Inscape Bench Spine

Inscape Bench spines are constructed of 16 gauge tubular steel uprights with welded 18 gauge steel crossrails. This strong yet lightweight construction provides ease of movement and reconfiguration.

The simplicity of the spine structure provides an intelligent solution to cable management. The absence of baseplates, apertures and corner posts eliminate barriers that restrict the routing of cables. Cabling may be routed both vertically and horizontally through the panel. Cables are laid into cable managers that easily install between panel crossrails throughout the framework. Cable managers safely cradle and segregate cables. An aperture free system means installation and reconfiguration costs are kept to a minimum. Reconfiguration is easy and economical. Cabling simply eases out of the cable managers and is laid back in at the desired point, eliminating the costly need to cut and re-terminate cables for every reconfiguration. *See Inscape Bench Application Guide for quantity of cables achievable in the various spines.

Spines do not include the electrical cover kit but may house power which is to be accessed alternate locations with a “cut out” tile. The spine comes with one wire manager. Electrical and data components must be specified separately.

Spine glides provide 1.5” height adjustment allowing air to circulate. Spines are available in 6” increments in widths ranging from 30” wide to 60” wide.

A **Mid Spine Support Leg** must be specified when the Partial Height Spine or the Filing Spine are specified. This leg is a support between two units

The **Stack on Frame** consists of a 6.75”, 10.125”, 13.5”, 20.25” and 27” frame which may be installed on any Inscape Bench spine of the same width or combination of two frames as outlined in the Inscape Bench Application Guide only. The Stack on frame is load bearing to one storage unit above 64” height and may be stacked up to 91”h. Tiles and trim is specified separately. Stack-on frames are frame thickness specific and should be specified accordingly.

Double Glazed Stack-on kit is a stack-on with a double glazed insert. The 30” to 60” wide Double Glazed Stack-on is a fully welded frame stack on. Double Glazed Stacks which are 54” and wider are kitted and are installed on site. The Double Glazed Stack on is not load bearing and no stacks can be stacked on top of the Double Glaze. Finishes are available in Clear or Frosted Acrylic to match Double Glazed tile.

Trim & Connectors

All **top caps, end of line trim, and connectors** must be specified independently from the frame.

Inline connectors are specified to join two units together which are in alignment. These connectors are specified based as INLINE-2 which will connect any of the Inscape Bench spines as well as the stack-ons. Be sure to specify inline connectors for the Stack-ons and Double Glaze Kits separately.

Top Caps are specified separately. The Top Cap includes clips to mount on spine or Stack-on in addition to the option of spanning two frames as outlined in the Inscape Bench Application Guide.

End Trim is kit structured to include all brackets, bolts and finished trim; Flat profile. Trim is manufactured from aluminum and always aligns straight and true at end of the Filing spine. All painted aluminum vertical trim and top trim are easily removed to facilitate lay in of cables.

Stack-on End Trim is used when a higher Stack-on requires vertical end trim at a connection. Hi-Lo trim may be used in this application for Flat profile trim because there is no ‘scribing’ that is required for this profile.

Tiles

Tiles are available as fabric, painted, tackable, veneer, Nuform, Double Glazed, Paper Management and whiteboard. 13.5”h tiles are interchangeable between Inscape System and Inscape Bench. Tile heights vary and must always align with the spine they are to be installed on. I.e. 23.6”h tiles = Full Height Spine, 10.125”h tiles = Stack on, 13.5”h tiles = Partial Height and Storage Spine. Tile clips support spine tiles and top trim. The clips are made of Delrin which is a resin similar to nylon in strength but has more rigidity and superior memory. These characteristics allow the Inscape Bench clips to retain their original shape without permanently deforming under continual pressure. This ensures tiles and trim will snap into place with a solid “click” time after time.

Fabric and Painted tiles are available 23.6”, 10.125” and 13.5” high and are constructed of 24 gauge galvanized steel. Powder-coated and fabric-covered steel tiles have a flame spread rating of less than 200 when tested according to ASTM-E84. Fabric-covered tiles are available in standard fabrics or COM. COM fabrics are subject to approval. White or extremely light colored COM fabrics will incur an upcharge of 25% to the tile pricing with which the fabric is being applied.

This is due to special handling of the fabric and tiles, in addition to painting of the tiles. Painted tiles are available in the colors shown in our Color Guide and are available in the following styles: plain steel, embossed, perforated, and steel screen. Fabric on tiles is applied in a railroad orientation.

Tackable tiles are constructed from 24 gauge cold rolled steel with a paint finish on all surfaces to prevent corrosion. The same general rules from the fabric tile section apply to the Tackable tiles. Fabric on tiles is applied in a railroad orientation. NRC 0.57, STC 9. **Tackable Acoustical tiles are available through Standard Specials with and NRC .73 and an STC of 12.

Nuform Tiles consist of gray melamine-backed MDF substrate 0.375" thick, with vacuum-formed Nuform foil over the front's surface and sides. The back-side of the tile also has routing features that accept zinc die-cast tile clips. All Nuform tiles incorporate a stiffener on the rear of the tile to ensure straightness and rigidity. This stiffener limits where the tile may be placed on the Inscape Bench spine. Nuform tiles cannot be specified in a location where a power track is installed due to interference. A sticker on the back of Nuform tiles provides UL flame / smoke-rating information. Woodgrain pattern is vertical. Due to limitations in the foil size, 48" and wider tiles are not available in F06 Walnut.

