## GSA Terms and Conditions of GS-03F-038DA

### 1.a Special Item Numbers (SINs) Awarded:

SIN	GSA Description	Inscope Line	Inscope Pricer
33721	Office Furniture	Systems, Bench, Storwal, Planna, Tables, Ergonomics, Office Specialty & Rockit	Inscope System, Office Specialty, Rockit Inscope Ergonomics
33721	Office Furniture	Installation, Project Management & Design	Terms & Conditions
OLM	Order Level Materials	All	All

### 1.b Lowest Price Items: N/A

### 1.c Hourly Rate Description:

GSA SIN	Labor Category	GSA Price /HR (Inclusive of IFF)
33721	Senior Interior Designer	\$68.00
33721	Designer/Specifier	\$50.00
33721	Senior Project Manager	\$98.00
33721	Project Manager	\$84.00

Note: For Installation services see items 19 & Appendix A

#### Senior Interior Designer

**Rate:** \$68 per hour

**Education:** 4 year Bachelor's degree *or* 2 year degree with certification in Interior Design

**Experience:** 3+ years' experience working in the field of design or project management

**Certification:** NCIDQ (National Council for Interior Design Qualification), or equivalent, or 7+ years as experience as an interior designer

**Understanding:** Extensive design theory for the office environment, project management theory, critical path timelines, current egress and ADA codes, the advantages of different types of office environments, change management, budget projections, and detailed familiarity with all Inscope furniture lines

**Proficiencies:** High computer literacy including Autocad, CAP, strong presentation ability

**Responsibilities:** Understanding and executing all aspects of commercial interior design from theory to application. The Senior Interior Designer is accountable for all technical facets of any project, including quality, and will have the ability to execute all elements of the scheduled design services

#### Designer / Specifier

**Rate:** \$50 per hour

**Education:** 2 year degree with certification in Interior Design *or* 3+ years' of design experience

**Experience:** none

**Certification:** Certification in Interior Design or 1+ years' of direct design experience

**Understanding:** Extensive knowledge of Inscope product and its design application. Autocad and CAP

**Responsibilities:** Understanding and executing all aspects of office design and layout including drawing, specifying and creating proposals

1.c **Hourly Rate Description** (continued):

**Senior Project Manager**

**Rate:** \$98 per hour

**Education:** 4 year Bachelor's degree

**Experience:** 3+ years' experience working in the field of design or project management for furniture, fixtures and equipment. And 1+ years' experience in running multi task teams in executing large scale furniture contracts.

**Certification:** NCIDQ National Council for Interior Design Qualification or PMI – Project Management Institute Associate (or equivalent) or 7+ years field PM Experience

**Understanding:** Extensive project management theory for the office environment including critical path timelines, budget estimating and project tracking; understanding of how to organize and manage multiple tasks and sub contractors simultaneously, knowledge of how to create and manage asset control systems; understanding of general Government contracting, FAR regulations and working on a DOD base; familiarity with LEED & environmental standards and detailed understanding of Inscape furniture lines.

**Responsibilities:** Understanding, leading and project managing all aspects of furniture related projects from conception, to quote, to installation to follow-up. Senior Project Manager is accountable for all technical and financial facets of any project including the final quality. Senior Project Manager is responsible for understanding and complying with all relevant GSA and Government regulations.

**Project Manager**

**Rate:** \$84 per hour

**Education:** 2 year Associate degree

**Experience:** none

**Certification:** NCIDQ / PMI or 1+ years' experience working in the field of project management for furniture, fixtures and equipment.

**Understanding:** Understanding of project management theory for the office environment including critical path timelines, budget estimating and project tracking; understanding of how to organize and manage multiple tasks and sub contractors simultaneously, understanding of general government contracting, familiarity with LEED & environmental standards and detailed understanding of Inscape furniture lines.

**Responsibilities:** Understanding and project managing all aspects of furniture related projects. Project Manager is accountable for all technical facets of any project including timeline and final quality. Project Manager is responsible for understanding and complying with all relevant GSA and Government regulations.

2. **Maximum Order Threshold**

33721 - \$250,000

OLM - The cumulative value of OLM's in an individual task or delivery order cannot exceed 33.33% of the total value of the order.

Note: Orders accepted above the threshold, but with additional concessions granted.

3. **Minimum Order:** \$50.00 all SINS

4. **Geographic Area:** The 48 Contiguous States and Washington, DC (CONUS). Shipments for areas outside of CONUS (OCONUS) are to the embarkation point within CONUS.

5. **Points of Production:** Holland Landing, ON Canada & Falconer, NY USA

6. **Discount Statement:** Prices listed in the GSA pricers are list. The current GSA list pricers may be found at <https://myinscape.com/contracts/us-federal>. To calculate net price, utilize the following awarded discount table:

SIN	Description	Single Order List Per SIN	GSA Discount
33721	Inscape System (includes planna & storwal, bench & tables) & Ergonomics	\$1 - \$50,000	73%
		\$50,001 - \$500,000	76%
		\$500,001 - \$1,190,500	79%
33721	Rockit	\$1 - \$50,000	72%
		\$50,001 - \$500,000	74%
		\$500,001 - \$1,033,100	75.80%
33721	Office Specialty	\$1 - \$11,000	70%
		\$11,000 - \$250,000	73%
		\$250,001 - \$1,042,000	76%

List tier is determined from total single order list price per SIN, not per line item. GSA orders may be combined to create a single order discount if they utilize the same destination, time of shipment, and are cross-referenced to one another. Once list discount is determined, each line item should be quoted at net.

\*The MFC and GSA discounts are equivalent after rebate allowance, with MFC being FOB origin and GSA being FOB destination. MFC = Most Favored Customer

7. **Quantity Discounts:** Included in above discount chart.
8. **Prompt Payment Terms:** None. Note that prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.
9. **Government Credit Cards:** Accepted below and above the micro-purchase level. For requirements for use, see number 17.
10. **Foreign Items:** None. All items are domestic or from NAFTA countries (I.E. Canada) which qualify as domestic in regards to the "Buy American Act".
- 11a. **Time of Delivery:** 35 days ARO. Orders conforming to routine commercial criteria may be accorded shorter lead times when possible. Orders which require delivery dates in excess of 35 days shall state "do not ship prior to..." within the order.
- 11b. **Expedited Delivery:** In accordance with the Task Order when possible at no charge. However, expedited freight may incur an additional charge.
- 11c. **Overnight and 2 Day Delivery:** Not available
- 11d. **Urgent Requirements:** Contact Inscape to request a faster delivery via the "urgent requirement" clause. Additional costs may apply.
12. **F.O.B. Point:** Destination for all SINs. The delivery to the destination is defined as the shipping truck to the "Deliver To" loading dock per FAR 52.247-34. Installation, including unloading of the shipping truck, will require additional charges.
- 13a. **Ordering Address**  
 Inscape, Inc.  
 15 Tiffany Avenue  
 Jamestown NY 14701  
 T: 716 665 6210  
 GovTeam@myinscape.com

- 13b. **Ordering procedures:** For supplies and services, the ordering procedures and information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.
14. **Payment Address:** Electronic Fund Transfer as listed in SAM is preferred, alternatively:  
Inscape Inc.  
15 Tiffany Ave  
Jamestown, NY 14701 USA  
T: 905 836 7676  
GovTeam@myinscape.com
15. **Warranty Provision:** Standard commercial limited lifetime warranty as stated in each individual list pricer.
16. **Export Packing Charges:** Available and recommended for OCONUS delivery; additional price quoted upon each request.
17. **Terms and Conditions of Government Purchase Card Acceptance:** A signed credit card authorization form is required which may be requested from Govteam@Inscapesolutions.com. The card number itself may be given by phone if preferred. Also required is a written statement of the part number and quantity of the items being ordered.
18. **Terms and Conditions of Rental, Maintenance, and Repair:** N/A
19. **Terms and Conditions of Installation:** Installation service is awarded at 10% - 29% of Net product price for standard installation. The exact percentage is quoted at the task order level depending upon standard installation variables. Rates in excess of 29% may be permitted under contract when the Contracting Officer finds that "extraordinary circumstances" are present. See Appendix A (follows) for examples of standard installation variables and extraordinary circumstances.  
Additional terms:
- Installation is available via SIN 33721 only when installing the awarded product SIN's of this contract.
  - The end-user, or their contractors, may not change the awarded terms of the installation task (e.g. stop the install, change the location). If an unforeseen installation issue arises that would change the scope or add cost, Inscape reserves the right to stop work and immediately consult the Contracting Officer.
  - This SIN contains a perpetual offer, at the sole determination of the Contracting Office, for emergency product storage at the rate of 3% of product Net stored per month. Emergency product storage is defined as after the product is manufactured but is not able to be installed due to unforeseen end-user or building delay.
  - When required by the Scope of Work, but incidental to the overall furniture order, existing furniture reconfiguration and minor outside trade-work (e.g. small area carpet repair) is allowable as installation
  - Connection of the furniture to the building power is the responsibility of the client.
20. **Terms and Conditions of Repair Parts:** N/A
- 20a. **Terms and Conditions for Any Other Services:** N/A
21. **List of Service and Distribution Points:** All product is distributed from points of production. Services are executed by Inscape's local distribution partners located throughout CONUS as a sub-contractor to Inscape.

22. **List of Participating Dealers:** Contact Inscope at Govteam@myinscape.com

23. **Preventive Maintenance:** N/A

24a. **Special Environmental Attributes:** All awarded SINs for both Inscope System and Office Specialty are:  
BIFMA Level: 3  
SCS Indoor Advantage Gold: Indoor Air Quality  
FSC Chain of Custody : Veneers  
Toxics Reduction Plan: Annual Reports

24b. **Section 508 Compliance Information:** N/A

25. **Federal Identification Numbers:**

Data Universal Number System (DUNS) number: 080668756  
Tax Id: 51-0391804  
Cage Code: 7Y1V3  
Business Size: Small  
Primary NAICS: 337214, 337215 & 337127  
Primary PSC: 7110, 7195 & 7125

26. **System for Award Management (SAM), WAWF & ITSS:** Registered

## Appendix A

### Installation Variables

Standard Variable Examples

Examples of installation variables that are considered standard but may necessitate a task quote at the higher end of the awarded rate range:

- Loading dock restrictions (limited dock access, size restrictions, no dock / street unload)
- Overly phased or piecemealed installation timeline or, conversely, overly compressed install timeline requiring multiple crews
- Requirement to work around other trades
- Restrictions on elevator use
- Lack of staging area
- Inscope required to acquire local systems furniture building permits
- Overly restrictive security requirements (extensive badging, line of sight supervision, mandatory escorting)
- Urban work in the business district of a major city (e.g. NY, LA, Chicago)
- Rural work more than 100 miles from an Authorized Inscope dealer
- Requirement of Prevailing Wage
- Exact delivery time for less than full tractor-trailer load
- Storage of product off-site for less than 30 days
- Requirement for a US licensed truck driver for entering a military installation

Extraordinary Circumstances Examples

Extraordinary circumstances may necessitate a GSA schedule task quote at higher than the awarded rate. Any proposed work under extraordinary circumstances and must be reviewed and approved by the GSA Contracting Officer.

Examples include:

- Requirement of Union installers or the inclusion of other required tradesmen not part of Inscope’s installer’s personnel or subcontractors
- Requirement of installation during non-standard business hours. Standard installation hours are defined as 7:00am to 7:00pm on days of standard government operation.
- Requirement of installation above the ground floor without the use of an elevator
- Installation in facilities located Outside of the Continental United States

Bench Marks

For the convenience of the Task Order Contracting Officer, we are voluntarily stating the following pricing bench-marks (non-contractual estimates).

Task: Full, typical installation service in Washington, DC with one or two of the above standard variables applying
for Inscope Systems (SIN 33721) = 19% of net product price
for Office Specialty (SIN 33721) = 15% of net product price
for mixed SINs = 17% of net product price

# System Architecture

**inscape**

work for tomorrow

Inscape System frames are constructed of 16 gauge tubular steel uprights with welded 18 gauge steel crossrails. This strong yet lightweight construction provides ease of movement and reconfiguration.

The simplicity of the frame structure provides an intelligent solution to cable management. The absence of baseplates, apertures and corner posts eliminate barriers that restrict the routing of cables. Cabling may be routed both vertically and horizontally through the panel. Cables are laid into cable managers that easily install between panel crossrails throughout the framework. Cable managers safely cradle and segregate cables. An aperture free system means installation and reconfiguration costs are kept to a minimum. Cabling may also enter the system through the top or face of the panel. Reconfiguration is easy and economical. Cabling simply eases out of the cable managers and is laid back in at the desired point, eliminating the costly need to cut and re-terminate cables for every reconfiguration. Panels do not have creep.

### 3 1/2" THICK FRAME

The 3 1/2" Thick Frame accommodates approximately 96 Cat6 or 125 Cat5 cables per 13.5" H zone at a fill capacity of 60% between the upright and the tile. Frames and frame specific components for the 3.5" thick frame are denoted by the suffix "-3F".

### 2 3/4" THICK FRAME

The 2 3/4" Thick Frame accommodates approximately 52 Cat6 or 67 Cat5 cables per 13.5" H zone at a fill capacity of 60% between the upright and the tile. Frames and frame specific components for the 2.75" thick frame are denoted by the suffix "-2F".

### STANDARD FRAMES

A Standard Frame has a beltline cover kit enabling power to run at the beltline location without the need of a "cutout" tile. Standard frames are available for both the 3.5" and 2.75" thick frames. Frames 37" H and higher come equipped with one wire manager. Electrical and data components must be specified separately. Standard heights that are available include 37", 44", 51", 57" and 64".

**NOTE: Tiles cannot be placed over the cover kit on a 2 3/4" thick frame. The Cover Kit frame clip cannot accommodate a tile hanging from the clip.**  
**NOTE: 27" H tiles cannot be mounted in bottom position on a 2 3/4" thick standard frame.**

### BASIC FRAMES

Basic Frames do not include the electrical cover kit but may house power which is to be accessed at all locations with a "cutout" tile. Basic frames 37" H and higher come with one wire manager. Basic frames are available for both the 3.5" and 2.75" thick frames. Basic heights available include 24", 29", 37", 44", 51", 57" and 64". The 3 1/2" thick frame by 24" H includes the mounting hardware to attach to a Credenza Storage case when used in a benching application.

Both types of frames feature glides that provide 1 1/2" height adjustment allowing air to circulate under panels and throughout the office. Frames are available in 6" increments in widths ranging from 18" W to 60" W.

Standard Frames

Basic Frames

### STACK ON FRAME

The Stack on Frame consists of a 6.75", 13.5", 20.25" and 27" frame which may be installed on a Standard or Basic frame of the same width or combination of two frames as outlined in the Inscape System Application Guide only. The Stack on frame is load bearing to one storage unit above 64" H and may be stacked up to 91" H. Tiles and trim are specified separately. The top cap from the base frame may be used on the stack on frame. Stack on frames are frame thickness specific and should be specified accordingly.

### DOUBLE GLAZED STACK-ON KIT

Double Glazed Stack-On Kit is a stack on frame with a double glazed insert. The 24" to 60" W Double Glazed Stack is a fully welded frame stack on. Double Glazed Stacks which are 54" and wider are kitted and are installed on site. The Double Glazed Stack on is not load bearing and no stacks can be stacked on top of the Double Glaze. Stack on frames are frame thickness specific and should be specified accordingly. Finishes are available in Clear or Frosted Acrylic to match Double Glazed tile.

		Dimensions			
		A	B	C	D
SYSTEM	TRIM	TOP CAP TO TOP TILE	TOP TILE TO BOTTOM TILE	BOTTOM TILE TO FLOOR*	FLOOR TO CANTILEVER
INSCAPE SYSTEM	Tapered	1.1	24" h = 20.050	1.843	27.24
			29" h = 26.800		
		37" h = 33.550			
	Flat	0.65	44" h = 40.300		
			51" h = 47.050		
		57" h = 53.800			
		64" h = 60.550			

Note: Dimensions 'C' & 'D' measured with frames at lowest glide position. Frame can be raised up to 1.500" depending on configuration and leveling.

## 1 1/2" THICK SCREEN

The 1.5" Thick Screen is available in a freestanding version or one that is intended to be joined to adjacent screens. The screen is inclusive of a finished frame, 1/2" tackable core (fabric option) and glides. Various configurations of the segmented or monolithic screen are available including all fabric, fabric with acrylic or resin and polycarbonate. Whiteboard accessories should follow the same guidelines as the Whiteboard tile. No assembly is required with the screen.

## TABLE MOUNTED SCREEN

The Table Mounted Screen is constructed of a 1.5" thick extruded aluminum frame and is designed to provide modesty and privacy to adjacent work areas. This 37" H screen mounts onto a 1" or 1.25" thick worksurface and may be adjusted vertically to create the desired privacy or modesty. The tackable 1/2" thick core may be specified in any of Inscape's standard fabrics or COM. Height adjustable brackets allow for various screen height positions. It is recommended that the table mounted screen be installed 20" above the surface with 16" below. Table mounted screens cannot be attached to 1.5" thick screen brackets attaching to thicker frames.

## 1 1/2" ELECTRIFIED STORAGE FRAME

The 1.5" Electrified Storage Frame is an open structure frame which is positioned between Electrified Storage units to allow technology to run through when a 1 1/2" connection is required and a 1 1/2" screen is to run perpendicular to Electrified Storage spine.

## INSCAPE SYSTEM SLIDING DOOR

Inscape System Sliding Door is a 1 1/2" thick extruded aluminum frame which is available to match 51" and 64" panel heights and openings of 36" and 42". The sliding door includes a door assembly consisting of door trim, polycarbonate panel, two door pulls, two 2.5" adjustable wheels and top/bottom connector brackets to attach to the panel frame. A locking version is available and is secured in the closed position by a lock at the opposite side of the handle. Polycarbonate has naturally occurring variations in the material. The tile configuration must be such that the crossrail at 37" H is accessible where the lock mechanism is located. See Inscape System Application Guide.

The 36" W sliding door is installed on any panel or combination of panels 42" in width.

The 42" W sliding door is installed on any panel or combination of panels 48" in width.

Sliding Doors are handed and need to be specified left or right for the direction in which the door is required to slide once installed on the front of the workstation.

## GENERAL INFORMATION

To facilitate specification of connector kits for various multi-height panel configurations, preconfigured connector kits have been created. Connector kits include all the vertical trims, connectors, plugs and plates required to make and complete the connection at the junction point.

The panel configurations shown on the following pages have been grouped according to the type of connection: 'L' Connection (two-way 90°), 'T' Connection (three-way 90°), 'X' Connection (four-way 90°), 'V' Connection (two-way 120°) and 'Y' Connection (three-way 120°). Identify the desired connection and panel configuration and specify connectors as outlined below. A variety of panel configurations are shown on the following pages. Some configurations have more than one product code. An explanation of the product codes follow:

## PRODUCT CODE KEY EXAMPLE INCPT5053

<b>INCP</b>	panel connector
<b>T</b>	three-way connection
<b>5</b>	51" H panel
<b>0</b>	no panel
<b>5</b>	51" H panel
<b>3</b>	37" H panel

The prefix to the four digits in the product number represent the following: 'CP'-panel connector, 'L'-2-way connection, 'T'-3 way connection, 'X'-4-way connection, 'V'-2-way 120°connection and 'Y'-3-way 120°connection. The four digits represent the different heights of panels to be connected. Heights are represented by the first digit.

64" H panel	-6
51" H panel	-5
37" H panel	-3

To specify the correct panel junction, start with the highest panel and move clockwise. For example: To specify a 3-way connection comprised of 51" H and 37" H panels, start with the highest panel, 51" - 5. Proceed clockwise, 0 for no panels, 5 for 51" and 3 for 37". The code is 5053.

## FINISHES

Vertical trims are available in any of the colors shown in our current Paint Card and Fans plus textured paint finishes.

**NOTE: Tapered vertical trim is available in any of the colors shown in our current Paint Card and Fans plus textured paint finishes.**

If you don't find your configuration listed as standard product, send your request to [specials@inscapesolutions.com](mailto:specials@inscapesolutions.com) with a copy of the connection layout.

# Architecture

## Frames and Screens

### 3 1/2" Thick Double Glazed Stack-on Frames

# System

#### PRODUCT CODE KEY EXAMPLE

INSTGL24-3F

<b>INST</b>	Inscape System Stack-on Frame
<b>GL</b>	double glaze
<b>24</b>	24" W
<b>3F</b>	3 1/2" thick frame

- Clear and frosted acrylic options available.
- Must only be installed in the top location
- Is not load bearing.
- Stack on Double Glaze may span two frames.  
\*See Application Guide for spanning guidelines
- 24" to 48" W kits consist of welded frames
- 54" to 96" W kits are kitted and must be assembled onsite

#### NOTES

Be sure to specify correct thickness of stack frame based on the frame it is being installed on.

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INSTGL24-3F in Frosted Acrylic would be \$474 +\$84

		Part number	H	W	Thickness	Clear acrylic	Frosted acrylic	Accent paint
	13.5" H Double Glaze Stack-On Acrylic	<b>INSTGL24-3F</b>	13.5"	24"	3 1/2"	\$474	+\$84	+\$50

## PRODUCT CODE KEY EXAMPLE

INOF342-2F

**INOF** Inscape System Frame

**3** 37" H

**42** 42" W

**2F** 2 3/4" thick standard frame

- Includes electrical cover kit at the beltline location painted in Eco Black
- 2" deep glide cap color of black or gray (gray default)
- 1 wire manager hanger included with frame
- Compatible with electrical launched after December 2010 only
- A Beltline power track is to be specified in the beltline location
- See Application guide for restrictions with cabling
- Rectangular glides available for an upcharge of \$15 per frame

## NOTES

- 18" – 24" W frames do not come with electrical cutouts
- 30" W frames come with 1 electrical cutout
- 27" H tiles cannot be mounted in bottom position on a 2.75" thick standard frame
- Tiles cannot be placed over cover kit (beltline location) on 2.75" frame
- Top caps are to be ordered separately

# Architecture

Frames and Screens  
2 3/4" Thick Stack-on Frames

# System

## PRODUCT CODE KEY EXAMPLE

INSF048-2F

<b>INSF</b>	Inscape System Stack-on Frame
<b>0</b>	6.75" H
<b>48</b>	48" W
<b>2F</b>	2 3/4" thick fram

- Fully welded stack on kits easily installed and removed to adjust panel height.
- Load bearing – only one overhead unit on frame higher than 64" H only.
- Stack-on frames may span multiple frames.  
\*See Application Guide for spanning guidelines.

## NOTES

- Be sure to specify correct thickness of stack frame based on the frame it is being installed on
- May be stacked up to 91" H

# Architecture

## Frames and Screens

### 2 3/4" Thick Double Glazed Stack-on Frames

# System

#### PRODUCT CODE KEY EXAMPLE

INSTGL24-2F

<b>INST</b>	Inscape System Stack-on Frame
<b>GL</b>	double glaze
<b>24</b>	24" W
<b>2F</b>	2 3/4" thick frame

- Clear and frosted acrylic options available
- Must only be installed in the top location
- Is not load bearing
- Stack on Double Glaze may span two frames.  
\*See Application Guide for spanning guidelines
- 24" to 48" W kits consist of welded frames
- 54" to 96" W kits are kitted and must be assembled onsite

#### NOTES

Be sure to specify correct thickness of stack frame based on the frame it is being installed on.

