# DESIGN, SAFETY AND FUNCTIONALITY

Design, Safety and Functionality (our D.S.F. Innovation Principle) are always at the core of every CYBEX product. The 2018 CYBEX Gold collection lives up to these principles by delivering a broader product portfolio and also a new product category that is focused on parents' homes. CYBEX products are based on exceptional design, award-winning safety and innovation, along with tried and tested CYBEX functionality.

Our products regularly undergo a series of strict safety and quality tests, both internally and with third parties, to ensure that they are safe and easy to use. Continuous research and advancements bring all of our CYBEX infant car seats and car seats to the latest state-of-the-art. We strive for maximum comfort and convenience for you and your child.

What's more, our products are tested by the most critical judges: parents. They are the ones who put our products through their paces on a day-to-day basis. Only products that receive their approval become part of our collection.

ATON M ON BALIOS M

# CYBEX GOLD MODULAR SYSTEM

Safety, functionality and design are at the core of our innovations at CYBEX. But there's more: to get ready for baby, an infant car seat and stroller are essentials from day one and go wherever you go during the first years of your child's life. With this in mind, we developed the CYBEX Gold Modular System: an efficient product package, which work together to offer parents maximised flexibility. Infant car seats help you stay mobile by car. Don't wake a sleeping baby: simply click your infant car seat onto the Balios S or any of our

CYBEX M-Line strollers. What's more, the Aton M and Aton M i-Size share the Base M with the Sirona M2 i-Size car seat. Once your baby outgrows the infant car seat, it's an efficient transition: the seat changes, the Base M stays. The Sirona M2 i-Size clicks into the base and your child travels safely rearward-facing up to 105 cm (approx. 4 years). The same smooth transition applies to our CYBEX Gold travel systems: simply exchange the infant's carry cot with the seat unit as your baby gets older.

# WHY CYBEX MODULAR SYSTEM?

/ ONE BASE FOR TWO CAR SEATS

/ ONE SOLUTION FROM BIRTH  
UP TO 4 YEARS (105 CM)

/ EASY HANDLING

/ ONE-CLICK INSTALLATION

/ INSTALLATION INDICATORS TO PREVENT MISUSE

/ TRAVEL SYSTEM FOR MAXIMUM COMFORT

/ AVAILABLE AS COMPLETE i-SIZE SYSTEM

## CYBEX 3-IN-1 TRAVEL SYSTEM

CYBEX GOLD COT

CYBEX GOLD INFANT CAR SEAT

CYBEX GOLD COMFORT SEAT

Convenient and stylish to suit the everyday needs of modern parents, CYBEX Gold strollers are uniquely designed and include elements to ensure maximised comfort and a great design for navigating the city streets. The CYBEX strollers Balios S and CYBEX M-Line Strollers are equipped with a 3-in-1 frame, meaning that you can swap the stroller seats for the Cot M (only in combination with CYBEX M-Line Strollers) or the Cot S (only in combination with Balios S) as well as a CYBEX infant car seat (both components are optional available) to build your ideal travel system.

---

## BASE M

The Base M is compatible with the Aton M (p. 85), Aton M i-Size (p. 84) and Sirona M2 i-Size (p. 99). Due to the individual adjustable ISOFIX connectors as well as the height-adjustable load leg, the car seats gain extra stability and safety on the Base M. The one-click installation offers a safe and simple installation that requires no further fastening. Installation indicators also help to prevent potential misuse.

Larger than ever, our product portfolio for 2018 includes the new S-Line Design. It stands out with high quality materials, reduced shapes and an iconic appearance. Whether light and ultra-compact or comfortable and sturdy, our range of strollers is versatile in style and offering. The result is a family of strollers to suit every taste and need and that perfectly adapts

to the lifestyle of urban parents. With practical functions such as the one-hand folding mechanism, compact sizes and high manoeuvrability, CYBEX strollers have been ideal companions on city streets for many years. Add on a matching carry cot or a popular CYBEX or gb infant car seat, and you have a practical 3-in-1 system to meet all your needs.

NEW

COTY ON BALIOS

# COT S

*From birth – 9 kg (approx. 6 months)*

Throughout baby's first months, a carry cot is the perfect bed on the go. The canopy with extra sun visor offers sun and wind protection with UPF50+ for your little one. The carry handle of the Cot S is placed along the sun canopy for easy carrying and attaching to a stroller base. Equipped with a memory foam mattress that supports the correct lying position of the little one, our biggest CYBEX Gold Cot is not only super-spacious (inner dimensions: L77 x W32 x H21 cm) but also offers a comfortable, sheltered place for your infant. The Cot S clicks onto the Balios S and, together with one of the renowned CYBEX and gb infant car seats, it's easy to create a 3-in-1 travel system to take your baby from the car into the city in stylish comfort.