Composite Veneer tiles are constructed utilizing 45 lbs. density particle board with an engineered balanced backer for structural integrity. Veneer thickness is 0.025". The backside of the tile has routing features that accept zinc die-cast tile clips. All Composite Veneer tiles incorporate a stiffener on the rear of the tile to ensure straightness and rigidity. This stiffener bar limits where the tile may be placed. Composite Veneer tiles cannot be specified in a location where a power track is installed due to interference on an Inscape Bench spine. Woodgrain pattern is vertical.

Whiteboard Tiles are available in heights of 13.5". Tiles are constructed from 24 gauge cold rolled steel with a white paint finish that has been specifically formulated for dry erase markers. Whiteboards are seamless and fit same locations as standard painted tiles. *Note: Inscape whiteboards are specifically designed for use with DRY-ERASE markers only. WHITEBOARDS ARE NOT INTENDED FOR USE WITH PERMANENT MARKERS. Inscape advises the use of Sanford Expo Dry Erase markers*

with whiteboards. For a thorough cleaning, use Sanford Expo spray cleaner.

Paper Management tiles support horizontal paper management accessories. Organizers may be positioned at any point along the width of the tile. Three slats structured into the tile allow for three different height options for the accessories to be installed. Accessories may be found under Horizontal Accessories under the "Storage and Accessories" section. Maximum load capacity is 75lbs. When specifying paper management tiles which will be supporting a monitor arm, a Paper Management Reinforcing kit is required for additional structure. The 54" and 60" w tiles are pre-structured with these kits.

Perforated and Embossed tiles are constructed of 24 gauge galvanized steel, the **Steel Screen tiles** are constructed from 24 gauge cold rolled steel. Tiles may be painted in any of Inscape's standard colors or color matches.

Communication tiles provide power OR data access. The 30" wide includes one cut out while all wider tile widths include two cut outs. Bezels in tile may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P326 – Moonlight) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

Multi Access tiles provide electrical AND data access. Cut outs align with power track and proper tiles must be specified in specific areas if stated. Data and Electrical components may be specified from the Technology section. Bezels in tile may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P326 – Moonlight) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

Double Glazed tiles are available in 13.5" high and may be installed on frames 24" to 48" wide in place of a tile. Double Glazed tiles feature a double pane of frosted acrylic or clear acrylic framed by vertical and horizontal trim. Double Glazed tiles may be installed one on top of another. If wider than 60" of glaze is desired; **Stack on Double Glazed** kits may be specified.

Spine

- 2 3/4" thick spine when clad with tiles
- Power Track Kit (Upper Deck) only - no electrical clips included
- includes one cable hook

Mid Spine Support Leg

INBMSL10	10				\$188
-----------------	----	--	--	--	--------------

- must be specified at all situations where two frames join (except Full Height Benching spine)

Stack-on for Spine

- 2 3/4" thick
- no Twin Bin placement on the 13.5"h Stack-on
- 20.25"h requires an additional crossrail (separately) if Twin Bin or 13.5"h tile being specified
- Fully welded stack on kits easily installed and removed to adjust panel height
- Load bearing – only one overhead unit on frame higher than 64"h only
- Stack on frames may span multiple frames *See Application Guide for spanning guidelines

Double Glaze Stack on

- Stack on Double Glaze is non-load bearing
- Stack on Double Glaze may span two frames *See Application Guide for spanning guidelines
- 30" to 48" wide kits consist of welded frames
- 54" to 96" wide kits are kitted and must be assembled onsite
- Clear and Frosted Acrylic options available
- May be located in the top location only
- no Twin Bin placement on the 13.5"h Stack-on
- 20.25"h requires an additional crossrail (separately) if Twin Bin or 13.5"h tile being specified

Trim and Connectors

- Inline Connectors are required to be specified when frames are connected inline
- Specified independently of frame and may span two frames. *See Inscape System Application Guide
- All mounting hardware is included for corresponding frame thickness
- Veneer trim is up to a maximum length of 48"
- Top Trim up to 60"w requires two additional Jesters to be specified if spanning multiple frames (i.e. a 60"w top trim installed on 2_30" frames)
- Veneer trim available in specific height only (not 10.125"height)
- Stack-on End Trim is specified when stack frames are specified
- End of line trim is specified when storage is being specified and there is visibility to the end of the frame (all other end conditions include finished appearance with no end trim needed)

INSCAPE BENCH TECHNOLOGY

Inscape Bench Technology

General Information

Inscape Bench electrical is UL and CSA approved. New York City and Chicago solutions are also available as standard offering. The electrical system features 8 wires and 4 circuits that can be configured in a 2+2 or 3+1 circuit configuration. All electrical components, with the exception of the power feed (which must be connected to the building power supply by a licensed electrician) may be installed by furniture installers, unless otherwise stated by jurisdiction of the installation.

Inscape Bench electrical components consist of the following: Floor/Wall power in-feed, power tracks, jumper cables, duplex receptacles. Power components snap into place without the need of tools and are the same components as offered in Inscape System.

Power in-feed connections can be made through a wall, column, or floor connection. Power in-feed connections consist of an 84" long liquid tight cable and a 45" flex cable connected by a 3" metal coupler and elbow joint to sit between bottom rails. The liquid tight portion of the Power in-feed must be connected to the building power supply by an electrician. If two power feeds are being specified for one cluster of stations, care must be taken not to cross connect the two feeds through jumper cables and power tracks.

Two versions of the power in-feed exist. One version is to be used with the Full Height Spine and the other is to be used with the Partial height or Storage Spine and includes a wire casing.