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INSTGL24-2F in Frosted Acrylic would be \$462 +\$84

		Part number	H	W	Thickness	Clear acrylic	Frosted acrylic	Accent paint

# Architecture

Frames and Screens  
1 1/2" Thick Segmented Screens

# System

## PRODUCT CODE KEY EXAMPLE

SS378

<b>SS</b>	Segmented Screen
<b>37</b>	37" H
<b>18</b>	18" W

- Segmented screens may only be attached to the 3 1/2" thick tapered trim frames or 1 1/2" thick screens (brackets specified separately)
- These screens are not freestanding
- Screens include 2" dia glide with 1 1/2" height adjustability – optional gray (default) or black
- Segmented screens come fully trimmed
- All segments are optioned as one fabric pattern only
- Segments are tackable
- Fabric is applied in a railroad orientation
- Available with round glides only

## NOTES

The following fabrics are not available on segmented screens; U5005 Sprite Snow

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

# Architecture

## Frames and Screens

### 1 1/2" Thick Glazed Segmented Screens

# System

#### PRODUCT CODE KEY EXAMPLE

SSG6424

<b>SS</b>	Segmented Screen
<b>G</b>	Glazed
<b>64</b>	64" H
<b>42</b>	42" W

- Glazed Segmented Screens may only be attached to the 3 1/2" thick tapered trim frames or 1 1/2" thick screens (brackets specified separately)
- These screens are not freestanding
- Screens include 2" dia glide with 1 1/2" height adjustability – optional gray (default) or black
- Segmented screens come fully trimmed
- Clear acrylic is included in the top 13.5" segment
- All other segments are optioned as one fabric pattern
- Fabric segments are tackable
- Fabric is applied in a railroad orientation
- Available with round glides only

#### NOTES

The following fabrics are not available on segmented screens; U5005 Sprite Snow

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product SSG6424 in Grade 5 Fabric would be \$799 +\$137

37" H Adjustable  
Framed Table  
Mounted Screen  
Tackable

**PRODUCT CODE  
KEY EXAMPLE**

<b>INSD5136LH-3F</b>	
<b>IN</b>	Inscape System
<b>SD</b>	Sliding Door
<b>51</b>	51" H
<b>36</b>	36" W opening
<b>LH</b>	Left-handed
<b>3F</b>	3.5" thick frame

- Sliding doors consist of polycarbonate material which has naturally occurring variances in the material
- Sliding door includes complete door assembly (trim, polycarbonate material, two door pulls, two 2.5" adjustable casters and top/bottom connector brackets to attach to the panel – optional lock available)
- Black casters
- Locking option available at an upcharge of \$142 per door
- When locking door is specified the crossrail at the 37" H location must be accessible between two tiles for the locking mechanism to function
- See Application Guide for tile configuration to accommodate locking mechanism

**NOTES**

- Be sure to specify correct sliding door configuration based on the frame it is being installed on
- Sliding doors are specific to frame thickness being installed
- Sliding doors are handed and are based on the direction the door slides to open from front view
- Specify the 36" W sliding door on panel or combination of panels 42" W or greater
- Specify the 42" W sliding door on panel or combination of panels 48" W or greater

		Part number	H	W	Clear fluted / White fluted polycarbonate	Accent paint

		<b>INSD6442RH-2F</b>	64"	55"	\$1615	+\$165

Inscape System 2 1/2" and 3 1/2" frames may be connected in a variety of ways including on and off-module, straight inline, two-way, three-way and four-way configurations. Frames of the same height or frames of differing heights may be connected together. All top caps, end of line trim, and connectors must be specified independently from the frame. To facilitate specification, connectors are available in same height kits which include all connector brackets, plugs, plates, trim clips and finished trim. 90° and 120° connections are achievable with both thickness of panel. When creating frames of varying heights, kits need to be built up. A combination of same height "L", "T" or "X" connections along with Stack-on Connectors and vertical trim will create a finished connection. Begin by connecting all common heights and working up.

A handful of universal connectors create all Inscape System panel configurations for the 2 3/4" and 3 1/2" frames. The 1 1/2" screen has its own set of connectors which are specific for this thinner screen. A 3/16" Allen Key is all that is required to fasten connector bolts. Trim is constructed of aluminum.

### INLINE CONNECTORS

Inline connectors are specified to join two frames together which are in alignment. These connectors are specified based on the height of the panels.

### OFF MODULE CONNECTIONS

Off module connections are specific for frame thickness as well as location where the panel will be mounted to the spine. The off-module panel may be positioned at the end of the panel or in the middle of the panel, with the corresponding bracket. Cannot be used with monolithic tiles on spine. See Inscape System Application Guide.

### CONNECTION KITS

Connection kits come in a variety of heights and configurations, within 90° and 120° connections and are based on the panel orientation. Within the connection kit, finished trim, panel connector bracket and short bolts are included depending on the configuration specified. Connector kits are panel thickness specific due to the thickness of the finished trim. The brackets and bolts within are part of the universal kit of parts and may be used for either thickness of panel. Special connectors have been structured to connect 3 1/2" and 2 3/4" in the same height connections. These are also kitted and include connecting brackets and flat trim profile only. When specifying connections on module and of varying height (when only one thickness of panel is specified) the connection will need to be "built". This can be done by specifying the lowest same height connection and building stack trims to complete the top connection portion. There are a few pre-built connector kits for varying height configurations. Connector kits for Stack-on frames allow for construction of multi height connections.

## WALL CONNECTORS

Wall connectors are specified based on the height of the panel attaching to the wall. All hardware is included in order to attach the panel to the wall. This connector is not visible, and sets frame off wall slightly.

## END TRIM

End trim is kit structured to include all brackets, bolts and finished trim; Tapered or Flat. Trim profiles are available in two profile options for the 3 1/2" thick frame; Tapered and Flat, and Flat for the 2 3/4" thick frames. When connecting these two thicknesses of frame at a connection, only the Flat trim profile may be specified. Vertical trim heights are available to match all frame heights as well as in four modular heights of 6.75", 13.5", 20.25" and 27". Trim is manufactured from aluminum and always aligns straight and true when frames are connected. All painted aluminum vertical trim and top trim are easily removed to facilitate lay in of cables.

## HI-LO TRIM

Hi-Lo trim is designed to be situated at the end of line condition of a higher frame, where the top cap of a lower height frame meets the vertical trim. The profile of the top cap has been scribed from the Hi-Lo trim.

## STACK-ON END TRIM

Stack-on end trim is used when a higher frame requires vertical end trim at a connection. Hi-Lo trim may be used in this application for Flat profile trim because there is no 'scribing' that is required for this profile.

## TOP CAPS

Top caps are specified separately. Top caps include clips to mount on a frame or combination of two frames as outlined in the Inscape System Application Guide. Painted aluminum profile is available for both thickness of frame. Painted aluminum tapered is available for 3 1/2" thick frame. When spanning two frames when 60" or less in width, two additional Jesters are required to be specified.

## 1.5" THICK SCREEN CONNECTORS

1 1/2" Thick screen connectors allow for two-way ("L"), three-way ("T"), and four way ("X") connections. Each condition, excluding the inline, includes a 1 1/2" square extruded aluminum connector post and the required number of post connector clips. The inline condition only requires inline connector clips which mount directly into the frames of the adjoining screens to complete the connection. The connector post may be finished in any of the standard Inscape System paint finishes.

Post connector clips are a standard black finish. Universal 1 1/2" connector kits include all required connector hardware and trim necessary to make 'L', 'T' and 'X' connections. Specify one height specific universal connector kit to accommodate any of the three corner conditions. Inline connector kits come complete with the required amount of connector clips.

## CREDENZA STORAGE BENCHING COMPLIMENT END TRIM

Credenza storage benching compliment end trim is specified where the low height panel is situated between two Credenza Storage cases and end trim is to be specified. This trim is available with cutout or without depending if a power feed needs to enter at that location. The trim can be painted the same color as the cases. Two end trim types have been designed; one to correspond with a lateral top and one for a cushion top. These are specific to the situation in which they are being installed. This is used for 3 1/2" thick application only. See Inscape System Application Guide.

- Connectors and trim are specified independently of frames
- All mounting hardware and finish trim is included for corresponding frame thickness

**TOP CAP**

- Top caps may span two frames. See Inscape System Application Guide for details
- Top caps up to 60"W requires two additional Jesters to be specified if spanning multiple frames (ie a 60"W top trim installed on 2-30" frames)

**END TRIM**

- Stack-On End Trim is used when stack frames are specified and full height trim is not specified (whenever possible order full height trims when adding a stack on frame)

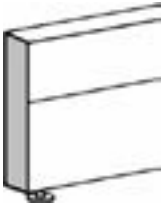

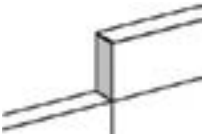

- Hi-Lo End trim is used where two frames in alignment are of different heights. The Hi-Lo End trim mounts to the side of the higher panel to finish it off
- Flat Hi-Lo End Trim may also be used in a stack on solution. The flat bottom profile allows for this trim to be used in multiple conditions

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INTC18-3F Tapered in an accent paint would be \$44 +\$8

# Architecture

Connectors and Trim  
3 1/2" Thick 90° Connector Kits

# System

- Inline connectors are required to be specified when frames are connected inline
- Off-module bracket "MP" – when an off-module frame is to be mounted in the middle of the frame (frame thickness specific)
- Off-module bracket "EP" – when an off-module frame is to be mounted at either end of the frame. See application guide
- For back to back off-module applications at either end of a panel, 2x "EP" off-module bracket codes are required
- Two sided off-module brackets are specified when frames are of- module on both sides of the "spine" frame
- Off-module bracket suffix (3F) is based on the frame thickness
- Off-module brackets cannot be used where monolithic tiles are present on spine. The lower bracket requires segmentation in tiles to attach to crossrail
- Specify wall start connector based on the height of the frame (64" to be cut on site when used with 57" high frame)

	Part number	H	List price
	Inline Connector Kit	<b>INLINE-1</b>	All Stack on Frame" \$0

		<b>INST27Y-3F</b>	27"	3 1/2"	\$210	\$210	+\$23

- Connectors and trim are specified independently of frames
- All mounting hardware and finish trim is included for corresponding frame thickness
- 2 3/4" thickness is not available in the tapered profile

**TOP CAP**

- Top caps may span two frames. See Inscape System Application Guide for details
- Top caps up to 60" w requires two additional Jesters to be specified if spanning multiple frames (ie a 60"W top trim installed on 2-30" frames).

**END TRIM**

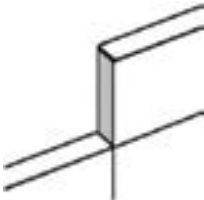

- Hi-Lo End trim is used where two frames in alignment are of different heights. The Hi-Lo End trim mounts to the side of the higher panel to finish it off
- Flat Hi-Lo End Trim may also be used in a stack on solution. The flat bottom profile allows for this trim to be used in multiple conditions

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INTC18-2F in an accent paint would be \$44 +\$8

# Architecture

Connectors and Trim  
2 3/4" Thick 90° Connector Kits

# System

- Inline connectors are required to be specified when frames are connected inline
- Off-module bracket "MP" – when an off-module frame is to be mounted in the middle of the frame thickness specific)
- Off-module bracket "EP" – when an off-module frame is to be mounted at either end of the frame. See application guide
- For back to back off-module applications at either end of a panel, 2x "EP" off-module bracket codes are required
- Two sided off-module brackets are specified when frames are of- module on both sides of the "spine" frame
- Off-module bracket suffix (2F) is based on the frame thickness
- Off-module brackets cannot be used where monolithic tiles are present on spine. The lower bracket requires segmentation in tiles to attach to crossrail
- Specify wall start connector based on the height of the frame (64" to be cut on site when used with 57" H frame)

	Part number	H	List price

Tiles are available as fabric, painted, tackable, Nuform, Double Glazed and whiteboard. Tiles are interchangeable between 2.75" and 3.5" frame thickness (the thickness of the frame is determined by the tile clips which come with the frame). Tile heights vary and must always align with a crossrail on the frame as this is where the tile clips are located. If alternative tile configurations are required, additional crossrails may be specified separately and installed in the field (crossrails will include tile clips depending on thickness opted for). Tiles may be positioned in any location unless otherwise stated or crossrail does not permit.

Tiles are held in place by tile clips. These clips snap between panel crossrails and may easily be removed and/or replaced if necessary when changing the thickness of the panel. Clips support panel tiles and top trim. The clips are made of Delrin which is a resin similar to nylon in strength but has more rigidity and superior memory. These characteristics allow the Inscape System clips to retain their original shape without permanently deforming under continual pressure. This ensures tiles and trim will snap into place with a solid "click" time after time.

### FABRIC AND PAINTED TILES

Fabric and painted tiles are available 27", 20.25" and 6.75" H, as well as 13.5" and are constructed from 24 gauge galvanized steel. Powder-coated and fabric-covered steel tiles have a flame spread rating of less than 200 when tested according to ASTM-E84. Fabric-covered tiles are available in standard fabrics or COM. COM fabrics are subject to approval. White or extremely light colored COM fabrics will incur an upcharge of 25% to the tile pricing with which the fabric is being applied. This is due to special handling of the fabric and tiles, in addition to painting of the tiles. Painted tiles are available in the colors shown in our Color Guide and are available in the following styles: plain steel, perforated, and steel screen. Fabric on tiles is applied in a railroad orientation.

### TACKABLE TILES

Tackable tiles are constructed from 24 gauge cold rolled steel with a paint finish on all surfaces to prevent corrosion. The same general rules from the fabric tile section apply to the Tackable tiles. Fabric on tiles is applied in a railroad orientation. NRC 0.57, STC 9.

**Tackable Acoustical tiles are available through Standard Specials with NRC of .73 and an STC of 12.**

Nuform Tiles consist of gray melamine-backed MDF substrate 0.375" thick, with vacuum-formed Nuform foil over the front's surface and sides. The back-side of the tile also has routing features that accept zinc die-cast tile clips. All Nuform tiles incorporate a stiffener on the rear of the tile to ensure straightness and rigidity. This stiffener limits where the tile may be placed on a 2.75" thick frame. Nuform tiles cannot be specified in a location where a power track is installed due to interference. A sticker on the back of Nuform tiles provides UL flame / smoke-rating information. Woodgrain pattern is vertical. Due to limitations in the foil size, 48" and wider tiles are not available in F06 Walnut.

### WHITEBOARD TILES

Whiteboard tiles are available in two heights, 13.5" and 20.25". Tiles are constructed from 24 gauge cold rolled steel with optional white, gray or black paint finishes that has been specifically formulated for dry erase markers. Whiteboards are seamless and fit same locations as standard painted tiles.

**NOTE: Inscape whiteboards are specifically designed for use with DRY-ERASE markers only. WHITEBOARDS ARE NOT INTENDED FOR USE WITH PERMANENT MARKERS. Inscape advises the use of Sanford Expo Dry Erase markers with whiteboards. For a thorough cleaning, use Sanford Expo spray cleaner.**

## PAPER MANAGEMENT TILES

Paper management tiles support horizontal paper management accessories. Organizers may be positioned at any point along the width of the tile. Three slats structured into the tile allow for three different height options for the accessories to be installed. Accessories may be found under Horizontal Accessories under the "Storage and Accessories" section. Maximum load capacity is 75lbs. When specifying paper management tiles which will be supporting a monitor arm, a Paper Management Reinforcing kit is required for additional structure. The 54" and 60" w tiles are pre-structured with these kits.

## PERFORATED TILES

Perforated tiles are constructed of 24 gauge galvanized steel, the Steel Screen tiles are constructed from 24 gauge cold rolled steel. Tiles may be painted in any of Inscape's standard colors or color matches.

## COMMUNICATION TILES

Communication tiles provide power OR data access. The 24" and 30" W include one cutout while all wider tile widths include two cutouts. Tiles provide electrical access in frames 30"w and wider only and data access in all panel widths. Bezels in tile may be specified in black, white (close match to P290 – Aluminum Leaf) and gray (close match to P326 – Moonlight) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

## FABRIC/FINISHES & WORKSURFACE GENERAL NOTES

Fabric patterns which are available in 54" and 55" both have limitations on the sizes of tiles available. Tile sizes longer than 42" are not available.

Codes with the following suffix have specific install locations

<b>UD</b>	Upper Deck
<b>BL</b>	Beltline
<b>BS</b>	Base

## MULTI ACCESS TILES

Multi access tiles provide electrical AND data access. Cutouts align with power track and proper tiles must be specified in specific areas if stated. Data and Electrical components may be specified from the Technology section. Bezels in tile may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

Codes with the following suffix have specific install locations

<b>UD</b>	Upper Deck
<b>BL</b>	Beltline
<b>BS</b>	Base

## MONOLITHIC TILES

Monolithic tiles are specified based on the height and width of the frame with which they are being installed. Monolithic tiles are available in painted or fabric (fabric wrapped steel).

## DOUBLE GLAZED TILES

Double glazed tiles are available in 13.5" H and may be installed on frames 24" to 48" W in place of a tile. Double Glazed tiles feature a double pane of frosted acrylic or clear acrylic framed by vertical and horizontal trim. Double Glazed tiles may be installed one on top of another. If wider than 60" of glaze is desired; Stack on Double Glazed Kits may be specified.

## PLANNA MULTI ACCESS TILE

The Planna multi access tile is required for termination of electrical and data at points behind the Planna case. The multi access tile can be optioned in any standard paint color. The multi access tile designed for Planna includes proper hardware to mount the tile to the frame. Be sure to specify electrical components such as the Upper Deck electrical kit, duplexes and phone/ data components separately.

This tile is only structured in conjunction with the 3.5" thickness.

## PRODUCT CODE KEY EXAMPLE

IN13.5TK18

<b>IN</b>	Inscape System
<b>13.5</b>	13.5" H
<b>TK</b>	Tackable
<b>18</b>	18" W

- Fabric applied in a railroad orientation as standard
- Fabric tile is magnetic
- NRC 0.55, STC 9
- Wall Mount Tile Kit must match height of tile
- It is recommended that tackable tiles are not to be used on the outside of a workstation
- Be sure to confirm crossrail locations will accommodate tile height
- Crossrails can be found in the accessory section of the price list under Panel and Table accessories

## NOTES

See finishes section for fabrics that require scrim.

Tile size limitations exist for some fabrics, see finishes section.

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product IN13.5TK18 in Grade 2 with scrim would be \$145 +\$7 +\$25

	Part number	W	Grade 1/ COM/ Base price	Grade 2	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Scrim

<b>IN</b>	Inscape System
<b>13.5</b>	13.5" H
<b>NFP</b>	Nuform patterned tile
<b>HE</b>	Herringbone
<b>18</b>	18" W

- Only available for use on 37", 44" and 51" H frames
- Patterned tiles must be applied in specific configurations based on the height of the frame in order for the pattern to line up correctly
- Due to limitations in the foil size, 48" and wider tiles are not available in F06 Walnut
- Direction of woodgrain is horizontal

**NOTES**

Patterned tiles cannot be used with the following as they will interfere with the installation:

- Off-module brackets
- Power poles
- Worksurfaces front edge support brackets
- Up-mount bins
- Transaction Tops
- Electrical covers
- Dekko power tracks for 2 3/4" frames

Can only be used on the outside face of a workstation

## PRODUCT CODE KEY EXAMPLE

IN37F18

<b>IN</b>	Inscape System
<b>37</b>	37" H
<b>F</b>	Fabric
<b>18</b>	18" W

- Fabric applied in a railroad orientation as standard
- Fabric tile is magnetic
- Be sure to confirm crossrail locations will accommodate tile height
- Crossrails can be found in the accessory section of the price list under Panel and Table accessories

## NOTES

See finishes section for fabrics that requires scrim.

Tile size limitations exist for some fabrics, see finishes section.

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product IN37F18 in Grade 2 with scrim would be \$258 +\$15 +\$33

	Part number	W	Grade 1/ COM/ Base price	Grade 2	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Scrim

Planna Storage Benching Multi Access

# System

**PRODUCT CODE**  
**KEY EXAMPLE**

IN6.75MAP30B

**INPL** Inscape System  
Planna

**6.75** 6.75" H

**MAP** Multi access - painted

**30** 30" W

- Use with 3.5" thick panel only
- Paint finish only
- Painted tiles are available in any of Inscape's standard paint colors or a custom color can be accommodated
- Painted tile is magnetic
- Flush bezel color option of black (default), white and gray
- Be sure to confirm crossrail locations will accommodate tile height
- Crossrails can be found in the accessory section of the price list under Panel and Table accessories

The Foam Bumpers are required for the following tiles then they are used directly below a top can on a 3.5" frame:

- 13 ½"h tiles that are 54" or 60" wide that are NOT Screen, Tackable, Wall Mounted Tackable or Whiteboard require 1 bumper
- 20 ¼"h tiles that are 54" or 60" wide that are NOT Screen, Tackable, Wall Mounted Tackable or Whiteboard require 1 bumper
- Whiteboard tiles 36" wide or wider require 2 bumpers
- 27"h tiles that are 48" wide that are NOT Nuform require 2 bumpers

Foam Bumper for back of select tiles

# System Technology

**inscape**

work for tomorrow

Inscape System electrical is UL and CSA approved. New York City and Chicago solutions are also available as standard offering. The electrical system features 8 wires and 4 circuits that can be configured in a 2+2 or 3+1 circuit configuration. All electrical components, with the exception of the power feed (which must be connected to the building power supply by a licensed electrician) may be installed by furniture installers, unless otherwise stated by jurisdiction of the installation.

Inscape System electrical components consist of the following: Floor/Wall power in-feed, ceiling power in-feed, chimney feed, power tracks, jumper cables and duplex receptacles. Power components snap into place without the need of tools.

**POWER IN-FEED CONNECTIONS**

Power in-feed connections can be made through a wall, column, or floor connection. Power in-feed connections consist of an 84" long liquid tight cable and a 45" flex cable connected by a 3" metal coupler and elbow joint to sit between bottom rails. The liquid tight portion of the Power in-feed must be connected to the building power supply by an electrician.

If two power feeds are being specified for one cluster of stations, care must be taken not to cross connect the two feeds through jumper cables and power tracks.

New York City has requirements for special power entry assemblies. A qualified electrician is required to hard-wire the **New York City In-feed** from the entry box to the power source. The New York City feed works for side feed, end feed or ceiling feed.

The City of Chicago does not permit the use of pre-wired modular electrical systems. To simplify hardwiring of the Inscape System panel, the **City of Chicago Hold Down Bracket** is available. When requiring power and data in the beltline location, it is required that basic frames be specified with the width specific code (ECHB-BL- ). The beltline location code includes the beltline cover as well as the City of Chicago Hold Down bracket which is based on the width of the frame. When specifying in locations other than at the beltline, an attachment bracket (INECHB) is available. Specify two INECHB for each power entry point, one for the power feed and one for the outlet. (The outlet box is NOT supplied by Inscape). INECHB's are available in packages of 6. **Boxes should be sourced through Ental Industries or J&A Sheet both local Chicago suppliers of electrical junction boxes.**

**NOTE: Panels 30" W will accept one double-sided outlet box. Panels 36" W and wider will accept two boxes. INECHB's may also be specified to mount multi-user termination boxes inside the panel.**

**WIRE DESIGNATION**

**2 + 2 Circuit Configuration**

**2+2**

- Circuits #1 and #2 share one oversize neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.
- Circuits #3 and #4 share the other oversize neutral and isolated ground to provide isolated power to computers.

**3 + 1 Circuit Configuration**

**3+1**

- Circuits #1, #2 and #3 share one oversized neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.
- Circuit #4 uses the other oversized neutral and isolated ground to provide isolated power to computers.

**CEILING POWER AND DATA FEEDS KIT**

Ceiling power and data feeds kit includes a split top trim to facilitate cable entry into the panel, a ceiling grommet, a 16' long electrical cable and power pole featuring a septum to separate power from data cables to avoid electromagnetic interference (EMI). Specify ceiling power pole according to panel width. The ceiling power entry cable must be connected to the building power supply by an electrician. If two power feeds are being specified for one cluster of stations, care must be taken not to cross connect the two feeds through jumper cables and power tracks. The entire power pole accommodates 61 Cat6 and 78 Cat5 cables at a 60% fill capacity if no electrical cable is routed through pole. If electrical is routed within power pole, at a 60% fill capacity, 46 Cat6 and 59 Cat5 cables may be accommodated.

**THE CHIMNEY CEILING FEED**

The chimney ceiling feed carries up to 99 Cat6 or 128 Cat5 cables from the ceiling into the panel at 60% capacity when electrical is routed within chimney feed as well. If only data is being routed through Chimney Feed 147 Cat6 or 189 Cat5 cables may be routed through the chimney feed. The chimney kit consists of an 18" W Basic frame which includes an internal channel, ceiling collar (white only), and top trim. A septum within the chimney feed separates power and data cables. All tiles and vertical end trim must be specified separately. The 16' power entry cable is optional and is specified by the appropriate code.

## **POWER TRACKS**

Power tracks are specified for frames 30" W and wider. This power track mounts at the beltline location of a 3 ½" thick Standard frame by clips that are shipped with the frame. The 30" W power track accepts one duplex per side. A power track 36" W and wider accepts two duplexes per side. Power tracks do not include jumper cables. Jumper cables must be specified to carry power from track to track (see Application Guide for length requirements).

## **POWER TRACK KITS**

Power track kits consist of a power track and clips to attach the power track to a crossrail. The kit allows for power tracks to be mounted in all locations of the 2 ¾" thick panel and in locations other than the beltline location in the 3 ½" thick standard frames. Jumper cables and receptacles are specified separately. The 30" W Power Track Kit accepts one duplex per side. Power Track Kits which are 36" W and wider accept two duplexes per side. Power Track Kits may be specified below the following; Transaction Tops, Up mount Bins, Stack on Glaze, Add on Glaze and Double Glazed Tiles. Power Track Kits MAY NOT be specified below Twin Bins or Power Poles.

