ABOUT ME

Highly motivated and adaptable Full-Stack Developer with commercial experience building web applications, mobile applications, and internal tools. Strong background in React, Typescript, C#, ASP.NET, Python, and modern technologies. Passionate about clean code, learning new technologies, and delivering high-quality solutions.

SKILLS

Front end: Javascript, Typescript, React, React Native, Redux, CSS, SCSS, HTML
Back end: Python, C#, ASP.NET, Flask, Django
Databases: MySQL, PostgreSQL, MongoDB
Other: Linux, Git, Bash, Docker
Languages:

- Italian (native)
- English (full professional proficiency)
- Japanese (limited working proficiency)

EDUCATION

BSc Computing & IT

Open University | 2022 – Present

EXPERIENCE

Web App Developer - Stark

May 2022 - August 2025

- Developed a large-scale web application for creating plans to improve energy consumption and cost efficiency.
- Worked across the full stack using React, Typescript, SCSS, C#, ASP.NET.
- Collaborated with designers and product teams to build user-friendly features.
- Improved performance and maintainability by refactoring legacy components and implementing reusable UI elements.

Full Stack Developer - JMS

Nov 2021 - Mar 2022

- Developed and maintained the company's eCommerce website using React, Magento, Python, Flask, MySQL and MongoDB.
- Managed hosting infrastructure on a Linux-owned private server.
- Built internal tools and automation scripts using Python.
- Contributed to improving website reliability and customer experience.

UX Designer & Developer Intern - ThisDotSoftware

Aug 2021 - Nov 2021

- Developed "Cheapskate", a mobile app helping users find the best deals nearby.
- Built front end features using React Native.
- Took part in UX design sessions, prototyping and usability testing.

PROJECTS & PORTFOLIO
