Media release

dormakaba previews new EasyAssist low energy operator for barrier-free access

INDIANAPOLIS, March 17, 2025 – dormakaba's upcoming EasyAssist™ low energy swing door operator makes entrances more accessible, convenient, and hygienic – with lower costs and time savings from planning to installation. dormakaba will preview EasyAssist at booth #20007 during the International Security Conference and Exposition (ISC) West 2025 in Las Vegas (March 31 - April 4).

Thanks to its sleek, compact design, EasyAssist can be used in offices, medical practice buildings, hotels, retail stores, schools, and apartment buildings. The new EasyAssist low energy operator is easy to plan, install, and operate, reliably ensures accessibility and safety, and is environmentally friendly. With its four different operating modes and additional functions, opening doors becomes considerably easier.

"Our new EasyAssist low energy swing door operator, coming soon, perfectly demonstrates how entrances can be made more barrier-free, comfortable, and aesthetically pleasing at great value," said Bret Holbrook, Senior Vice President of Access Hardware Solutions (AHS) and Access Control Solutions (ACS) Channel Sales for dormakaba North America. "Whether you want to easily automate or add accessibility to an interior door, EasyAssist makes life easier."

When EasyAssist is in automatic mode, the door opens automatically using a switch such as a push or wave plate. The Push-N-Go feature requires slight manual door movement, while Power Assist supports manual opening and Power Close ensures safe and silent closing of the door.

Both standard doors and fire doors can be equipped with EasyAssist. Installation, commissioning, and configuration are simplified to save time and effort. With EasyAssist, all mounting positions are possible and can retrofit a standard mechanical door closer for consistent aesthetics through a facility. Additionally, EasyAssist's SmartArm with integrated cabling allows for door leaf mounting without exposed wiring, enhancing security by deterring cable tampering and damage.

Equipped with an Environmental Product Declaration (EPD) and Health Product Declaration (HPD), EasyAssist's environmental and health-related properties are presented transparently to enable architects, planners, and builders to make informed decisions for sustainable construction projects.
