

Ambiance™ Cloud

Hotel Access Management Software

The key to efficient hospitality

Easy just got easier

From the leader in hospitality access and security solutions, Ambiance Cloud is the latest technology from dormakaba that delivers a fully connected digital access solution – anywhere, anytime.

Ambiance by dormakaba is already a proven, access management software for the hospitality industry. Designed to be user-friendly, Ambiance connects front desks, room locks, perimeter security and much more with ease.

Ambiance Cloud allows you to manage multiple properties and processes from any location. No matter the task, from staff scheduling to lock auditing to issuing guest keys, Ambiance Cloud is the key to efficient hospitality.

TJANA
TRAINEE

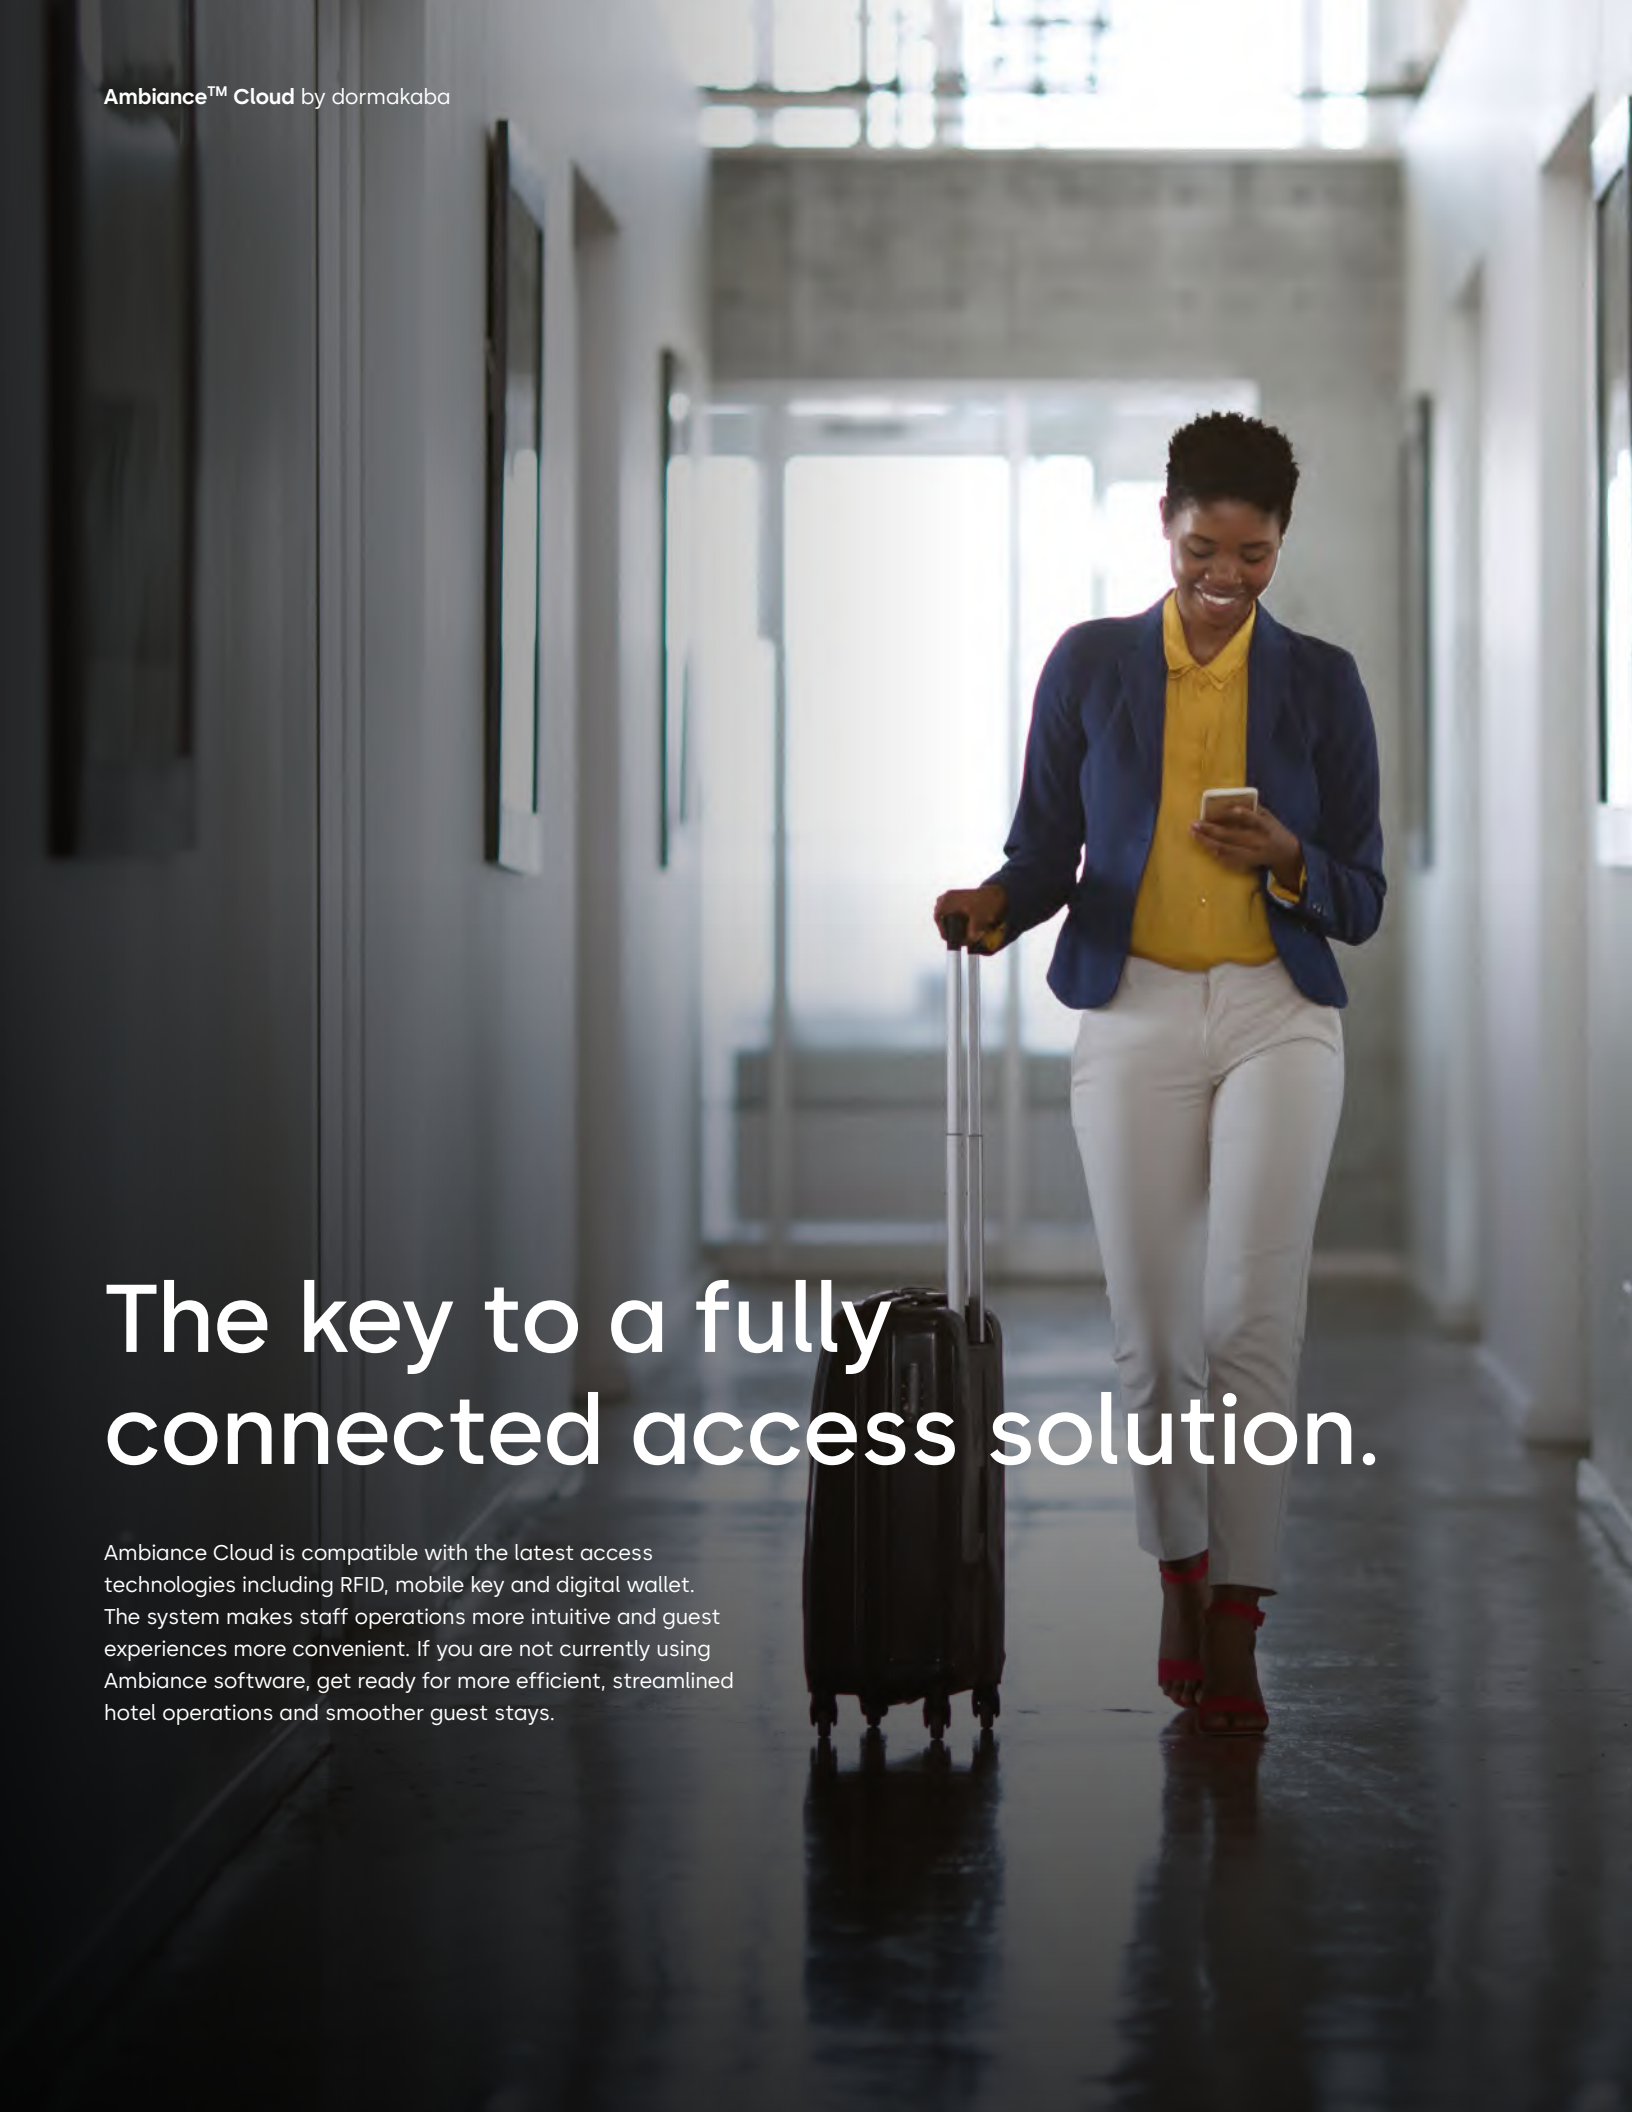

The product you know. The ease you deserve.

With Ambiance Cloud, open new doors to the Ambiance experience. This next level of Ambiance Access Management Software delivers a fully connected digital solution