## **JUMPER CABLES**

Jumper cables by-pass non-powered panels and also facilitates connections from power track to power track. Jumper cables must attach to power tracks only and cannot be attached to adjacent jumper cables or power in-feeds. Product codes indicate the width of the jumper cable which may be cross-referenced in the Inscape System Application Guide. Various widths of jumper cables are available to facilitate various applications and configurations.

*\*See Inscape System Application Guide for details.*

## **DUPLEX RECEPTACLES**

Duplex receptacles snap into power tracks back-to-back and may be accessed through cutouts in either the electrical cover plate with standard frames or multi-access and communication tiles in all other locations and basic frames. Duplexes are interchangeable amongst the varying power track locations. However, specific duplexes are required for various frame thicknesses and Electrified Storage, and need to be specified accordingly. Specify duplexes according to circuit configuration, 2+2 or 3+1. The IN3D3-\_ duplex is specific to 2+2 wire configurations and the IN3DU3-\_ duplex is specified for 3+1 wire configurations. General rule is no more than 12 receptacles per circuit per power in feed. Duplexes may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf).

Controlled receptacles to satisfy California Title 24 are available. These receptacles control circuits through building switches. When circuits are controlled through building switches, it is required to identify which circuit is controlled to the end user. To identify the receptacles on the controlled circuit, Inscape's controlled receptacles have a power mark (circle with the vertical line). The fit and function of these receptacles are same as the standard receptacle offering only application is in controlled circuits.

USB receptacles are also available. The snap into the standard power track. Each module provides 2 amp output via 2 USB ports and are available for both 2+2 and 3+1 wire configurations. Duplexes may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf.)

## DATA COMPONENTS

### DATA HANGER BRACKET

The Data Hanger Bracket provides a place for a voice/data box to be installed within the panel behind the tile (voice/data box not included). The bracket will accommodate up to a 6 outlet faceplate and is packaged in pairs.

### HINGED COVER (INHRC)

The hinged cover (INHRC) snaps into the cutouts which are found in multi access and communication tiles. When data faceplates and receptacles are not required the hinged cover provides a visual and protective cover.

### FIBER OPTIC OUTLET (INCFO)

Fiber optic outlet (INCFO) is specified to be installed in a cutout in a multi access or communication tile. May be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf).

### DATA AND COMMUNICATION FACEPLATE (INCDP)

The data and communication faceplate (INCDP) installs in a cutout in a multi access or communication tile where plug and play access is required. The faceplate provides three “slots” where the Category 5 (INCABRJ45), Category 6 (INCABR6J45), and/or Telephone Jacks (INCRJ11) may be inserted. All “openings” need to be filled with data or phone jacks, The Blank Data Plate Insert (INCB) fills in any which are not being used. Data components may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf). Telephone Jacks (INCRJ11) are not available in gray. Data Communication Plates (INCDP) are not currently available in white.

### WORKSURFACE GROMMETS

Worksurface grommets are field installed and instructions are available. Inscape cannot and will not be held responsible for the quality of workmanship executed by any installation firm engaged to provide grommet-cutting services required for the field installation of our grommet sleeve/cap offering.

### CLAMP-ON POWER MODULES

Clamp-on power may be clamped along edge of worksurface for plug and play access to electrical/voice/data. Power Modules plug into the duplexes and attach to 1” and 1 ¼” thick worksurfaces.

The Clamp-On Power Module has a 3 receptacle/1 dual USB port configuration and is available in a black or white finish. It has a 96” long power cord and LED surge protection indication. The mount includes a device holder.

The Clamp-On Power Module with Colored Components comes in many different configurations with receptacles, USB (1 type A and 1 type B) ports and availability lights. Power Modules come in black, white or gray and have colored options for the lid; Black, White, Teal, Red, Purple, Blue, Green, Gray. The availability light is user controlled and requires free software download.

### CABLE HOOKS

Cable Hooks support and segregate data cables. Each frame 37” and higher ships with one cable manager. Cable hooks carry data cables to their termination voice/data point at a multi access or communication tile for plug and play access or to hanger brackets which are located behind the tile.

### WIRE MANAGEMENT CLIPS

Wire management clips are required when power is being routed from a Credenza Storage benching application frame to the worksurface. Where cabling is running from behind a Credenza Storage case, these wire management clips are mounted to the underside of the inside of the case and the wires are cleanly routed to the main surface. These clips come in a package of 10 and are white in color.

### WIRE CASING

Wire casing manages cables and technology from a worksurface to the floor. Casing is 29” long but can be adjustable in length by removing or adding “links”. Casing is available in gray. As standard the wire casing accommodates 28.5” H worksurface heights. The wire casing accommodates 30 Cat5 cables with electrical works at a 60% fill capacity which is recommended. Approximately 36 Cat5 cables may be accommodated in the wire casing at a 60% fill capacity without electrical works.

### POWER BAR

Power bar is a white power bar consisting of 6 outlets and a 10’ cord which may be specified to provide additional outlets. Addition of power bars should be taken into account when determining the amount of power required for a single or a cluster of stations. The power bar may be mounted under the worksurface.

### ELECTRIFIED STORAGE COMPLIMENT TECHNOLOGY COMPONENTS

Electrified storage compliment technology components have been designed to fit within or compliment the Electrified Storage case. These components essentially work the same as the frame components but are specified based on specific lengths in relation to Electrified Storage.

#### ELECTRIFIED STORAGE CABLE CLOSETS

The electrified storage cable closets are designed to facilitate technology entering the Electrified Storage cases if a panel is not present. The cable closet is specified for the end of an Electrified Storage single case or run of cases. The closet is 1 ½" space thick, 18" W and is specified based on the height of the case with which it is mounting to. Technology may enter the cable closet via the floor or ceiling. Specify correct closet for desired application.

When ceiling feed is required, the **Cable Feed Kit** for the cable closet is required to be specified separately based on the ceiling height. Cable closets which attach to the 1 ½" screen are available to allow for technology to enter an Electrified Storage unit when the 1 ½" screen is being utilized which does not carry power. Be sure to specify inline connectors for the connection of this cable closet to the screen. Closets include all hardware to attach to the Electrified Storage case.

**NOTE: Holes are required to be drilled in the case in order to attach cable closet brackets.**

#### ELECTRICAL MODULE SIDE COVER

Electrical module side cover is specified for the end of an Electrified Storage unit to conceal the technology zone when a panel, screen or cable closet is not specified. This is a value engineered solution for the finishing of an Electrified Storage run. This cover may be painted the same colors as the Electrified Storage cases.

#### ELECTRICAL MODULE FRONT COVER

Electrical module front cover come standard with all Electrified Storage base cases; one side with cutout and one side without. When the configuration of an Electrified Storage base unit calls for additional cutouts or no cutouts on the other side of the unit, the appropriate front cover may be specified. The 30" W front cover only includes one cutout.

- Power in-feed connections consist of an 84" long liquid tight cable and a 45" flex cable connected by a 3" metal coupler and elbow joint to sit between bottom rails
- All electrical components are standard 8 wire configuration

	Part number	List price
 <p>Standard Floor/Wall Power In Feed Kits</p>	<b>INEFWK-8</b>	<b>\$361</b>
 <p>New York City Power In Feed Kit</p>	<b>INEFWK-NY-8</b>	<b>\$641</b>

- The ceiling power pole accommodates a maximum ceiling height of 11' when placed atop any systems frame height
- See Inscape System Application Guide for compatibility with ceiling heights
- Power pole kit includes top trim, power pole (exposed height noted below) and electrical power in-feed
- "2F" denotes use with 2 ¾" thick frame  
"3F" denotes use with 3 ½" thick frame

**NOTES**

- Beltline Power Track or Power Track Kit must be located in frame where power pole is entering in order for in-feed to connect

- City of Chicago bracket for beltline is for 3 ½" thick frame beltline location only
- City of Chicago bracket is compatible with upper deck and base locations in 2 ¾" and 3 ½" thick frames
- "2F" denotes use with 2 ¾" thick frame, "3F" denotes use with 3 ½" thick frame
- Boxes should be sourced through Ental Industries or J&A Sheet both local Chicago suppliers of electrical junction boxes
- Brackets are painted in Eco Black

- The Hinged Cover is a plastic cover that acts as a hinged door to allow access to the cables if needed. Available in color options of black (default), white and gray
- White close match to 168 Glacier White and Gray close match to 290 Aluminum Leaf
- Data hanger bracket is paint Eco Black and allows for industry standard face data plate mount

**NOTES**

Data cannot be installed directly back to back in a 2 ¾" thick frame application

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INHRC in Gray would be \$22 +\$11

	Part number	Wt (lbs)	Black/ base price	White	Gray
 <p>Data Outlet Hanger Brackets (pair)</p>	<b>INDPMT-W</b>	2	\$49	—	—
 <p>Hinged Cover for Tiles with Cutouts</p>	<b>INHRC</b>	—	\$22	+\$11	+\$11

- Grommets must be field installed
- Round Grommet = 2" diameter
- Rectangular Grommet = 3" x 5.25"
- Power Modules mount to the back edge of a surface and are accessible by the user above the surface
- Power Modules plug into the duplexes
- The Clamp-On Power Module is available in a black or white finish. It has a 96" long power cord and LED surge protection indication. It attaches to 1" and 1 ¼" thick worksurfaces and the mount includes a device holder.
- The Clamp-On Power Module with Colored Components comes in many different configurations with receptacles, USB (1 type A and 1 type B) ports and availability lights. Power Modules come in black, white or gray and have colored options for the lid; Black, White, Teal, Red, Purple, Blue, Green, Gray. The availability light is user controlled and requires free software download.
- Flip-up Power & Data Module is finished with a clear anodized aluminum with white inserts and a 72" long power cord
- All electrical components on this page are field installed

work for tomorrow

# Worksurfaces & Supports

Panel Mounted Worksurfaces  
General Information

# System

Depth dimension is nominal. Depths are 1" less than stated to provide a 1" gap between the worksurface and panel to facilitate wire management.

True sized worksurfaces are actual size for both the depth and the width.

## IMPERIAL TO METRIC CONVERSIONS

Inches	mm
18"	457
24"	610
30"	762
36"	914
42"	1067
48"	1219
54"	1372
60"	1524
66"	1676
72"	1829
78"	1981
84"	2134
90"	2286
96"	2438

## ELECTRIFIED STORAGE WORKSURFACES

Electrified storage worksurface lengths are true size to what is printed in the price list and are 1" less in length than a module line (panel). This allows for a 1" gap between the Electrified Storage unit and the end of the worksurface facilitating wire management and space for the Electrified Storage worksurface support bracket. This 1" less in length also allows the worksurface to line up on-module with a panel. Optional pencil groove is available.

## NUFORM CLASSIC AND NUFORM SELECT WORKSURFACES

The Nuform top is a thermo-formable polymer based sheet continuously bonded to a 1 1/4" or 1" thick MDF substrate. The polymer sheet is surface coated with a scratch resistant film. Colors are homogenous throughout the film thickness. Top and edge are one continuous surface with no edge seams. The underside of the top is finished in a low pressure melamine. Nuform tops have the option of a pencil groove running across the width of the worksurface as standard and depth for conference tables. Two price options are available - Nuform Classic and Nuform Select.

Limitations exist with the F09, F38, F40, F42, F43, F45, F46, F47, F48, F49, F50, F51, F57, F58 & F59 Nuforms due to the directional pattern. 48"w standard and split corners are not possible for the above referenced Nuform.

## EDGE DETAILED - NUFORM CLASSIC & NUFORM SELECT

1 1/4" Straight Edge

1" Straight Edge

1 1/4" Tapered Edge

1" Tapered Edge

Top and edge are one continuous surface with no edge seams.

## LAMINATE WORKSURFACES

Plastic laminate is laminated to 1.25" thick particle-board. The underside of the worksurface is finished with a man-made, wood-fiber veneer backer. Worksurfaces specified with a plastic laminate finish include a 2mm edge banding in a coordinating color. Plastic laminate tops do not include a pencil groove.

All worksurfaces default to 1.25" thick, Straight edge. Pencil Groove is only available on Nuform.

## EDGE DETAIL - LAMINATE

Straight Edge

**Load capacity for freestanding and panel mounted worksurfaces is 4.5lbs per linear inch.**

## Worksurfaces & Supports

Panel Mounted Worksurfaces  
General Information

# System

### GRAIN DIRECTION

Grain direction on woodgrain Nuform worksurfaces is as denoted below.

### ADJUSTABLE HEIGHT WORKSURFACES

Adjustable height worksurfaces are available in a panel mounted version which mounts on-module to the Inscape System frame. Worksurfaces provide gas cylinder height adjustment ranging from 28.5" to 49.5" with a lift capacity and calibration of a recommended 25lbs (not including the worksurface). Worksurfaces structured on the height adjustable mechanism are 1" less in stated width in the price list, and are meant to be installed on center to the base allowing for a gap between adjacent surfaces to eliminate pinch points. The base mechanism of the worksurface is available in gray only. See the Inscape System Application Guide for application notes and restrictions.

# Worksurfaces & Supports

Panel Mounted Worksurfaces  
90° Rectangular Tops

# System

## PRODUCT CODE KEY EXAMPLE

INSWW2423

<b>IN</b>	Inscape System
<b>SWW</b>	90° worksurface
<b>24</b>	24" D
<b>23</b>	23" W

- 90° worksurfaces are 1" less in length than standard worksurfaces to accommodate a wire management gap all the way around an L shaped workstation
- When manually specifying worksurface in laminate, add suffix "-S" to the code
- Optional pencil groove with Nuform
- To manually specify Nuform worksurfaces; begin with the desired thickness then build up options
- 1" thick worksurfaces are not available in laminate
- Stretcher bars are required to be specified with worksurfaces 54" and wider which do have any mid support – ensure not to interfere with support brackets, cable trays or other work tools

## NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

For example:

Product INSWW2423 in Nuform Select with a tapered edge would be \$292 +\$33 +\$17

Product INSWW2423 in Nuform Select with a 1" straight edge would be \$292 +\$33 -\$32

# Worksurfaces & Supports

Panel Mounted Worksurfaces  
True Sized Rectangular Tops

# System

## PRODUCT CODE KEY EXAMPLE

INSTW1830

**INSTW** Inscape System  
worksurface

**18** 18" D

**30** 30" W

- These worksurfaces are true sized for both depth & width
- When manually specifying worksurface in laminate, add suffix “-S” to the code
- To manually specify Nuform worksurfaces; begin with the desired thickness then build up options
- 18" deep tops should not be specified with cantilever brackets as mid span support
- 1" thick worksurfaces are not available in laminate
- Stretcher bars are required to be specified with worksurfaces 54" and wider which do have any mid support – ensure not to interfere with support brackets, cable trays or other work tools

## NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

# Worksurfaces & Supports

Panel Mounted Worksurfaces  
Standard Corners

# System

## PRODUCT CODE KEY EXAMPLE

INCR3636-22

<b>INCR</b>	Inscape System standard corner
<b>3636</b>	36x 36" W
<b>24</b>	24" D

- Depth dimension is nominal. Depths are 1" less than stated to provide a 1" gap between the worksurface and panel to facilitate wire management.
- When manually specifying worksurface in laminate, add suffix "-S" to the code
- Optional pencil groove with Nuform
- To manually specify Nuform worksurfaces; begin with the desired thickness then build up options
- 48" Split Corner accommodates 24" or 30" returns
- Standard Corner and Split Corner include a radius front edge
- Limitations exist with the F09, F38, F40, F42, F43, F45, F46, F47, F48, F49, F50, F51, F57, F58 & F59 Nuforms due to the directional pattern. 48" w standard and split corners are not possible for the above referenced Nuform.
- 1" thick worksurfaces are not available in laminate
- Stretcher bars are required to be specified with worksurfaces 54" and wider which do have any mid support– ensure not to interfere with support brackets, cable trays or other work tools

## NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

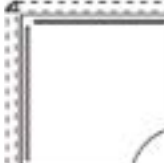

For example:

Product INCR3636-22 in Nuform Select with a tapered edge would be \$505 +\$52 +\$29

Product INCR3636-22 in Nuform Select with a 1" straight edge would be \$505 +\$52 -\$51

## Worksurfaces & Supports

Transaction tops  
General Information

# System

Transaction tops are commonly specified for reception areas but have a variety of applications including help desks and banks.

Transaction Tops are commonly specified with 37" high panels. Widths indicated refer to panel width. Stanchions and top trim are included. Installed height of transaction top on 37" high panel is 41 1/2". Transaction Top worksurfaces are 1" thick and available in Nuform options. The edge detail is straight only. Transaction tops are panel thickness specific.

The suffix "2F" denotes compatibility with 2 3/4" thick panel, "3F" denotes compatibility with 3 1/2" thick panel.

**Note: 72", 84" and 96" W kits consist of two top caps and four stanchions (based on "Symmetrical Frame Configuration" module lines). Top Caps can be specified as an option and are included with the kit.**

### GENERAL

- Straight-line transaction tops are available
- Straight-line transaction tops are 12" deep and are available in the following widths: 24", 30", 36", 42", 48", 54", 60", 72", 84" and 96"
- Transaction tops may be specified for 37" standard frames. Overall height of 37" high frame and transaction top is 41 1/2"
- All transaction tops shorter than 72" W are supported by 2 stanchions
- Transaction tops 72" or wider include two top trims and four stanchions
- A top trim with two cutouts, to accommodate the stanchions, is included with each transaction top
- Stanchions are not height adjustable
- Do not specify upper deck electrical beneath

### PRODUCT CODE KEY EXAMPLE

## Worksurfaces & Supports

Transaction Tops  
For 3 1/2" Thick Frames

# System

- Straight Edge Nuform worksurface
- 1" thick worksurface
- Specific frame configurations only for the spanning tops
- 72" (36" top caps), 84" (42" top caps) and 96" (48" top caps) wide kits consist of two top caps and four stanchions
- On-module installation only
- Stanchions have a rectangular profile

### NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

For example:

Product INTT1224-3F in Nuform Select with tapered trim would be \$374 +\$21

	Part number	H	W	Tapered trim		Flat trim		Accent paint

## Worksurfaces & Supports

Transaction Tops  
For 2 3/4" Thick Frames

# System

- Straight Edge Nuform worksurface
- 1" thick worksurface
- Specific frame configurations only for the spanning tops
- 72" (36" top caps), 84" (42" top caps) and 96" (48" top caps) wide kits consist of two top caps and four stanchions
- On-module installation only
- Stanchions have a rectangular profile

### NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

For example:

Product INTT1224-2F in Nuform Select with flat trim would be \$374 +\$21

	Part number	H	W	Tapered trim		Flat trim		Accent paint
				1" Straight edge Nuform classic/base price	1" Nuform select	1" Straight edge Nuform classic/base price	1" Nuform select	
 Rectangular Transaction Top	INTT1224-2F	12"	24"	—	—	\$374	+\$21	+\$39
	INTT1230-2F	12"	30"	—	—	\$400	+\$22	+\$44
	INTT1236-2F	12"	36"	—	—	\$426	+\$23	+\$46
	INTT1242-2F	12"	42"	—	—	\$451	+\$25	+\$48
	INTT1248-2F	12"	48"	—	—	\$486	+\$27	+\$51
	INTT1254-2F	12"	54"	—	—	\$511	+\$29	+\$53

	INTT1272-2F	12"	72"	—	—	\$848	+\$45	+\$88
	INTT1284-2F	12"	84"	—	—	\$898	+\$47	+\$92
	INTT1296-2F	12"	96"	—	—	\$961	+\$50	+\$99

## END GABLE & END GABLE BRACKETS

End gable & end gable brackets support panel mounted worksurfaces 28.5" high and. The left and right-handed brackets match the height of the end gable. End gables and brackets are available in any of Inscape's standard paint finishes and are frame thickness specific.

## 'H' LEG

'H' leg is a freestanding leg which may also be specified in a panel mounted application. Small glides provide leveling capability.

## 'O' LEG

'O' leg is a fully welded 'O' structure which mounts to the underside of a worksurface. This leg is freestanding.

## FRAMED LEG

Framed leg is a panel mounted worksurface support that has the bracket to attach to panel incorporated in the design. Legs are specified based on depth of worksurface. Small leveling glide included with no glide cap. For version with glide cap see standard specials.

## CANTILEVER BRACKET

Cantilever brackets support panel mounted worksurfaces on-module and are available in fixed or adjustable. Brackets are handed and adjustable to achieve 5 standard worksurface heights: 24.5", 27", 28.5", 30" and 31.5". Fixed cantilever brackets do not adjust vertically.

## MID SPAN CANTILEVER BRACKET

The mid span cantilever bracket is specified when there is a long tile being specified in the zone directly above the bottom 20.25" H tile which would interfere with the middle upright for a standard cantilever to attach into. The Mid Span Cantilever mounts lower to the upright allowing the wide tile aesthetic.

## CORNER CANTILEVER BRACKET

The corner cantilever bracket is specified where the 1" gap behind a worksurface wraps around a corner.

## BRIDGE BRACKET

Bridge bracket install onto Cantilever brackets only. These brackets are handed and an adjustable version is available to achieve the same five heights as Cantilever brackets. Fixed bridge brackets do not adjust vertically and must only be specified with fixed Cantilever brackets.

## FLUSH BRACKETS

Flush brackets are specified when two adjoining worksurfaces need to be held flush together and come in pairs. Maximum span of overhang when supported with a flush bracket is 18" per side.

## MULTI SURFACE SUPPORT BRACKETS

Multi surface support brackets are adjustable to achieve five standard worksurface heights: 25.5", 27", 28.5", 30" and 31.5". MSSB's provide corner support for panel-mounted worksurfaces, support panel mounted conference tops and provide mid-span support for worksurfaces up to 72" W. MSSB's are handed and may be specified for either thickness of Inscape System panel. Fixed Multi-surface Support Brackets are available and do not adjust vertically.

## FRONT EDGE SUPPORT BRACKETS

Front edge support brackets provide front edge support for 24" and 30" deep worksurfaces and also dock freestanding tables to panel's on-module. Brackets may be positioned to achieve five standard worksurface heights. Front Edge Support Brackets are handed and may be specified for either thickness of panel.

## FRAMED LEG FRONT SUPPORT BRACKET

The framed leg front support bracket provides additional stability to a wing panel which is longer than the depth of the adjacent worksurface. The bracket must have access to a crossrail (at any location within the height of the leg) via a segmentation in tiles. The bracket is then double side taped to the inside of the leg.

## PLANNA SUPPORT BRACKET

Planna support bracket is specified to be mounted on Planna rail and floats the worksurface off the bracket. Bracket is available in all standard paint colors. Bracket "snaps" into the rail without the need for tools. These are shipped as a pair and both must be installed per worksurface.

## HAT CHANNEL

Hat channels are used to support a worksurface off of a 21" ID Planna storage case and are available in any of Inscape's standard paint finishes. They are nominal in height and support a worksurface at a standard 28.5" height.

### **WORKSURFACE STRETCHER BAR**

Worksurface stretcher bar is additional structural support for unsupported worksurfaces of 54" or greater. It is 1 ½" high and the length of the stretcher bar is chosen based on the width of the worksurface. Be sure that there are no legs or panel mounted worksurface support brackets that may interfere with the stretcher bar.

### **WORKSURFACE TO TOWER BRACKET**

This bracket is attached to a storage unit with screws (included) to support a worksurface from the underside. The 18" W bracket is used in a lateral, bookcase or locker application. The 24" W bracket is used with modular and workplace towers. These brackets are painted. Silicone caps to cover exposed screw tips are provided.

### **1.5" SCREEN DOCKING BRACKETS**

Brackets dock the screen to a worksurface but are NOT worksurface supporting. Worksurfaces must always be freestanding. The Single Docking bracket docks one surface to a screen, the double docks two surfaces on either side of the screen. The Front edge docks the front edge of a freestanding table to the edge of a screen. Mid Span Docking bracket simply dock the mid of the worksurface to the 1.5" screen but does not support it.

Pedestals

Wardrobe towers

Pedestals are of all-welded "wrap-around" construction of 20 and 22 gauge high quality, tension leveled, cold rolled steel. The steel gauge selected for drawer fronts, bodies and accessories ensure the highest quality durability and performance for all components. All glides on cases consist of flat glides with  $\frac{5}{8}$ " height adjustability. Pedestal corners are welded at junction of top and case, eliminating horizontal lines for a cleaner, flush appearance, and strengthened with reinforcing gussets. A completely enclosed case provides rigid construction and dust-free interiors.

### **ANSI/BIFMA**

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications.

