Power-Fast II.
The chipboard screw
for fast and flexible
applications.

The chipboard screw for fast and flexible applications.

The three ribs on the tip, ensure a quick bite and pre-drilling.
For a **fast bite** and **reduced splitting**.

The special underhead geometry with optimized double cone and milling pockets ensure less cracking in timber and less damage to metal components.
For **better finished surfaces**.

The increased thread pitch significantly reduces the installation time. For **fast assembly**.

The shank-miller in combination with the core-miller geometry is designed to reduce the installation torque.
This means that more screws can be installed with the **same battery** and **less effort**.

The innovative core-miller geometry enables precise milling and perfect swarf removal. This makes **small edge** and **spacing distances** possible.

The new Power-Fast II with its unique screw geometry combines the highest **technical know-how** with **excellent design**.

Drive: Available as TX-Star recess or cross drive PZ.

reddot winner 2020
innovative product

Outstanding: Winner of the German Design Award 2020 and the Red Dot Award 2020.

Countersunk head

Raised countersunk head

Pan head

Convincing in application.

Advantages at a glance

- The screw geometry of the new Power-Fast II enables fast applications. Installation is easy, comfortable and flexible.
- The chipboard screw has significantly reduced splitting behavior in comparison with standard chipboard screws.
- The Power-Fast II with high performance wax coating reduces screw-in torque and allows smooth installation.
- The blue passivated zinc plating does not contain chrome VI and is therefore environmentally friendly.
- The new recess sizes reduce the number of bit changes in the range from D3-D6 to only 2 changes (D3,0 -> D3,5 & D5,0 -> D6,0).

2699	
For fastenings in timber constructions or of thermal insulation on rafters	

Versatile in use.

Applications in plug

The perfect plug-screw combination

- The new Power-Fast II is suitable for use with fischer plugs (E.g. DUOPOWER and UX) and recommended loads.
- This offers flexible application in the plug with high load-bearing capacities.
- No special screws are required.
- Safe and secure with fischer plugs.

Applications wood in wood

Powerful connections in nearly all kind of timber

- The new screw geometry provides the perfect solution, no matter if hard or soft wood.
- For use in load-bearing wooden constructions, for the connection of solid wood parts (soft wood and hard wood) as well as glued laminated timber, cross laminated timber, veneer laminated timber, similar glued wood components and wood-based panels.

Applications metal on wood

Fixation of metal without damage

- For metal parts to wood, e.g. metal fittings, angles, beam shoes and other metal and wood connections.
- The ideal solution for a clean surface finish without damage.

Our 360° service to you.

From software solutions, to training, to personal consulting. As a reliable partner, we are always happy to assist you with words and deeds.

Your advantages:

- Our products range from chemical resin systems to steel anchors through to nylon anchors.
- Competence and innovation through own research, development and production.
- Global presence and active sales service in over 100 countries.
- Qualified technical consulting for economical and compliant fastening solutions. Also on-site at the construction site if requested.
- Training sessions, some with accreditation, at your premises or at the fischer academy.
- Design and construction software for demanding applications.

Design Software fischer FIXPERIENCE.

The fischer design Software FIXPERIENCE gives you safe and reliable support in measuring your projects whether you are a planer, structural engineer or craftsman. Measuring has never been so simple!

Software and modules for your daily work.

- The modular design program includes engineering software and application modules.
- The software is based on international design standards (ETAG 001, EC1, EC2, EC3 and EC5), including the national application documents. All common force and measurement units are available.
- Incorrect input will be recognized and the software gives tips to get a correct result. This ensures a safe and reliable design every time.
- The graphical display can easily be rotated through 360°, panned, tilted or zoomed as required.
- The 3D display gives a detailed and realistic image.
- The "live update" feature helps to keep the program up to date ensuring you are always working with the latest version.
- Free download and updates at: www.fischer.de/fixperience-en