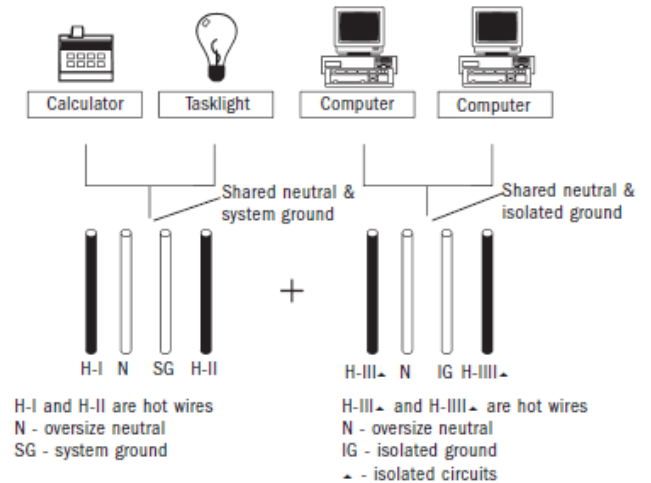

New York City has requirements for special power entry assemblies. A qualified electrician is required to hard-wire the **New York City In-feed** from the entry box to the power source.

The New York City feed works for side feed, end feed or ceiling feed.

The City of Chicago does not permit the use of pre-wired modular electrical systems. To simplify hardwiring of the Inscape Bench Spine, the City of **Chicago Hold Down Bracket** (INECHB) is available. Specify two INECHB for each power entry point, one for the power feed and one for the outlet. (The outlet box is NOT supplied by Inscape). INECHB's are available in packages of 6. *Boxes should be sourced through Ental Industries or J&A Sheet both local Chicago suppliers of electrical junction boxes.*

Note: Spines 30" wide will accept one double-sided outlet box. Spines 36" wide and wider will accept two boxes. INECHB's may also be specified to mount multi-user termination boxes inside the panel.

2 + 2 Circuit Configuration

2+2 – Circuits #1 and #2 share one oversize neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.

- Circuits #3 and #4 share the other oversize neutral and isolated ground to provide isolated power to computers.

3 + 1 Circuit Configuration

3+1 – Circuits #1, #2 and #3 share one oversize neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.

- Circuit #4 uses the other oversize neutral and isolated ground to provide isolated power to computers.

Power Track Kits consist of a power track and clips to attach the power track to a crossrail. The kit allows for power tracks to be mounted in specified locations (above or below the worksurface). Jumper cables and receptacles are specified separately. The 30" wide Power Track Kit accepts one duplex per side. Power Track Kits which are 36" wide and wider accept two duplexes per side. Power Track Kits may be specified below the following; Transaction Tops, Up mount Bins, Stack on Glaze, Add on Glaze and Double Glazed Tiles. Power Track Kits MAY NOT be specified below Twin Bins or Power Poles.

Jumper Cables by-pass un-powered spines and also facilitates connections from power track to power track. Jumper cables must attach to power tracks only and cannot be attached to adjacent jumper cables or power in- feeds. Product codes indicate the width of the jumper cable which may be cross-referenced in the Inscape Bench Application Guide. Various widths of jumper cables are available to facilitate various applications and configurations. See Inscape Bench Application Guide for details.

Duplex receptacles snap into power tracks back-to-back and may be accessed through cutouts in either the electrical cover plate with standard frames or multi-access and communication tiles in all other locations and basic frames. Duplexes are interchangeable amongst the varying power track locations. Specify duplexes according to circuit configuration, 2+2 or 3+1. The IN3D3-__ duplex is specific to 2+2 wire configurations and the IN3DU3-__ duplex is specified for 3+1 wire configurations. General rule is no more than 12 receptacles per circuit per power in feed. Duplexes may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P326 – Moonlight).

Data Components

The **Hinged Cover (INHRC)** snaps into the cut outs which are found in multi access and communication tiles. When data faceplates and receptacles are not required the hinged cover provides a visual and protective cover.

Fiber Optic Outlet (INCFO) is specified to be installed in a cut out in a multi access or communication tile. Available in black only.

The **Data and Communication Faceplate (INCDP)** installs in a cut out in a multi access or communication tile where plug and play access is required. The faceplate provides three "slots" where the **Category 5 (INCABRJ45)**, **Category 6 (INCABR6J45)**, and/or **Telephone Jacks (INCRJ11)** may be inserted. All "openings" need to be filled with data or phone jacks, the **Blank Data Plate Insert (INCB)** fills in any which are not being used. Data components (except the INCFO) may be specified in

black, white (close match to P168 – Glacier White) and gray (close match to P326 – Moonlight).

Clamp on Power may be clamped along edge of worksurface for plug and play access to electrical/voice/data. Unit has clear anodized aluminum case with two outlets and two voice/data cut outs. Voice and data adaptor kits are included. Voice and data jacks must be purchased separately. Clamp on power module has 72" long extension cord. This module adjusts from .75" to 1.75" for varying surface thickness.

Cable hooks support and segregate data cables and each frame ships with one cable manager. Cable hooks carry data cables to their termination voice/data point at a multi access or communication tile for plug and play access or to hanger brackets which are located behind the tile.

Wire Management clips are required when power is being routed from a Credenza Storage benching application frame to the worksurface. Where cabling is running from behind a Credenza Storage case, these wire management clips are mounted to the underside of the inside of the case and the wires are cleanly routed to the main surface. These clips come in a package of 10 and are black in color.

Wire Casing manages cables and technology from a worksurface to the floor. Casing is adjustable in length by removing or adding "links". Casing is available in gray. As standard the wire casing accommodates 28.5"h worksurface heights. The wire casing accommodates 30 Cat5 cables with electrical works at a 60% fill capacity which is recommended. Approximately 36 Cat5 cables may be accommodated in the wire casing at a 60% fill capacity without electrical works.

