Singapore

Singapore is an island microstate located at the southern tip of the Malay Peninsula. At 273 square miles (707 km²) Singapore is one of four remaining true city-states in the world. It is the smallest nation in Southeast Asia. With its friendly and welcoming people, state-of-the-art infrastructure and something new happening every day, Singapore is a destination like no other.

From its beginnings as a humble trading post to the bustling metropolis it is today, Singapore has always been different. A bridge between the East and the West for centuries, Singapore is today a vibrant melting pot of ideas, cultures and peoples. Local in its perspective but global in its outlook, Singapore is a city that has evolved uniquely, where age-old traditions and cutting-edge innovations are celebrated, a place brimming with unbridled energy and bursting with exciting events.

Brief History

Prior to European settlement, the island now known as Singapore was the site of a Malay fishing village at the mouth of the Singapore River. In 1819 the British East India Company established a trading post on the island, which was used thereafter as a strategic trading post along the spice route. Singapore would become one of the most important commercial and military canthers of the British Empire, and the hub of British power in Southeast Asia.

The city was occupied by the Japanese during World War II. Singapore reverted to British rule immediately after the war, in 1945. Eighteen years later the city, having achieved independence from Britain, merged with Malaya, Sabah and Sarawak

to form Malaysia. However, less than two years later it seceded from the federation and became an independent Republic on August 9, 1965.

Since independence, Singapore's standard of living has been on the rise. Foreign direct investment and a state-led drive to industrialization have created a modern economy focused on electronics manufacturing, petrochemicals, tourism and financial services. Singapore is the 5th wealthiest country in the world in terms of GDP per capita.

Highlights

The architecture of Singapore is varied, reflecting the ethnic build-up of the country. Singapore has several ethnic neighborhoods, including Chinatown and Little India. "Sri Mariamman Temple", the "Masjid Jamae Mosque" and the "Church of Gregory the Illuminator" are among the places of worship that were built during the colonial period and still present today. Other highlights include:

- Colonial-styled buildings: including the City Hall, Supreme Court and the legendary Raffles Hotel.
- The Botanical Gardens: which encompass the world's largest orchid collection, featuring 60,000 plants displayed in a natural setting.
- The statue of the Merlion: Singapore's enduring symbol.
- Shenton Way: commonly known as Asia's Wall Street.
- Orchard Road: the city's fashionable shopping district.
