

MINI-DUMPERS 400 / 2300 KG

CARRY105
CARRY107
CARRY107ht
CARRY108hf
CARRY110
CARRY150
CARRY230

AGILITY AND VERSATILITY

The new Carry 105 mini-dumper is a highly agile and versatile machine, designed to handle materials in warehouses and greenhouses and especially suitable for use in nurseries and agriculture.

ENGINE

The Carry 105 mini-dumper has a Honda $4.7\ kW$ rpm petrol engine with pull-cord starter.

SAFETY AND STANDARDS

The engine is a low noise version which meets established noise pollution standards. The engine is mounted on vibration dampers to significantly reduce the amount of vibration transmitted.

LIMITED WEIGHT

The Carry 105 is smallest mini-dumper in the range. Designed to satisfy all worksite requirements.

FULL ACCESSIBILITY

The amount of oil in the machine's hydraulic circuit is such to allow long intervals between servicing. All parts requiring inspection and servicing are easily accessible.

A SMALL, VERSATILE MACHINE

The Carry 105 can be equipped with a wide range of accessories to meet a various requirements: skip for construction, self-loading shovel, bed with opening sides. Replacing the equipment is quick and easy. The self-loading bucket kit is removable.

STCS TRACK TENSIONING

The innovative STCS (Self Tension Crawler System) track system ensures the rubber tracks are always perfectly tensioned, easily adjusted via a bolt on the lower carriage.

PARKING BRAKE

The manual parking brake prevents the drive from running by mechanically locking the LH wheel.

TRAVELLING SPEED

The 690 mm undercarriage with large-size sprocket and 3 rollers on either side means that the Carry 105 is perfectly at home on all kinds of terrain, including steep gradients. The travel speed of 0-2.5 km/h guarantees maximum operating capability and top grade performance. The triple fixed-displacement pump allows simultaneous linear travel and accessory movement.

TECHNICAL FEATURES

Engine	Honda GX200 petrol (4.7 kW / 3600 rpm)
Machine weight with skip	290 kg
Machine weight with skip with shovel	345 kg
Machine weight with bed with opening sides	305 kg
Basic machine weight	240 kg
Operating load	500 kg
Speed	0 / 2.5 km / h
Skip capacity	0.22 m ³
Loading bed (sides closed) dim. LxPxH	900 x 620 x 200 mm
Max allowed slope when empty (guide with operator on the ground, where applicable)	20° - 36% (variable based on the configuration)
Max allowed slope when loaded (guide with operator on the ground, where applicable)	11° - 20% (variable based on the configuration)

FAST, SAFE, TIRELESS

The Carry 107 mini-dumper is the ideal solution to transport and handle various types of materials on the worksite and in difficult to access locations.

ENGINE OPTIONS

The Carry107 is equipped with a Honda 6.3 or 8.7 kW petrol engine with recoil or electric start. There is also the option of a Yanmar 7.4 kW diesel engine, with electric start, for reduced fuel consumption and longer operating periods between refuelling stops. The Carry107 is equipped as standard with a hydraulic power take-off providing a flow rate of 14 litres/min. It can be used to use hydraulic tools and accessories like the concrete mixer kit. The engine is completely protected and enclosed between fixed side panels and a removable front bonnet.

TACKLES ANY SLOPE

Thanks to the large undercarriage, the large driving sprocket and 4 track rollers per side, the Carry107 is completely at ease on any terrain, including tough slopes, steps and ramps. Two travel speeds ensure maximum operating efficiency even on very large sites.

SAFETY AND STANDARDS

All the engines have reduced noise emissions. The engine is mounted on vibration dampers to significantly reduce the amount of vibrations transmitted. Integral bonnet panels prevent accidental contact with hot engine parts.

DESIGNED WITH THE OPERATOR IN MIND

The steering handle is mounted on dampers to reduce the vibration transmitted to the arms and upper body, ensuring total operator comfort. Even the structure of the spring-damping footplate prevents vibrations from being transmitted to the body. The footplate conveniently folds out of the way when the machine is operated from the ground to prevent accidental contact with the operator's legs. When the machine is driven with the operator on board, the footplate is automatically locked in the open position to protect it from being closed accidentally.