Electrical

- Power in feed to be used with partial height spine includes wire casing to enclose exposed cables
- All electrical components are standard 8 wire configuration
- Power track is required to match the width of the frame it is being installed in
- Power Track Kits may be specified below; Transaction Tops, Up mount Bins, Stack on Glaze, Add on Glaze
- Power Track Kits MAY NOT be specified below Twin Bins
- See Inscape System Application Guide for length requirements for varying panel configurations
- Jumper Cables do not connect together nor do they attach to power in feeds
- Circuit 3 receptacle requires 2+2 or 3+1 wire designation ("U" in the code signifies 3+1 wire configuration)
- White close match to 168 Glacier White, Gray close match to 326 Moonlight
- The "UD" duplexes are to be specified in conjunction with the Electrified Twin Bin (Inscape System Price List)

Data Components

- Data components which are face mounted have optional color of black, white or gray (default black)
- Data cannot be installed directly back to back in a benching spine
- Data components are industry standard sized AMP product
- Wire Management clips are black and attach by double sided tape which is included
- Cable Management tray is available in two lengths and painted Eco Black and includes mounting hardware

INSCAPE BENCH WORKSURFACES

Worksurfaces

General Information

Depth dimension is nominal. Depths are 1" less than stated to provide a 1" gap between the worksurface and panel to facilitate wire management. Worksurfaces are specific to the worksurface support they are being installed on. Codes and dimensions are outlined in the following pages and Inscape Bench Application Guide showing which worksurface is to be specified with the End Gable, Open "H" Leg or Storage Support.

Nuform Solid and Nuform Woodgrain/Pattern Worksurfaces

The Nuform top is a thermo-formable polymer based sheet continuously bonded to a 1.25". The polymer sheet is surface coated with a scratch resistant film. Colors are homogenous throughout the film thickness. Top and edge are one continuous surface with no edge seams. The underside of the top is finished in a low pressure melamine. Nuform tops have the option of a pencil groove running across the width of the worksurface as standard and depth for conference tables. Two price options are available - Nuform Solid and Nuform Woodgrain which includes patterns.

Limitations exist with the F06, F08, F09, F10, F11, F16, F26 Nuform due to size of the foil – 48" standard and extended corners as well as 120 degree surfaces.

Edge Detail - Nuform Solid and Nuform Woodgrain

1 1/4" Straight Edge

1" Straight Edge

1 1/4" Tapered Edge

1" Tapered Edge

Top and edge are one continuous surface with no edge seams.

Laminate Worksurfaces

Plastic laminate is laminated to 1.25" thick particle-board. The underside of the worksurface is finished with a man-made, wood-fiber veneer backer. Worksurfaces specified with a plastic laminate finish include a 2mm edge banding in a coordinating color. Plastic laminate tops do not include a pencil groove. All worksurfaces default to 1.25" thick, Straight edge, Pencil Groove.

Edge Detail - Plastic Laminate

Straight Edge

Composite Veneer Worksurfaces

Veneer thickness is 0.025". Overall thickness of top is 1.25". The stain color is impregnated throughout the veneer for color consistency. The open pore veneer is clear coated with a catalyzed lacquer utilizing a multi-step process and has a gloss value of 30° when dry. Tops are constructed utilizing 45lbs density particle board with an engineered balanced backer for structural integrity. Tops are edged in 3mm thick same species veneer and do not include a pencil groove.

Edge Detail - Composite Veneer

Straight Edge

Load capacity for freestanding and panel mounted worksurfaces is 4.5lbs per linear inch.

Grain direction on Nuform Woodgrain and Veneer worksurfaces is as denoted below.

The **Worksurface Extension** is a cantilevered worksurface which is situated perpendicular to the spine. This top is available in all the worksurface finishes of the standard worksurfaces (if woodgrain is chosen, pattern will run perpendicular to the main worksurfaces). This extension CANNOT be specified adjacent to the Height Adjustable Worksurfaces.

The **Worksurface for Electrical Access** is a worksurface which provides easy access to power/data ports below the worksurface within the spine. The hinged access cover is an aluminum component which is inset into the Laminate or Veneer surfaces only. Worksurfaces are specific to the frame width in order to allow the hinged access cover to line up with the port in the spine beneath.

Adjustable Height Worksurfaces are available to be mounted on the Full Height Spine of the Inscape Bench.

Worksurfaces provide gas cylinder height adjustment ranging from 28.5" to 49.5" with a lift capacity and calibration of a recommended 25lbs (not including the worksurface). Worksurfaces structured on the height adjustable mechanism are 1" less in stated width in the price list, and are meant to be installed on center to the base allowing for a gap between adjacent surfaces to eliminate pinch points. The base mechanism of the worksurface is available in gray only. See the Inscape Bench Application Guide for application notes and restrictions.

Worksurface Support Brackets & Accessories

Cantilever Bracket is fixed. Cantilever brackets support panel mounted worksurfaces on-module.

Flush Brackets are specified when two adjoining worksurfaces need to be held flush together. These brackets (INFB) come as a pair. Maximum span of overhang when supported with a flush bracket is 18" per side. These are not required for Height Adjustable worksurfaces.

Spacers are specified when storage is being specified within the bench. The appropriate height of storage to use within the bench is 22.5" id with FLAT GLIDE (Rectangular glides will not line up below the worksurface)

Pedestal Brackets are specified when a pedestal unit is being specified. This allows for docking of the storage pieces to the benching spine. End Location Bracket is to be specified when the pedestal is at the end of a run. The Middle Location Bracket is to be specified when a pedestal is situated below the bench within the bench. *See Inscape Bench Application Guide.

