\* NIBE recommend the use of an additional buffer volume/tank for this combination, e.g. NIBE UKV.

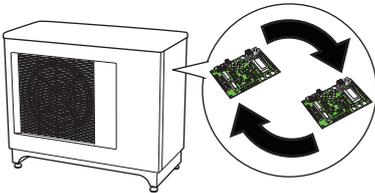

\*\*S2125-16 together with VVM S320 / VVM S325 – The flow and pressure settings from the VVM are limited. Ensure that the minimum flow for defrosting and heating can be achieved.

### Before 2019

In some air/water heat pumps, manufactured before or in 2019, it is required that circuit boards be updated to be compatible with S-series products.
