

# Rommel Espinoza

Technical Support & API Integration Specialist

## Profile

Highly analytical IT Professional with extensive experience in technical support and API integration, consistently optimizing operational efficiency and resolving complex issues. Proven ability to deliver exceptional customer satisfaction through effective troubleshooting and proactive communication. I'm actively expanding my expertise in web development, data analysis, Python, and SQL, seeking to leverage my strong IT foundation and problem-solving skills to build efficient solutions and contribute to dynamic technical teams.

## Employment History

### API Integration Engineer, EML Payments, Dublin

JUNE 2021 – AUGUST 2024

- Designed and implemented resilient, performant **REST APIs** for EML Payments, a global **fintech** leader in payment solutions, ensuring dynamic data synchronization across various payment programs and mobile applications, enabling seamless enterprise-wide integration with diverse client systems.
- Collaborated with cross-functional teams (Product, UX, Engineering, Marketing, Sales) to define and align API vision and strategy with customer needs and business goals, ensuring successful deployment of core API offerings.
- Acted as a key liaison between clients, non-API project managers, the API integration team, and API developers to ensure the successful and timely delivery of complex API Integration projects.
- Developed and managed a suite of APIs to support both internal and external customers, driving API & Integrations strategy from concept to production.
- Drafted high-quality, non-technical API documentation articulating business value and benefits, and devising use cases to describe how partners could leverage APIs to achieve their business goals.
- Functioned as the voice of the customer, deeply understanding client-side user needs, workflows, and how the enterprise would benefit from API offerings.
- Leveraged **Palantir Foundry** to integrate **data** and **models** into operational workflows, optimizing real-time decision-making and enhancing system interoperability through **Foundry's Ontology**.
- Designed and managed **AI-driven workflows**, automating processes to improve operational efficiency and ensure seamless data and model integration without duplication, adhering to established data governance.
- Managed inbound customer calls and queries related to API issues, prioritizing first-time resolution to ensure high levels of customer satisfaction and meeting established **KPIs** (e.g., First Response Time, Average Resolution Time).
- Supported and trained new agents, enhancing team capabilities and knowledge transfer processes.

### Sous Chef, The Kettle Street Cafe, Lisdoonvarna, Ireland

2018 – 2020

Responsible for overseeing the team, ensuring dish quality and consistency, and managing daily operations.

### Computer Network Administrator, Directa Group, Caracas, Venezuela

MARCH 2006 – DECEMBER 2012

- Developed **Contact Center** infrastructure and administration for two subsidiaries, managing logistics for 950 workstations.
- **Led project implementation**, including infrastructure setup and **technical support**, ensuring seamless operations.
