

Working student 40%: Technology & Innovation Insurtech

Work start: as soon as possible;

About the company

TONI is an insurtech startup, that offers a fully digital insurance offering as a white-label solution. Our slogan “Make insurance simple” underlines our approach to focus on today’s customer requirements by offering a fully digitized and automated insurance solution. Our white-label approach allows us to leverage the brand of large established institutions and to quickly gain access to a large amount of private clients as well as to be able to offer insurance solutions inside unique eco-systems. TONI is based at Bellevue in Zurich.

About the role

We are looking for a vibrant team-player with a strong interest in and understanding of technology and IT. You will help us establish innovative, customer-oriented and highly automated processes and have the ability to work hands-on on various technology projects.

You will be working directly in the Technology & Innovation department and will hence directly be exposed to the management of a large IT project in a leading Swiss insurtech. Further, you are given the opportunity to prove and expand your analytic & technical prowess, as well as the opportunity to have a direct impact on defining our insurance product and have a market impact. Furthermore, you are also given the opportunity to do various coding assignments.

You should apply if you:

- Are excited to work in a leading Swiss insurtech and want to have a real impact in changing the way the insurance market works
- Are excited to help TONI to become leader in process-automation (thus achieving cost leadership) on basis of innovative technical processes
- Have a strong interest in technology
- Enjoy tackling complex problems and conceive “simple” approaches to solve them (e.g. technology processes, automated decisions), so that we can keep our product simple
- Are a highly motivated person that is willing to put in the extra mile to get the best result

The following experience is valued:

- Strong analytic thinking
- Ability to manage complexity
- Strong technical / IT understanding
- Coding experience (e.g. Python / Matlab)
- You have high attention to detail and won’t compromise on precise and thought-through processes to solve problems in a simple and effective manner
- Ability to work within tight deadlines, adjust to changes in priorities
- Comfortable in a fast moving, fluid environment.

Application / Contact

We are looking forward to getting to know you! Please send your application including CV to Alexander Sanders (sanders@toni-dis.ch).