### **CONSTRUCTION FEATURES & BENEFITS**

Box drawer sides are slotted on 1" centers to allow for maximum flexibility for drawer division. Double-wall construction allows lift-up doors to be picked up and recede smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. Storage with Handles is single-wall construction. File (10.5" and 12") and EDP (15") drawer bodies have full-height sides to accommodate hanging file folders, eliminating the need for optional file frames. Fully progressive ball bearing suspensions on all drawers, including pencil and box drawers, are staged so that the left and right sides work in unison; this provides smooth drawer operation with minimum force. Staged suspensions allow the drawer to be completely pulled out, providing access to the entire drawer depth.

Special "claw-like" device incorporated in the suspension "grips" the fixed section of the suspension channel preventing drawer body bounce back or creep when drawer is closed. Modular interior allows complete interchangeability of drawer types within the pedestal case. For example, two 6" box drawers may be replaced by a 12" file drawer. Pedestals are standard with keyholes for attachment to underside of worksurface. For the Storage with Handles only cases: 18" deep pedestals come standard with 18" deep drawers, 22" and 28" deep pedestals come standard with 22" deep drawers. For all other Series, pedestal drawers match case depth.

Pedestals are available in mobile and worksurface supporting. Worksurface supporting pedestals are designed for use with the Inscape System and are standard with flat glides. Worksurface supporting pedestals are available in two depths to fit under 24" and 30" deep worksurfaces and support finished worksurface height of 28.5". Pedestals with 3", 6" or 7.5" drawers have the option to order one pencil tray per pedestal. The 6" and 7.5" drawers have the additional option to order one steel divider. The 10.5" and 12" drawers have the option to order one hang file suspension bar (two in a 28" deep pedestal) for side-to-side filing of legal or letter size folders or printout binders. Storage with Handles Pedestals do not include any suspension bars.

**NOTE: System storage pedestal cases consist of holes in the top of the case and back of the case to allow for worksurface docking and panel mounted brackets to be secured.**

### **COUNTERWEIGHTS**

Counterweights are required for ALL freestanding units that are not anchored or ganged to other cabinets or bolted to walls/floor. Counterweights come standard with ALL mobile pedestals and must be field installed.

### **OPTIONAL HANDLE**

Mobile Pedestals have the option to select a face mounted contemporary style handle for the case. There is an upcharge of \$32 list if this handle is selected. This handle is available in two finish options: Brushed Nickel (default) or Polished Nickel.

### **DOCKING BRACKET**

The pedestal docking bracket docks a pedestal to an Inscape System panel on-module. Specify bracket according to case front style and based on the thickness of panel. Pedestal -to-panel brackets are available in full height version.

### **GLIDES**

Inscape System pedestals are standard with flat glides. Glides provide 0.125" height adjustment when docked and 0.75" height adjustment if unit is not docked. 2 glides in front and 2 in back are adjustable from inside the cabinet so that cabinets can be leveled regardless of whether they are backed against a wall or banked.

### **LOCKS**

Standard with single bitted lock. If lock is not required add suffix '**NL**' after product number and deduct \$57 list per lock. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number.

**NOTE: Locks cannot be field installed on hinged door cabinets.**

**9900 Series NOTE: Pedestals with 9900 series fronts must be specified beneath 1" Nuform worksurfaces only.**

### FINISHES

All laterals are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. All interior drawers/ shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

### FRONT DETAILS & PULL OPTIONS

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Storage with Handles is single-wall construction. Refer to the images and chart below for pull application on Storage with Handles and Nuform fronts.

Pull	Storage with Handles	Nuform

Pulls FP004 and FP005 meet the guidelines for ADA compliance.

**FP005 is the default pull for Storage with Handles**

**FP001 is the default pull for Nuform**

## CUSHION MOBILE PEDESTALS

The **Classic Cushion** is 1 ¼" thick CAL 117 compliant polyurethane foam with a 2.3 lb/ft. density. This upholstered cushion is balanced with a 7/16" board and is attached to the pedestal top with heavy duty Velcro. The 5-pc construction, features double row top stitching on all seams, seen in fine upholstered pieces. The result provides crisp rectilinear styling.

The **Lite Cushion** is ¾" thick CAL 117 compliant polyurethane foam with a 2.3 lb/ft. density. This upholstered cushion is balanced with a ¼" board and is attached to the pedestal top with Velcro. Our Lite Cushion has seamless features allowing it to highlight the fabric details. The result provides a modern and simple look.

The Lite Cushion is available in the following Grade A fabrics only: Fedora, Glint, Pebble, Rancho & Script

Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customer Own Material). To determine if a COM fabric has been pre-approved for use on our cushion topper, contact your client services representative or log into INSITE. For application of ALL fabrics, both from our graded program as well as COM (Customer Own Material) please specify layout orientation at time of order. If layout instructions are not provided Inscape will choose the direction to maximize production. Refer to the diagram below for layup options.

After calculating the total amount of material needed in inches, divide the total number of inches by 36 for the total yardage and round up to the next full yard. Allow additional for repeat. Add 15% of total fabric required for small and medium pattern repeats. Add 20% of total fabric required for large patterns.

Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your client services representative for assistance.

All directional/patterned fabrics (Graded or COM) require cushion layup instructions with order placement. Depending on layup additional fabric may be required and upcharges may apply. If layup instructions are not provided the layup that maximizes the production yield will be chosen. (Refer to the layup diagrams)

**Please see Finishes section for COM calculator.**

# Storage

## Pedestals

### Storage with Handles Mobile Pedestals

# System

- Consult General Information for pull options
- 15" letter width pedestal
- Pedestals that include a cushion come with Classic Cushion
- For application of ALL fabrics, both from our graded program as well as COM (customers own material), please specify layup orientation at time of order. If layup instructions are not provided we will choose the direction to maximize our production. Refer to the Finishes Section for additional layout and COM details.

#### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product PH1518-BFMCNH in Grade B/COM fabric would be \$1124 +\$57

PH1518-BFMCNH in Grade C fabric would be \$1124 +\$103 **OPTIONAL ACCESSORIES**

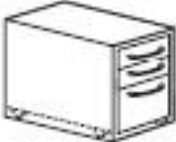

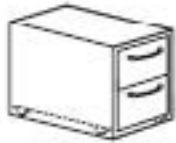

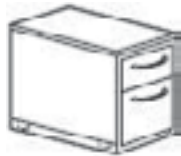

All pedestal accessories are optional. See chart below for information an accessories by drawer height.

Drawer Height	Product Code	Product Description	Price
3" & 4.5"	PFWS-PTxx	Pencil Tray	\$37
6" & 7.5"	PFWS-PTxx	Pencil Tray	\$37
	PFWS-DVxx	Divider	\$22

18"D, 22"D, 28"D Pedestals Only (28"D requires 2 per drawer)

Drawer Height	Product Code	Product Description	Price
10.5", 12", 13.5, & 15"	PFSSFxx	Side-To-Side Filing Bar	\$8

Visit the [Pedestal Accessories](#) section for full accessory details.

	Part number	H	W	D	Wt (lbs)	Neutral paint/ Grade A/ base price	Accent paint

Lateral cabinets are of all-welded construction using 20 and 22 gauge high quality, tension leveled, and cold rolled steel. Drawer fronts, lift-up doors, roll-out shelves and all steel accessories are manufactured of the steel gauge appropriate to function at the highest quality level.

### **ANSI/BIFMA**

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications.

### **CONSTRUCTION FEATURES & BENEFITS**

All interiors are completely modular and interchangeable so that cabinets can be retrofitted with new accessories and interiors as required. Cabinet corners are welded at junction of top and case, eliminating horizontal lines for cleaner, flush appearance, and strengthened with reinforcing gussets. Double-wall construction allows lift-up doors to be picked up and receded smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. Lift-up door carrier mechanism has four nylon rollers two on each side - for smooth receding action with no binding or snagging. Self-closing, 110° opening, European style cupboard hinges for smooth door operations. Storage with Handles Series storage is single-wall construction.

The absence of scissor mechanism in doors and drawers eliminates the potential for scissors binding, and facilitates reconfiguration of cabinet openings as needed. Front leading edge of pullout shelves is beaded and rolled to provide grip for pullout action and strengthen shelf; front leading edge of fixed shelf is flat for easy removal of material. Fully progressive ball bearing suspension slides provide smooth action with minimum force.

Special "claw-like" device incorporated in suspension slide channel "grips" the fixed section of the suspension channel preventing drawer bounce-back or creep when drawer is closed. A patented Safelock™ interlock mechanism provides complete security and user safety against accidental opening of two or more drawers simultaneously. Lock fingers are configured with right angle bend upward not downward so that lift-up doors cannot be pulled down to disengage fingers from door slots and be forced to circumvent lock system. Lock bars operate vertically on both sides of cabinet for maximum security.

Laterals include 1 pair of hang file bars in 10.5" and 12" fixed fronts, 1 EDP kit in 13.5" and 15" fixed fronts, pencil tray in 3" multi-file drawer and steel divider in 7.5" multi-file drawer, steel divider in 6" multi-file drawers and 3 divider plates in 13.5" liftups. Fixed shelf in lift-up is slotted in 1" increments. Lateral-to-panel bracket is required if lateral is positioned on-module.

**NOTE: System storage laterals and multi-files consist of slots in the back of the case to allow for panel mounted brackets to be secured.**

### **COUNTERWEIGHTS**

Counterweights are required for ALL freestanding units that are not anchored or ganged to other cabinets or bolted to walls/floor. Counterweights come standard with ALL mobile pedestals and must be field installed.

### **DOCKING BRACKET**

The Lateral Docking Bracket docks a lateral to an Inscape System panel on-module. Specify bracket according to depth of worksurface and based on the thickness of panel. Counterweights are not required for laterals which are tied into the panel and worksurface supporting.

### **GLIDES**

Inscape System laterals are standard with flat glides. Glides provide 0.125" height adjustment when docked and 0.625" height adjustment if unit is not docked. 2 glides in front and 2 in back are adjustable from inside the cabinet so that cabinets can be leveled regardless of whether they are backed against a wall or banked.

### **LOCKS**

Standard with single bitted lock. If lock is not required add suffix '**NL**' after product number and deduct \$57 list per lock. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number.

**NOTE: Locks cannot be field installed on hinged door cabinets.**

## **STORAGE STABILIZER BRACKET**

Storage Stabilizer Bracket is specified when a storage case/Planna Storage lateral or pedestal is positioned directly adjacent to an Inscape System panel. This bracket does not create a gap between the case and the panel like a pedestal or lateral bracket does. No factory holes are required to be in the back of the case and are added at time of installation.

## **FINISHES**

All laterals are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to Finishes section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. All interior drawers/shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

## **COM**

Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customer Own Material). To determine if a COM fabric has been pre-approved for use on our cushion topper, contact your client services representative or log into INSITE. For application of ALL fabrics, both from our graded program as well as COM (Customer Own Material) please specify layout orientation at time of order. If layup instructions are not provided Inscape will choose the direction to maximize production. Refer to the diagram for layup options.

After calculating the total amount of material needed in inches, divide the total number of inches by 36 for the total yardage and round up to the next full yard. Allow additional for repeat. Add 15% of total fabric required for small and medium pattern repeats. Add 20% of total fabric required for large patterns.

Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your client services representative for assistance.

All directional/patterned fabrics (Graded or COM) require cushion layup instructions with order placement. Depending on layup additional fabric may be required and upcharges may apply. If layup instructions are not provided the layup that maximizes the production yield will be chosen. (Refer to the layup diagrams)

**Please see Finishes section for COM calculator.**

### FRONT DETAILS & PULL OPTIONS

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Storage with Handles is single-wall construction. Refer to the images and chart below for pull application on Storage with Handles and Nuform fronts.

 <p>Storage to Panel Stabilizer Bracket            For use with 2 ¾" T frames</p>	<b>INPSSB-2F</b>	1	\$48	+\$8

Workplace Towers are constructed of all-welded construction using high quality, tension leveled cold rolled steel. The steel gauge selected for drawer fronts, bodies and accessories ensure the highest quality durability and performance for all components.

### **SAFELOCK™**

The patented Safelock mechanism is standard on the 42" W locker and on towers and lockers that have more than one file (10.5" and 12") drawer. It provides complete security against accidental opening of two or more drawers simultaneously. When any drawer is extended, even fractionally, Safelock ensures that all other openings immediately become inoperable.

### **DRAWER STANDARD EQUIPMENT**

On pre-configured units, Lockers and towers containing 3" or 6" drawers are provided with one pencil tray per cabinet. 6" drawers are additionally standard with one steel divider. 10.5", 12" and 15" letter-width file drawers have one suspension bar for side-to-side filing of letter or legal-size folders. Full-width pullout drawers are standard with one pair hang file bars for side-to-side suspended filing. Full-width fixed shelves are standard with 3 plate dividers. Optional accessories are available. Build ups are ordered separately.

### **GLIDES**

Overall heights are inclusive of metal glides. Heights may be increased up to ¾" by extending the standard glide. Glides are accessible from inside the cabinet when the bottom drawer is fully extended or removed and may be adjusted with a 0.25" socket driver. Optional 1.5" stem glides are available.

### **LOCKS**

Standard with single bitted lock. If lock is not required add suffix '/NL' after product number and deduct \$57 list per lock. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number.

**Note: Locks cannot be field installed on hinged door cabinets.**

### **WARDROBE UNITS**

Freestanding wardrobe units are available in widths of 12", 15" and 18". The freestanding wardrobes match panel heights of 44", 51", 57" and 64" H. Wardrobe units are available in 9900 series, Nuform Classic and Select. Wardrobe units include the option of a coat rod and upper shelf or multiple shelves (quantities listed below)

44" H version includes 2 shelves

51" H version includes 2 shelves

57" H version includes 2 shelves

64" H version includes 3 shelves

Wardrobe units are locking and include flat glides on the freestanding versions.

### **FINISHES**

All towers are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. All interior drawers/ shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

### FRONT DETAILS & PULL OPTIONS

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Storage with Handles is single-wall construction. Refer to the images and chart below for pull application on Storage with Handles and Nuform fronts.

Pull	Storage with Handles	Nuform
 <b>FP001</b> P290 Aluminum Leaf Finish	●	●
 <b>FP004</b> Brushed Nickel Finish	●	●
 <b>FP005</b> Brushed Nickel Finish	●	○

● Available    ○ Unavailable

Pulls FP004 and FP005 meet the guidelines for ADA compliance.

**FP005 is the default pull for Storage with Handles**

**FP001 is the default pull for Nuform**

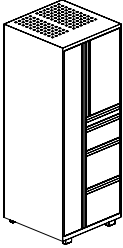

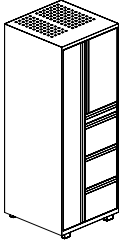

# Storage

Towers  
9900 Series Front Workplace Towers

# System

- Towers are 24" deep
- Flat glides
- Glides which come standard with towers will level to lower than the actual frame height
- System glides are required to be ordered separately in order to match top of 64" H frame top trim

**CAUTION: Un-level floors may result in towers with leveling higher than the frame top trim**

## OVERHEAD STORAGE BINS

Overhead storage bins may be panel mounted on or off module as well as wall mounted. Overhead bins are fabricated from minimum 20 gauge steel with horizontal reinforcing channels. Task lights and bin-mounted sorters are easily installed beneath bins without tools. Bins are available in 6" increments from 24" to 48" W. General maximum recommended load for overhead bins is 3lbs per linear inch. Bins are finished in standard 37.5° gloss baked enamel, electrostatically applied in a 2-coat process and are available in all colors shown in the Inscape color guide.

Overhead bins are 13 3/8" deep and have lift-up flipper doors that glide on ball bearing slides. Soft-down bins feature a soft-down mechanism that slows the speed at which the overhead doors close. Bins are available with and without locks. The lock mechanism engages both sides of the overhead case to prevent forcible entry. Standard and soft-down overhead bins may be specified with Nuform fronts. Nuform fronts are available in any of Inscape's standard finishes.

## OVERHEAD BIN BRACKETS

Overhead bin brackets are finished in black and mount into the panel upright for on module bracket or utilize special brackets for off-module condition. Off-module brackets are specific to frame thickness. Specific Overhead Bin brackets are required for mounting onto a 44" and 57" H frame as well as 6.75" and 20.25" H stack-ons (on module).

On module bracket	Off-module
Both brackets attach into upright slots on upright	Both brackets are mounted off module only
Does not require tile behind	Must be further than 3/16" from module line
	Requires tile behind

## ALIGNMENT BRACKETS

Alignment brackets are required if overhead storage units are mounted bin-to-bin or bin-to-shelf or shelf-to-shelf. One bracket is required.

## TWIN-BINS

Twin-bins are 5.75" deep on each side of the supporting frame. Twin-Bins may be specified to install in both the lower and upper position of the frame. Bins are manufactured from minimum 20 gauge steel with an extruded aluminum reinforced top. Double wall, sliding doors on each side of the unit, slide easily across the recessed groove built into the bin front. Twin-Bins are available with or without locks. The locking mechanism is individualized for each side of the unit, allowing for personal privacy on either side. Twin-Bins are available in 36", 42", 48" and 60" widths. Recommended maximum load for Twin-Bins is 3lbs per linear inch. Bins are finished in standard 37.5° gloss baked enamel, electrostatically applied in a 2-coat process and are available in any of the colors shown in our Color Guide. Woodgrain fronts are available in any of our standard woodgrain finishes.

Handles are standard in aluminum finish and are located on the front of the sliding door. Case may still be ordered in any of the colors shown in our Color Guide.

## ELECTRIFIED TWIN BIN

The electrified twin bin is built on the same premise as the standard Twin Bin with the addition of electrical and a sliding door with locking capabilities in two positions. All electrical components are specified separately including power track, receptacles and jumper cables. The sliding door may lock either the binder storage portion (full depth of bin) or the electrified portion which is the center portion which is approximately 5" D. The back of the Electrified Twin Bin may be clad with either a tackboard or whiteboard which are both specific to this storage unit. A shelf may also be optioned for the electrified portion which is field installed midway between top and bottom of opening. A gap in the shelf allows for the cord of an electronic unit to plug into duplex (located near base of opening) and still sit on top of shelf.

**NOTE: these accessories are NOT compatible with the standard Twin Bin. See Application Guide for more details.**

Specify Twin-Bin mounting brackets separately according to location on frame. 1 bracket per Twin-Bin is required. Specify 13.5" high bottom tiles when lower position mounting bracket is specified. When stacking Twin-Bins a 6.75" high tile minimum must separate the two. Do not specify over Power Track Kit. Twin-Bins specified with 44" H frames cannot be used above a worksurface. It is not recommended to specify Twin-Bins on wing panels. Twin-Bins should only be specified on spine panels for adequate stability.

## OVERHEAD SHELVES

Overhead Shelves may be panel-mounted both on and off-module or wall-mounted. Shelves are manufactured from minimum 20 gauge steel. Shelves are 13.75" deep.

Task lights and shelf-mounted sorters may easily be installed beneath panel-mounted shelves without tools. General maximum recommended load for overhead shelves is 3 lbs. per linear inch. Shelves are finished in standard 37.5° gloss baked enamel, electrostatically applied in a 2-coat process.

## OVERHEAD SHELF BRACKETS

Overhead Shelf Brackets are specified to mount shelf on or off-module to the frame. The on-module bracket may be used with either thickness of panel. If a shelf is desired in an off-module condition a special bracket is required. Wall mount brackets are also available. Drywall mounting brackets do not include fasteners. The installer must ensure the surface is adequately constructed and/or braced and that adequate fasteners are used to ensure a secure installation.

## UP-MOUNT BIN

The Up-Mount Bin is constructed of 24 gauge steel on the back and 20 gauge steel on bottom, sides and top. The Up-Mount Bin is ordered and shipped independent of the stanchion kit, top trim and accessories to hang on back of bin. The stanchion kit includes hardware to mount the stanchions on the crossrail of the frame and top trim (tapered or flat). Stanchion kits are specified based on thickness of frame in which the Up-Mount Bin is being installed. The backs of all Up-Mount Bins require either a whiteboard or a tackboard to provide a clean aesthetic. These accessories are specific to the Up-Mount Bin and include mounting hardware. The stanchion and Up-Mount Bin provide an overall height of 20.25" module matching adjacent panel heights. The bin is 12.75" deep and may be specified directly adjacent to another Up-Mount Bin facing the opposite direction; creating a "Twin-Bin" effect. Separate top cap and two stanchions will be required for each bin.

The Up-Mount Bin has the option to also be mounted on either thickness of frame like a traditional bin. When this option is selected covers will be included to hide the bracket hooks.

## LOCKS

Standard with single bitted lock. If lock is not required add suffix '**NL**' after product number and deduct \$57 list per lock. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number.

**Note: Locks cannot be field installed on hinged door cabinets.**

## FINISHES

All overhead units are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are subject to extended lead times. All interior drawers/ shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

### FRONT DETAILS & PULL OPTIONS

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Storage with Handles is single-wall construction. Refer to the images and chart below for pull application on Storage with Handles and Nuform fronts.

Pull	Storage with Handles	Nuform
 <b>FP001</b> P290 Aluminum Leaf Finish	●	●
 <b>FP004</b> Brushed Nickel Finish	●	●
 <b>FP005</b> Brushed Nickel Finish	●	○

● Available    ○ Unavailable

Pulls FP004 and FP005 meet the guidelines for ADA compliance.

**FP005 is the default pull for Storage with Handles**

**FP001 is the default pull for Nuform**

- Bracket ordered separately
- Ensure the wall is braced to accept the weight of a loaded overhead unit
- On module and aff module mounting options available
- Consult General Information for pull options
- Nuform Classic and Select options available
- Cannot span tiles below overhead bins

- Bracket ordered separately
- Hinged door bin is for wall mounted application only
- Hinged Door Bin options Nuform and laminate come with a lock. Options glass and acrylic do not.
- Hinged door bins have a door that extends down a little bit below the bin so that it acts like a handle. No face mounted handle is required.
- Up-Mount Bin may be installed on a wall or panel using wall or panel brackets
- If the option to panel mount the Up-Mount Bin is selected cover will be included to hide the bracket hooks
- Optional colored insert available for Up-Mount bin only. See accessories section
- Optional top available for Up-mount bin only. See accessories section
- When the Up-Mount Bin is being mounted on a wall, the optional Flush Mount Kit can be installed on the bottom side of the bin to cover understructure typically used for stanchion mount. 54" and 60" Up-Mount Bins do not have this as a standard option.
- The Flush Mount Kit is not to be used when stanchion mounting to the bin
- Ensure the wall is braced to accept the weight of a loaded overhead unit

**LOCK OPTION**

Hinged Door Overhead Bins come standard with lock. If lock is not required as suffix"/NL" after product number. Deduct \$57 list per lock.

**NOTES**

Up-Mount Bins MUST always be specified to include a tack board or whiteboard specific to the up-mount bin width when installed on stanchion, as they cover holes on the back of the bin. See accessories section

If selecting the panel mounted option for the Up-Mount Bin, add \$108 list per bin.

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

Planna Storage exterior cabinet heights are nominal, interior case height is 21". Lateral and pedestal options are available. Units include mounting rails (see Inscape System Application Guide) that are pre-installed by the factory to accommodate the Planna Storage lateral top which is specified separately (see Accessories section). These mounting rails are ready to accept application of this lateral top on site. Bench support bracket must also be specified separately. Lateral cabinets are priced inclusive of one pair of hang file bars in each 10.5" and 12" pull out openings.

### **ANSI/BIFMA**

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications.

### **COUNTERWEIGHTS**

Counterweights are required for ALL freestanding units that are not anchored or ganged to other cabinets or bolted to walls/floor. Counterweights come standard with ALL mobile pedestals and must be field installed.

### **GLIDES**

Planna units are standard with flat glides. Glides allow for 3/8" height adjustability.

### **LOCKS**

Cabinets come standard with lock. 9900 series cabinets can be ordered non-locking. Bookcase cabinets come standard without locks. Standard with single bitted lock. If lock is not required add suffix 'N/L' after product number and deduct \$57 list per lock. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number.

**NOTE: Locks cannot be field installed on hinged door cabinets.**

**9900 Series Note: Pedestals with 9900 series fronts must be specified beneath 1" Nuform worksurfaces only.**

### **FINISHES**

All units are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. All interior drawers/ shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

**FRONT DETAILS & PULL OPTIONS**

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Refer to the images and chart below for pull application on Nuform fronts.

Pull	Nuform
 FP001 P290 Aluminum Leaf Finish	●
 FP004 Brushed Nickel Finish	●
 FP005 Brushed Nickel Finish	○

● Available    ○ Unavailable

Pulls FP004 and FP005 meet the guidelines for ADA compliance.

