# CAR SEATS

COLLECTION 2019

CYBEX HAS RECEIVED MORE  
THAN 250 AWARDS FOR DESIGN,  
SAFETY & INNOVATION

Visit our website at [www.cybex-online.com](http://www.cybex-online.com) for more information.

# DESIGN SAFETY FUNCTIONALITY

Design, Safety and Functionality—our D.S.F. Innovation Principle—are always at the core of every CYBEX product. The 2019 CYBEX Gold collection lives up to these principles by delivering a broader product portfolio and also a new product category that is focused on innovative smart technologies. CYBEX products are based on exceptional design, award-winning safety and innovation, along with tried and tested CYBEX functionality. Our products regularly undergo a series of strict safety and quality tests, both in-house and with third parties, to ensure that they are safe and easy to use. Continuous research and advancements bring all of our CYBEX infant car seats and car seats to the latest state of the art. We strive for maximum comfort and convenience for you and your child. What's more, our products are tested by the most critical judges: parents. They are the ones who put our products through their paces on a day-to-day basis. Only products that receive their approval become part of our collection.

## FUNDAMENTAL PRINCIPLES OF i-SIZE

### REAR-FACING MANDATORY UNTIL AT LEAST 15 MONTHS

R129 child restraints require children to be rear-facing up to at least 15 months of age. This is done, in part, by setting a minimum height for forward-facing child restraints of 76 cm. In contrast, R44 allows forward-facing child restraints from 9 kg (approximately 9 months).

### SEATS ARE SELECTED BY THE CHILD'S HEIGHT AND WEIGHT

R129 uses the child's height to determine if the seat is appropriate for them. This makes it easier for a parent to find the correct size of car seat for their child. However, this differs from R44/04, which uses weight only.

### SIDE-IMPACT TESTING

R129 includes a side-impact test of the seat to ensure it provides protection in side-impact collisions.

### IMPROVED COMPATIBILITY AND EASY HANDLING

All i-Size certified vehicles will fit all i-Size car seats. A special label indicates the compatibility with each seat in each certified vehicle. The use of ISOFIX reduces the risk of misuse as car seats can be easily installed with one simple click.

# DISCOVER i-SIZE

## CURRENT REGULATIONS

All over the world, new car seats are authorised by the latest regulations. In Europe and many parts of the world, the current UN R44 regulation applies in addition to the new UN R129 norm regulation. An amendment to R129 has been agreed that allows the approval of booster seats. This has passed the main legislative processes and has been in force since June 2017.

## R44 AND R129

UN Regulation No. 44.04 (R44/04) and UN Regulation No. 129 (R129) are running side by side for the time being. This means that parents can choose whether to buy a child restraint approved to either regulation.

## WHAT ARE R129 AND i-SIZE?

i-Size is one part of UN Regulation No. 129 (R129). R129 is a new regulation in Europe for enhanced child restraint systems and was developed by the Economic Commission for Europe of the United Nations (UNECE). This committee of experts includes regulators, research and test institutes, car manufacturers and child restraint manufacturers. CYBEX is a very active member of this group.

# CYBEX GOLD MODULAR SYSTEM

COT S

BALIOS S COMFORT SEAT\*

ATON M

SIRONA M2

FRAME BALIOS S

BASE M

Safety, functionality and design are at the core of our innovations at CYBEX. But there's more: to get ready for baby, an infant car seat and stroller are essentials from day one and go wherever you go during the first years of your child's life. With this in mind, we developed the CYBEX Gold Modular System: an efficient product package, which works together to offer parents maximised flexibility. Infant car seats help you stay mobile by car. Don't wake a sleeping baby: simply click your infant car seat onto the Balios S or any of

our CYBEX S-Line strollers and buggies. What's more, the Aton M shares the Base M with the Sirona M2 car seat. Once your baby outgrows the infant car seat, it's an efficient transition: the seat changes, the Base M stays. The Sirona M2 clicks into the base and your child travels safely rearward-facing up to 105 cm (approx. 4 years). The same smooth transition applies to our CYBEX Gold travel systems: simply exchange the infant's carry cot with the seat unit as your baby gets older.

## CYBEX 3-IN-1 TRAVEL SYSTEM

COT S

CYBEX GOLD CAR SEATS

COMFORT SEAT

Convenient and stylish to suit the everyday needs of modern parents, CYBEX Gold strollers are uniquely designed and include elements to ensure maximum comfort for navigating city streets. The CYBEX stroller Balios S is equipped with a 3-in-1 frame, meaning that you can swap the stroller seat for the Cot S while both Balios S and the entire S-Line strollers can alternatively be equipped with a CYBEX and gb infant car seat (both components are optionally available) to build your ideal travel system.

---

## BASE M

The Base M is compatible with the Aton M and Sirona M2. Due to the individually adjustable ISOFIX connectors as well as the height-adjustable load leg, the car seat gains extra stability and safety on the Base M. The one-click installation offers a safe and simple installation that requires no further fastening. Installation indicators also help to prevent potential misuse.