BALIOS S

# BALIOS S

ALUMINIUM  
FRAME

*From birth – 17 kg (approx. 4 years)*

Convenience for you, comfort for your baby. Add a renowned CYBEX or gb infant car seat and the spacious Cot S Carry Cot to the Balios S to create your 3-in-1 travel system that takes you through the city streets and across the country. Smooth rides are guaranteed wherever your walk takes you: the suspension on the big All Terrain Wheels ensures a smooth and agile ride on cobblestones, pavement or out in the country. Functions like the reversible seat unit, memory buttons or the one-hand fold mechanism and the full lie-flat position of the backrest make the Balios S your perfect companion.

# WHY BALIOS S?

## CYBEX 3-IN-1 TRAVEL SYSTEM

Cot S

Car Seat

Stroller

The Balios S stroller frame can be used as a 3-in-1 travel system. Simply attach the matching Cot S, the matching seat unit, or one of the renowned CYBEX and gb infant car seats.

## ONE-HAND FOLDING MECHANISM

When the Balios S is not in use, it can be easily folded with the one-hand folding mechanism for self-standing storage, even with the parent-facing seat unit.

## BIG ALL TERRAIN WHEELS WITH SMOOTH SUSPENSION

Ensure a smooth ride for parent and child. From bumpy cobbles to off-road walks, enjoy smooth mobility wherever you are.

### REVERSIBLE SEAT UNIT WITH MEMORY BUTTONS

Reversible seat unit: choose a parent-facing or forward-facing stroller set-up. Reversing the seat unit is quick and easy thanks to memory buttons.

### ONE-HAND RECLINING MECHANISM

Three backrest positions including a full lie-flat position make the Balios S suitable from birth.

### TELESCOPIC ADJUSTABLE HANDLEBAR

Four positions offer comfortable steering for parents of any height.

### XXL SUN CANOPY

Offers shade and protects from wind with UPF50+ sun protection and extendable visor.

COTY M ON BALIOS M

# COT M

*From birth – 9 kg (approx. 6 months)*

The CYBEX Cot M carry cot is lightweight without compromising on comfort and space (L89 x W40 x H60 cm). A comfortable wide mattress ensures an ergonomically correct lying position. The XXL sun canopy with integrated visor and UPF50+ not only protects baby against sun but also against wind. The Cot M fits all CYBEX M-Line strollers using the additional adapters (adapters included in package).

BALIOS M

BALIOS M

# BALIOS M

ALUMINIUM  
FRAME

*From birth (with carry cot) – 17 kg (approx. 4 years)*

The CYBEX Balios M combines comfort and elegance on four robust and durable wheels, meaning it has no problem mastering cobbled streets and kerbs. The reversible seat unit can be reclined to a comfortable lying position that is either forward-facing or parent-facing, and you only need one hand to operate most of its functions. These details, among other ingenious design characteristics, make the Balios M the perfect city stroller.

# IRIS M-AIR

ALUMINIUM  
FRAME

*From birth (with carry cot) – 17 kg (approx. 4 years)*

The CYBEX Iris M-Air is the perfect choice for parents looking for a light and flexible city stroller that doesn't make compromises on comfort. The cushioned seat can be used forward-facing or parent-facing. Using one hand, the backrest can be adjusted into three positions, including a comfortable near-flat position.

# WHY BALIOS M & IRIS M-AIR?

## THE WHEELS MAKE THE DIFFERENCE

Both strollers offer the same user-friendly functions and comfort; the main difference between them is the wheels. The Iris M-Air has City Light Wheels that are light and manoeuvrable, smooth to handle on flat pavements and city streets. The city tyres are puncture-proof with a narrow tread to make moving around the city easy. The Balios M, with its large All Terrain Wheels, also has puncture-proof tyres that are best suited to navigating more bumpy terrain.

## CYBEX M-LINE 3-IN-1 TRAVEL SYSTEM

Cot M

Car Seat

Stroller

Convenient and stylish to suit the everyday needs of modern parents, these strollers are uniquely designed and include elements to ensure excellent comfort. Both the Iris M-Air and the Balios M are equipped with 3-in-1 frames, meaning that you can swap the stroller seat for a carry cot or a CYBEX or gb infant car seat (both components are optional additions) to build your ideal travel system. Simply attach each travel component onto the frame using the available adapters and both strollers can be converted with ease to offer maximised comfort and great design for navigating the city streets.