Storage Docking Bracket is used when lateral or bookcase units are specified perpendicular to the spine. This bracket docks the storage and worksurface to the spine. *See Inscape Bench Application Guide.

The **Lateral Tops** are available as ¾" thick. These tops are to be specified atop the 22.5" id storage units, FLAT GLIDE only on storage. Tops are available in all standard Nuform finishes.

End Support

There are three main ways to support the Inscape Bench from an end support perspective. One option is a **Full End Gable**. This end gable unit spans the entire depth of the bench beneath the worksurfaces, which are specific to this support type. The End Gable is a fully kitted product code which includes trim, tiles, glides and structure. The trim can be painted in any standard paint color. Tiles are to be specified on the inside and outside of the end gable. Tiles on the interior consist of two separate tiles whereas the outside is one full tile. Woodgrain on the exterior tile will run vertical on the tile. The Full End Gable is only to be used with the Full Height Spine.

An alternative support is the **Open "H" Leg**. This open leg structure has the ability to span the entire depth of the bench as well as carry multiple storage/accessories components. These units may be found in the Accessories section and are specific to the "H" Leg. The Open "H" Leg is only to be used with the Partial Height Spine. *unless the Height Adjustable version is being used

Both support types have a mid-span support which matches the overall end aesthetic. These are available in 12" and 18"d. The 12" version is to be specified with 24" and 30" deep worksurfaces and the 18"d with 36"d worksurfaces. Tiles on the Full Gable version are painted only.

When the Height Adjustable Worksurface is specified, either the Full End Gable or the Open "H" Leg which is specific to the Height Adjustable may be specified.

*See Inscape Bench Application Guide for more details.

Rectangular Inscape Bench Worksurface

- 1 1/4" thick
- Worksurfaces are to be specified with any Inscape Bench spine in a middle or non-end position
- Nuform, Laminate & Veneer
- Straight & Tapered edge available on Nuform
- 84" and 96" worksurfaces require same support as two surfaces

Height Adjustable Worksurface

- 1 1/4" thick
- Straight & Tapered edge
- Nuform, Laminate & Veneer
- End units are 1/2" shorter in length and Middle units are 1/2" shorter on each end eliminating potential pinch points
- only to be installed on Full Height Panel option - with either full height end gable or open "H" leg
- *See Inscape Bench Application Guide for details on how to specify

- when specifying the height adjustable worksurfaces, all units within bench must be height adjustable

INBEZxx = Middle-of-Run
 INBEZExx = End Gable

Height Adjustable Worksurface

- 1 1/4" thick
- Straight & Tapered edge
- Nuform, Laminate & Veneer
- End units are 1/2" shorter in length and Middle units are 1/2" shorter on each end in order to eliminate potential pinch points
- only to be installed on Full Height Panel option - with either full height end gable or open "H" leg
- *See Inscape Bench Application Guide for details on how to specify
- when specifying the height adjustable worksurfaces, all units within bench must be height adjustable

INBEZxx = Middle-of-Run

Worksurface Supports

- Cantilever brackets support worksurfaces at mid-span
- Spacers are to be specified in conjunction with 22.5" id cases and 3/8" thick tops to support worksurfaces
- Pedestal brackets dock pedestal cases to the benching spine *See Inscape Bench Application Guide
- Frame to Worksurface is to be specified in certain configurations where storage is the anchor *See Inscape Bench Application Guide

INSCAPE BENCH ACCESSORIES

Accessories

General Information

Spine Accessories are units that may be specified to sit on top of any of the benching spines. The units are specified to include the stanchion kit or not (see notes on page). Height Adjustable worksurfaces must not be specified when spine accessories are specified due to interference with the lift mechanism. Items such as the Up-Mount Bin and Add on Glazing are taken from the Inscape System price list and are compatible.

Add-on Glazing is manufactured from 0.25 " tempered glass. Glazing may be mounted to the top of any equivalent Inscape Bench spine or combination of bases outlined in the Application Guide. Glazing is available in clear, etched one or two sides and designer glass Strie and Etre options. Add-on Glazing includes top trim, glass mounting extrusion and specified glass. Add-on Glazing is specified based on the thickness of the panel. Note: Hi-lo Add-on Glazing must be specified when installed directly adjacent to a higher panel at an inline situation only. The glaze and extrusion are inset on one side to allow for hi-lo vertical trim on the adjacent higher panel. If the situation calls for hi-lo on both sides, a special may be required. An Add on Glazing alignment clip is included with each Add on Glaze ordered.

Transaction Tops are specific to spine width they are to be installed on. Stanchions and top trim are included in the kit, as well as a 1" thick Nuform or laminate top. Hi-Lo Transaction Top must be specified when a transaction top is specified directly adjacent to a higher panel. The worksurface takes into account the profile of the end trim.

Note: 72", 84" and 96"w kits consist of two top caps and four stanchions (based on "Symmetrical Frame

Configuration" module lines). Top Caps can be specified as an option and are included with the kit.

The **Upmount Bin** is constructed of 24 gauge steel on the back and 20 gauge steel on bottom, sides and top. The Upmount Bin is ordered and shipped independent of the stanchion kit, top trim and accessories to hang on back of bin. The stanchion kit includes hardware to mount the stanchions on the crossrail of the frame and top trim (tapered or flat). Stanchion kits are specified based on thickness of frame in which the Upmount Bin is being installed. The backs of all Upmount Bins require either a whiteboard or a tackboard to provide a clean aesthetic. These accessories are specific to the Upmount Bin and include mounting hardware. The stanchion and Upmount Bin provide an overall height of 20.25" module matching adjacent panel heights. The bin is 12.75" deep and may be specified directly adjacent to another Upmount Bin facing the opposite direction; creating a "Twin- Bin" effect. Separate top cap and two stanchions will be required for each bin.

