

Breacher Strip

The Breacher Strip is a compact breaching tool designed with PRIMASHEET® 1000 Flexible Explosive, SOB® Slip-On-Booster and detonating cord. The charge has double-sided adhesive for use on target PRIMACORD® Detonating Cord is inserted through the SOB® for initiator attachment. The final assembly is rolled and vacuum sealed in a barrier bag for maximum protection and storage life.

Assembly is under controlled manufacturing conditions, providing high consistency and reliability.

APPLICATION:

Designed for:

- Metal door breaching
- Wood door breaching
- Window breaching
- Light wall breaching
- No field assembly required – open and go

PROPERTIES:

- Small, compact assembly for easy handling
- Consistent net explosive weight compared with field expedient charges
- Compatible with standard detonators
- Reduced deployment time
- No field assembly required
- No cutoff
- No remnants after function
- Repeatable results

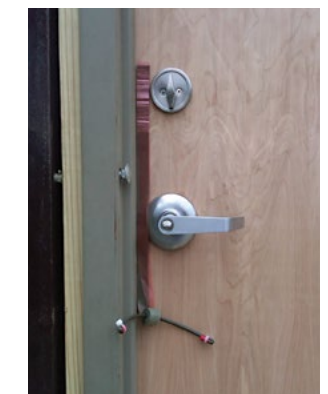

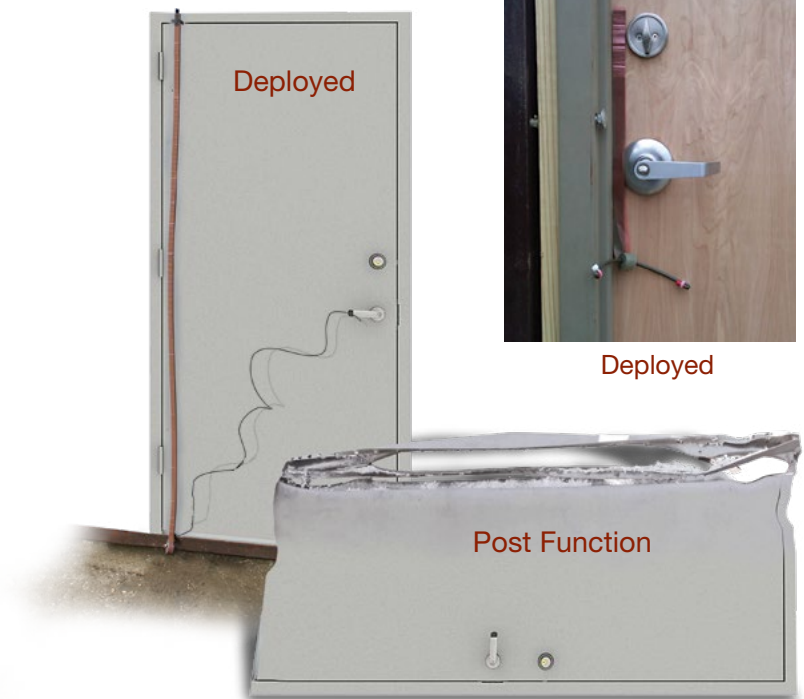

OPERATIONAL STEPS:

1. The Breacher Strip is deployed by unspooling the PRIMASHEET® Flexible Sheet Explosive. This exposes the adhesive providing a firm attachment to the target.
2. The charge is then placed on the specific target location (typically near the hinges of the door) and pressed in place.
3. Once the Breacher Strip is deployed, the detonator from an EBAD™ SKIN-PACK® or equivalent initiation device is attached to the Detonating Cord using an accepted method of attachment.

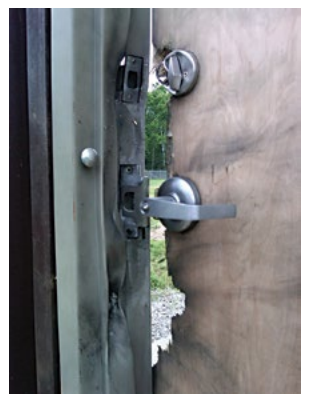

BREACHER STRIP

PART NUMBER	EXPLOSIVE MATERIAL	THICKNESS (NOMINAL)		WIDTH (NOMINAL)		LENGTH (NOMINAL)		NET EXPLOSIVE WEIGHT (NOMINAL)		CHARGE SIZE (ROLLED)
		in	mm	in	mm	in	mm	lb	gram	mm (in)
D11676-1	PETN	0.083	2	0.75	19	86	2184	0.30	138	19 mm x 115 mm (0.75" x 4.5")
