

THE 9-POINT BIODECONTAMINATION AUDIT

Is your facility truly covered?

1

PERIODIC SCHEDULE

Standing calendar for whole-room decon, not just reactive response

2

SPORICIDAL VALIDATION

≥ 6 -log reduction against bacterial endospores, third-party validated, EPA-registered

3

FULL-ROOM COVERAGE

Verified reach behind equipment, above benches, through HEPA filters

4

AUDIT-READY RECORDS

Automated electronic reports, not handwritten logs

5

VALIDATED AGENT

Efficacy matched to biosafety level and space compatibility

6

WRITTEN PROTOCOL

Who, what, when, and who to call for biodecontamination services—documented before you need it

7

RE-ENTRY CLEARANCE

Defined clearance criteria before re-entry—sensor confirmation, time-based hold, or signed certificate

8

TRAINING & COMPETENCY

Current training records for everyone authorized to execute decon operations

9

RE-VALIDATION TRIGGERS

Written triggers for protocol review when equipment, layout, organisms, or methods change