Open "H" Leg Accessories are units which hang from the Open "H" Leg on the Inscape Bench. These units are constructed of laminate and come complete with all brackets to hang. These units may be specified when a Height Adjustable worksurface is being specified. The units sit 2" lower than the worksurface so there is no concern of pinch points when lowering the worksurface. The Upper Bookcase is cantilevered over the end of the worksurface (similar to the Worksurface Extension). The weight capacity of shelves is 100 lbs and all other units are 200 lbs.

Spine Accessories

- Planter box, Cubbi Stor and Transaction Counter include stanchions kits and trim for spine mount
- Transaction Counter is available in 1" Nuform or Laminate
- Flat trim profile only
- Cubbi Stor and Planter box are constructed of laminate

Add on Glaze

- Add-on Glazing comes complete with mounting hardware and top cap
- Add-on Glazing may span multiple frames according to guidelines set in the Inscape Bench Application Guide
- Glaze is 0.25" thick tempered glass and available in 6.75", 10.125" and 13.5" heights with various finish options
- One glaze Alignment clip is included with each Add on Glaze

INSCAPE BENCH STORAGE

Storage

General Information

Pedestals are of all-welded "wrap-around" construction of 20 and 22 gauge high quality, tension leveled, cold rolled steel. The steel gauges selected for drawer fronts, bodies and accessories ensure the highest quality durability and performance for all components. **All glides on cases must be specified as flat glides ($\frac{5}{8}$ " height adjustability) to work with Inscape Bench.** Pedestal corners (except for 7900) are welded at junction of top and case, eliminating horizontal lines for a cleaner, flush appearance, and strengthened with reinforcing gussets. A completely enclosed case provides rigid construction and dust-free interiors.

Box drawer sides are slotted on 1" centers to allow for maximum flexibility for drawer division. Double-wall construction allows lift-up doors to be picked up and recede smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. 7900 is single-wall construction. File (10.5" and 12") and EDP (15") drawer bodies have full-height sides to accommodate hanging file folders, eliminating the need for optional file frames. Fully progressive ball bearing suspensions on all drawers, including pencil and box drawers, are staged so that the left and right sides work in unison; this provides smooth drawer operation with minimum force. Staged suspensions allow the drawer to be completely pulled out, providing access to the entire drawer depth.

Special "claw-like" device incorporated in the suspension "grips" the fixed section of the suspension channel preventing drawer body bounce back or creep when drawer is closed. Modular interior allows complete interchangeability of drawer types within the pedestal case. For example, two 6" box drawers may be replaced by a 12" file drawer. Pedestals are standard with keyholes for attachment to underside of worksurface. For the 7900 only cases: 18" deep pedestals come standard with 18" deep drawers, 22" and 28" deep pedestals come standard with 22" deep drawers. For all other Series, pedestal drawers match case depth.

Worksurface supporting pedestals are designed for use with the Inscape Bench when used with flat glides. Worksurface supporting pedestals are available in two depths to fit 24" and 30" deep worksurfaces and support finished worksurface height of 28.5". Pedestals with 3", 6" or 7.5" drawers include one pencil tray per

pedestal. The 6" and 7.5" drawers also include a steel divider. The 10.5" and 12" drawers have one hang file suspension bar (two in a 28" deep pedestal) for side-to-side filing of legal or letter size folders or printout binders. 7900 Pedestals do not include any suspension bars.

Note: System storage pedestal cases consist of holes in the top of the case and back of the case to allow for worksurface docking and panel mounted brackets to be secured.

Cushion Mobile Pedestals (*See Inscape System Price List for this product) are topped with 1.25" thick Cal.117 fire-retardant polyurethane foam with a 2.2lb/ft. density. This upholstery cushion is balanced with a $\frac{7}{16}$ " board and is attached to a pedestal top with Velcro. Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customers Own Material). To determine if a COM fabric has been preapproved for use on our cushion topper, contact your client services representative or go to www.inscapesolutions.com. For application of ALL fabrics, both from our graded program as well as COM (Customer Own Material) please specify layout orientation at time of order. If layout instructions are not provided Inscape will choose the direction to maximize production. Refer to the diagram for layout options.

After calculating the total amount of material needed in inches, divide the total number of inches by 36 for the total yardage and round up to the next full yard. Allow additional for repeat. Add 15% of total fabric required for small and medium pattern repeats. Add 20% of total fabric required for large patterns.

Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your client services representative for assistance.

Fabric lay up of Pedestal Cushions

Pedestals come standard with lock. If lock is not required add suffix '/NL' after product number and deduct \$43 list per lock. Random keying is standard, and keyed alike may be ordered. Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number. Note: Locks cannot be field installed on hinged door cabinets.

Lateral cabinets are of all-welded construction using 20 and 22 gauge high quality, tension leveled, and cold rolled steel. Drawer fronts, lift-up doors, roll-out shelves and all steel accessories are manufactured of the steel gauge appropriate to function at the highest quality level. **Laterals must be specified with flat glides to work with Inscape Bench.** Flat Glides provide 0.125" height adjustment when docked and 0.75" height adjustment if unit is not docked.

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications.