# ATON M

*i-Size UN R129, 45 – 87 cm, max. 13 kg (birth – approx. 18 months)*

The Aton M offers the latest safety technology available. When installed with the Base M (additionally available), the infant car seat complies with the new i-Size regulation. i-Size (UN R129) is the new EU standard for child safety, making rear-facing travel mandatory until your child reaches 15 months. The Aton M is also available with the brand-new CYBEX SensorSafe technology – an innovative, smart solution to increase the child's safety.

### SUPER-LIGHTWEIGHT & EXTRA-SPACIOUS

The Aton M fulfils the latest safety standards by being super-lightweight and extra-spacious for maximised comfort.

INSTALLATION VIDEO ON OUR WEBSITE

## LINEAR SIDE-IMPACT PROTECTION

The Linear Side-impact Protection (L.S.P. System) helps absorb the forces of a side-impact collision. The initial force of an accident is transferred through the door-facing extended side protector and is distributed into the car seat's energy-absorbing shell. The flexible material and structure of the infant car seat then reduce the forces of impact.

### LIE-FLAT POSITION

The removable newborn inlay reduces the risk of breathing difficulties caused by the head falling forward with small and premature babies.

### INTEGRATED XXL SUN CANOPY

Wind and sun protection with a UPF50+ rating.

### ENERGY-ABSORBING SHELL

Reduces the forces of an impact and channels them away from the baby.

(p. 48)

# WHY REAR-FACING ?

## SIRONA S & SIRONA M2

Doctors, accident researchers, as well as consumer and health organisations such as the ADAC and the German independent consumer testing organisation, Stiftung Warentest, all recommend extending the time that children travel rear-facing to 4 years old. The risk of injury has been shown to be much lower for children travelling in rear-facing car seats. These results have been verified by statistics from countries which primarily use rear-facing seats for older children (i.e. Group 1 seats). This is why we recommend rear-facing transport for children up to 105 cm (approx. 4 years).

### REAR-FACING VS FORWARD-FACING

Unlike adults, the head of a baby is very big and heavy in relation to the body. A baby's head is equal to 25% of the overall body weight, while the neck and spine muscles are not yet fully developed. They need special protection, particularly in case of an accident. In the event of a collision, the CYBEX Sirona S or Sirona M2 function like a protective

shield to protect the sensitive neck and vertebrae. The force of impact is distributed evenly over the large surface of the backrest, meaning the strain on the neck, shoulders, head and internal organs is significantly reduced. This is why a rear-facing car seat helps to reduce the risk of an injury in a frontal collision.

A woman with blonde hair, wearing a white top and a beige coat, is smiling and looking towards the camera. A man in a dark sweater is partially visible on the left. In the background, a young child is seated in a blue and black car seat inside a car. The car's interior is visible, showing a tan leather seat.

# WHY SIRONA S?

## ENERGY REDUCTION TECHNOLOGY

*Reduces the strain on the neck in case of a front impact (forward-facing)*

## GROWING PROTECTION

*12-position height-adjustable headrest – excellent protection up to the age of 4 years*

## INTEGRATED L.S.P. SYSTEM

*Extendable on side facing the car door*

## EASY ENTRANCE AND EXIT

*Harness clips make moving your child in and out of the seat simple*

## ONE-HAND RECLINE AND ROTATION FUNCTION

*Easy adjustment for parents (5 positions rear-facing and 3 positions forward-facing)*

## DRIVING DIRECTION CONTROL (D.D.C.)

*Prevents misuse in turning forward-facing before the child is at least 16 months old and 76 cm tall*

## REAR-FACING

*Birth – 105 cm (up to 18 kg, approx. 4 years) optional forward-facing (starting from min. 76 cm and 16 months)*

---

## UN R129 (i-SIZE)

The CYBEX Sirona S complies with the 'i-Size' European requirements and regulations for car seats. The R129 regulation states that children aged 15 months and under must travel in a rear-facing car seat.

At CYBEX we recommend prolonging the time that children travel in a rear-facing position in the Sirona S until they are around 105 cm in height (approx. 4 years). The Sirona S can also be used in cars which do not comply with i-Size. Please see the compatibility list on the CYBEX website.

---

---

### 360° ROTATION MECHANISM

The innovative 360° rotating mechanism of the Sirona S makes switching between the rear- and forward-facing position easy. In addition, it provides a comfortable entry and exit position for less strain on parents' backs. The Driving Direction Control (D.D.C.) prevents forward-facing use before the child is at least 16 months old and 76 cm tall.

---

### INTEGRATED L.S.P. SYSTEM

The integrated L.S.P. System of the Sirona S offers increased safety in the event of a side-impact collision.

### HEIGHT-ADJUSTABLE HEADREST

The adjustable headrest of the Sirona S offers 12 positions for customized adjustment as your child grows.

### ONE-HAND RECLINE AND ROTATION FUNCTION

The smart one-hand recline and rotation function makes it easy for parents to adjust the seat.

## WHY JUNO M-FIX?

---

### ADJUSTABLE IMPACT SHIELD

The impact shield works similarly to an airbag, significantly reducing the force of impact by distributing it evenly over energy-absorbing materials. Your child's sensitive neck, head and chest area are also well protected thanks to the adjustable impact shield. It adjusts using one hand to fit your child's body and offers more freedom of movement for the upper body compared to conventional impact shield car seats.