INSTALLATION VIDEO ON OUR WEBSITE

### COMPACT ONE-HAND FOLD MECHANISM

Both the Iris M-Air and Balios M can be folded with the seat unit facing forward or facing the parent. Thanks to the intuitive fold technology, both strollers become small and compact packages in a matter of seconds using just one hand. The strollers stay upright with a self-standing fold and can easily be stowed away.

### REVERSIBLE SEAT UNIT

The seat can be used forward-facing or parent-facing and comes with a one-hand reclining function.

### SPACIOUS SHOPPING BASKET

Extra-large and practical (maximum capacity: 5 kg).

AGIS M-AIR 4

# AGIS M-AIR3

ALUMINIUM  
FRAME

*From birth – 17 kg (approx. 4 years)*

The CYBEX Agis M-Air3 embodies ultimate strolling enjoyment. This urban runabout is lightweight and agile, but still offers exceptional comfort. Its compact size makes it easy and fun to navigate and the uncomplicated one-hand folding system makes it the perfect companion for use in the city.

CITY LIGHT WHEELS

# WHY EEZY S TWIST?

UNIQUE ONE-HAND ROTATABLE SEAT UNIT

Offers the choice of a parent-facing or forward-facing stroller set-up. This smart function allows quick and simple rotation of the seat unit with one hand.

### SMOOTH FRONT WHEEL SUSPENSION

### SMOOTH REAR WHEEL SUSPENSION

Ensures a smooth ride for parent and child. From bumpy cobbles to uneven sidewalks.

## COMPACTNESS AT ITS BEST

The narrow footprint of only 45 cm makes this stroller perfect for public transport, narrow streets and travelling.

The compact folded package can fit anywhere, in the smallest car trunks, under train seats or in cafés.

## SMART ONE-HAND FOLDING MECHANISM

Bring the Eezy S Twist on the plane – it's small enough to meet hand luggage criteria\*, measuring only L 26 x W 45 x H 56 cm in its compact, self-standing fold.

\* Cabin luggage allowances may vary depending on airlines.

## MULTIPLE RECLINE FUNCTION INCLUDING FULL LIE-FLAT POSITION

Makes the Eezy S Twist suitable from birth. Multiple backrest positions until full lie-flat ensure your child is always comfortable.

## SUN CANOPY

Offers shade and protects from wind with UPF50+ sun protection and extendable visor.

## WHY EEZY S?

### ONE-HAND COMPACT FOLD

The one-hand folding mechanism leaves your other hand free to hold your child while you place the Eezy S in its compact, self-standing fold. Measuring only L 25 x W 45 x H 53 cm in its self-standing fold, the Eezy S is a space-saving choice. Compact and convenient, it can be stored everywhere.

---

### LIGHTWEIGHT

The compact and light build of this buggy allows for easy manoeuvring when you're on the go. With a weight of only 6.0 kg and its compact fold, the Eezy S is easy to lift and carry.

### SMALL FOOTPRINT

Thanks to the sleek silhouette and only 45 cm width, this buggy offers easy manoeuvring even in shops and narrow streets.

### 2-IN-1 TRAVEL SYSTEM

Comfortable travel with one frame: use the integrated soft seat (from 6 months), and your CYBEX & gb infant car seats (from birth).

### MULTIPLE RECLINE FUNCTION

A stepless adjustment of the backrest ensures your child is always comfortable from sitting up to reclining for a nap.

---

### SMOOTH 4-WHEEL SUSPENSION

From bumpy cobbles to uneven sidewalks – your mobility and baby's sleep are uninterrupted.

### SUN CANOPY

The sun canopy (UPF50+) with additional visor protects from sun and wind.

# BABY CARRIERS

The background image is a blurred city street scene. In the foreground, there is a dark stone balustrade with vertical slats. Below the balustrade, a paved area with white diagonal stripes is visible. In the background, there are several multi-story buildings with many windows, some of which are lit up. The overall scene is out of focus, creating a sense of depth and atmosphere.

MAIRA.TIE & MAIRA.CLICK**

72 **BEYLA.TWIST**

75 **WHY  
BEYLA.TWIST**

Being carried is one of the basic needs of every baby. The physical contact between parent and baby positively impacts close bonding, as well as a feeling of security and strengthened self-assuredness. Correct carrying also promotes the baby's healthy physical development – the rounded back and spread-squat position create the natural posture of a baby and promote the healthy development of the back and hip joints.

Discovering the world 'at eye level' stimulates all senses and the healthy mental and physical development of the baby. All CYBEX baby carriers offer these aspects of healthy infant development and offer hands-free mobility for the parent while enjoying the ultimate closeness with the baby. Our carriers are developed and designed together with German midwives, carrying consultants and orthopedists.