OPERATOR COMFORT

The reduced noise level enhances operator comfort and makes the machine suitable for use even in urban centres.

HONDA HOUR METER/REV COUNTER KIT

Easily installed, this kit enables the operator to view the engine rpm when the engine is running. When the engine is stopped, the hour meter is displayed.

A VERSATILE MACHINE FOR ALL TYPES OF USE

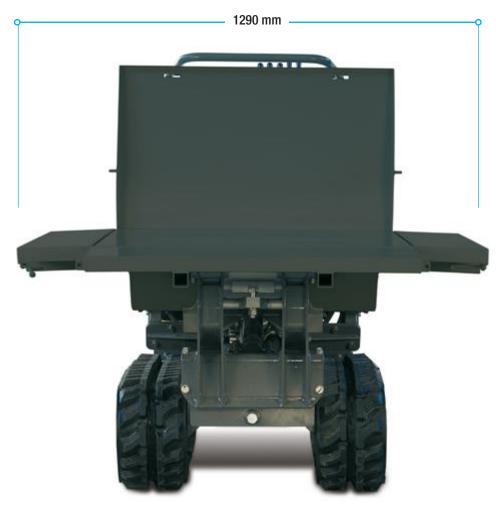

The Carry107 can be equipped with a wide range of accessories to meet various requirements: skip for construction, self-loading shovel, bed with opening sides, concrete mixer kit and levelling blade. The equipment coupling/uncoupling system is guick and simple.

OPENING SIDES

The version with a bed has a surface of 1240 x 1290 mm

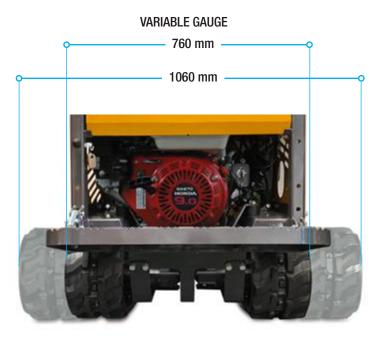

SIMPLE, INTUITIVE CONTROLS

The control console is simple and intuitive. The control lever protection bar is a convenient armrest for the operator, while the control levers are connected directly to the control valve to ensure an accurate, progressive response.

TECHNICAL FEATURES

Honda GX270 petrol (6.3 kW / 3600 rpm)
Honda GX270-AE petrol (6.3 kW / 3600 rpm)
Honda GX390-AE petrol (8.7 kW / 3600 rpm)
Yanmar L100V6-AE diesel (6.8 kW / 3600 rpm)
495 kg (petrol
560 kg (petrol)
550 kg (petrol)
600 kg (petrol)
510 kg (petrol)
700 kg
2.3 / 3.2 km / h
760 / 1060 mm
0.33 m ³
20° - 36% (variable based on the configuration)
11° - 20% (variable based on the configuration)
250 / 190 L (total / yield)
990 x 790 x 200 / 1240 x 1290 mm (closed sides / open sides)
1250 mm / 30° (width / angle)
demolition hammer, hydraulic drill, dirty water pump

CARRY107ht

EVEN MORE VERSATILE

The Carry 107ht is ideal for transporting and handling materials. The "hi-tip" kit helps empty the skip from above where desired, directly onto the lorry and into specific skips. The raised position of the skip makes the machine suitable for work on flat or moderately bumpy surfaces.

VERSATILITY

The Carry 107ht mini-dumper in the standard skip + self-loading shovel version is particularly versatile when used by a single operator, who is able to quickly and effortlessly load and dump material directly onto transport vehicles.