---

INSTALLATION VIDEO ON OUR WEBSITE

---

### RECLINING BACKREST

Thanks to the recline function, the car seat can be better adjusted to the vehicle seat.

### ISOFIX CONNECT

Provides added stability and safety and can also be used in vehicles without ISOFIX.

---

### AIR CIRCULATION SYSTEM

The integrated air circulation system helps to regulate your child's body temperature, even on hot days.

### HEIGHT-ADJUSTABLE HEADREST

The height-adjustable headrest of the seat grows with your child for a more perfect fit and increased safety throughout the whole period of use.

### L.S.P. SYSTEM

In case of an accident, the force of a side-impact collision is systematically absorbed and the child's head is actively guided into a safe position.

---

PALLAS S-FIX

# PALLAS S-FIX

*9 – 36 kg (approx. 9 months – 12 years) UN R44/04*

Nothing fits! Too small! Common phrases during the first years of your child's life. The Pallas S-Fix car seat will be the perfect fit for years: as a 2-in-1 seat, it is designed to grow with your child from 9 months to 12 years. The impact shield reduces the risk of serious neck injuries without confining the child. When it's time for a nap, the reclining headrest prevents the child's head from tipping forward. It helps the head to remain in the safety zone of the headrest at all times, which is especially important in the event of a side-impact collision. Together with the headrest, the L.S.P. System offers increased safety by reducing the forces of a side-impact collision.

**COMFORTABLE, ONE-HAND RECLINE FUNCTION**  
*Can be easily adjusted to a sleeping position with just one hand (Group 1)*

---

### ADJUSTABLE IMPACT SHIELD

The adjustable impact shield of the Pallas S-Fix reduces the risk of serious neck injuries without confining the child and has an excellent overall crash performance. The one-hand adjustment of the impact shield ensures ease of use for the parent.

### RECLINING HEADREST

The reclining headrest prevents the child's head from tipping forward while sleeping. It ensures that the child's head remains in the safety zone at all times, which is especially important in the event of a side-impact collision.

### L.S.P. SYSTEM

The L.S.P. System of the Pallas S-Fix offers increased safety during a side-impact collision. It reduces the forces of an impact in the event of a side-impact collision by approximately 25% when compared to the same car seat without L.S.P. extended.

---

### ONE-HAND RECLINE FUNCTION

The smart one-hand recline function makes it easy for parents to adjust the Pallas S-Fix to a sleeping position while keeping one hand free (Group 1).

### 2-IN-1 SEAT

The Pallas S-Fix is a 2-in-1 seat, adjusting to the growth of your child and can be used from 9 months up to 12 years.

---

### ACCESSORIES

(p. 48)

SOLUTION S-FIX

# SOLUTION S-FIX

*15 – 36 kg (approx. 3 – 12 years) UN R44/04*

Made with your child in mind: The Solution S-Fix grows with your child from 3 to 12 years, adapting to changing needs just like parents do. The reclining headrest prevents the child's head from tipping forward while sleeping, keeping it in the safety zone at all times. This is especially important in the event of a side-impact collision, where the headrest and the L.S.P. System offer increased safety for your child. 12 positions for height adjustment ensure your growing child will travel comfortably at all times. The smart one-hand operation makes adjustments quick and easy for parents on the go.

## RECLINING HEADREST

The optimised reclining headrest prevents the child's head from tipping forward while sleeping. It ensures that the child's head remains in the safety zone at all times, which is especially important in the event of a side-impact collision.

### L.S.P. SYSTEM

The L.S.P. System of the Solution S-Fix offers increased safety during a side-impact collision. The L.S.P. System reduces the forces of an impact in the event of a side-impact collision by approximately 25% when compared to the same car seat without L.S.P. extended.

### HEIGHT ADJUSTMENT

The 12-position height adjustment allows the seat to grow with the child and offers extremely long usability. The head protectors grow with the personal space requirements of the child.

---

### VENTILATION SYSTEM

The integrated ventilation system of the Solution S-Fix ensures a comfortable seat temperature for your child even on hot days.

### RECLINING BACKREST

The reclining backrest of the Solution S-Fix adjusts perfectly to any vehicle seat.

### ENERGY-ABSORBING

The energy-absorbing shell of the Solution S-Fix absorbs the forces of an impact and protectively covers the child.

# PASSION FOR EXCELLENCE

CYBEX FOR  
SCUDERIA FERRARI

The CYBEX for Scuderia Ferrari collection of car seats, strollers and baby carriers features unmistakable Ferrari accents. The Gold line boasts a modern, casual design, showcasing mesh material for a sporty look in a colour palette of racing red and victory black. The CYBEX for Scuderia Ferrari collection is a testament to the Ferrari legacy: capturing its rich heritage of excellence, uniqueness and high performance. From the race track to the city streets, the CYBEX for Scuderia Ferrari collection is driven by a genuinely unparalleled passion for excellence – leading the way for the modern parent.