**FP001 is the default pull for Nuform**

- Planna Storage case comes with optional Planna Storage rail
- **DO NOT option yes for rail if mounting a cushion on the case**
- **When "no rail" is optioned there will still be mounting holes in the top of the case. Cover with cushion or common top**
- 18"D lateral case
- Height noted below includes ½" Planna Storage rail.  
Adding a Planna common top will add an additional ½"
- FP001 pull is standard for Nuform fronts
- Consult General Information for pull options

Laminate Storage exterior cabinet heights are nominal and have an actual dimension of 23.858" from bottom of glide to top of case when the glide is at minimum position. The mobile pedestal is an exception to this dimension rule as it is 21.25". Lateral, pedestal, open bookcase, tower and overhead bin options are available.

### ANSI/BIFMA

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications.

### COUNTERWEIGHTS

Counterweights are required for ALL freestanding units that are not anchored or ganged to other cabinets or bolted to walls/floor. Mobile Pedestals have a fifth caster installed on front underside which works as anti-tip mechanism, eliminating requirement for counterweight

### GLIDES

Laminate units are standard with flat glides. Glides allow for 1 ¼" height adjustability.

### LOCKS

Lateral, pedestal, bookcase with drawers, hinged door overhead bin and tower cabinets come standard with lock. Open bookcase and open bin cabinets come standard without locks. Standard with single bitted lock in a Satin Chrome finish. For applications requiring higher security a double bitted solution is available. Random keying is standard, and keyed alike may be ordered. Master keys are available; refer to the accessories section to specify.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Specify cabinet height and width or model number.

### OVERHEAD BRACKETS

Overheads are wall mounted and brackets are included in the code. Wall mounting brackets do not include fasteners as they are dependent on the requirements of the wall type. The installer must ensure the surface is adequately constructed and/or braced and that adequate fasteners are used to ensure a secure installation.

### FINISHES

All storage cases are available in all of inscape's standard low pressure laminate options (MCC codes).

All fixed storage fronts are default as low pressure laminate (like the cases), and are mounted flush with the front of the top. Mobile pedestal fronts extend past the case top before sloping flush with the top of the case. High pressure laminate is available for storage fronts for an upcharge.

Standard edge banding is 2.5mm and compliments worksurface.

Refer to the Finishes Section of this price list for available colors.

### CUSHION MOBILE PEDESTALS

The Classic Cushion is 1 ¼" thick CAL 117 compliant polyurethane foam with a 2.2 lb/ft. density. This upholstered cushion is balanced with a 7/8" board and is attached to the pedestal top with heavy duty Velcro.

Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customer's Own Material). To determine if a COM fabric has been pre-approved for use on our cushion topper, contact your client services representative or log into INSITE. For application of ALL fabrics, both from our graded program as well as COM (Customer Own Material) please specify layout orientation at time of order. If layout instructions are not provided Inscape will choose the direction to maximize production. Refer to the diagram for layout options.

After calculating the total amount of material needed in inches, divide the total number of inches by 36 for the total yardage and round up to the next full yard. Allow additional for repeat. Add 15% of total fabric required for small and medium pattern repeats. Add 20% of total fabric required for large patterns.

Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your client services representative for assistance.

**Please see Finishes section for COM calculator.**

### FABRIC LAY UP OF PEDESTAL CUSHIONS

**FRONT DETAILS & PULL OPTIONS**

Laminate Storage offers flush fronts with surface mounted pulls. Refer to the images and chart below for pull application on Laminate Storage.

Pull	Laminate
 <b>FP001</b> P290 Aluminum Leaf Finish	●
 <b>FP004</b> Brushed Nickel Finish	●

- Available
- Unavailable

Pull FP004 meet the guidelines for ADA compliance.

**FP001 pull is the default pull for all Laminate Storage.**

- Mobile and fixed pedestal options available
- Both laminate pedestal options are locking
- Available pull options for Laminate Storage are FP001 and FP004 (default)
- Storage cases are available in any of Inscape's standard low pressure laminate options (MCC codes)
- Storage fronts are standard in any of Inscape's standard low pressure laminate options (MCC codes) but have the option to select a corresponding high pressure laminate for an upcharge
- Mobile Laminate Pedestals have an optional Classic cushion which is inset from the drawer fronts
- Fixed Laminate Pedestals must be used in a Hat Channel or a Rail Kit with common top application in order to support a worksurface at a 28.5" height
- Mobile pedestal has a caster at each corner and a single caster in the middle of the underside of the unit to make a total of 5 casters. The 5th caster acts as a counterweight.
- Laminate Storage exterior cabinet heights are nominal and have an actual dimension of 23.858" from bottom of glide to top of the case when the glide is at minimum position. The mobile pedestal is an exception to this dimension rule as it is 21.25" H.

- For application of ALL fabrics, both from our graded program as well as COM (customers own material), please specify layup orientation at time of order. If layup instructions are not provided we will choose the direction to maximize our production. Refer to the Finishes Section for additional layout and COM details.
- Models ordered with counter weights will be installed by default to the bottom shelf. When the counter weight is ordered separately it can field installed either on the bottom or the back of the unit.

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product LL1518-BFMC in Grade B/COM fabric would be \$1101 +\$57LL1518-BFMC in Grade C fabric would be \$1101 +\$103

	Part number	Exterior Height	W	D	Wt (lbs)	Grade A/ base price	High pressure laminate front option	No cushion option	
	6" box, 12" file Laminate Mobile Pedestal Includes cushion	<b>LL1518-BFMC</b>	22"	15 1/2"	18"	—	\$1101	+\$299	-\$227

	<b>LL3621-BBKCW</b>	24 3/8"	36"	18"	—	\$1413	+\$189
	<b>LL4221-BBKCW</b>	24 3/8"	42"	18"	—	\$1473	+\$200

- Hinged Door Cabinets are 18" deep and locking
- Available pull options for Laminate Storage are FP001 and FP004 (default)
- Storage cases are available in any of Inscape's standard low pressure laminate options (MCC codes)
- Storage fronts are standard in any of Inscape's standard low pressure laminate options (MCC codes) but have the option to select a corresponding high pressure laminate for an upcharge
- Laminate Hinged Door Cabinets must be used with a Hat Channel or a Rail Kit in order to support a worksurface at a 28.5" height
- Laminate Storage exterior cabinet heights are nominal and have an actual dimension of 23.858" from bottom of glide to top of bin when the glide is at minimum position

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product LL2421HD-SH with high pressure laminate fronts would be \$1010 +\$218

Laminate Hinged Door Cabinet with 1 adjustable shelf

Part number	Exterior Height	W	D	Wt (lbs)	Base price	High pressure laminate front option
<b>LL2421HD-SH</b>	24 3/8"	24"	18"	—	\$1010	+\$218
<b>LL3021HD-SH</b>	24 3/8"	30"	18"	—	\$1051	+\$227
<b>LL3621HD-SH</b>	24 3/8"	36"	18"	—	\$1058	+\$242
<b>LL4221HD-SH</b>	24 3/8"	42"	18"	—	\$1092	+\$255

- Available pull options for Laminate Storage are FP001 and FP004 (default)
- Hinged Door option is locking, the open and sliding door overheads are non-locking
- Storage cases are available in any of Inscape's standard low pressure laminate options (MCC codes)
- Storage fronts are standard in any of Inscape's standard low pressure laminate options (MCC codes) but have the option to select a corresponding high pressure laminate for an upcharge
- Wall mount brackets included but fasteners are not as they are dependent on the requirements of the wall type
- Open Overhead Bins that are 36" w or larger will have a center divider that creates two openings
- Hinged Door Overhead Bins that are 36" w or larger will have a center divider and the unit will have four doors
- Ensure the wall is adequately constructed and/or braced and that adequate fasteners are used to ensure a secure installation.

- Shelf maximum weight capacity is 50lbs.
- Wall mounted brackets are included when specifying each overhead shelf
- Shelf is available in high pressure laminate and mounting brackets are painted
- Wall mounting brackets do not include fasteners as they are dependent on the requirements of the wall type

### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product LLSDBIN-24 with high pressure laminate fronts would be \$872 +\$222

		Part number	Exterior Height	W	D	Wt (lbs)	Base price	High pressure laminate front option

# System Accessories

**inscape**

work for tomorrow

Inscape System accessories include panel and table-mounted organizers, whiteboards, wall-mounted tack boards, panel mounted accessory shelves, pencil drawer, signage, a picture hook and coat hook. The panel and table-mounted organizers are easy to install, move and reconfigure and provide a comprehensive solution for effectively managing paper and other office supplies.

## HORIZONTAL ORGANIZERS

A variety of work tool Horizontal Organizers may be positioned at any point along the width of the paper management tiles. The three slat design allows for three different height options - customizing and providing adjustability to suit individual needs and preferences. Re-positioning the height of the trays can be easily done by lifting the trays out of the slats on the tile. Horizontal paper management accessories are available in colors shown in the Color Guide. These paper management organizers can withstand max 5lbs. The storage compartments are clear plastic.

## COAT HOOKS, PICTURE HOOKS AND SIGNAGE

Coat Hooks, Picture Hooks and Signage are manufactured from steel and snap onto panel crossrails without tools. Signage is available 9" W. The sign insert channel is 1" H. Insert is customer generated and can be printed on any printer compatible paper. Printing instructions are included. A strip of clear plastic slides into the channel to protect the printed identification card.

## PENCIL DRAWERS

Pencil Drawers can be installed under any Inscape System worksurface, increasing the amount of usable storage within the workstation.

## TOUCH UP PAINT

Touch Up Paint is available in ½ pint cans to repair minor scratches on trim, tiles and cabinets. Paint may also be specified in aerosol cans for any of our standard paint colors with the exception of mica and textured paint finishes. Custom enamel finishes are available in liquid only.

**NOTE: Restrictions may apply to shipping aerosol cans; contact your Client Services Representative.**

## CPU HOLDER

The CPU Holder mounts to the underside of any 1" or 1.25" thick worksurface. The AU200CU is non-locking and has a track size of 17". This CPU holder has a weight capacity of 13lbs. This CPU holder has a plastic glide track style. The AU300CU is non-locking with a weight capacity of 17lbs and has a track size of 17" with a ball bearing style track. All CPU holders have a height range of 14.5"/22.5" and a width range of 3.5"/9.3".

## WORKSURFACE STRETCHER BAR

Worksurface stretcher bar is additional structural support for unsupported worksurfaces of 54" or greater. It is 1 ½" H and the length of the stretcher bar is chosen based on the width of the worksurface. Be sure that there are no legs or panel mounted worksurface support brackets that may interfere with the stretcher bar.

## PANEL-MOUNTED WHITEBOARDS

Panel-Mounted Whiteboards are available in two tile heights and in five tile widths. They are manufactured from steel and are powder-coated with white paint specially formulated for dry erase markers.

**NOTE: Only Expo Markers are to be used on any Inscape Whiteboard. Whiteboards should be cleaned with Expo Eraser or a Microfiber cleaning cloth along with Expo Cleaning Solution which is formulated to remove residue from Expo Dry Erase Markers.**

## CROSSRAILS

Crossrails are available for order when a tile configuration requires a different mount of the tile from where crossrails are placed when shipped. These crossrails are based on the width of the panel as well as the thickness, either 2.75" or 3.5". Crossrails are shipped with mounting hardware as well as tile clips.

## MODESTY PANELS

Modesty Panels are available in a variety of options including painted, Nuform, laminate and acrylic. Panels are available in Partial Height of 13.5" and Full Height of 24" versions and a number of widths. Calculations must be made to determine the correct width dimension of Modesty Panel should be specified to accommodate the desired space. All mounting hardware is included in the product code and are installed on-site.

## TABLE MOUNTED FABRIC SCREEN

The Table Mounted Fabric Screen is constructed of a 1.5" thick extruded aluminum frame and is designed to provide modesty and privacy to adjacent work areas. This 37" H screen mounts onto a 1" or 1.25" thick worksurface and may be adjusted vertically to create the desired privacy or modesty. The tackable 0.5" thick core may be specified in any of Inscape's standard fabrics or COM. Height adjustable brackets allow for various screen height positions. It is recommended that the table mounted screen be installed 20" above the surface with 16" below. Table mounted screens cannot be attached at 90° connections to 3.5" thick frames.

## TABLE MOUNTED ACRYLIC SCREENS

Table Mounted Acrylic Screens ship with standoff hardware to mount to a 1" or a 1.25" thick work surface. The acrylic is a white finish with pre-drilled holes. When mounted, the screen extends 15.5" above the work surface. Mounting hardware is included within the kit.

## FREESTANDING TABLE SCREENS

The Freestanding Side Screen acts as a portable or stationary screen that separates two spaces adjacent to one another. The screen is made of 6mm thick frosted acrylic which is 13" H, seated in a painted aluminum extrusion, which can be painted any of Inscape's standard colors. The width of the screens is such that they are 5" less than the depth of our standard work surfaces.

## ADD-ON GLAZING

Add-on Glazing is manufactured from ¼" tempered glass. A ⅜" tempered glass is also available. Glazing may be mounted to the top of any equivalent Inscape System frame or combination of frames outlined in the Application Guide. Glazing is available in clear, gray, etched one or two sides and designer glass Strie options. Add-on Glazing includes top trim, glass mounting extrusion and specified glass. Add-on Glazing is specified based on the thickness of the panel.

**NOTE: Hi-lo Add-on Glazing must be specified when installed directly adjacent to a higher panel at an inline situation only. The glaze and extrusion are inset on one side to allow for hi-lo vertical trim on the adjacent higher panel. If the situation calls for hi-lo on both sides, a special may be required. An Add-on Glazing alignment clip is included with each Add-on Glaze ordered.**

## WALL MOUNTED ACCESSORIES

Wall Mounted Accessories include tackboards, whiteboards and paper management rails. These accessories ship with mounting hardware and instructions on how to install them onto the wall. Re-enforcing of the wall should be taken into account when wall mounting any accessory for additional weight. Tackboards may be specified with any of our standard fabrics or a COM all are applied railroad orientation. The paper management rail may be specified with any of the colors found in the Color Guide.

Bin/Shelf-Mounted sorters install beneath overhead bins and shelves and hold literature, correspondence, notes, etc. Sorters are available in right and left-handed models and are easily repositioned by sliding horizontally along the length of the bin or shelf. Sorters ship in packages of three and may be painted in any of Inscape's color options. Bin and shelf sorters are specific to the unit they are being mounted on. Sorters are suitable for paper literature. Sliding Dividers may be placed in the overhead bin within a channel and slid to divide binders and other literature.

## MAGNETIC WHITEBOARDS

Magnetic Whiteboards are available to mount on the side access tower. Available in 13.25" width only and two heights, the magnetic whiteboard is manufactured from steel and powder-coated with white paint formulated for use with dry-erase markers. Magnetic whiteboards include a 10.5" W marker tray.

**NOTE: Only Expo Markers are to be used on any Inscape Whiteboard. Whiteboards should be cleaned with Expo Eraser or a Microfiber cleaning cloth along with Expo Cleaning Solution which is formulated to remove residue from Expo Dry Erase Markers.**

## HANGFILE BARS

Hangfile Bars are shipped as a pair and are used for 10.5", 12", 13.5", 15" and 16.5" pullout shelves/drawers.

## INVIROMASS COUNTERWEIGHTS

Inviromass Counterweights for field installation "IMCW-30, IMCW-36 and IMCW-42" consist of one Inviromass plate and one retaining wire. These plates are to be field installed into lateral file cabinet by inserting the 30", 36" or 42" W retaining wire into holes in the left and right hand rear stripe's.

The "INCW" for field installation consists of two 24lbs steel plates. These are affixed to back interior of case using peel and stripe two way tape.

## SYSTEM CARE KITS

System Care Kits are panel thickness specific. Included in this care kit is the following: panel hook and latch assembly, 2-way 90° connectors, tile clips, end of line plugs, Dekko electrical clips, inline connector and trim clips.

## BACK PAINTED GLASS

Back Painted Glass is a 6mm tempered glass addition to the back of Planna Storage cases. This glass is installed on the back of the case with stand off assemblies and holes that are field drilled into the case. Glass is painted on one side and available in white. Mounting hardware included.

## **SUPERSTOR™ INSERTS**

SuperStor™ Inserts may be purchased independently of a storage unit and field installed using #10 self-drilling 'Tek' screws. The pre slotted back panel of the insert accepts SuperStor™ Trays which are available in any of Inscape's standard paint colors plus textured finishes. Trays must be specified separately and for ease of specification are sold in packages: standard trays - package of 6, small trays - package of 3. The 30" insert is slotted to accept 12 Standard Trays (2 pkgs) and 3 Small Trays (1 pkg), the 36" insert is slotted to accept 18 Standard Trays (3 pkgs) and the 42" insert is slotted to accept 18 Standard Trays (3 pkgs) and 3 Small Trays (1 pkg).

## **PLANNA SUPPORT BRACKET**

Planna support bracket is specified to be mounted on Planna rail and floats the worksurface off the bracket. Bracket is available in all standard paint colors. Bracket "snaps" into the rail without the need for tools. These are shipped as a pair and both must be installed per worksurface.

## **HAT CHANNEL**

Hat channels are used to support a worksurface off of a 21" ID Planna storage case and are available in any of Inscape's standard paint finishes. They are nominal in height and support a worksurface at a standard 28.5" height.

## **LATERAL AND PEDESTAL RAIL KITS**

Lateral and Pedestal Rail Kits are available for separate purchase to create alternative applications when mounted on standard Office Specialty cases. These kits must be field installed. Rail Kits consist of a pair of extruded aluminum rails painted in 'Aluminum Leaf' and a pair of mounting rails that act as a 'reveal' and secure the Planna Storage rails into a box substructure to support the Planna Storage 0.5" thick lateral top.

End anchor units must be 36" W. Specify CREDENZA STORAGE-KIT36 separately. Center units will be positioned back-to-back and may be 30", 36" or 42" W.

If Center Units = 30" W,  
specify 2 x CREDENZA STORAGEKIT3615

If Center Units = 36" W,  
specify 2 x CREDENZA STORAGEKIT36

If Center Units = 42" W,  
specify 2 x CREDENZA STORAGEKIT3621

Using pre-configured or buildup cases with 36" I.D. (interior dimension) will provide finished height to top of worksurface of 43". Use adjustment in Planna Storage brackets to lower worksurface height to suit seating height.

## **LATERAL TOPS**

The Lateral Tops are available in ½" and ¾" thick options. The ½" thick option has been designed for Planna Storage applications in freestanding, benching or private office applications (may be specified on any lateral case). When being specified with the top fully spanning the Planna Storage benching frame or partially, there are a number of tops to accommodate the clean visual of having a continuous top over the panel. Depths are 1.75" or 3.5" deeper than standard tops to accommodate the various Planna Storage benching applications. The 21.5" deep Planna Storage lateral tops work in conjunction with the two Planna Storage units which access electrical through the back of the case. The 3.5" gap created behind the case provides space for cables to be plugged in and routed into the case. The same concept may be applied when specifying lateral tops for Private Office applications and requiring an additional 3.5" deep top. The ¾" top is ideal for and freestanding lateral applications. These are NOT to be specified on Planna Storage cases.

## CUSHION PROGRAM

The **Classic Cushion** is 1 ¼" thick CAL 117 compliant polyurethane foam with a 2.3 lb/ft. density. This upholstered cushion is balanced with a ¼" board and is attached to the pedestal top with heavy duty Velcro. The 5-pc construction, features double row top stitching on all seams, seen in fine upholstered pieces. The result provides crisp rectilinear styling.

The **Lite Cushion** is ¾" thick CAL 117 compliant polyurethane foam with a 2.3 lb/ft. density. This upholstered cushion is balanced with a ¼" board and is attached to the pedestal top with Velcro. Our Lite Cushion has seamless features allowing it to highlight the fabric details. The result provides a modern and simple look.

The Lite Cushion is available in the following Grade A fabrics only: Fedora, Glint, Pebble, Rancho & Script

Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customers Own Material). To determine if a COM fabric has been pre-approved for use on our cushion topper, contact your Client Services Representative or go to [inscapesolutions.com](http://inscapesolutions.com).

For application of all fabrics, both from our graded program as well as COM (Customers Own Material) please specify lay-up orientation at time of order. If lay-up instructions are not provided we will choose the direction to maximize our production. Refer to diagram for lay-up instructions. Please contact your Client Services Representative to confirm yardage requirements for your order. All COM fabric must be pre-approved. Your CSR can determine if your COM has already been pretested for application. A fully graded program has been set up for cushions. Various sizes of cushion have been designed for applications ranging from freestanding, benching and private office applications.

## CUSHION APPLICATION NOTES

When ordering a Planna Storage cushion to lie flush next to a Planna Storage case with rail/lateral surface, select your Planna Storage case with 'no rails' option.

## PEDESTAL FABRIC LAY UP INSTRUCTIONS

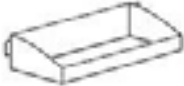

## LATERAL FABRIC LAY UP INSTRUCTIONS

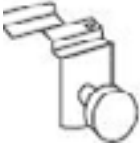

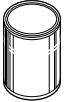

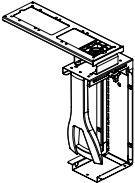

**Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your Client Services Representative for assistance.**

**Please see Finishes section for COM calculator.**

- Planna Storage Support Brackets are shipped as a pair and are both required per Planna Storage worksurface installation
- Hat Channel heights are nominal and they support a standard worksurface height of 28.5"
- Planna Storage rail kits are optional on Planna Storage cases, DO NOT specify if a cushion is to be installed
- Lateral kits install with the rail running the width of the case (side to side)
- Pedestal kits install with the rail running the depth of the case (front to back) EXCEPT for the 18" D which runs side to side
- Planna Storage rails are only available in silver (match to P290 Aluminum Leaf)
- Planna Storage Rail kits include mounting hardware to adhere to the case if ordered separate from Planna Storage case

## Accessories

Planna Storage  
Pedestals and Lateral Tops

# System

- Planna Storage tops are ½" thick to withstand weight that may be placed on the Planna Storage case
- Various depths and widths have been created for multiple configurations. Refer to drawing in left column for details
- Planna Storage tops are shipped with double sided tape to adhere on the Planna Storage rails

### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product PLN1518 in Nuform Select would be \$86 +\$17

	Part number	W	D	Wt (lbs)	Nuform classic/ base price	Nuform select

## INSCAPE BENCH SPINE

Inscape Bench spine frames are constructed of 16 gauge tubular steel uprights with welded 18 gauge steel crossrails. This strong yet lightweight construction provides ease of movement and reconfiguration.

The simplicity of the spine structure provides an intelligent solution to cable management. The absence of baseplates, apertures and corner posts eliminate barriers that restrict the routing of cables. Cabling may be routed both vertically and horizontally through the panel. Cables are laid into cable managers that easily install between panel crossrails throughout the framework. Cable managers safely cradle and segregate cables. An aperture free system means installation and reconfiguration costs are kept to a minimum. Reconfiguration is easy and economical. Cabling simply eases out of the cable managers and is laid back in at the desired point, eliminating the costly need to cut and re-terminate cables for every reconfiguration. \*See Inscape Bench Application Guide for quantity of cables achievable in the various spines.

### SPINES

Spines do not include the electrical cover kit but may house power which is to be accessed in alternate locations with a "cutout" tile. The spine comes with one wire manager. Electrical and data components must be specified separately.

Spine glides provide 1.5" height adjustment allowing air to circulate. Spines are available in 6" increments in widths ranging from 30" W to 60" W.

### MID SPINE SUPPORT LEG

A Mid Spine Support Leg must be specified when the Partial Height Spine or the Filing Spine are specified. This leg is a support between two spine frames. There is also a 120° version available. The legs are specific to parallel and 90° applications. The mid spine support legs specific to 90° applications are available in wood, straight metal and T metal styles. The wood style come in Clear Oak (default), Black Oak and Clear Maple finishes. The metal styles are painted and come in all standard options.

### END SPINE SUPPORT LEG

An End Spine Support Leg must be specified at the very end of a Partial Height Spine frame run. This leg is specific to 90° applications. It is available in wood, straight metal and T metal styles. The wood style come in Clear Oak (default), Black Oak and Clear Maple finishes. The metal styles are painted and come in all standard options.

### 90° SPINE SUPPORT LEG

A 90° Spine Support Leg must be specified at the connection point when two Partial Height Benching spine frames are connected at a 90° angle. This leg is specific to 90° applications. It is available in wood and straight metal. The wood style come in Clear Oak (default), Black Oak and Clear Maple finishes. The metal styles are painted and come in all standard options.

## STACK-ON FRAME

The Stack-on Frame consists of a 6.75", 10.125", 13.5", 20.25" and 27" frame which may be installed on any Inscape Bench spine of the same width or combination of two frames as outlined in the Inscape Bench Application Guide only. The Stack-on frame is load bearing and can be stacked one high above spine frame. Tiles and trim are specified separately. Stack-on frames are frame thickness specific and should be specified accordingly.