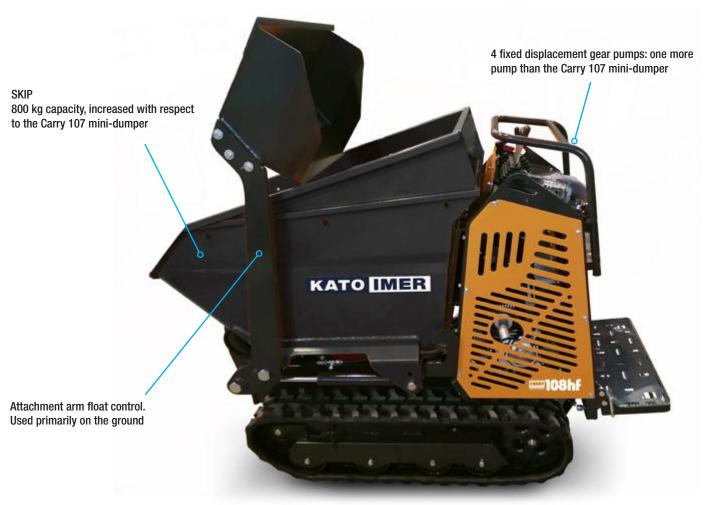

TECHNICAL FEATURES

Engine options	Honda GX270 petrol (6.3 kW / 3600 rpm)
	Honda GX270-AE petrol (6.3 kW / 3600 rpm)
	Honda GX390-AE petrol (8.7 kW / 3600 rpm)
	Yanmar L100V6-AE diesel (6.8 kW / 3600 rpm)
Machine weight with skip	675 kg (petrol)
Machine weight with skip and shovel	740 kg (petrol)
Operating load	700 kg
Speed	2.3 / 3.2 km / h
Standard hydraulic variable gauge	760 / 1060 mm
Skip capacity	0.33 m ³
Max allowed slope when loaded (guide with operator on the ground, where applicable)	7° - 12% (variable based on the configuration)
Applicable tools (Hi-Flow version)	demolition hammer, hydraulic drill, dirty water pump

CARRY108hf

POWERFUL AND FUNCTIONAL

The new Carry 108hf fixed undercarriage model, with skip capacity increased to 800 kg, features 4 fixed displacement gear pumps, with the extra pump increasing travel speed to guarantee the utmost functionality; two auxiliary lines and float control of the attachment holder arm. The powerful "hi-flow" kit features a maximum flow rate of 28 l/min at 150 bar. The hydraulic oil flow makes it possible to fit new attachments such as the mulcher and Snow blowers.

HONDA GX390-AE 8.7 KW PETROL ENGINE

With a generous 800 kg load capacity, the Carry 108hf mini-dumper with self-loading skip is designed to facilitate loading of materials thanks to the self-loading bucket and is available with a Honda GX390 11 HP engine with electric starting and uprated alternator of sufficient size to power the radiator fan.

The engine and hydraulic circuit, with its four fixed displacement gear pumps, allow the use of powerful attachments while also guaranteeing fast operating speeds

The engine is fully protected, enclosed by fixed side panels and a removable front bonnet.

COOLER

The cooler, available also as an optional, is particularly suitable for the use of hydraulic attachments that require an oil cooling stage, thus making it possible to work in extreme temperature conditions.

CONTROL CONSOLE FOR SUPERVISION OF ALL OPERATIONS

The uncluttered, convenient and intuitive control console is located in front of the operator. The levers are protected by a handy grab bar for use by the operator while driving the machine; the levers operate the control valve directly, guaranteeing a response that is always progressive and precise. The control panel also accommodates the connectors for auxiliary line 2. Enhanced operator safety thanks to levers that are easy to reach when driving the machine.

800 KG OPERATING LOAD

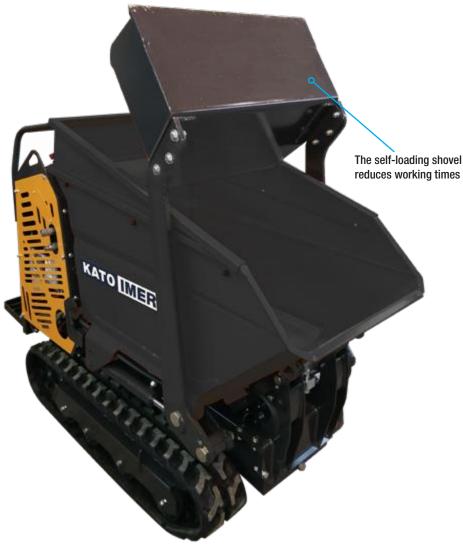

The high capacity skip with increased dimensions facilitates loading of sacks of salt, rocks and tree trunks, a useful feature when working with the mulcher or snow

The skip tipping function can be used only after the accessory has been hydraulically disconnected.