MAIRA.CLICK

# CARRYING COMPETENCE

## CARRY YOUR BABY ...

Babies love to be carried. A baby carrier offers the baby close physical contact with mum or dad and satisfies the basic need for security and closeness while promoting self-assuredness and independence.

Correct carrying in a baby carrier promotes the optimal posture and supports the healthy physical development of the baby.

## ... AND PROMOTE THE HEALTHY DEVELOPMENT OF THE BACK AND HIP JOINTS!

After nine months in the mom's womb, babies are born with a lightly curved spine. After birth, the spine straightens: a slow and cautious process, which takes over a year. Right after birth, babies take up the spread-squat position, which promotes the continued healthy development of the hip joints. Carrying your baby in a carrier promotes the maturing of the hip joints in a natural way.

## FURTHER BENEFITS OF A BABYWEARING

### SENSES/EARLY DEVELOPMENT

Carrying stimulates all physiological senses, such as perception of the body through balance, gravity, physical boundaries, internal organs, positions of the joints and movement. Also the very important perception of the environment through senses, such as sense of hearing, tasting, smelling, touch and seeing, are being developed.

### BONDING/PSYCHOLOGY

Last but not least – carrying strengthens the important parent-child-bonding and continuously satisfies the emotional needs of the baby through closeness, warmth and a feeling of security. This leads to babies who cry less and sleep better. At the same time, the baby carrier offers parents more flexibility, mobility and free hands for everyday tasks while being close to their precious baby.

NEW

MAIRA.CLICK

# MAIRA.CLICK

*From newborn to toddler (approx. 3.5 – 15 kg)*

The MAIRA.click is a full buckle carrier from the CYBEX Gold range, made from diagonally elastic fabric which supports baby's naturally rounded back. The baby carrier is secured by an easy click mechanism for very fast click-on and click-off. From newborn to toddler (approx. 2 years), the ergonomic seating panel with width and height adjustment and the multifunctional head and neck-rest adjust to baby's size for ergonomic and comfortable carrying in the natural spread-squat position.

We make the effort to make our products fashionable and appealing but our principle mission is always to provide your child with maximum safety in the car. To make sure of this, CYBEX products undergo hundreds of crash tests during the development process. It is no coincidence that each year our

car seats consistently achieve outstanding results in the most important European safety and consumer tests. Every new crash test brings about further improvements when we develop our products, and we use the most up-to-date testing technology to ensure this.

## FUNDAMENTAL PRINCIPLES OF i-SIZE

### REAR-FACING MANDATORY UNTIL AT LEAST 15 MONTHS

R129 child restraints require children to be rear-facing up to at least 15 months of age. This is done, in part, by setting a minimum height for forward-facing child restraints of 76 cm. In contrast, R44 allows forward-facing child restraints from 9 kg (approximately 9 months).

### SEATS ARE SELECTED BY THE CHILD'S HEIGHT AND WEIGHT

R129 uses the child's height to determine if the seat is appropriate for them. This makes it easier for a parent to find the correct size of the car seat for their child. However, this differs from R44/04, which uses weight only.

### SIDE IMPACT TESTING

R129 includes a side-impact test of the seat to ensure it provides protection in side-impact collisions.

### IMPROVED COMPATIBILITY AND EASY HANDLING

All i-Size certified vehicles will fit all i-Size car seats. A special label indicates the compatibility with each seat in each certified vehicle. The use of ISOFIX reduces the risk of misuse as car seats can be easily installed with one simple click.

# DISCOVER i-SIZE

## CURRENT REGULATIONS

All over the world, new car seats are authorised by the latest regulations. In Europe and many parts of the world, the current UN R44 regulation applies in addition to the new UN R129 norm regulation. An amendment to R129 has been agreed that allows the approval of booster seats. This has passed the main legislative processes and has been in force since June 2017.

## R44 AND R129

UN Regulation No. 44.04 (R44/04) and UN Regulation No. 129 (R129) are running side by side for the time being. This means that parents can choose whether to buy a child restraint approved to either regulation.

## WHAT ARE R129 AND i-SIZE?

i-Size is one part of the UN Regulation No. 129 (R129). R129 is a new regulation in Europe for enhanced child restraint systems and was developed by the Economic Commission for Europe of the United Nations (UNECE). This committee of experts includes regulators, research and test institutes, car manufacturers and child restraint manufacturers. CYBEX is a very active member of this group.

### SUPER-LIGHTWEIGHT & EXTRA SPACIOUS

The Aton M & Aton M i-Size fulfil the latest safety standards by being super-lightweight and extra-spacious for maximised comfort.