### DOUBLE GLAZED STACK-ON KIT

Double Glazed Stack-On Kit is a stack-on with a double glazed insert. The 30" to 48" W Double Glazed Stack-on is a fully welded frame stack-on. Double Glazed Stacks which are 54" and wider are kitted and are installed on site. The Double Glazed Stack-on is not load bearing and no stacks can be stacked on top of the Double Glaze. Finishes are available in Clear or Frosted Acrylic to match Double Glazed tile.

## TRIM & CONNECTORS

All Top Caps, End of Line Trim, and Connectors must be specified independently from the frame.

### INLINE CONNECTORS

Inline Connectors are specified to join two units together which are in alignment. These connectors are specified based as INLINE-2 which will connect any of the Inscape Bench spines as well as the stack-ons. Be sure to specify inline connectors for the Stack-ons and Double Glaze Kits separately.

### CONNECTOR TRIM KITS

Connectors are specified independently from the inline connectors and include all necessary brackets and trim for the condition. They are available in two styles; 90° and 120°.

90° corner connectors are used in 90° applications only.

120° connectors are available in "Y" connectors are for 3-way connections and "V" connectors are for 2-way connections.

### TOP CAPS

Top Caps are specified separately. The Top Cap includes clips to mount on spine or Stack-on in addition to the option of spanning two frames as outlined in the Inscape Bench Application Guide.

### END TRIM

End Trim is kit structured to include all brackets, bolts and finished trim; Flat profile. Trim is manufactured from aluminum and always aligns straight and true at end of the Filing spine. All painted aluminum vertical trim and top trim are easily removed to facilitate lay in of cables.

### STACK-ON END TRIM

Stack-on End Trim is used when a higher Stack-on requires vertical end trim at a connection. Hi-Lo trim may be used in this application for Flat profile trim because there is no 'scribing' that is required for this profile.

## TILES

Tiles are available as Fabric, Painted, Tackable, Nuform, Double Glazed, Paper Management and Whiteboard. 13.5" H tiles are interchangeable between Inscape System and Inscape Bench. Tile heights vary and must always align with the spine they are to be installed on.

ie. 23.6" H tiles = Full Height Spine, 10.125" H tiles = Stack-on, 13.5" H tiles = Partial Height and Storage Spine. Tile clips support spine tiles and top trim.

### FABRIC AND PAINTED TILES

Fabric and Painted Tiles are available 23.6", 10.125" and 13.5" H and are constructed of 24 gauge galvanized steel. Powder-coated and fabric-covered steel tiles have a flame spread rating of less than 200 when tested according to ASTM-E84. Fabric-covered tiles are available in standard fabrics or COM. COM fabrics are subject to approval. White or extremely light colored COM fabrics will incur an upcharge of 25% to the tile pricing with which the fabric is being applied. This is due to special handling of the fabric and tiles, in addition to painting of the tiles. Painted tiles are available in the colors shown in our Color Guide and are available in the following styles: plain steel, embossed, perforated, and steel screen. Fabric on tiles is applied in a railroad orientation.

### TACKABLE TILES

Tackable Tiles are constructed from 24 gauge cold rolled steel with a paint finish on all surfaces to prevent corrosion. The same general rules from the fabric tile section apply to the Tackable tiles. Fabric on tiles is applied in a railroad orientation. NRC 0.57, STC 9. Tackable Acoustical tiles are available through Standard Specials with and NRC .73 and an STC of 12.

### NUFORM TILES

Nuform Tiles consist of white melamine-backed MDF substrate 0.375" thick, with vacuum-formed Nuform foil over the front's surface and sides. The back-side of the tile also has routing features that accept zinc die-cast tile clips. All Nuform tiles incorporate a stiffener on the rear of the tile to ensure straightness and rigidity. This stiffener limits where the tile may be placed on the Inscape Bench spine. Nuform tiles cannot be specified in a location where a power track is installed due to interference. A sticker on the back of Nuform tiles provides UL flame/smoke-rating information. Woodgrain pattern is vertical. Due to limitations in the foil size, 48" and wider tiles are not available in F06 Walnut.

## WHITEBOARD TILES

Whiteboard Tiles are available in heights of 13.5". Tiles are constructed from 24 gauge cold rolled steel with a white paint finish that has been specifically formulated for dry erase markers. Whiteboards are seamless and fit same locations as standard painted tiles.

**NOTE: Only Expo Markers are to be used on any Inscape Whiteboard. Whiteboards should be cleaned with Expo Eraser or a Microfiber cleaning cloth along with Expo Cleaning Solution which is formulated to remove residue from Expo Dry Erase Markers.**

## PAPER MANAGEMENT TILES

Paper Management Tiles support horizontal paper management accessories. Organizers may be positioned at any point along the width of the tile. Three slats structured into the tile allow for three different height options for the accessories to be installed. Accessories may be found under Horizontal Accessories under the "Storage and Accessories" section. Maximum load capacity is 75lbs. When specifying paper management tiles which will be supporting a monitor arm, a Paper Management Reinforcing kit is required for additional structure. The 54" and 60" W tiles are pre-structured with these kits.

## PERFORATED AND EMBOSSED TILES

Perforated and Embossed Tiles are constructed of 24 gauge galvanized steel, the Steel Screen Tiles are constructed from 24 gauge cold rolled steel. Tiles may be painted in any of Inscape's standard colors or color matches.

## COMMUNICATION TILES

Communication Tiles provide power OR data access. The 30" W includes one cutout while all wider tile widths include two cutouts. Bezels in tile may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

**MULTI-ACCESS TILES**

Multi-access Tiles provide electrical AND data access. Cutouts align with power track and proper tiles must be specified in specific areas if stated. Data and Electrical components may be specified from the Technology section. Bezels in tile may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf) as well with the data or electrical components. Bezels are flush with tile, NOT recessed.

**COMMUNICATION AND MULTI-ACCESS TILES WITH SINGLE SIDED CUTOUTS**

Communication and multi-access tiles with single sided cutouts have one cutout per tile (or two above each other for multi-access) and the cutouts are left or right justified making the tiles handed. They are intended to be specified so that the cutouts are hidden below the worksurface. Use one left and one right hand collaborative communication tile for each Bench Collaborative area

**DOUBLE GLAZED TILES**

Double Glazed Tiles are available in 13.5" H and may be installed on frames 24" to 48" W in place of a tile. Double Glazed tiles feature a double pane of frosted acrylic or clear acrylic framed by vertical and horizontal trim. Double Glazed tiles may be installed one on top of another. If wider than 60" of glaze is desired; Stack on Double Glazed kits may be specified.

- 2 ¾" thick spine when clad with tiles
- Power Track Kit (Upper Deck) only - no electrical clips included
- Includes one cable hook
- Bench spine frames come standard with rectangular glides. Black and gray options available

	Part number	H	W	Thickness	List price

	<b>INBFF60</b>	13.5"	60"	2 ¾"	\$231

- 2 ¾" thick when clad with tiles
- No Twin Bin placement on the 13.5"H Stack-on
- 20.25"H requires an additional crossrail (separately) if Twin Bin or 13.5"H tile being specified
- Fully welded stack on kits easily installed and removed to adjust panel height
- Load bearing
- Stack on frames may span multiple frames
- See Application Guide for spanning guidelines

**NOTE**

With the exception of the 10.125" H stack-on frame, standard Inscape System tiles can be used for Bench Stack-On frames.

	<b>INSTGL96-2F</b>	13.5"	96"	2 3/4"	\$1058	+\$182	+\$107	

- Mid spine support legs support the Partial Height Benching spine when it is placed adjacent to another inline
- Glide option on spine support legs are black and gray with the exception on the 90° application legs coming in black only
- Wood spine support legs are available in Clear Oak (default), Black Oak and Clear Maple finishes
- Straight and T metal spine support legs are painted and available in all standard colors
- For freestanding height adjustable 90° applications the Metal T Legs must be use with a Bench Height Adjustable Foot Docking Bracket.  
*\*See Worksurface Support section of this price list*
- The Height Adjustable Tables (2 or 3 stage base) found in the Ergonomic Price List are compatible with 90° applications in 48", 54" and 60" widths only

		Part number	H	Neutral paint/ base price	Accent paint

	4-Way Wood Partial Height Bench Frame Spine Support Leg for Mobile applications only	<b>INB4SLW10</b>	10"	\$316	—
	4-Way Metal Partial Height Bench Frame Spine Support Leg for Mobile applications only	<b>INB4SLSM10</b>	10"	\$262	+\$27
	Freestanding Bench Spine Floor Docking Bracket	<b>INBLAKESTBKT</b>	—	\$17	—

- Inline Connectors are required to be specified when frames are connected inline
- Specified independently of frame and may span two frames.
- See Inscape System Application Guide
- All mounting hardware is included for corresponding frame thickness
- Top Trim up to 60" W requires two additional Jesters to be specified if spanning multiple frames (i.e. a 60" W top trim installed on two 30" frames)
- Stack-on End Trim (Hi-Lo End Trim) is specified when stack frames are specified

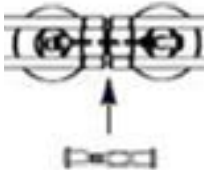

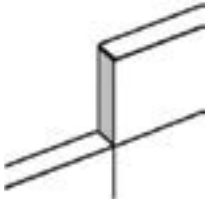

- End of line trim is specified when storage is being specified and there is visibility to the end of the frame (all other end conditions include finished appearance with no end trim needed)
- End of line trim can not be used on a stack on frame

**NOTE**

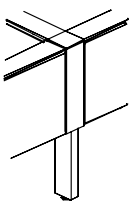

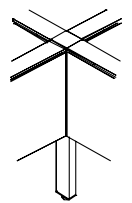

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

## Tiles

### Partial Height Spine Tiles

# Bench

- 13.5" H tile may be specified with Partial Height Spine or Filing Spine
- Tiles are standard 13.5" H Inscape System
- 13.5" H tiles may be specified on 13.5" Stack-on Frame
- Multi-access Tiles include cutouts for power and data
- Communication Tiles include cutouts for power or data
- Collaborative communication and multi-access tiles with single sided cutouts have one cutout per tile (2 stacked for multi-access) and the cutouts are left or right justified making the tiles handed. They are intended to be specified so that the cutouts are hidden below the worksurface
- Use one left and one right hand collaborative communication tile for each Bench Collaborative area

		Part number	H	W	Neutral paint/ base price	Accent paint

# Bench Technology

**inscape**

work for tomorrow

Inscape Bench electrical is UL and CSA approved. New York City and Chicago solutions are also available as standard offering. The electrical system features 8 wires and 4 circuits that can be configured in a 2+2 or 3+1 circuit configuration. All electrical components, with the exception of the power feed (which must be connected to the building power supply by a licensed electrician) may be installed by furniture installers, unless otherwise stated by jurisdiction of the installation.

Inscape Bench electrical components consist of the following: Floor/Wall power in-feed, power tracks, jumper cables and duplex receptacles. Power components snap into place without the need of tools and are the same components as offered in Inscape System.

#### POWER IN-FEED

Power In-Feed connections can be made through a wall, column, or floor connection. Power in-feed connections for Full Height applications consist of an 84" long liquid tight cable and a 45" flex cable connected by a 3" metal coupler and elbow joint to sit between bottom rails. Power in-feed connections for Partial Height applications consist of an 84" long liquid tight cable and a 12" flex cable connected by a 3" metal coupler and elbow joint to sit between bottom rails. The liquid tight portion of the Power in-feed must be connected to the building power supply by an electrician. If two power feeds are being specified for one cluster of stations, care must be taken not to cross connect the two feeds through jumper cables and power tracks.

Two versions of the power in-feed exist. One version is to be used with the Full Height Spine and the other is to be used with the Partial height or Storage Spine and includes a wire casing.

#### NEW YORK CITY IN-FEED

New York City has requirements for special power entry assemblies. A qualified electrician is required to hard-wire the New York City In-Feed from the entry box to the power source. The New York City feed works for side feed, end feed or ceiling feed.

#### CITY OF CHICAGO HOLD DOWN BRACKET

The City of Chicago does not permit the use of pre-wired modular electrical systems. To simplify hardwiring of the Inscape Bench Spine, the City of Chicago Hold Down Bracket (INECHB) is available. Specify two INECHB for each power entry point, one for the power feed and one for the outlet. (The outlet box is NOT supplied by Inscape). INECHB's are available in packages of 6.

Boxes should be sourced through Ental Industries or J&A Sheet both local Chicago suppliers of electrical junction boxes.

**NOTE: Spines 30" W will accept one double-sided outlet box. Spines 36" W and wider will accept two boxes. INECHB's may also be specified to mount multi-user termination boxes inside the panel.**

#### POWER POLE

The Bench power pole brings power and data into the station from the ceiling. It includes a split top trim to facilitate cable entry into the spine panel, a ceiling grommet, an optional 16' or 22' long electrical cable and an expandable power pole featuring a septum to separate power from data cables to avoid electromagnetic interference (EMI). Specify ceiling power pole according to panel width as well as an optional selection for A Leg applications, which includes a bottom cover that conceals cables running from the bottom of the channel up to the frame. An electrician must connect the ceiling power entry cable to the building power supply. If two power feeds are specified for one cluster of stations, care must be taken not to cross connect the two feeds through jumper cables and power tracks. The entire power pole accommodates 61 Cat6 and 78 Cat5 cables at a 60% fill capacity if no electrical cable is routed through pole. If electrical is routed within power pole, at a 60% fill capacity, 46 Cat6 and 59 Cat5 cables may be accommodated

2 + 2 CIRCUIT CONFIGURATION

2+2

- Circuits #1 and #2 share one oversized neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.
- Circuits #3 and #4 share the other oversized neutral and isolated ground to provide isolated power to computers.

3+ 1 CIRCUIT CONFIGURATION

- Circuits #1, #2 and #3 share one oversized neutral and one shared ground to provide convenience power for task lights, calculators, radios etc.
- Circuit #4 uses the other oversized neutral and isolated ground to provide isolated power to computers.

POWER TRACK KITS

Power Track Kits consist of a power track and clips to attach the power track to a crossrail. The kit allows for power tracks to be mounted in specified locations (above or below the worksurface). Jumper cables and receptacles are specified separately. The 30" W Power Track Kit accepts one duplex per side. Power Track Kits which are 36" W and wider accept two duplexes per side. Power Track Kits may be specified below the following; Transaction Tops, Up mount Bins, Stack on Glaze, Add on Glaze and Double Glazed Tiles. Power Track Kits MAY NOT be specified below Twin Bins or Power Poles.

JUMPER CABLES

Jumper Cables by-pass non-powered spines and also facilitates connections from power track to power track. Jumper cables must attach to power tracks only and cannot be attached to adjacent jumper cables or power in-feeds. Product codes indicate the width of the jumper cable which may be cross-referenced in the Inscape Bench Application Guide. Various widths of jumper cables are available to facilitate various applications and configurations. See Inscape Bench Application Guide for details.

DUPLEX RECEPTACLES

Duplex Receptacles snap into power tracks back-to-back and may be accessed through cutouts in either the electrical cover plate with standard frames or multi-access and communication tiles in all other locations and basic frames. Duplexes are interchangeable amongst the varying power track locations. Specify duplexes according to circuit configuration, 2+2 or 3+1. The IN2D3- duplex is specific to 2+2 wire configurations and the IN2DU3- duplex is specified for 3+1 wire configurations. General rule is no more than 12 receptacles per circuit per power in feed. Duplexes may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf).

Controlled receptacles to satisfy California Title 24 are available. These receptacles control circuits through building switches. When circuits are controlled through building switches, it is required to identify which circuit is controlled to the end user. To identify the receptacles on the controlled circuit, Inscape's controlled receptacles have a power mark (circle with the vertical line). The fit and function of these receptacles are same as the standard receptacle offering only application is in controlled circuits.

## DATA COMPONENTS

### HINGED COVER (INHRC)

The hinged cover (INHRC) snaps into the cutouts which are found in multi access and communication tiles. When data faceplates and receptacles are not required the hinged cover provides a visual and protective cover.

### FIBER OPTIC OUTLET

Fiber optic outlet (INCFO) is specified to be installed in a cutout in a multi access or communication tile. May be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf).

### DATA AND COMMUNICATION FACEPLATE

The **Data and Communication Faceplate (INCDP)** installs in a cutout in a multi access or communication tile where plug and play access is required. The faceplate provides three “slots” where the **Category 5 (INCABRJ45)**, **Category 6 (INCABR6J45)**, and/or **Telephone Jacks (INCRJ11)** may be inserted. All “openings” need to be filled with data or phone jacks, the **Blank Data Plate Insert (INCB)** fills in any which are not being used. Data components may be specified in black, white (close match to P168 – Glacier White) and gray (close match to P290 – Aluminum Leaf). Telephone Jacks (INCRJ11) are not available in gray. Data Communication Plates (INCDP) are not currently available in white.

### CLAMP ON POWER MODULES

Clamp-on power may be clamped along edge of worksurface for plug and play access to electrical/voice/data. Power Modules plug into the duplexes and attach to 1” and 1 ¼” thick worksurfaces.

The Clamp-On Power Module has a 3 receptacle/1 dual USB port configuration and is available in a black or white finish. It has a 96” long power cord and LED surge protection indication. The mount includes a device holder.

The Clamp-On Power Module with Colored Components comes in many different configurations with receptacles, USB (1 type A and 1 type B) ports and availability lights. Power Modules come in black, white or gray and have colored options for the lid; Black, White, Teal, Red, Purple, Blue, Green, Gray. The availability light is user controlled and requires free software download.

### CABLE HOOKS

Cable Hooks support and segregate data cables. Each frame 37” and higher ships with one cable manager. Cable hooks carry data cables to their termination voice/data point at a multi access or communication tile for plug and play access or to hanger brackets which are located behind the tile.

### WIRE MANAGEMENT CLIPS

Wire Management Clips are required when power is being routed from a Credenza Storage benching application frame to the worksurface. Where cabling is running from behind a Credenza Storage case, these wire management clips are mounted to the underside of the inside of the case and the wires are cleanly routed to the main surface. These clips come in a package of 10 and are white in color.

### WIRE CASING

Wire casing manages cables and technology from a worksurface to the floor. Casing is 29” long but can be adjustable in length by removing or adding “links”. Casing is available in gray. As standard the wire casing accommodates 28.5” H worksurface heights. The wire casing accommodates 30 Cat5 cables with electrical works at a 60% fill capacity which is recommended. Approximately 36 Cat5 cables may be accommodated in the wire casing at a 60% fill capacity without electrical works.

- Partial Height In Feed Kit is slightly shorter than the Full Height Kit and includes wire management casing
- All electrical components are standard 8 wire configuration
- New York City Power In-Feed Kit is for use with a full height spine. To use it with Partial Height or Storage spine application, a wire management casing (INBFWC) needs to be specified
- The power pole is expandable and comes standard with a 16" whip. It also has the option of no power or can accommodate a 22" whip

		Part number	List price
	Standard Floor/Wall Power In Feed Kits	<b>INEFWK-8</b> (use with full spine)	\$361
		<b>INBFWK-8</b> (use with partial height spine)	\$641
	New York City Power In Feed Kit	<b>INEFWK-NY-8</b>	\$641
	Wire Management Casing Gray	<b>INBFWC</b>	\$130

	Part number	Neutral paint/ base price	Optional 22" whip	No power option	Accent paint	
	Power Pole	<b>INBPWRPOLE-8</b>	\$1595	+\$225	-\$238	+\$166

- All electrical components are standard 8 wire configuration
- See Inscape System Application Guide for jumper cable length requirements for varying panel configurations
- Jumper Cables do not connect together nor do they attach to power in feeds

**NOTES**

- Power tracks are required to match the width of the frame they are being installed in
- Power Track Kits may be specified below the following; Transaction Tops, Up mount Bins, Stack on Glaze, Add on Glaze and Double Glazed Tiles
- Power Track Kits MAY NOT be specified below Twin Bins or Power Poles

		Part number	W	List price
	Power Track Kit	<b>INRUDKIT-30-8</b>	30"	\$185
		<b>INRUDKIT-36-8</b>	36"	\$201
		<b>INRUDKIT-42-8</b>	42"	\$219
		<b>INRUDKIT-48-8</b>	48"	\$238
		<b>INRUDKIT-54-8</b>	54"	\$253
		<b>INRUDKIT-60-8</b>	60"	\$273
	Electrified Twin-Bin Power Track	<b>INETPTWB-8</b>	8"	\$88

		<b>INETC53-8</b>	53"	\$88
		<b>INETC64-8</b>	64"	\$104
		<b>INETC88-8</b>	88"	\$135
		<b>INETC104-8</b>	104"	\$156
		<b>INETC122-8</b>	122"	\$192
		<b>INETC141-8</b>	141"	\$194
<b>INETC158-8</b>	158"	\$212		
<b>INETC182-8</b>	182"	\$243		

- All electrical components are standard 8 wire configuration
- Circuit 3 receptacle requires 2+2 or 3+1 wire designation (“U” in the code signifies 3+1 wire configuration)
- White is a close match to 168 Glacier White, Gray is a close match to 290 Aluminum Leaf
- The “UD” duplexes are to be specified in conjunction with the Electrified Twin Bin (Inscape System Price List)
- Controlled receptacles satisfy California Title 24 and are indicated with a “power mark” which is represented by a circle with a line

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product IN2D1-8 in Gray would be +\$27 +\$11

	Part number	Black/ base price	White	Gray	
	Receptacle for cutout tiles application in 2 3/4" frames	<b>IN2D1-8</b>	\$27	+\$11	+\$11
		<b>IN2D2-8</b>	\$27	+\$11	+\$11
		<b>IN2D3-8</b>	\$27	+\$11	+\$11
		<b>IN2D3U-8</b>	\$27	+\$11	+\$11
		<b>IN2D4-8</b>	\$27	+\$11	+\$11
	Controlled Receptacle for cutout tiles application in 2 3/4" frames	<b>IN2D1-8C</b>	\$32	+\$11	+\$11
		<b>IN2D2-8C</b>	\$32	+\$11	+\$11
		<b>IN2D3-8C</b>	\$32	+\$11	+\$11
		<b>IN2D3U-8C</b>	\$32	+\$11	+\$11
		<b>IN2D4-8C</b>	\$32	+\$11	+\$11

		<b>IN3D2-UD-8</b>	\$27	+\$11	+\$11
		<b>IN3D3-UD-8</b>	\$27	+\$11	+\$11
		<b>IN3D3U-UD-8</b>	\$27	+\$11	+\$11
		<b>IN3D4-UD-8</b>	\$27	+\$11	+\$11

- The Hinged Cover is a plastic cover that acts as a hinged door to allow access to the cables if needed. Available in color options of black (default), white and gray
- Data cannot be installed directly back to back in a benching spine

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INHRC in Gray would be \$22 +\$11

	Part number	Black/ base price	White	Gray
 Hinged Cover for Tiles with Cutouts	<b>INHRC</b>	\$22	+\$11	+\$11

- Wire Management clips are white and attach by double sided tape which is included
- Wire Casing (INFWC) is 29" long and allows for electrical and data cables to be brought neatly from floor into a table – available in gray only, works with 28.5" worksurface heights
- Cable Management Tray (INCMTXX) is available in two lengths, painted Eco Black and includes mounting hardware
- Height Adjustable Cable Manager (INHACMT18) comes with a basic tray (see INCMT18) and 1" Diameter grey plastic wire sleeve that is single length piece with opening slit to accept cables
- 18"w Cable Manager Tray (INHACHCMT18) includes a black rectangular cable chain with an non-hinged tray
- Hinged Cable Manager Tray (INHACMTHINGE) includes black rectangular cable chain with a hinged tray

		Part number	Neutral paint/ base price	Accent paint
	Wire Management Clip (pkg of 10)	<b>INWMCLIP</b>	\$30	—
	Wire Casing (Gray color)	<b>INFWC</b>	\$130	—
	Cable Management Tray	<b>INCMT18</b> <b>INCMT30</b>	\$36 \$47	— —
	Wire mesh cable tray (silver)	<b>INWMTRAY</b>	\$133	—
	Height Adjustable Cable Manager	<b>INHACMT18</b>	\$89	—
	18"w Cable Manager Tray For use with Electric Freestanding and Bench (illustrated) height adjustable applications	<b>INHACHCMT18</b>	\$256	+\$27
	Hinged Cable Manager Tray For use with Electric Freestanding and Bench (illustrated) height adjustable applications	<b>INHACMTHINGE</b>	\$532	+\$56

- Power Modules mount to the back edge of a surface and are accessible by the user above the surface
- Power Modules plug into the duplexes
- The Clamp-On Power Module is available in a black or white finish. It has a 96" long power cord and LED surge protection indication. It attaches to 1" and 1 ¼" thick worksurfaces and the mount includes a device holder.
- The Clamp-On Power Module with Colored Components comes in many different configurations with receptacles, USB (1 type A and 1 type B) ports and availability lights. Power Modules come in black, white or gray and have colored options for the lid; Black, White, Teal, Red, Purple, Blue, Green, Gray. The availability light is user controlled and requires free software download.