ATTACHMENT ARM FLOAT CONTROL

The arm "FLOAT function", with damped dropping, provides floating action of the arm in order to optimise the use of accessories. Safety is always guaranteed, also when the "FLOAT function" is selected to raise the accessory slowly with the operator on the ground.

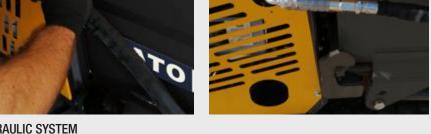

"FLAT FACE" QUICK COUPLING

The Carry108hf mini-dumper can be equipped with attachments that are connected and replaced easily thanks to the use of the universal Multi-Tach system. Maximum visibility of the attachment is guaranteed; the "flat face" quick coupling system is easy to clean and it prevents contamination of the hydraulic system and the environment.

The Carry 108hf is equipped with two auxiliary lines, the first of which is unidirectional with fixed flow rate of 28 I / min with maintained proportional control, the second auxiliary line is bi-directional with fixed flow rate of 28 I / min and dedicated proportional control. High performance and reliability are guaranteed during use of the many accessories.

High performances for even more professional uses

The Carry 108hf mini-dumper is a powerful and compact machine. Thanks to the four pumps and the high oil flow rate, with the possibility of Hi-Flow for the first speed, this being a differentiating factor with respect to model Carry 107, the machine can be equipped with new attachments in the form of a mulcher and snow blowers in addition to the standard accessories already available for the previous model. The equipment coupling/uncoupling system is quick and simple. Use of the float function with the mulcher and snow blowers assures the perfect

result also in the presence of uneven and sloping ground. Use of the accessory is improved by the float control function

with damped dropping.

The accessory can be raised slowly also with the float function enabled.

MULCHER

This accessory is ideal for shredding grass and brushwood of small and medium diameter. Suitable for mowing river banks and road verges, even just for a few metres. The mowing height is adjustable, thus facilitating use of the attachment with several passes, which is especially useful when cutting brushwood with thicker stems. The Carry108hf mini-dumper is thus ideal also for agricultural applications, helping to free the ground from pruning residues and vine shoots.

KATO IMER

SNOW BLOWERS

The snow blowers is designed to remove snow from roads, paths, pavements, forecourts, industrial sites, etc. Removes all types of snow unless it is too heavy (wet) or too icy. The travel speed of the attachment depends on the type and depth of snow.

on the type and depth of snow.

The snow blowers height is adjustable, thus facilitating repeat passes of the attachment, which is extremely useful to clear heaps of ice and snow progressively.

Ideal for removing snow from roads, paths, pavements, forecourts, and industrial sites

TECHNICAL FEATURES

Available engine	Honda GX390-AE petrol (8.7 kW / 3600 rpm)
Machine weight with skip / with self-loading shovel	538 / 603 kg
Machine weight with Mulcher	656 kg
Machine weight with Snow blowers	670 kg
Operating load	800 kg
Speed	2.3 / 4.5 km / h (1st / 2nd)
Width (fixed undercarriage)	760 mm
Skip capacity	0.37 m ³
$\label{thm:maximum} \textbf{Maximum allowed slope when empty} \ \ (\textbf{guided with pedestrian operator, where applicable})$	20° - 36% (variable based on the configuration)
Maximum allowed slope when loaded (guided with pedestrian operator, where applicable)	10° - 18% (variable based on the configuration)
Working width Mulcher	780 mm
Maximum ground pressure Mulcher	210 bar
Working width Snow blowers	900 mm
Maximum ground pressure Snow blowers	210 bar

A WIDE RANGE OF ACCESSORIES

The CARRY 110 is equipped with an independent dual circuit hydrostatic transmission with variable displacement axial piston pump and dual displacement axial piston hydraulic engine for each track. The mechanical negative hydraulic parking brake ensures the machine remains locked even on steep slopes.