INSTALLATION VIDEO ON OUR WEBSITE

## LINEAR SIDE-IMPACT PROTECTION

The Linear Side-impact Protection (L.S.P. System) helps absorb the forces of a side-impact collision. The initial force of an accident is transferred through the door-facing extended side protector and is distributed into the car seat's energy-absorbing shell. The flexible material and structure of the infant car seat then reduce the forces of impact.

---

### LIE-FLAT POSITION

The removable newborn inlay reduces the risk of breathing difficulties caused by the head falling forward with small and premature babies.

### INTEGRATED XXL SUN CANOPY

Wind and sun protection with a UPF50+ rating.

### ENERGY-ABSORBING SHELL

Reduces the forces of an impact and channels them away from the baby.

## ACCESSORIES

(p. 126)

# SIRONA S i-SIZE & SIRONA M2 i-SIZE

## WHY REAR-FACING?

Doctors, accident researchers, as well as consumer and health organisations such as the ADAC and the German independent consumer testing organisation, Stiftung Warentest, all recommend to extend the time that children travel rear-facing to 4 years old. The risk of injury has been shown to be much lower for children travelling in rear-facing car seats. These results have been verified by statistics from countries which primarily use rear-facing seats for older children (i.e. Group 1 seats). This is why we recommend a rear-facing transport for children up to 105 cm (approx. 4 years).

### REAR-FACING VS FORWARD-FACING

Unlike adults, the head of a baby is very big and heavy in relation to its body. A baby's head is equal to 25 % of its overall body weight, while the neck and spine muscles are not yet fully developed. They need special protection, particularly in case of an accident. In the event of a collision, the CYBEX Sirona S i-Size or Sirona M2 i-Size function like a protective

shield to protect the sensitive neck and vertebrae. The force of impact is distributed evenly over the large surface of the backrest, meaning the strain on the neck, shoulders, head and internal organs is significantly reduced. This is why a rear-facing car seat helps to reduce the risk of an injury in a frontal collision.

*Safely rear-facing until your child  
reaches 105 cm in height*

SIRONA S i-SIZE

NEW

SIRONA S i-SIZE

# SIRONA S i-SIZE

*45 cm – 105 cm (up to 18 kg, approx. 4 years), UN R129/02*

No more awkward lifting and back pain when helping your child in and out of the car seat. The innovative one-hand 360° rotating mechanism provides a comfortable entry and exit position, ensuring less strain on parents' backs. Because it's the safest way for your little one to travel, the Sirona S i-Size provides comfortable rear-facing travel for children up to 105 cm, approx. 4 years. The Driving Direction Control (D.D.C.) prevents forward-facing use before the child is at least 16 months old and 76 cm tall.

# WHY SIRONA S i-SIZE?

## ENERGY REDUCTION TECHNOLOGY

*Reduces the strain on the neck in case of a front impact (forward-facing)*

## GROWING PROTECTION

*12-position height-adjustable headrest – excellent protection up to the age of 4 years*

## INTEGRATED L.S.P. SYSTEM

*Extendable on side facing the car door*

## EASY ENTRANCE AND EXIT

*Harness clips make moving your child in and out of the seat simple*

## ONE-HAND RECLINE AND ROTATION FUNCTION

*Easy adjustment for parents (5 positions rear-facing and 3 positions forward facing)*

## DRIVING DIRECTION CONTROL (D.D.C.)

*Prevents misuse in turning forward-facing before the child is at least 15 months old and 76 cm tall*

## REAR-FACING

*Birth – 105 cm (up to 18 kg, approx. 4 years) optional forward facing (starting from min. 76 cm and 16 months)*

## UN R129 (i-SIZE)

The CYBEX Sirona S i-Size complies with the 'i-Size' European requirements and regulations for car seats. The R129 regulation states that children aged 15 months and under must travel in a rear-facing car seat.

At CYBEX we recommend prolonging the time that children travel in a rear-facing position in the Sirona S i-Size until they are around 105 cm in height (approx. 4 years). The Sirona S i-Size can also be used in cars which do not comply with i-Size. Please see the compatibility list on the CYBEX website.

### 360° ROTATION MECHANISM

The innovative 360° rotating mechanism of the Sirona S i-Size makes switching between rear and forward-facing position easy. In addition, it provides a comfortable entry and exit position for less strain on parents' backs. The Driving Direction Control (D.D.C.) prevents forward-facing use before the child is at least 16 months old and 76 cm tall.

---

### INTEGRATED L.S.P. SYSTEM

The integrated L.S.P. System of the Sirona S i-Size offers increased safety in the event of a side-impact collision.