	Part number	List price
 <p>Clamp-On Power Module 3 receptacles/1 dual USB port</p>	<b>INPMOD-3P1U</b>	\$173
 <p>Clamp-On Power Module with Colored Components 2 Ports: 1 receptacle + 1 USB AC</p>	<b>INBPMOD-1P1U</b>	\$437
 <p>Clamp-On Power Module with Colored Components 4 Ports: 2 receptacles + 1 USB AC + 1 open data port data not provided</p>	<b>INBPMOD-2P1U1O</b>	\$548
 <p>Clamp-On Power Module with Colored Components 4 Ports: 2 receptacles + 1 USB AC + 1 availability light</p>	<b>INBPMOD-2P1U1L</b>	\$867

**Bench**  
Worksurfaces  
& Supports

**inscape**

work for tomorrow

Depth dimension is nominal. Depths are .325" less than stated to provide a gap between the worksurface and panel to facilitate wire management. Worksurfaces are specific to the worksurface support they are being installed on. Codes and dimensions are outlined in the following pages and Inscape Bench Application Guide showing which worksurface is to be specified with the End Gable, Open "H" Leg or Storage Support.

Depth dimensions listed on Height Adjustable surfaces are actual.

All worksurfaces default to 1.25" thick, Straight edge, Pencil Groove.

Grain direction on woodgrain Nuform worksurfaces is as denoted below.

**NUFORM CLASSIC & NUFORM SELECT WORKSURFACES**

The Nuform top is a thermo-formable polymer based sheet continuously bonded to a 1.25" thick MDF substrate. The polymer sheet is surface coated with a scratch resistant film. Colors are homogenous throughout the film thickness. Top and edge are one continuous surface with no edge seams. The underside of the top is finished in a low pressure melamine. Nuform tops have the option of a pencil groove running across the width of the worksurface as standard and depth for conference tables. Two price options are available - Nuform Classic and Nuform Select.

**WORKSURFACE EXTENSION**

The Worksurface Extension is a cantilevered worksurface which is situated perpendicular to the spine. This top is available in all the worksurface finishes of the standard worksurfaces (if woodgrain is chosen, pattern will run perpendicular to the main worksurfaces). This extension CANNOT be specified adjacent to the Height Adjustable Worksurfaces.

**Edge Detail - Nuform Solid and Nuform Woodgrain**

1 1/4" Straight Edge

1 1/4" Tapered Edge

Top and edge are one continuous surface with no edge seams.

Note that the tapered edge style is only available on the front or user edge of the worksurface.

**LAMINATE WORKSURFACES**

Plastic laminate is laminated to 1.25" thick particle-board. The underside of the worksurface is finished with a man-made, wood-fiber veneer backer. Worksurfaces specified with a plastic laminate finish include a 2mm edge banding in a coordinating color. Plastic laminate tops do not include a pencil groove.

**Edge Detail - Plastic Laminate**

Straight Edge

**Load capacity for freestanding and panel mounted worksurfaces is 4.5lbs per linear inch.**

## ADJUSTABLE HEIGHT WORKSURFACES

Panel Mounted Electrical height adjustable worksurfaces are available for the Inscape Bench.

Electrical Height Adjustable Worksurfaces provide height adjustment ranging from 28.5" to 44.5" with a lift capacity and calibration of a recommended 195lbs (includes worksurface).

Worksurfaces structured on the height adjustable mechanism are 1" less in stated width in the price list, and are meant to be installed on center to the base allowing for a gap between adjacent surfaces to eliminate pinch points. The base mechanism of the worksurface is available in Silver only. See the Inscape Bench Application Guide for application notes and restrictions.

## WORKSURFACE SUPPORT BRACKETS & ACCESSORIES

### CANTILEVER BRACKET

Cantilever Bracket is fixed. Cantilever brackets support panel mounted worksurfaces on-module.

### FLUSH BRACKETS

Flush Brackets are specified when two adjoining worksurfaces need to be held flush together. These brackets (INFB) come as a pair. Maximum span of overhang when supported with a flush bracket is 18" per side. These are not required for Height Adjustable worksurfaces.

### SPACERS

Spacers are specified when storage is being specified within the bench. The appropriate height of storage to use within the bench is 22.5" id with FLAT GLIDE (Rectangular glides will not line up below the worksurface)

### LEG ANCHOR BRACKET

A Bench 30"d Single Sided Electric Height Adjustable table must have rear glides at every height adjustable support bracket anchored to a concrete floor using the Leg Anchor Bracket and customer supplied 3/8"-16 x 2.25" (min.) concrete anchor studs. See installation manual for further details.

### PEDESTAL BRACKETS

Pedestal Brackets are specified when a pedestal unit is being specified. This allows for docking of the storage pieces to the benching spine. End Location Bracket is to be specified when the pedestal is at the end of a run. The Middle Location Bracket is to be specified when a pedestal is situated below the bench within the bench.

*\*See Inscape Bench Application Guide.*

## STORAGE DOCKING BRACKET

Storage Docking Bracket is used when lateral or bookcase units are specified perpendicular to the spine. This bracket docks the storage and worksurface to the spine.

*\*See Inscape Bench Application Guide.*

## 90° WORKSURFACE SUPPORT BRACKETS

90° worksurface to spine support brackets support a 90° worksurface off of a spine frame. These brackets are handed left or right and there is a double sided option. The handedness of the support bracket is from the user perspective. Brackets are available in all standard paint finishes.

## SHARED WORKSURFACE SUPPORT BRACKETS

Shared worksurface support brackets are used to support either a 30"d or 36"d shared worksurface off of a spine frame(s) and are available in on module and mid module applications. See Inscape Bench Application Guide for application guidelines. Brackets are available in all standard paint finishes

## ANGLED WOOD SUPPORT LEG

The angled wood fixed worksurface support leg supports the end of a 90° or shared worksurface that is not bracketed to the spine frames. The angled wood fixed worksurface support leg come in three finish options; Clear Oak (default), Black Oak and Clear Maple.

## LATERAL TOPS

The Lateral Tops are available as 3/4" thick. These tops are to be specified atop the 22.5" id storage units, FLAT GLIDE only on storage. Tops are available in all standard Nuform finishes.

## END SUPPORT

There are three main ways to support the Inscape Bench from an end support perspective. One option is a Full End Gable. This end gable unit spans the entire depth of the bench beneath the worksurfaces, which are specific to this support type. The End Gable is a fully kitted product code which includes trim, tiles, glides and structure. The trim can be painted in any standard paint color. Tiles are to be specified on the inside and outside of the end gable. Tiles on the interior consist of two separate tiles whereas the outside is one full tile. Woodgrain on the exterior tile will run vertical on the tile. The Full End Gable is only to be used with the Full Height Spine.

An alternative support is the Open End Leg which is available in the "H", "O" and "A" options. This open leg structure has the ability to span the entire depth of the bench as well as carry multiple storage/accessories components. These units may be found in the Accessories section and are specific to the Open End Leg. The Open End Leg is only to be used with the Partial Height Spine; unless the Height Adjustable version is being used.

Open O legs have the option to add a glazed insert to either the double or single sided applications. The inserts are glass and are available in clear, gray and etched 1 side finish options.

H Leg hole covers are available for use with H Legs that have been optioned for electric height adjustable worksurfaces as holes are visible. These covers are a small flat rectangular powder coated (any color) sheet steel part that has double sided tape attached and will ship 4 per pack.

Both support types have a mid-span support which matches the overall end aesthetic. These are available in 12", 18" and 24" d. Tiles on the Full Gable version are painted only.

When the Height Adjustable Worksurface is specified, either the Full End Gable or the Open End Leg which is specific to the Height Adjustable may be specified. See Inscape Bench Application Guide for more details.

## SINGLE SIDED BENCH

Single Sided Bench may be specified to create single sided bench configuration. This application may only be used with a full height spine only. End Gable or Open End Legs are end support options. The legs include supports to tie into the spine or worksurface. Mid Supports, whether Full Gable or Open End Legs must be specified between two worksurfaces and tie into the spine on module. Use 18" mid support for 24" d worksurface and 24" mid support for 30" d worksurface. Benching worksurfaces are to be specified in the same way for single sided version of the bench. 36" d worksurfaces are not available in single sided version. When tiling full height tiles are to be specified. Nuform and laminate tiles cannot be used on single sided frames with electrical. When integrating height adjustable in a single sided application, specific end supports must be specified. The Single Sided Frame to Worksurface bracket must be specified to tie the worksurface into the spine.

## Worksurfaces & Supports

Rectangular Tops  
Middle Application

# Bench

- Depth dimension is nominal. Depths are .325" less than stated to provide a gap between the worksurface and panel to facilitate wire management.
- Worksurfaces are to be specified with any Inscape Bench spine in a middle or non-end position
- Nuform and Laminate
- Straight & Tapered edge available on Nuform
- 84" and 96" worksurfaces require same support as two surfaces
- Stretcher bars are required to be specified with worksurfaces 54" and wider which do have any mid support
- Stretcher bars are also required for all 30" or deeper worksurfaces no matter the width including when mid cantilever is installed
- Be sure stretcher bars do not to interfere with support brackets, cable trays or other work tools

- Rectangular Curved worksurfaces have curved back corners and straight 90° front corners
- Stretcher bars are included with all perpendicular worksurfaces
- The curved rectangular perpendicular worksurface will overhang 4.5" from the spine end line
- The straight rectangular perpendicular worksurfaces will overhang .300" from the spine end line which will bring it flush with the end trim
- The shared worksurface is not available with a tapered edge and freestanding end support legs must be specified separately

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBWCP2448 in Nuform Select with Tapered Edge would be \$432 +\$47 +\$23

## Worksurfaces & Supports

120° Worksurface  
Middle Application

# Bench

- Depth dimension is nominal. Depths are .325" less than stated to provide a gap between the worksurface and panel to facilitate wire management.
- Worksurfaces are to be specified with any Inscape Bench spine in a middle or non-end position
- 24"d worksurfaces have a front dimension of 38"
- 30"d worksurfaces have a front dimension of 32"
- Specific worksurfaces must be used in specific applications based on location and end support
- Nuform\* and Laminate
- \*All 23"D 120° surfaces that are 54"W & 60"W are NOT available in Nuform
- \*All 29"W 120° surfaces that are 48"W, 54"W & 60"W are NOT available in Nuform
- Straight & Tapered edge available on Nuform
- Stretcher bars are required to be specified with worksurfaces 54" and wider which do have any mid support

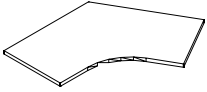

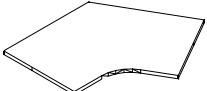

- Stretcher bars are also required for all 30" or deeper worksurfaces no matter the width including when mid cantilever is installed
- Be sure stretcher bars do not to interfere with support brackets, cable trays or other work tools

### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBWVM363624-S in Grade 1 laminate would be \$539 +\$174

# Worksurfaces & Supports

Height Adjustable Worksurface  
Electric

# Bench

- Specific worksurfaces must be used in specific applications based on location and end support
- This electric height adjustable table with two motors has a lift capacity of 195lbs (includes worksurface)
- Height adjustment is 28.5" to 44.5"; a total range of 16"
- Base available in Steel Wool, White Velvet or Kettle Black
- Nuform and Laminate
- Straight & Tapered edge available on Nuform
- End units are 1/2" shorter in length and Middle units are 1/2" shorter on each end eliminating potential pinch points
- Can be installed on a Full Height or Partial Height Spine with Full able End support. No mid support is required
- Only to be installed on Full Height Panel option - with either full height end gable or open end leg
- See Inscape Bench Application Guide for more details
- Stretcher bars not required for Height Adjustable worksurfaces

### HANDSET OPTIONS

Included at no additional cost:

1. Handset with Up Down Buttons

**OR**

2. Intuitive Paddle

Optional with upcharge:

3. Handset with Up Down Buttons + Memory Display (+\$92)

**OR**

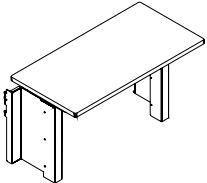

4. Intuitive Paddle with Bluetooth + Memory Display (+\$92)

# Worksurfaces & Supports

Height Adjustable Worksurface  
Electric

# Bench

- Specific worksurfaces must be used in specific applications based on location and end support
- This electric height adjustable table with two motors has a lift capacity of 195lbs (includes worksurface)
- Height adjustment is 28.5" to 44.5"; a total range of 16"
- Base available in Steel Wool, White Velvet or Kettle Black
- Nuform and Laminate
- Straight & Tapered edge available on Nuform
- End units are ½" shorter in length and Middle units are ½" shorter on each end eliminating potential pinch points
- Can be installed on a Full Height to Partial Height Spine with Full able End support. No mid support is required
- Only to be installed on Full Height Panel option - with either full height end gable or open end leg
- See Inscape Bench Application Guide for more details
- Stretcher bars not required for Height Adjustable worksurfaces

## HANDSET OPTIONS

Included at no additional cost:

1. Handset with Up Down Buttons

**OR**

2. Intuitive Paddle

Optional with upcharge:

3. Handset with Up Down Buttons + Memory Display (+\$92)

**OR**

4. Intuitive Paddle with Bluetooth + Memory Display (+\$92)

## NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

# Worksurfaces & Supports

Worksurfaces Supports  
90° Application

# Bench

- 90° worksurface to spine support brackets support a 90° worksurface at the end of a spine frame at 28.5" H. These brackets are handed left or right and there is a double sided option
- The handedness of the support bracket is determined from the user perspective (i.e. a left handed bracket would install on the left hand side of the user)
- Shared worksurface support brackets are used to support either a 30" D or 36" D shared worksurface off of a spine frame(s) and are available in on module and mid module applications. See Inscape Bench Application Guide for application guidelines
- Brackets are available in all of Inscape's standard paint colors

		Part number	H	Neutral paint/ base price	Accent paint

 Mid module		<b>INWSHBRKT-OFF</b>	—	\$240	+\$26	
		For mid module applications				

# Worksurfaces & Supports

Worksurfaces Supports  
90° Application

# Bench

- Height Adjustable Foot Docking Bracket must be specified when spine is freestanding with height adjustable tables
- Height Adjustable Foot Docking Bracket for use with no accessories can only be used in 90° applications
- Height Adjustable Foot Docking Bracket for use with accessories can only be used in 90° applications
- The angled wood fixed worksurface support leg supports the end of a 90° or shared worksurface that is not bracketed to the spine frames
- Wood support legs are available in Clear Oak (default), Black Oak and Clear Maple finishes
- ¼" Tapcon Masonry Screws are NOT included with the Anchor Bracket

		Part number	H	Neutral paint/ base price	Accent paint

		Part number	H	List price
	Angled Wood Fixed Worksurface Support Leg	<b>TANGCONPL28.5</b>	27 ¾"	\$504
		Single leg		

## Worksurfaces & Supports

Worksurfaces Supports  
Parallel Application

# Bench

- Freestanding Height Adjustable Foot Docking Bracket can be specified to dock the non-mobile Height Adjustable Tables to a T Foot in parallel applications

		Part number	H	Neutral paint/ base price	Accent paint
	Freestanding Height Adjustable Foot Docking Bracket for parallel applications	<b>INBHAFDBRKTPARL</b>	—	\$29	—

- 3/8" thick tops are available in Nuform (straight edge) and Laminate
- Tops are specified on 22.5" id cases along with spacers to support surfaces at 28.5" H
- Pedestal top depths are sized so that the tops line up flush with the front of the pedestals and go all the way to the front of the tile behind, covering the docking bracket space
- Tops are not available with plywood edge band

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

# Worksurfaces & Supports

Worksurfaces Supports  
Open H Leg

- Can be used with Full Height, Partial Height and Storage Spine Frames
- For double-sided applications, use 12" mid supports for 24"D surfaces, 18" mid supports for 30"D surfaces and 24" mid supports for 36"D surfaces
- For single-sided applications, use 18" mid supports for 24"D surfaces and 24" mid supports for 30"D surfaces
- Covers for "H" leg are specified when the holes on the interior of the leg are exposed when electric height adjustable is specified. These covers come 4 in a package and two are required under each worksurface

	Part number	H	W	Neutral paint/ base price	Accent paint

# Worksurfaces & Supports

Worksurfaces Supports  
Open O Leg

# Bench

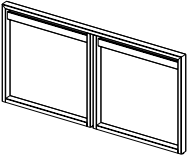

- When specifying an Open O Leg Support, choose the base, then choose the worksurface support option
- Open O Leg Supports can be used with Full Height, Partial Height and Storage Spine Frames
- Open O legs have the option to add glazed inserts which are available in clear, gray and etched 1 side glass. See example for how to price glazed inserts
- Has the ability to support various accessories which hang from the support bar of the leg
- Use Open H leg Mid Supports to support mid applications
- For single-sided applications, use 18" mid supports for 24" D surfaces and 24" mid supports for 30" D surfaces
- 36" D single-sided Bench applications are not available

## NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBAHLEG28.548 with fixed height worksurfaces supports on both sides would be \$1016 +\$278  
Product INBAHLEG28.548 with fixed height worksurfaces supports on both sides and Gray glazed insert would be \$1016 +\$278 + \$466 +\$54

# Bench Storage

**inscape**

work for tomorrow

**PEDESTALS**

Pedestals are of all-welded "wrap-around" construction of 20 and 22 gauge high quality, tension leveled, cold rolled steel. The steel gauge selected for drawer fronts, bodies and accessories ensure the highest quality durability and performance for all components. All glides on cases must be specified as flat glides (5/8" height adjustability) to work with Inscape Bench. Pedestal corners are welded at junction of top and case, eliminating horizontal lines for a cleaner, flush appearance, and strengthened with reinforcing gussets. A completely enclosed case provides rigid construction and dust-free interiors.

Box drawer sides are slotted on 1" centers to allow for maximum flexibility for drawer division. Double-wall construction allows lift-up doors to be picked up and recede smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. Storage with Handles is single-wall construction. File (10.5" and 12") and EDP (15") drawer bodies have full height sides to accommodate hanging file folders, eliminating the need for optional file frames. Fully progressive ball bearing suspensions on all drawers, including pencil and box drawers, are staged so that the left and right sides work in unison; this provides smooth drawer operation with minimum force. Staged suspensions allow the drawer to be completely pulled out, providing access to the entire drawer depth.

Special "claw-like" device incorporated in the suspension "grips" the fixed section of the suspension channel preventing drawer body bounce back or creep when drawer is closed. Modular interior allows complete interchangeability of drawer types within the pedestal case. For example, two 6" box drawers may be replaced by a 12" file drawer. Pedestals are standard with keyholes for attachment to underside of worksurface. For the Storage with Handles only cases: 18" deep pedestals come standard with 18" deep drawers, 22" and 28" deep pedestals come standard with 22" deep drawers. For all other Series, pedestal drawers match case depth.

Worksurface supporting pedestals are designed for use with the Inscape Bench when used with flat glides. Worksurface supporting pedestals are available in two depths to fit 24" and 30" deep worksurfaces and support finished worksurface height of 28.5". Pedestals with 3", 6" or 7.5" drawers have the option to order one pencil tray per pedestal. The 6" and 7.5" drawers have the additional option to order a steel divider. The 10.5" and 12" drawers have the option to order hang file suspension bar (two in a 28" deep pedestal) for side-to-side filing of legal or letter size folders or printout binders.

**NOTE: System storage pedestal cases consist of holes in the top of the case and back of the case to allow for worksurface docking and panel mounted brackets to be secured.**

**CUSHION MOBILE PEDESTALS**

The Classic Cushion is 1 1/4" thick CAL 117 compliant polyurethane foam with a 2.2 lb/ft. density. This upholstered cushion is balanced with a 7/16" board and is attached to the pedestal top with heavy duty Velcro.

Select from our graded upholstery program of solid color fabrics and vinyl's or choose COM option (Customers Own Material). To determine if a COM fabric has been pre-approved for use on our cushion topper, contact your client services representative or go to [www.inscapesolutions.com](http://www.inscapesolutions.com). For application of ALL fabrics, both from our graded program as well as COM (Customer Own Material) please specify layout orientation at time of order. If layup instructions are not provided Inscape will choose the direction to maximize production. Refer to the diagram for layup options.

After calculating the total amount of material needed in inches, divide the total number of inches by 36 for the total yardage and round up to the next full yard. Allow additional for repeat. Add 15% of total fabric required for small and medium pattern repeats. Add 20% of total fabric required for large patterns.

Due to the nature of the design and manufacture of our cushion, only approved fabrics will be accepted for application. For a description of the procedure required for COM fabric approval see sample 'Cushion COM Test Request' form found in the General Information section of this price list. This form can be downloaded from the Administration section of Insite or by contacting your client services representative for assistance.

**FABRIC LAY UP OF PEDESTAL CUSHIONS**

Pedestals come standard with lock. If lock is not required add suffix '/NL' after product number and deduct \$57 list per lock. Random keying is standard, and keyed alike may be ordered.

Locks feature removable core and are standard with two keys, one of which has a black neoprene plastic key cover. Locks may be ordered for field installation. Specify cabinet height and width or model number. Note: Locks cannot be field installed on hinged door cabinets.

## LATERALS

Lateral cabinets are of all-welded construction using 20 and 22 gauge high quality, tension leveled, and cold rolled steel. Drawer fronts, lift-up doors, roll-out shelves and all steel accessories are manufactured of the steel gauge appropriate to function at the highest quality level. Laterals must be specified with flat glides to work with Inscape Bench. Flat Glides provide 0.125" height adjustment when docked and 0.75" height adjustment if unit is not docked.

With the addition of counterweights where appropriate, cabinets meet all BIFMA specifications. All interiors are completely modular and interchangeable so that cabinets can be retrofitted with new accessories and interiors as required. Cabinet corners (except for Storage with Handles) are welded at junction of top and case, eliminating horizontal lines for cleaner, flush appearance, and strengthened with reinforcing gussets. Double-wall construction allows lift-up doors to be picked up and receded smoothly, eliminates deformation, ensures flush fit within cabinet and improves lock performance. Lift-up door carrier mechanism has four nylon rollers two on each side - for smooth receding action with no binding or snagging. Self-closing, 110° opening, European style cupboard hinges for smooth door operations.

The absence of scissor mechanism in doors and drawers eliminates the potential for scissors binding, and facilitates reconfiguration of cabinet openings as needed. Front leading edge of pullout shelves is beaded and rolled to provide grip for pullout action and strengthen shelf; front leading edge of fixed shelf is flat for easy removal of material. Fully progressive ball bearing suspension slides provide smooth action with minimum force.

Special "claw-like" device incorporated in suspension slide channel "grips" the fixed section of the suspension channel preventing drawer bounce-back or creep when drawer is closed. A patented Safelock™ interlock mechanism provides complete security and user safety against accidental opening of two or more drawers simultaneously. Lock fingers are configured with right angle bend upward not downward so that lift-up doors cannot be pulled down to disengage fingers from door slots and be forced to circumvent lock system. Lock bars operate vertically on both sides of cabinet for maximum security.

Knockouts that are included on case sides, top and bottom facilitate ganging and leveling. Glides - 2 in front and 2 in back - are adjustable from inside the cabinet so that cabinets can be leveled regardless of whether they are backed against a wall or banked.

9900 Series fronts have full width integral pulls with enamel finish to match case fronts. Storage with Handles fronts are available with 2 pull options. The standard pull option is the radius aluminum pull. A rectangular aluminum pull option is also available at no additional cost. Storage with Handles is single-wall construction. Nuform fronts include a Q- pull.

Laterals include 1 pair of hang file bars in 10.5" and 12" fixed fronts, 1 EDP kit in 13.5" and 15" fixed fronts, pencil tray in 3" multi-file drawer and steel divider in 7.5" multi-file drawer, steel divider in 6" multi-file drawers and 3 divider plates in 13.5" lift-ups. Fixed shelf in lift-up is slotted in 1" increments. Lateral to panel bracket is required if lateral is positioned on-module.

**NOTE: laterals and multi-files consist of slots in the back of the case to allow for panel mounted brackets to be secured.**

Cabinets ship standard with single bitted lock. For applications requiring higher security a double bitted solution is available. If lock is not required it may be optioned as such. Random keying is standard, keyed alike is optional. Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Contact your client services representative for required parts. Locks may not be field installed in hinged door and sliding door cabinets. Master keys are available; refer to the accessories section to specify. Locks are standard with two keys, one of which has a black neoprene plastic cover.