for your properties and staff with 24/7 control. Ambiance Cloud removes the need for a physical server at each of your hotel locations and provides system access from anywhere.

For hotel owners using Ambiance on-prem, the migration to Ambiance Cloud is easy. The consistent look and feel of the software makes the transition smooth for management and staff.

- Manage your properties from anywhere
- Round-the-clock monitoring and system availability
- Automatic system updates, backups and maintenance
- No need to maintain local servers
- Uses industry-leading Amazon Web Services for cloud services

A woman with short dark hair, wearing a blue blazer over a yellow top and white trousers, is walking down a modern, brightly lit hallway. She is smiling and looking at her smartphone in her left hand, while her right hand is on the handle of a black rolling suitcase. The hallway has large windows on the right side, and the floor is highly reflective, showing her and the suitcase. The overall atmosphere is professional and convenient.

The key to a fully connected access solution.

Ambiance Cloud is compatible with the latest access technologies including RFID, mobile key and digital wallet. The system makes staff operations more intuitive and guest experiences more convenient. If you are not currently using Ambiance software, get ready for more efficient, streamlined hotel operations and smoother guest stays.

Streamlined hospitality

Door-to-door

Property-to-property

There has never been a better time to switch to dormakaba's Ambiance Cloud access management solution. The system has always simplified hospitality management and takes ease of operation to the next level. Ambiance Cloud provides a flexible solution that delivers increased value and connectivity.

Connectivity

Ambiance Cloud is accessible from anywhere. You can manage staff access, run reports, change door latch/unlatch schedules and remotely advise your staff of these changes with on-screen notifications without being on premises.