All interiors are completely modular and interchangeable so that cabinets can be retrofitted with new accessories and interiors as required. Cabinet corners (except for 7900) are welded at junction of top and case, eliminating horizontal lines for cleaner, flush appearance, and strengthened with reinforcing gussets. Double-wall construction allows lift-up doors to be picked up and receded smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. Lift-up door carrier mechanism has four nylon rollers two on each side - for smooth receding action with no binding or snagging. Self-closing, 110° opening, European style cupboard hinges for smooth door operations.

The absence of scissor mechanism in doors and drawers eliminates the potential for scissors binding, and facilitates

reconfiguration of cabinet openings as needed. Front leading edge of pullout shelves is beaded and rolled to provide grip for pullout action and strengthen shelf; front leading edge of fixed shelf is flat for easy removal of material. Fully progressive ball bearing suspension slides provide smooth action with minimum force.

Special "claw-like" device incorporated in suspension slide channel "grips" the fixed section of the suspension channel preventing drawer bounce-back or creep when drawer is closed. A patented Safelock™ interlock mechanism provides complete security and user safety against accidental opening of two or more drawers simultaneously. Lock fingers are configured with right angle bend upward not downward so that lift-up doors cannot be pulled down to disengage fingers from door slots and be forced to circumvent lock system. Lock bars operate vertically on both sides of cabinet for maximum security.

Knockouts that are included on case sides, top and bottom facilitate ganging and leveling. Glides - 2 in front and 2 in back - are adjustable from inside the cabinet so that cabinets can be leveled regardless of whether they are backed against a wall or banked.

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. 7900 Series fronts are available with 2 pull options. The standard pull option is the radius aluminum pull. A rectangular aluminum pull option is also available at no additional cost. 7900 is single-wall construction. Nuform fronts include a Q- pull. Veneer fronts are available with 2 pull options. The standard Veneer pull option is the same Q- Pull that comes with the Nuform front. A continuous pull is also available on most veneer units.

Laterals include 1 pair of hang file bars in 10.5" and 12" fixed fronts, 1 EDP kit in 13.5" and 15" fixed fronts, pencil tray in 3" multi-file drawer and steel divider in 7.5" multi-file drawer, steel divider in 6" multi-file drawers and 3 divider plates in 13.5" lift-ups. Fixed shelf in lift-up is slotted in 1" increments. Lateral-to-panel bracket is required if lateral is positioned on-module.

Note: laterals and multi-files consist of slots in the back of the case to allow for panel mounted brackets to be secured.

Cabinets ship standard with single bitted lock. For applications requiring higher security a double bitted solution is available. If lock is not required it may be optioned as such. Random keying is standard, keyed

alike is optional. Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts. Locks may not be field installed in hinged door and sliding door cabinets. Master keys are available; refer to the accessories section to specify. Locks are standard with two keys, one of which has a black neoprene plastic cover.

All laterals are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. For laterals specified in custom micas, specials whites or metallic, add an up-charge of 10% to the list price. All interior drawers/shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

Twin-Bins are 5.75" deep on each side of the supporting frame. Twin-Bins may be specified to install in both the lower and upper position of the frame. Bins are manufactured from minimum 20 gauge steel with an extruded aluminum reinforced top. Double wall, sliding doors on each side of the unit, slide easily across the recessed groove built into the bin front. Twin-Bins are available with or without locks. The locking mechanism is individualized for each side of the unit, allowing for personal privacy on either side. Twin-Bins are available in 36", 42", 48" and 60" widths. Recommended maximum load for Twin-Bins is 3lbs per linear inch. Bins are finished in standard 37.5° gloss baked enamel, electrostatically applied in a 2-coat process and are available in any of the colors shown in our Color Guide. Side pulls on Radius fronts are manufactured from ABS black plastic. Woodgrain fronts are available in any of our standard woodgrain finishes.

Handles are standard in aluminum finish and are located on the front of the sliding door. Case may still be ordered in any of the colors shown in our Color Guide.

The **Electrified Twin Bin** is built on the same premise as the standard Twin Bin with the addition of electrical and a sliding door with locking capabilities in two positions. All electrical components are specified separately including power track, receptacles and jumper cables. The sliding door may lock either the binder storage portion (full depth of bin) or the electrified portion which is the center portion which is approximately 5"d. The back of the Electrified Twin

Bin may be clad with either a tackboard or whiteboard which are both specific to this storage unit. A shelf may also be optioned for the electrified portion which is field installed midway between top and bottom of opening. A gap in the shelf allows for the cord of an electronic unit to plug into duplex (located near base of opening) and still sit on top of shelf. NOTE: these accessories are NOT compatible with the standard Twin Bin.

* See Inscape Bench Application Guide for criteria on which heights of stack-on to use in conjunction with the Twin Bin and Electrified Twin Bin

Specify **Twin-Bin mounting brackets** separately according to location on frame. 1 bracket per Twin-Bin is required. When stacking Twin-Bins a 6.75" high tile minimum must separate the two. Do not specify over Power Track Kit.. It is not recommended to specify Twin-Bins on wing panels. Twin-Bins should only be specified on spine panels for adequate stability. *See Inscape Bench Application Guide for details.

Drawer Standard Equipment

Lockers and towers containing 3" or 6" drawers are provided with one pencil tray per cabinet. 6" drawers are additionally standard with one steel divider. 10.5", 12" and 15" letter-width file drawers have one suspension bar for side-to-side filing of letter or legal-size folders. Full-width pullout drawers are standard with one pair hang file bars for side-to-side suspended filing. Full-width fixed shelves are standard with 3 plate dividers. Optional accessories are available.