### HEIGHT-ADJUSTABLE HEADREST

The adjustable headrest of the Sirona S i-Size offers 12 positions for customized adjustment as your child grows.

### ONE-HAND RECLINE AND ROTATION FUNCTION

The smart one-hand recline and rotation function makes it easy for parents to adjust the seat.

## WHY JUNO M-FIX?

---

### ADJUSTABLE IMPACT SHIELD

The impact shield (patent pending) works similarly to an airbag, significantly reducing the force of impact by distributing it evenly over energy-absorbing materials. Your child's sensitive neck, head and chest area are also well protected thanks to the adjustable impact shield. It adjusts using one hand to fit your child's body and offers more freedom of movement for the upper body compared to conventional impact shield car seats.

---

INSTALLATION VIDEO ON OUR WEBSITE

---

## RECLINING BACKREST

Thanks to the recline function, the car seat can be better adjusted to the vehicle seat.

## ISOFIX CONNECT

Provides added stability and safety and can also be used in vehicles without ISOFIX.

---

## AIR CIRCULATION SYSTEM

The integrated air circulation system helps regulating your child's body temperature, even on hot days.

## HEIGHT-ADJUSTABLE HEADREST

The height-adjustable headrest of the seat grows with your child for a more perfect fit and increased safety throughout the whole period of use.

## L.S.P. SYSTEM

In case of an accident, the force of a side-impact collision is systematically absorbed and the child's head is actively guided into a safe position.

NEW

PALLAS S-FIX

# PALLAS S-FIX

*9 – 36 kg (approx. 9 months – 12 years) UN R44/04*

Nothing fits! Too small!! Common phrases during the first years of your child's life. The Pallas S-Fix car seat will be the perfect fit for years: as a 2-in-1 seat, it is designed to grow with your child from 9 months to 12 years. The optimised impact shield reduces the risk of serious neck injuries without confining the child. When it's time for a nap, the patented, reclining headrest prevents the child's head from tipping forward. It supports the head to remain in the safety zone of the headrest at all times, which is especially important in the event of a side-impact collision. Together with the headrest, the L.S.P. System offers increased safety by reducing the forces of a side-impact collision.

# WHY PALLAS S-FIX?

**PATENTED RECLINING HEADREST**  
*Can prevent the child's head from falling forwards while asleep*

**INTEGRATED L.S.P. SYSTEM**  
*Extendable on side facing the car door*

**2-IN-1 SEAT**  
*Can be easily converted into the Solution S-Fix*

**ADJUSTABLE IMPACT SHIELD**  
*Adjustable with one hand (Group 1)*

**VENTILATION SYSTEM**  
*Provides a comfortable seat temperature for your child, even on hot days*

**ISOFIX CONNECT**  
*For extra stability and safety. Can also be used in vehicles without ISOFIX*

**COMFORTABLE, ONE-HAND RECLINE FUNCTION**  
*Can be easily adjusted to a sleeping position with just one hand (Group 1)*

## ADJUSTABLE IMPACT SHIELD

The adjustable impact shield of the Pallas S-Fix reduces the risk of serious neck injuries without confining the child and has an excellent overall crash performance. The one-hand adjustment of the impact shield ensures ease of use for the parent.

### RECLINING HEADREST

The patented reclining headrest prevents the child's head from tipping forward while sleeping. It ensures that the child's head remains in the safety zone at all times, which is especially important in the event of a side-impact collision.

### L.S.P. SYSTEM

The L.S.P. System of the Pallas S-Fix offers increased safety during a side-impact collision. It reduces the forces of an impact in the event of a side-impact collision by approximately 25% when compared to the same car seat without L.S.P. extended.

---

### ONE-HAND RECLINE FUNCTION

The smart one-hand recline function makes it easy for parents to adjust the Pallas S-Fix to a sleeping position while keeping one hand free (Group 1).

### 2-IN-1 SEAT

The Pallas S-Fix is a 2-in-1 seat, adjusting to the growth of your child and can be used from 9 months up to 12 years.

PALLAS M-FIX

# PALLAS M-FIX

## TEST WINNER GROUP 1/2/3

*9–36 kg (approx. 9 months – 12 years) UN R44/04*

The 2-in-1 seat was the test winner in Group 1/2/3 of the 06/2015 tests conducted by German Stiftung Warentest. The Pallas M-Fix grows with your child and therefore offers excellent safety up to 11 years. In Group 1, Pallas M-Fix and its adjustable impact shield protects against neck injuries without being restrictive. For children from 15 kg (approx. 3 years and above) the seat can be easily converted into a Solution M-Fix and it can also be used in cars without ISOFIX thanks to the flexible connectors.