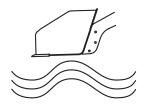

The central oscillating rollers provide a larger support surface and greater comfort compared to the fixed rollers.

YANMAR 14.4 KW ENGINE

The Carry 110 features a Yanmar TNM68 Tier 4 diesel 14.4 kW engine. The diesel fuel filter is equipped with a water separator and a cartridge air filter with clog indicator, which protect the engine from damage or premature wear.

FLOAT CONTROL OF ATTACHMENT ARM AVAILABLE AS AN OPTIONAL

The arm "FLOAT function", with damped dropping, provides floating action of the arm in order to optimise the use of accessories. Safety is always guaranteed, also when the "FLOAT function" is selected to raise the accessory slowly with the operator on the ground.

VERSATILE FOR MANY USES

One of the Carry 110's strengths is its versatility, thanks to the range of accessories it can use such as: the skip for construction, the concrete mixer kit, the levelling blade, the unloading bed with trilateral unloading and bucket multifunction arm, the hammer, the sweeper, and the grass cutter.

IDEAL FOR STEEP SLOPES

Thanks to the length of the tracks and to the 4 roll support on both sides, the machine is able to easily and safely move loads even on impracticable ground at full load up to a maximum slope of 20°.

OPERATOR AND COMFORT

The steering handle is mounted on dampers to reduce the vibration transmitted to the arms and upper body, ensuring total operator comfort. Even the structure of the spring-damping footplate prevents vibrations from being transmitted to the body. The footplate conveniently folds out of the way when the machine is operated from the ground to prevent accidental contact with the operator's legs. When the machine is driven with the operator on board, the footplate is automatically locked in the open position to protect it from being closed accidentally.

USER-FRIENDLY CONTROL CONSOLE

The control console is well placed and easily accessible. All function indicators are protected, however, the operator can see it well from any position. The electrical panel is separated from the dashboard.

SAFETY AND STANDARDS

In compliance with the existing regulations, safety is ensured by an engine with contained emissions mounted on dampers to minimise vibrations transmitted to the supporting frame, and by the engine compartment insulated with panelling to prevent accidental contact with hot or moving surfaces.

SKIP FOR CONSTRUCTION

The ideal solution for transporting and moving bulk materials in general such as demolition rubble, from confined spaces to the point of collection, building materials from the unloading or storage positions to points of use that cannot be reached with other types of vehicles. The operation can be performed also by just one operator.

SNOW BLOWERS

The snow blowers is designed to remove snow from roads, paths, pavements, forecourts, industrial sites, etc. It can remove all types of snow unless it is too heavy (wet) or too icy.

The travel speed of the attachment depends on the type and depth of snow.

The attachment is equipped with a working height adjustment system, consisting of lateral slides (10) in order to allow the minimum ground clearance of the augers. The impeller with rotation speed of approximately 950 rpm discharges the snow, directing it from the chute to the required deposit position.

The chute can be swivelled and it is hydraulically controlled by means of the dedicated lever on the control panel. The machine weight with the snow blowers is 963 kg.

MULCHER

This accessory is ideal for shredding and chopping tall grass, straw, leaves, vine shoots and orchard prunings of small diameter.

The cutting height can be regulated by means of a roller and adjustable front wheels.

This adjustment allows the operator to configure the necessary cutting mode time by time and is extremely useful when copping brush with slightly thicker stems. The machine weight with the mulcher is 949 kg.

CONCRETE MIXER KIT

The accessory is perfect for mixing small batches of concrete for construction and transporting them to the place of use, also and especially on an occasional basis. Excellent for renovation projects calling for small quantities of concrete in various positions, also widely spaced. This attachment is versatile also for loading different materials, even when located in places of storage that are distant from one another. The mixing operation, which can be performed by just one operator, can proceed also during travel, resulting in significant savings in labour and execution times.

