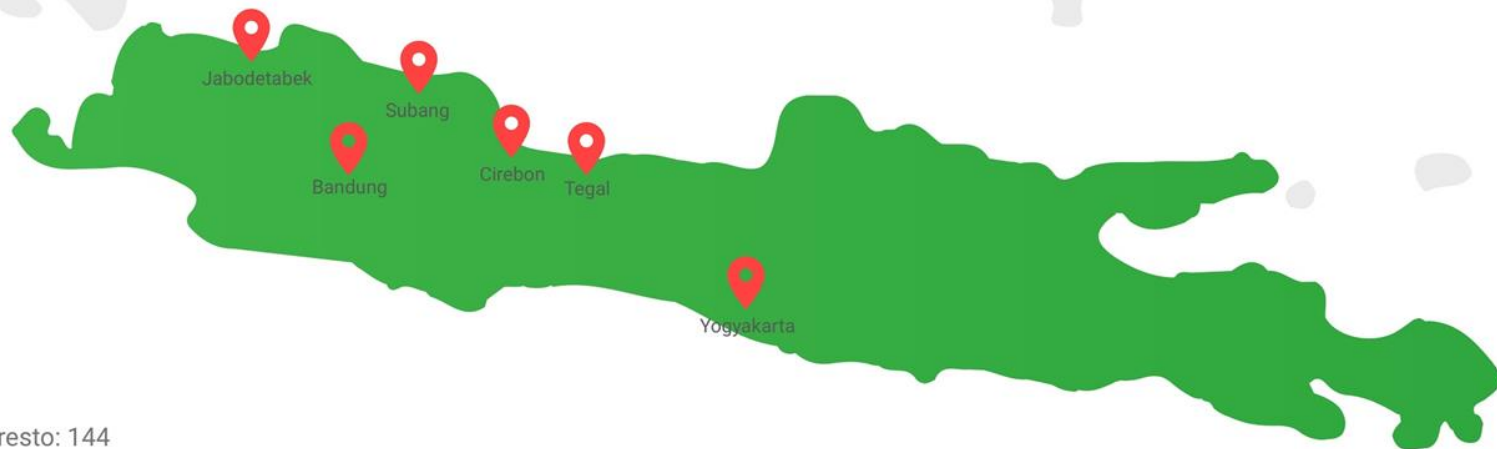

The waste products from vegetables can not be avoided, but since the farmers do the process themselves and the simplify process, the rejected product by clients because of standard like size, color, and etc is being processed to be more valuable product and we sell it for our B2C customer.