### AWARDS

# PALLAS M

*9–36 kg (approx. 9 months–12 years) UN R44/04*

Pallas M offers optimised safety and comfort with a lifespan of up to 11 years. The 2-in-1 seat can be used in a vehicle with a 3-point harness belt. As a Group 1 seat, the Pallas M features an adjustable impact shield. In case of a frontal collision, the force of the impact is distributed across the entire surface of the impact shield, similar to an inflated airbag. As a Group 2/3 seat, the Pallas M can be easily converted into a Solution M once the child reaches 15 kg (approx. 3 years).

# WHY PALLAS M/PALLAS M-FIX?

**PATENTED RECLINING HEADREST**  
*Can prevent the child's head from falling forwards while asleep*

**INDIVIDUALLY-ADJUSTABLE LINEAR  
SIDE-IMPACT PROTECTION**  
*L.S.P. System*

**2-IN-1 SEAT**  
*Can be converted into the Solution M  
or Solution M-Fix*

**ADJUSTABLE IMPACT SHIELD**  
*Adjustable with one hand (Group 1)*

**ISOFIX CONNECT (ONLY PALLAS M-FIX)**  
*For extra stability and safety. Can also be  
used in vehicles without ISOFIX*

**COMFORTABLE, ONE-HAND  
RECLINE FUNCTION**  
*Can be easily adjusted to a sleeping  
position with just one hand (Group 1)*

## 2-IN-1 SEAT

For children starting from 15 kg (approx. 3 years) the Pallas M (-Fix) can be easily converted into a Group 2/3 seat Solution M (-Fix) in just a few simple steps. The Pallas M series grows with the child and provides optimal safety and a lifespan of up to 11 years.

INSTALLATION VIDEO ON OUR WEBSITE

## PATENTED RECLINING HEADREST

The CYBEX patented 3-position reclining headrest shifts the balance point of the child's head slightly back and helps prevent the head from falling forwards when the child is asleep. In case of a side-impact collision, the child's head remains within the safety zone of the seat, ensuring maximised protection.

### COMFORTABLE RECLINE FUNCTION

Due to a comfortable recline function, the seat can be easily adjusted with just one hand for a relaxed journey (Group 1).

### SECURE WITH IMPACT SHIELD

Similar to an inflated airbag, the forces of a collision are distributed across the entire surface of the impact shield, protecting the child's sensitive head, neck and shoulder areas. The adjustable impact shield offers comfort without confinement (patent pending) and an optimised belt routing increases safety and makes installation easier.

### L.S.P. SYSTEM

The force of a side-impact collision is systematically reduced by individually-adjustable side protectors, as well as by the shoulder and head protectors. At the same time, the body's kinetic energy caused by the impact is absorbed right away and the head is actively guided into a safe position.

SOLUTION S-FIX

# SOLUTION S-FIX

*15 – 36 kg (approx. 3 – 12 years) UN R44/04*

Made with your child in mind: The Solution S-Fix grows with your child from 3 to 12 years, adapting to changing needs just like parents do. The reclining headrest prevents the child's head from tipping forward while sleeping, keeping it in the safety zone at all times. This is especially important in the event of a side-impact collision, where the headrest and the L.S.P. System offer increased safety for your child. 12 positions for height adjustment ensure your growing child will travel comfortably at all times. The smart one-hand operation makes adjustments quick and easy for parents on the go.

---

## RECLINING HEADREST

The optimised reclining headrest prevents the child's head from tipping forward while sleeping. It ensures that the child's head remains in the safety zone at all times, which is especially important in the event of a side-impact collision.

---

### L.S.P. SYSTEM

The L.S.P. System of the Solution S-Fix offers increased safety during a side-impact collision. The L.S.P. System reduces the forces of an impact in the event of a side-impact collision by approximately 25% when compared to the same car seat without L.S.P. extended.

### HEIGHT ADJUSTMENT

The 12-position height adjustment allows the seat to grow with the child and offers extremely long usability. The head protectors grow with the personal space requirements of the child.

### VENTILATION SYSTEM

The integrated ventilation system of the Solution S-Fix provides a comfortable seat temperature for your child even on hot days.

### RECLINING BACKREST

The reclining backrest of the Solution S-Fix perfectly adjusts to any vehicle seat.

### ENERGY-ABSORBING

The energy-absorbing shell of the Solution S-Fix absorbs the forces of an impact and protectively covers the child.

