

THE LARGEST TECH CONFERENCE IN **WEST AFRICA**

Pistis Conference Center:

1 Resurrection Drive, Lekki-Epe. Expr. way, Lagos Nigeria

LEAD SPONSORS

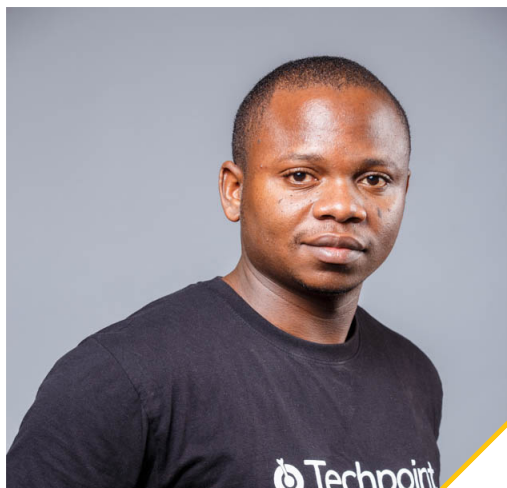

**FOUR YEARS OF EXCELLENCE
AND STORYTELLING IN THE TECH INDUSTRY**

...Stories that matter

Welcome to Techpoint Inspired 2019

Foreword by Adewale Yusuf

Over the last 4 years, my team and I have curated the impact of technology in Nigeria and Africa as a whole. This has promoted amazing conversations, featuring some of the biggest tech players within the continent. This journey of wanting to tell the story of the Techsphere in Africa has led us to meet really inspiring individuals with the best ideas, who despite the very obvious obstacles are still pushing on to make sure that they make their contributions to making our country and continent great.

Technology is changing Africa and the world really fast. Work, jobs and careers as you know them now are changing drastically. And this, in turn, will affect startups, small businesses, innovations and people.

Skills, jobs and careers are fast becoming obsolete at an alarming rate. And one way or the other, you are caught in this trap.

Technology will definitely help Africa leapfrog to a position of global excellence, but the continent needs to be properly positioned before all that happens.

At Techpoint Inspired, whether young or old, you will sit through action-fueled conversations with experts and enthusiasts from around the world in Lagos, Nigeria figuring out what wavelength you are on this technological wave.

Thanks for being our guest today. I believe you will find the event valuable, as the speakers are set to let you into their lives while you learn from their path. So, ask our speakers the questions that you've always wanted answers to and don't forget to network. The person sitting close to you might be your next co-founder.

The Techpoint team will be on the ground to make sure your conference experience is smooth and flawless. Just ask for assistance whenever you need it.

Keynote Schedule

Opening remarks