User experience

We know your time is valuable. Even the newest Ambiance Cloud users can quickly and intuitively create guest or staff keycards by following the on-screen guided workflows.

Scalability

Ambiance Cloud can adapt based on your property requirements. From a handful of rooms to thousands, in a single or multi-build configuration, you are in complete control. You can even easily change guest and meeting room configurations. Ambiance Cloud software will interface with third-party PMS systems and support point-of-sale parking gate systems and more.

Value

Today's hotel technology landscape is changing. Owners and IT managers are looking for long-term worth and return on their technology investment. Ambiance Cloud allows you to tailor features to fit your needs and pay only for the modules you use. Add additional options like mobile access and remote lock management when you are ready to upgrade.

System highlights

Staff access management

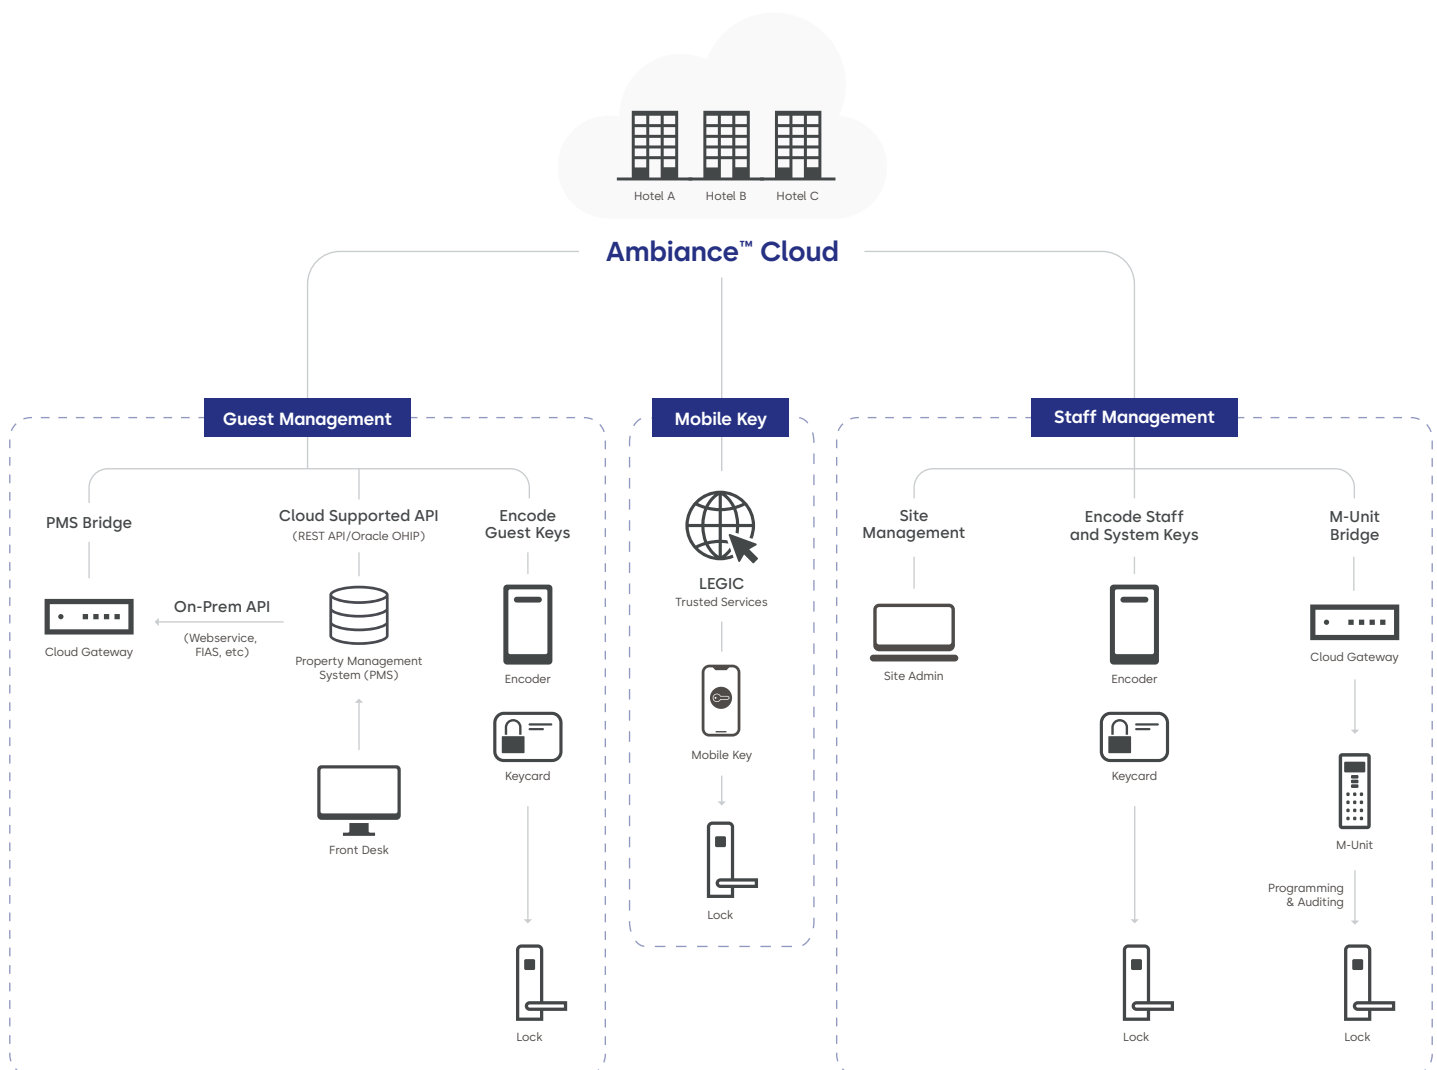

Control access to all property points using a combination of staff profiles, access point group definitions, access point scheduling, and credential management. Use dormakaba's maintenance unit for lock programming and auditing along with advanced diagnostics for troubleshooting.

Smart credential management

Ambiance Cloud is compatible with the latest access credential technology for enhanced security, including RFID, mobile key, and digital wallet.

Guest access management

Front desk agents are guided through the guest registration process with intuitive workflows. Guest keys can be created directly from Ambiance Cloud or through your property management system (PMS), whether it is cloud supported or on-prem. Our PMS Bridge provides connectivity between the on-prem PMS and Ambiance Cloud. Supported interfaces include FIAS and Ambiance SOAP API.

Ambiance Cloud Requirements

This section lists minimum system, network, device and interface requirements for using Ambiance Cloud.

Workstation Requirements	
	Workstation
CPU	2 GHz/ 64-bit / dual core
RAM	8 GB
Disk Drive Free Space	50 MB
Network Controller	Gigabit Ethernet - 1Gb/ second