LEMO BOUNCER**

144 **ACCESSORIES**

Broadening our product portfolio once again, CYBEX has developed a range of furniture, inspired by clean and minimalist lines. The desire was to create a sustainable furniture concept that fits the urban spaces of design-conscious parents while meeting the needs of babies and children. The first collection of its kind sees a highchair and bouncer that blend into the modern home and combine to create stylish, yet age-appropriate seating solutions. The 6-in-1 CYBEX LEMO concept was designed to find a

place at the table long after your child has outgrown the need for its support. Simply attach the LEMO Bouncer and make your LEMO Chair suitable from birth, add your Baby Set and let your toddler from 6 months sit with you at the table or remove the baby set from approx. 3 years and adjust the height, depth and footrest of your highchair to your child. From approx. 5 years, remove the footrest and use your LEMO Chair for the whole family. The CYBEX furniture concept makes your life more convenient!

# THE CYBEX LEMO CONCEPT

# DESIGN FOR LIFE

CYBEX LEMO Concept is a complete seating solution for life designed to match your lifestyle. Depending on your child's age, use the matching attachments to help your little one feel comfortable. Having guests and have a chair short? No problem!

Thanks to the intuitive and smooth one-hand adjustment system, you can easily switch the height and depth of your LEMO Chair from baby to adult within seconds. A perfect solution from birth (with the LEMO Bouncer) up to approx. 99 years.

LEMO CHAIR WOOD

# LEMO CHAIR WOOD

*From birth (with Bouncer), from 6 months approx. 9 kg (with Baby Set),  
from 3 years to approx. 99 years (approx. 95 kg)*

The 4-in-1 LEMO Chair Wood is a chair for life. The LEMO Bouncer nest makes it suitable from birth, at 6 months the LEMO Baby Set turns it into a classic highchair and when your child is ready for a chair without attachments, it meets the lifestyle and functional needs of the whole family. Growing child, changing needs, ergonomic seating: a smart, one-hand adjustment feature offers four depth positions and an individual, quick height adjustment of the seat. For fast assembly the LEMO Chair Wood requires just four screws so set up is child's play. The timeless design, crafted from ash wood will create a long lasting impression.

LEMO CHAIR

# LEMO CHAIR

*From birth (with Bouncer), from 6 months approx. 9 kg (with Baby Set),  
from 3 years to approx. 99 years (approx. 95 kg)*

A chair for life. The CYBEX 4-in-1 LEMO Chair offers a sustainable choice that grows with your child. Simply use the matching attachments for your child's age and the LEMO Chair can be used from birth up to approx. 99 years. The chair adapts with your growing child and their changing needs whilst providing ergonomic seating throughout. A smart one-hand adjustment feature allows the choice of four depth positions and an individual, quick height adjustment of the seat. Dining room? Patio? Kitchen? The wheels decrease the risk of the high-chair tipping over and increase your mobility around the house.

LEMO BOUNCER

# LEMO BOUNCER

*With harness: from birth up to 6 month; approx. 9 kg*  
*without harness: from 6 months up to 3 years/approx. 15 kg*

With the CYBEX LEMO Bouncer, your baby has a seat at the table from day one. This innovative 3-in-1 bouncer was designed for use from birth as a stand-alone bouncer with and without a harness or attached to the LEMO Chairs, meaning that parents can keep eye contact and effortlessly bring their baby to the table. From 6 months up to 3 years the LEMO Bouncer can be used without the harness system and is the perfect place for babies to bounce. The comfortable bouncer was designed for natural self-bouncing of the baby, perfect for relaxing, going to sleep and for fun when the baby is ready to play.

# WHY LEMO BOUNCER?

## 3-IN-1 BOUNCER

This innovative 3-in-1 LEMO bouncer was designed to be used from birth up to 6 months as a stand-alone bouncer or attached to the highchair, meaning that parents can keep eye contact and effortlessly bring their baby to the table for the perfect feeding position. From 6 months up to 3 years the bouncer can be used without a harness system and is the perfect place for babies to bounce.

---

## ACCESSORIES

(p. 144)

### ADJUSTABLE BACKREST

The adjustable backrest of the bouncer offers a sleeping and a feeding position, ensuring your baby is comfortable whilst sleeping or awake.

### ADJUSTABLE HARNESS

The adjustable harness ensures the baby's safety in the bouncer from day one. It can be removed from approx. 6 months once your baby is able to sit.

### SELF-BOUNCING

The comfortable bouncer was designed for natural self-bouncing of the baby, perfect for relaxing, going to sleep and for fun when the baby is ready to play. Silicone foot caps prevent from tipping over.

### BREATHABLE MESH

For summer days, detach the fabric cover of the bouncer to reveal a 3D mesh that will keep your child cool and continues to support ergonomic posture.