Glides

Overall heights are inclusive of metal glides. Heights may be increased up to 5/8" by extending the standard glide. Glides are accessible from inside the cabinet when the bottom drawer is fully extended or removed and may be adjusted with a 0.25" socket driver. Optional 1.5" stem glides are available. Specify and add \$24 list to the cabinet price. Requires field installation.

Front Details and Pull Options

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. 7900 is single-wall construction. Refer to the images and chart below for pull application on 7900 Series, Nuform, Veneer and MDF fronts. A \$20 list upcharge per pull applies to FP007, FP008 and FP009.

Workplace Towers and Lockers come standard with lock with single bitted lock. For applications requiring higher security, a double bitted solution is available. If lock is not required add suffix '/NL' after product number. Deduct \$51 list per lock. For lock location, see page 10. Locks are available in chrome and black finish. Specify. Random keying is standard. Files may be ordered keyed alike. Locks feature removable core and are standard with two keys, one of which has a black Neoprene plastic key cover. Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Please contact Inscape Client Services for required parts. Locks may not be field installed in hinged and sliding door cabinets. Specify lateral file height and width or model number. Master keys are available at \$44 list.

Custom Colors

Inscape System offers color matched to a customers' specification when possible. This matching is done through a database of over 2,000 existing color formulas or the development of a new custom color. A minimum order value of \$3,000 net per custom color, applies to each order. A \$250 net fee applies for each custom color below this minimum. In addition, Custom premium colors (bright whites and bright colors; textured paints; and reflection paints that use mica, aluminum or special chemical to create their reflective properties) will be subject to a 10% upcharge to the net value of the product.

Lateral Storage for Inscape Bench

- Be sure to specify a 3/8" top along with spacers to achieve a 28.5" finished worksurface height

Twin Bin

- The mid and lower brackets include crossrails which are required for installation of Twin-Bin
- Frame crossrail is required to be cut on site to install the mid Twin- Bin bracket
- See Inscape Bench Application Guide for bracket details and locations
- Twin-Bin cannot be installed directly above a worksurface as it causes interference
- Jumper cables and duplexes for the Electrified Twin Bin power track specified separately
- The "UD" duplexes are to be specified in conjunction with the Electrified Twin Bin

FREESTANDING AND PANEL ATTACHED LEGS

Freestanding and Panel Attached Legs

General Notes

The **Rectangular Post Leg** is a 2" x 1" leg is field installed and screwed to the underside of the worksurface. The rectangular leg comes in two options of either fixed (28.5" worksurface support) or adjustable (25.5", 27", 28.5", 30", 31.5"). The adjustment is made by using a 5mm HEX to manually adjust the leg vertically. Legs are available in all standard colors. Glide adjustment of the leg is 1 ½" for leveling purposes.

The **Triangular Leg** is a 2 ½" x 2 ½" leg which is field installed and screwed to the underside of the worksurface. This leg is available as a fixed version only. The interior of the leg includes a portion that may be slide up and down in order to accommodate wiring within the leg. This sliding portion may be painted an alternative color. This leg is available in all standard colors. Glide adjustment of the leg is 1 ½" for leveling purposes.

"O" Leg is a freestanding leg option which is available in all standard colors. This leg is fixed only and supports a worksurface of 28.5"h. The "O" leg is specific to the depth of the worksurface with which is to be supporting and is available in 24", 30" and 36" versions (nominal sizes). The worksurface will overhang .875" on either side of the leg. Glide adjustment of the leg is 1 ½" for leveling purposes.

"H" Leg is a freestanding leg option which has the ability to tie into panel via the **"H" Leg Docking Bracket**. This leg is available in all standard colors. There are two options for the "H" leg, fixed which supports a 28.5"h worksurface and an adjustable version which accommodates a height range of 25.5", 27", 28.5", 30" and 31.5". Be sure not to specify the adjustable leg version to tie into the panel as the height adjustment of the leg may differ from other supports. The "H" leg is specific to the depth of the worksurface with which is to be supporting and is available in 24", 30" and 36" versions (nominal sizes). The worksurface will overhang .875" on either side of the leg. Glide adjustment of the leg is 1 ½" for leveling purposes.

**This leg does NOT accommodate hanging storage components from the Inscape Bench; however the Accessory hook may be used.

The **Framed Support Leg** is the same as the previous version however it DOES NOT include the grey glide cap as the previous version did. This is a fixed support for 28.5"h worksurfaces and ties into the frame with its integral bracket. Glide adjustment of the leg is 1 ½" for leveling purposes.

**This leg does NOT accommodate hanging storage components from the Inscape Bench. Legs are available in all standard colors

**WARDROBE UNITS FREESTANDING AND
ELECTRIFIED VERSION**

General Notes

Wardrobe Units

Wardrobe units are available in two different variations; freestanding and an Electrified Storage version. The widths range from 12", 15" and 18" (the Electrified Storage version includes a 24" version). The freestanding version matches panel heights of 44", 51", 57" and 64" h. The Electrified Storage version matches 51" and 64" versions. Wardrobe units are available in 9900 series, Nuform solid/woodgrain and veneer for the Electrified Storage 24" version only. Wardrobe units include the option of a coat rod and upper shelf or multiple shelves (quantities listed below)

44" h version includes 2 shelves

51" h version includes 2 shelves

57" h version includes 2 shelves

64" h version includes 3 shelves

Wardrobe units are locking and include flat glides on the freestanding versions. Electrified Storage versions include round or rectangular glide.

9900 Series Wardrobe Tower

- Option of coat rod and upper shelf or multiple shelves
- See General Pages for multiple shelf quantities
- includes flat glide