Internal dimensions of the unloading bed 1300 x 970 x 350 mm (D x W x H)

EVEN MORE VERSATILE

The version with bed has opening sides and allows the bed to be lifted on 3 sides.

TRILATERAL SKIP

The accessory is suitable for transporting building materials and bulky goods, transporting and unloading materials for consolidation of roads, with the facility for partial unloading in the required positions without needing positioning manoeuvres. This accessory is not suitable for transporting sand or fine compost.

MULTITOOLS ARM KIT

The availability and interchangeability of a large number of accessories make Carry 110 a unique model for all types of construction site work.

ACCESSORIES AVAILABLE Bucket, mulcher, demolition hammer.

DIMENSIONS

Arm with bucket: 1840 x 940 x 1393 mm (D x W x H), unloading height of 1580 mm.

WEIGHT

The multitools arm kit weighs 230 kg.

Carry 110 with multitools arm and bucket (bucket weight 45 kg) is 965 kg - struck capacity 0.09 m³ / heaped capacity 0.1 m³;

Carry 110 with multitools arm kit and mulcher (mulcher weight 88 kg) is 1000 kg; Carry 110 with multitools arm kit and demolition hammer

(hammer weight 100 kg) is 1010 kg.

TECHNICAL FEATURES

Engine	Yanmar 3TNM68 3-cylinder water-cooled diesel (14.4 kW / 3600 rpm)
Machine weight with skip	830 kg
Machine weight with skip and shovel	900 kg
Machine weight with concrete mixer	870 kg
Machine weight with concrete mixer and shovel	968 kg
Machine weight with trilateral skip	930 kg
Machine weight with Mulcher	949 kg
Machine weight with Snow blowers	963 kg
Operating load of skip with shovel, trilateral skip, concrete mixer with shovel	1000 kg
Speed	2.6 / 4.0 km / h
Skip capacity	0.50 m³
$\label{eq:maximum allowed slope when empty} \textit{ (guided with pedestrian operator, where applicable)}$	20° - 36% (variable based on the configuration)
$\label{thm:maximum} \textbf{Maximum allowed slope when loaded} \ \ (\textbf{guided with pedestrian operator, where applicable})$	11° - 20% (variable based on the configuration)
Hydraulic power take-off	auxiliary standard mono/bidirectional
Concrete mixer kit volume	350 / 280 I (total / yield)
Trilateral unloading bed	1300 x 970 x 350 mm
Standard bucket width	940 mm
Bucket capacity	0.1 m^3
Working width Mulcher	780 mm
Working width Snow blowers	900 mm
Maximum ground pressure Mulcher and Snow blowers	210 bar

VERSATILITY FOR EVERY TYPE OF USE

Independent dual circuit hydrostatic transmission with variable displacement axial piston pump and dual displacement axial piston hydraulic engine for each track.

Battery housing under engine bonnet

FRONT TIPPING SKIP WITH (WITHOUT) SELF-LOADING SHOVEL

Loading bucket with automatic opening-closing, easily removable hatch.

The loading shovel, integrated into the bucket, allows the operator to manoeuvre safely; moving it fills the bucket completely.

TRILATERAL BED

Loading bed with hydraulic lifting on the three sides controlled by a single-lever distributor. The elevated front tipping angle allows for ideal unloading even uphill.

Manually move the reference pin to select the type of unloading.

Bed inner dimensions 1500x1000x350 mm

KUBOTA 15.2 KW ENGINE

The engine, abundantly oversized for the machine features, is housed under a large bonnet that can be opened and allows easy and convenient access to all the transmission, engine, and hydraulic system parts for safe, proper maintenance.

SIMPLE, INTUITIVE CONTROLS

Two electrically selectable speeds. Servo-assisted control hydrostatic pumps. Hydrostatic steering with the option of countersteering around the centre of the machine. Negative hydraulic mechanical parking brake.

