Silensec, a management consulting, technology services and training company specialized in information security, wants to hire a **Senior Penetration Tester** reporting to the Chief Executive Officer/Head of Incident Response. The Senior Penetration Tester is responsible for execution of a number of different technical consultancies including but not limited to penetration testing, incident response and computer forensics, and implementation of security solutions. The role involves working with security compliance consultants and business consultants to deliver complex projects for a wide range of clients both in Kenya and abroad.

Key Responsibilities

- Deliver vulnerability assessments and penetration tests, including the development of custom exploits and proof of concepts;
- Performing incident response and handling along with, where required, computer forensics investigation;
- Research into technical security areas and contribute to security training course development, including the development of slides, workshops and virtual environments;
- Delivery of security training courses;
- Assisting the business development team in business development activities.

Qualifications and Experience

- Bachelor of Science Degree or a related tertiary qualification.
- Minimum of three (3) years experience in IT security with emphasis on security assessment and security incidents investigations.
- Added bonus: Any technical security certification.

Core Skills

- Ability to program in Python and Javascript.
- High levels of integrity in the conduct of personal and professional affairs.
- Good communication and sound interpersonal skills.
- Exceptional verbal and written skills.
- Problem solving and decision making skills.
- Calmness and clarity of thought under pressure and ability to maintain confidentiality.
- Ability to work independently, without supervision and under pressure.

How to Apply

To apply send your CV and Cover letter to careers@silensec.com
- Applications must be sent as ONE (1) PDF document of maximum 3 pages long (1 page for the cover letter and 2 pages for the CV)
- File name to be FIRSTNAME.SURNAME.pdf
- Deadline for application is 8th February, 2019

Successful applicants will be asked to take a technical interview in order to qualify for the next stage. The Interview process will require a hands-on test. The positions are open for immediate start!
