

Future ready data center security solutions

Smarter solutions from street to rack

Securing every layer of infrastructure

4.4M

The global average cost of data break, in USD, a 9% decrease over last year, driven by faster identification and containment

90%

of companies face at least one physical security incident at data centers annually

47%

increase in physical security breach attempts in data centers in 2024

dormakaba delivers end-to-end physical security for next-gen data centers – from perimeter to rack. With rack-level authentication rack locks, mantraps, biometrics, automatic doors and integrated access control, we stop insider threats and tailgating. Seamless IT integration ensures fast deployment and strict audit compliance, enabling resilient, compliant, and secure operations backed by proven critical infrastructure expertise.

Perimeter Security

Boundaries, parking & EV charging.

Building Entry

Access, visitor flow & contractors.

Logistics Management

Deliveries & restricted zones.

Support & Utility Area

Restricted access for Power & Cooling.

Data Hall & Cabinets

Access control, biometrics & Mantraps.

Rack-Level Protection

Smart Locks with mechanical override.

Carrier Interconnection

High Security for Meet-Me-Rooms (MMR).

Security Operations Center

Monitoring, analytics & compliance.

Flagship solutions

Personal Interlock/ Mantrap

Prevents tailgating, allowing only authorized entry to sensitive zones.

Argus Sensor Barrier

Sensor-controlled, single-person passage at secure entrances and interconnection points.

Rack Lock

Smart, PoE-enabled rack locks with biometric/RFID/2FA and audit tracking.

MATRIX Professional

Scalable, centralized access management with biometrics, predefined rack access, and seamless integration.