DESIGNED WITH THE OPERATOR IN MIND

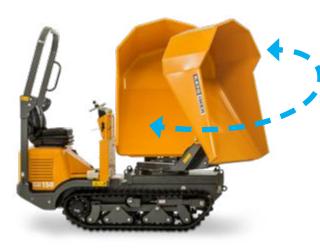

180° SWIVELLING SKIP

Bucket with 180° trilateral unloading with hydraulic lift and swivel. Locking valve on swivel. The rounded shapes are particularly suited to handling inert materials, soil and other resulting materials.

CONCRETE MIXER KIT

Concrete mixer with adjustable rotation speed to optimise the mixture. The barrel is lifted hydraulically for safe, complete unloading. The loading shovel, integrated into the mixing barrel lifting frame, allows it to be filled conveniently and safely.

TECHNICAL FEATURES

CARRY150 180° swivelling skip

Engine	Kubota D902 diesel water-cooled 898 cc 3-cylinder (15.2 kW / 3200 rpm)
Undercarriage weight	860 kg
Operating weight without shovel	1330 kg
Operating load	1500 kg
Loading capacity: struck / heaped (SAE standard)	0,63 / 0,82 / 0,37 m³
Battery	12 V - 60 Ah
Transmission	hydrostatic
Variable capacity piston transmission pumps	2 x 35 L / min
Gear service pump	1 x 27 L / min
Max service operating pressure	170 bar
Hydraulic power take-off	20 L / min - 170 bar (std.)
Maximum speed	4 / 7.5 km / h
Max allowed slope when empty	32° - 62% (variable based on the configuration)
Max allowed slope when loaded	32° - 62% (variable based on the configuration)
Steering system	independent tracks
Rubber track tensioning	spring + adjustment screw type
Track width	230 mm
Empty / loaded specific ground pressure	0.20 / 0.47 kg / cm ²
Fuel tank capacity	24 L
Hydraulic oil tank capacity	25 L

ALL-TERRAIN CRAWLER CARRIER

Crawler dumper with closed circuit hydrostatic transmission, variable displacement axial piston pumps and a dual speed axial piston motor for each track.

The Carry 230 dumper is equipped with a TIER4 engine with a rated output of 18.5 kW at 2300 rpm.

VERSATILE AND POWERFUL

The Carry 230 dumper has two electrically selectable speeds via with a button on the joystick. The mechanical parking brake features negative hydraulic control for stops on steep gradients; application of the brake inhibits the levers pilot signal.

Ground clearance of 250 mm makes it possible to negotiate dirt roads and rough terrain with ease

LONG LIFE TRACKED UNDERCARRIAGE

The tracked undercarriage is composed of oscillating rollers with taper roller bearings and long life seals; combined with the rubber crawler shoes, these characteristics allow the dumper to reach high travel speeds.

The generous ground clearance makes it possible to negotiate dirt roads and rough terrain with ease.

TRACKS

Rubber crawler shoes 270 mm wide and 2300 mm in length ensure stability and perfect driving control. The machine has a hydrostatic independent track type steering system.

INTUITIVE CONTROLS

The controls are fully servo-assisted with a joystick located on the driving seat armrests, just like in the higher category models.

The KUBOTA V1505-E4B, TIER4 diesel engine is housed under a large bonnet that allows easy and convenient access to all components of the transmission and the hydraulic circuit for easy servicing of the machine.

TECHNICAL FEATURES CARRY230 180° swivelling skip

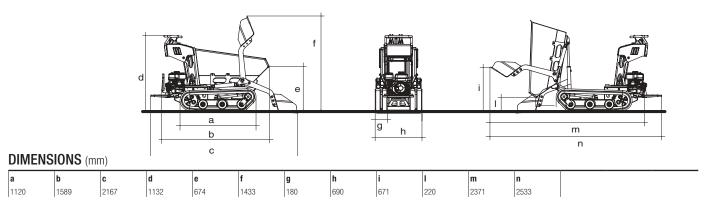

Engine	Kubota V1505-E4B 4-cylinder water-cooled 1498 cc diesel (18.5 kW / 2300 rpm)
Max torque at 1700 rpm	8.01 daNm