Operating System	- Microsoft Windows 10 Pro/Enterprise - Microsoft Windows 11 Pro/Enterprise¹
Web Browser ²	- Google Chrome (latest) - Microsoft Edge (latest)
Network Requirements	
The Property IT is responsible for establishing and maintaining a secure network (Ethernet or WiFi) environment on which the workstations and integrated interfaces are deployed and used. Refer to the latest Ambiance Cloud version release notes for supported firmware versions and any other system or device pre-requisites.	
RFID Access Media	
Supports MIFARE Ultralight® C, MIFARE Ultralight® AES, MIFARE Plus® EV2, and MIFARE® DESFire® EV3.	
Recommended with Enhanced Security in Ambiance as of version 2.10. Dependent on lock type and firmware version.	
Available as RFID cards, fobs, and wristbands.	
Encoder	
Ambiance Cloud supports the dormakaba RFID Encoder II (part 75720) which is required when Enhanced Security Mode is enabled.	
Maintenance Unit	
Ambiance Cloud supports the M-Unit SAFLOK HH6 NFC which is required when Enhanced Security Mode is enabled.	
Cloud Gateway	
dormakaba provides the network device required for all Ambiance Cloud deployments. The network device is used to facilitate programming and auditing access points using the dormakaba Maintenance Unit.	
Locks	
Ambiance Cloud works with dormakaba's suite of modular and full body hospitality locks including Quantum Pixel+, Quantum Pixel, Quantum RFID, QuantumIV, MT RFID, RT Plus, Confidant, Saffire LX and SR-3. Verify the date code and firmware version for enhanced, standard or legacy security.	
Supported Elevator Controllers	
Use with enhanced, standard, and legacy security: ECU/RCU4 and RAC5-MFC.	
Use with standard and legacy security: EMCC, Legacy MFC and MCC 8/12.	

¹TPM (Trusted Platform Module) 2.0 is required to run Windows 11.

²Recommended Web browser resolution: 1366 x 768 or greater.

Experience access management reimagined with Ambiance Cloud.

When you choose dormakaba, you're choosing a partner with over 160 years of experience and millions of installed products and solutions worldwide. You will be supported by a global network of fully trained, specialist technicians.