All laterals are finished in standard 36.5° gloss baked enamel, electrostatically applied in a 2-coat process. Refer to the surface materials section for available colors. With the exception of custom micas, whites and metallic; custom colors are available at an up-charge and are be subject to extended lead times. For laterals specified in custom micas, specials whites or metallic, add an up-charge of 10% to the list price. All interior drawers/shelf bodies, exposed hardware (excluding European style hinges) hang file bars, dividers and media frames are finished in Eco Black.

## TWIN-BINS

Twin-Bins are 5.75" deep on each side of the supporting frame. Twin-Bins may be specified to install in stack frames above the worksurface. Bins are manufactured from minimum 20 gauge steel with an extruded aluminum reinforced top. Double wall, sliding doors on each side of the unit, slide easily across the recessed groove built into the bin front. Twin-Bins are available with or without locks. The locking mechanism is individualized for each side of the unit, allowing for personal privacy on either side. Twin-Bins are available in 36", 42", 48" and 60" W. Recommended maximum load for Twin-Bins is 3lbs per linear inch. Bins are finished in standard 37.5° gloss baked enamel, electrostatically applied in a 2-coat process and are available in any of the colors shown in our Color Guide. Woodgrain fronts are available in any of our standard woodgrain finishes.

Handles are standard in aluminum finish and are located on the front of the sliding door. Case may still be ordered in any of the colors shown in our Color Guide.

## ELECTRIFIED TWIN BIN

The Electrified Twin Bin is built on the same premise as the standard Twin Bin with the addition of electrical and a sliding door with locking capabilities in two positions. All electrical components are specified separately including power track, receptacles and jumper cables. The sliding door may lock either the binder storage portion (full depth of bin) or the electrified portion which is the center portion which is approximately 5"D. The back of the Electrified Twin Bin may be clad with either a tackboard or whiteboard which are both specific to this storage unit. A shelf may also be optioned for the electrified portion which is field installed midway between top and bottom of opening. A gap in the shelf allows for the cord of an electronic unit to plug into duplex (located near base of opening) and still sit on top of shelf.

**NOTE: These accessories are NOT compatible with the standard Twin Bin.**

See Inscape Bench Application Guide for criteria on which heights of stack-on to use in conjunction with the Twin Bin and Electrified Twin Bin.

## SPECIFY TWIN-BIN MOUNTING BRACKETS

Specify Twin-Bin Mounting Brackets separately according to location on frame. 1 bracket per Twin-Bin is required. When stacking Twin-Bins a 6.75" H tile minimum must separate the two. Do not specify over Power Track Kit. It is not recommended to specify Twin-Bins on wing panels. Twin-Bins should only be specified on spine panels for adequate stability. See Inscape Bench Application Guide for details.

## DRAWER STANDARD EQUIPMENT

Lockers and towers containing 3" or 6" drawers are provided with one pencil tray per cabinet. 6" drawers are additionally standard with one steel divider. 10.5", 12" and 15" letter-width file drawers have one suspension bar for side-to-side filing of letter or legal-size folders. Full-width pullout drawers are standard with one pair hang file bars for side-to-side suspended filing. Full-width fixed shelves are standard with 3 plate dividers. Optional accessories are available.

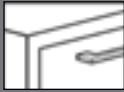

## GLIDES

Overall heights are inclusive of metal glides. Heights may be increased up to 5/8" by extending the standard glide. Glides are accessible from inside the cabinet when the bottom drawer is fully extended or removed and may be adjusted with a 0.25" socket driver. Optional 1.5" stem glides are available. Specify and add \$24 list to the cabinet price. Requires field installation.

**FRONT DETAILS & PULL OPTIONS**

9900 Series fronts have full width integral pulls with enamel finish to match case fronts.

Storage with Handles have the following styles options. FP005 is the default pull.

Pull	Storage with Handles
 <b>FP001</b> P290 Aluminum Leaf Finish	●
 <b>FP004</b> Brushed Nickel Finish	●
 <b>FP005</b> Satin Nickel Finish	●

● Available    ○ Unavailable

Pulls FP004 and FP005 meet the guidelines for ADA compliance.

**LOCKS**

Workplace Towers and Lockers come standard with lock with single bitted lock. For applications requiring higher security, a double bitted solution is available. If lock is not required add suffix '**NL**' after product number. Deduct \$57 list per lock.

Locks are available in chrome and black finish. Specify. Random keying is standard. Files may be ordered keyed alike. Locks feature removable core and are standard with two keys, one of which has a black Neoprene plastic key cover. Cabinets originally ordered as non-locking may be field installed with the addition of locking bars and a lock core. Please contact Inscape Client Services for required parts. Locks may not be field installed in hinged and sliding door cabinets. Specify lateral file height and width or model number. Master keys are available at \$51 list.

**CUSTOM COLORS**

Inscape System offers color matched to a customers' specification when possible. This matching is done through a database of over 2,000 existing color formulas or the development of a new custom color. A minimum order value of \$3,000 net per custom color, applies to each order. A \$250 net fee applies for each custom color below this minimum. In addition, Custom premium colors (bright whites and bright colors; textured paints; and reflection paints that use mica, aluminum or special chemical to create their reflective properties) will be subject to a 10% upcharge to the net value of the product.

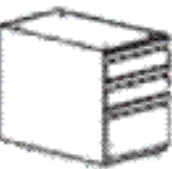

- Includes holes in top and bracket slots in back of case
- Worksurface supporting for 28.5" H
- Be sure to specify a 3/8" top along with spacers to achieve a 28.5" finished worksurface height
- **FLAT GLIDE ONLY** when used with Inscape Bench

### OPTIONAL ACCESSORIES

All pedestal accessories are optional. See chart below for information an accessories by drawer height.

Drawer Height	Product Code	Product Description	Price
3" & 4.5"	PFWS-PTxx	Pencil Tray	\$37
6" & 7.5"	PFWS-PTxx	Pencil Tray	\$37
	PFWS-DVxx	Divider	\$22
18"D, 22"D, 28"D Pedestals Only (28"D requires 2 per drawer)			
10.5", 12", 13.5, & 15"	PFSSFxx	Side-To-Side Filing Bar	\$8

Visit the [Pedestal Accessories](#) section for full accessory details.

- See Inscape Bench Application Guide for bracket details & locations
- Twin-Bin brackets are quoted separately and are specific to panel thickness
- Twin-Bin cannot be installed directly above a worksurface as it causes interference
- Jumper cables and receptacles for the Electrified Twin Bin power track specified separately
- The “IN3D\_UD-8” receptacles are to be specified in conjunction with the Electrified Twin-Bin
- See Inscape System Application Guide for bracket details and locations
- Twin-Bin brackets are specific to frame thickness
- “2F” denotes use with 2.75" thick frame
- Brackets are for use with Bench stack-on frames only

- Electrified Twin Bin shelf is installed in opening where electrical is located (center)
- Electrified Twin Bin Whiteboard + Tackboard only compatible with Electrified Twin Bin
- Receptacles are available in color options of black (default), white and gray
- White close match to 168 Glacier White and Gray close match to 290 – Aluminum Leaf
- The circuit 3 receptacle requires 2+2 or 3+1 wire designation (“4” in the code signifies 3+1 compatibility)
- USB power modules can be used with the Electrified Twin-Bin

**NOTE**

Only Expo Markers are to be used on any Inscape Whiteboard. Whiteboards should be cleaned with Expo Eraser or a Microfiber cleaning cloth along with Expo Cleaning Solution which is formulated to remove residue from Expo Dry Erase Markers.

# Bench Accessories

**inscape**

work for tomorrow

Spine Accessories are units that may be specified to sit on top of any of the benching spines. The units are specified to include the stanchion kit or not (see notes on page). Height Adjustable worksurfaces must not be specified when spine accessories are specified due to interference with the lift mechanism. The only exception to this is Add on Glazing.

### **ADD-ON GLAZING**

Add-on Glazing is manufactured from ¼" tempered glass. A ⅜" tempered glass is also available. Glazing may be mounted to the top of any equivalent Inscape Bench spine or combination of bases outlined in the Application Guide. Glazing is available in clear, gray, etched one or two sides and designer glass Strie options. Add-on Glazing includes top trim, glass mounting extrusion and specified glass. Add-on Glazing is specified based on the thickness of the panel. **Note: Special Hi-lo Add-on Glazing must be specified when installed directly adjacent to a higher panel at an inline situation only.** The glaze and extrusion are inset on one side to allow for hi-lo vertical trim on the adjacent higher panel. If the situation calls for hi-lo on both sides, a special may be required. An Add on Glazing alignment clip is included with each Add on Glaze ordered in the ¼" thickness option.

### **TRANSACTION TOPS**

Transaction Tops are specific to spine width they are to be installed on. Stanchions and top trim are included in the kit, as well as a 1" thick Nuform or laminate top. Hi-Lo Transaction Top must be specified when a transaction top is specified directly adjacent to a higher panel. The worksurface takes into account the profile of the end trim.

On the Inset Transaction Top, the worksurface is inset 5" on each side from the ends of the top cap.

**NOTE: 72", 84" and 96" W kits consist of two top caps and four stanchions (based on "Symmetrical Frame Configuration" module lines). Top Caps can be specified as an option and are included with the kit.**

### **UP-MOUNT BIN**

The Up-mount Bin is constructed of 24 gauge steel on the back and 20 gauge steel on bottom, sides and top. The Up-mount Bin is ordered and shipped independent of the stanchion kit, top trim and accessories to hang on back of bin. The stanchion kit includes hardware to mount the stanchions on the crossrail of the frame and top trim (tapered or flat). Stanchion kits are specified based on thickness of frame in which the Up-mount Bin is being installed. The backs of all Up-mount Bins require either a whiteboard or a tackboard to provide a clean aesthetic. These accessories are specific to the Up-mount Bin and include mounting hardware. The stanchion and Up-mount Bin provide an overall height of 20.25" module matching adjacent panel heights. The bin is 12.75" deep and may be specified directly adjacent to another Up-mount Bin facing the opposite direction; creating a "Twin- Bin" effect. Separate top cap and two stanchions will be required for each bin.

### **OPEN LEG ACCESSORIES**

Open Leg Accessories are units which hang from the Open H Leg, O Leg or A Leg on the Inscape Bench. Most of these units are constructed of laminate and come complete with all brackets to hang. With the exception of the Worksurface Extension which is not compatible with height adjustable worksurfaces, these units may be specified when a Height Adjustable worksurface is being used. The units sit 2" lower than the worksurface so there is no concern of pinch points when lowering the worksurface. The weight capacity of shelves is 100 lbs and all other units are 200 lbs. The HipStach is a painted unit and is available in any of Inscape's standard colors.

### **SPINE DIVIDERS**

Spine Dividers are situated on top of the bench spine only – full height or partial. They come complete with brackets and hardware to mount on the frame as well as a top cap. Dividers may span over two frame (see application guide). The tackable version is for tackability only. The two heights of divider match overall A.F.F heights of 37" and 44". Tackable Spine Divider is a 1.125" thick fabric wrapped panel.

### **WORKSURFACE DIVIDER**

Worksurface Divider may only be used with Bench as the depth correlates with the worksurface depth of the benching surfaces. All hardware is included to mount the divider on the worksurface. It does not deface the worksurface and can be used with either 1" or 1 ¼" thick surfaces. Spine Divider Accessories have a slightly different aesthetic as Inscape System paper accessories. Accessories cannot hang on the tackboard spine divider.

**WORKSURFACE MOUNTED  
CORNER SCREENS**

Worksurface mounted corner screens mount to main surface to provide privacy for the user. All worksurface mounted corner screens are handed left or right. The handedness is determined from the user perspective (i.e. a left handed screen would install on the left hand side of the user). The overall screen height is half way between a 44" H and a 51" H frame; 3.37" above the 44" frame height. Screens are available in two types; curved wood and metal. Screens have an optional feature for a tackable fabric "skin" on the inside.

Metal worksurface mounted corner screens can be painted any of the standard color. The optional fabric skin on a metal screen is only on the interior back. Only metal worksurface mounted corner screens are compatible with freestanding height adjustable worksurfaces.

**UPMOUNT SHELF**

Upmount shelves have a transaction top style shelf with a wrap around screen. Upmount shelves can be use with either parallel or 90° worksurface applications. The overall height is half way between a 44" H and a 51" H frame when mounted on a Bench spine frame (3.37" above the 44" frame height) and matches the overall height of a Worksurface Mounted Corner Screen. The shelf can be optioned in Nuform and laminate. The screens are available in metal. Screens have an optional feature for a tackable fabric "skin" on the inside.

The metal screens on the upmont shelves can be painted any of the standard color. The optional fabric skin on a metal screen is only on the interior back.

Back to back metal upmount shelves are handed left or right. The handedness is determined from the user perspective (i.e. a left handed screen would be open on the left hand side when user is looking at the spine).

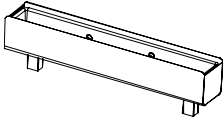

- Planter box include painted rectangular stanchions kits and trim for spine mount
- 72" (36" top caps) wide kits consist of two top caps and four stanchions
- Flat trim profile only
- On-module installation only
- Planter box is available in both laminate and metal construction
- Planter box is not available with plywood edge band

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBPLNTTOP-36 in Grade 1 Laminate would be \$2206 +\$708

		Part number	H	W	D	Neutral paint/ base price	Accent paint

- Up-mount overhead bins MUST always be specified to include a tackboard or whiteboard
- Up-mount bins stanchions must be specified to support a frame mounted up-mount bin
- “INB” Stanchion Kit must be used with Inscape Bench only
- Top caps included with stanchion kits and are specified to match frame and bin width
- Optional colored insert and shelf available for Up-Mount bin only
- Up-Mount shelf mounts below the Up-Mount Bin on module
- Stanchions are specific to the Bench frame and can not be used with Inscape System

**NOTE**

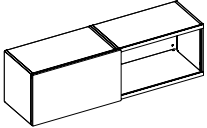

Only Expo Markers are to be used on any Inscape Whiteboard. Whiteboards should be cleaned with Expo Eraser or a Microfiber cleaning cloth along with Expo Cleaning Solution which is formulated to remove residue from Expo Dry Erase Markers.

- For use with Inscape Bench only
- Screens and shelves (both metal and wood) have an OPTIONAL feature for a tackable fabric "skin" on the inside. Base price is without skin
- The fabric skin on the wood screens wraps all the way around the interior of the screen. On metal screens it is only on interior back
- Wood upmount shelf screens are finished in a clear coat on maple
- Wood upmount shelves and screens have a 5.5" curved corner while metal upmount shelves and screens have a 1" corner
- Metal upmount shelf screens can be painted in all standard colors
- Back to back metal upmount shelves are handed left or right. The handedness is determined from the user perspective (i.e. a left handed screen would be open on the left hand side when user is looking at the spine)

- Upmount shelves can be use with either parallel or 90° worksurface applications; however, they can NOT be used on fully freestanding straight applications. Even one where docking brackets are used
- 72" sizes come with a 72" top cap

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBUPSHELFM-36 with a Grade D fabric skin and a Grade 1 laminate shelf would be \$941 +\$0 +\$62 +\$142

# Accessories

Add-on Glazing  
2 3/4" T

# System

- Add-on Glazing comes complete with mounting hardware and top cap
- Add-on Glazing may span multiple frames according to guidelines set in the Inscape Bench Application Guide
- 10.125" thick glaze available in .25" thick
- One glaze Alignment clip is included with each Add-on Glazing
- Add-on Glazing up to 60" W require two additional Jesters to be specified if spanning multiple frames (i.e. a 60" W AOG installed on 2-30" frames)
- **List/Base for 0.25" thick is clear glass**

Tackable Divider  
With single bracket to be  
mount at back of surface only  
For use with tapered edge  
worksurfaces  
Matches 44" H panel and  
16.875" H Spine Tackable  
Divider

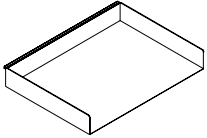

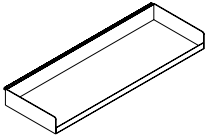

- Accessories do not hang on the tackable version of the dividers
- Slightly different design detail from Inscape System paper trays

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBAPTRY in an accent paint would be \$85 +\$11

		Part number	H	W	D	Neutral paint/ base price	Accent paint
	Paper Tray No holes in bottom	<b>INBAPTRY</b>	2"	12"	9"	\$85	+\$11
	Personal Accessory Tray	<b>INBAPSHF</b>	2"	18"	6"	\$126	+\$16

## Accessories

### Worksurface Screens for 90° Workstations

- For use with 90° worksurface applications only
- Screens and shelves (both metal and wood) have an OPTIONAL feature for a tackable fabric "skin" on the inside. Base price is without skin
- The fabric skin on the metal screens is only on the interior back of the screen.
- All Worksurface Mounted Corner Screens have 16 7/8" above the worksurface. The curved metal screen is 6" below the surface
- Worksurface Mounted Corner Metal Screens can be painted in all of Inscape's standard colors
- All Worksurface Mounted Corner Screens are handed left or right. The handedness is determined from the user perspective (i.e. a left handed screen would install on the left hand side of the user)
- ONLY metal Worksurface Mounted Corner Screens are compatible with freestanding height adjustable worksurfaces
- There will be a 1" wire management gap between the screen and the back side of the worksurface

#### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBWMCSWLH with a Grade D fabric skin would be \$1115 +\$123

Worksurface Mounted Corner Metal Screen  
For use with straight 90° worksurfaces

Part number	H	W	D	Screen list/base price	Fabric options							Accent paint
					No fabric layer	Grade A/COM	Grade B	Grade C	Grade D	Grade E	Grade F	
<b>INBWMCSMLH</b> left handed (illustrated)	24"	41"	17"	\$660	-\$199	—	+\$79	+\$101	+\$123	+\$137	+\$156	+\$67
<b>INBWMCSMRH</b> right handed	24"	41"	17"	\$660	-\$199	—	+\$79	+\$101	+\$123	+\$137	+\$156	+\$67

## Accessories

Worksurface Screens for 90° Workstations

- Slim Surface Mounted Tackable Screen is 16 7/8" above the worksurface and matches the aesthetics of the RockIt screens. It has 6" below the surface.
- Can be mounted on any 1" or 1 1/4" thick worksurface
- Can also be used with Inscape System worksurfaces, freestanding fixed tables and freestanding height adjustable tables

### NOTES

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBTBMPS2536 in Grade B would be \$700 +\$73

Part number	H	W	Thickness	Grade A/ base price	Grade B/ COM	Grade C	Grade D	Accent paint
<b>INBTBMPS2536</b>	24"	36"	1/2"	\$700	+\$73	+\$106	+\$165	+\$71
<b>INBTBMPS2542</b>	24"	42"	1/2"	\$786	+\$83	+\$119	+\$183	+\$80
<b>INBTBMPS2548</b>	24"	48"	1/2"	\$857	+\$90	+\$130	+\$200	+\$87
<b>INBTBMPS2554</b>	24"	54"	1/2"	\$957	+\$100	+\$145	+\$223	+\$97
<b>INBTBMPS2560</b>	24"	60"	1/2"	\$1041	+\$108	+\$158	+\$243	+\$105

Slim Surface Mounted Tackable Screen

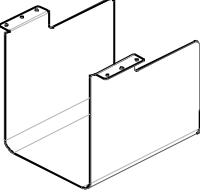

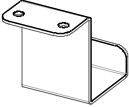

- Worksurface Undermount accessories are available in any of Inscape's standard paint colors
- Worksurface Undermount accessories can also be used on Inscape System and freestanding tables

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBUMBIN in an Accent Paint would be \$235 +\$16

		Part number	H	W	D	Neutral paint/ base price	Accent paint
	Worksurface Undermounted Bin	<b>INBUMBIN</b>	12 ½"	9"	12"	\$235	+\$16
	Worksurface Undermounted Accessory Hook	<b>INBUMHOOK</b>	2 ¼"	1 ½"	1 ½"	\$12	+\$5

- For replacement parts only

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBWMCSWSKIN in Grade D would be \$221 +\$123

	Part number	H	W	Grade A/ COM/ base price	Grade B	Grade C	Grade D	Grade E	Grade F
 <p>Replacement Fabric Skin for Corner Wood Curved Screen left and right hand compatible</p>	<b>INBWMCSWSKIN</b>	16 1/8"	51 5/8"	\$221	+\$79	+\$101	+\$123	+\$137	+\$156
 <p>Replacement Fabric Skin for Corner Metal Screen left and right hand compatible</p>	<b>INBWMCSMSKIN</b>	16 1/8"	39 1/3"	\$199	+\$79	+\$101	+\$123	+\$137	+\$156

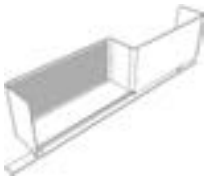

• For replacement parts only

**NOTES**

In order to get a total cost on products when upcharges are present take the list price of the product number and add the upcharge cost shown to the list price.

For example:

Product INBSHELFWSKIN36 in Grade D would be \$179 +\$62

	Part number	H	W	Grade A/ COM/ base price	Grade B	Grade C	Grade D	Grade E	Grade F
 <p>Replacement Fabric Skin for Single Wood Upmount Shelf</p>	<b>INBSHELFWSKIN36</b> When shelf is used on a 36" w spine frame	11 1/2"	39 7/8"	\$179	+\$43	+\$52	+\$62	+\$69	+\$81
	<b>INBSHELFWSKIN60</b> When shelf is used on a 60" w spine frame	11 1/2"	63 7/8"	\$198	+\$43	+\$52	+\$62	+\$69	+\$81
 <p>Replacement Fabric Skin for Single Metal Upmount Shelf</p>	<b>INBSHELFMSKIN36</b> When shelf is used on a 36" w spine frame	11 5/8"	24 1/2"	\$156	+\$43	+\$52	+\$62	+\$69	+\$81
	<b>INBSHELFMSKIN60</b> When shelf is used on a 60" w spine frame	11 5/8"	48 1/2"	\$175	+\$43	+\$52	+\$62	+\$69	+\$81
 <p>Replacement Fabric Skin for Back to Back Metal Upmount Shelf left and right hand compatible single side replacement part</p>	<b>INBSHELFMSKIN72</b> When shelf is used on a 72" w (2x 36") spine frame	11 5/8"	60 1/2"	\$206	+\$59	+\$74	+\$92	+\$102	+\$116
	<b>INBSHELFMSK72</b> When shelf is used on a 72" w (2x 36") spine frame	11 5/8"	29 1/9"	\$164	+\$31	+\$39	+\$48	+\$53	+\$60

work for tomorrow

## Worksurfaces

Square and Rectangular Tops

# Tables

- 60"-72" W rectangular tops require a stretcher bar
- 78" W and over rectangular tops require a center leg
- Tables are true to size
- When manually specifying worksurface in Laminate, add suffix "-S" to the code
- The tapered edge option on the 30" and 36" deep worksurfaces will only be on the front edge if specified
- The tapered edge option on the 42" and 48" deep worksurfaces will be on the all four sides if specified

### NOTE

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

For example:

Product TW3030 in Nuform Select with a Tapered Edge would be \$393 +\$45 +\$25

Product TW3030 in Nuform Select with a 1" Straight Edge would be \$393 +\$45 -\$44

	Part number	W	D	1.25" Straight edge Nuform classic/laminate (base)	Nuform select	Nuform tapered edge	1" Straight edge Nuform	Grade 1 laminate Straight Edge only

	<b>TWPEB3648</b>	48"	36"	\$871	+\$88	—	-\$46
Pebble Top							
	<b>TWROM4890</b>	90"	48"	\$1900	+\$195	—	-\$183
Rhombus Top							

## Worksurfaces

### Rectangular Tops with Power Module

# Tables

- 60" & 72" W rectangular tops require a stretcher bar
- 78" W and over rectangular tops require a center leg
- 30" & 36" deep surfaces include power modules positioned 2" in from the back edge. 60" and 72" W have one module and 84" & 96" have two modules
- 42" & 48" deep surfaces include power modules centered front to back. 60" & 72" W have one module and 84" and 96" have two modules
- When manually specifying worksurface in Laminate, add suffix "-S" to the code
- Stretcher bars are required for unsupported worksurfaces of 54" W or wider
- Rectangular Tops with Flip Up Power Module are not available in Nuform

### NOTES

In order to get a total cost on products when an upcharge or downcharge is present you take the list price of the product number and add the upcharge or deduct the downcharge cost shown to the list price.

For example:

Product TWP3060-S in Grade 1 laminate would be \$1583 +\$508

		<b>INSBK96</b>	86"	—	\$183	—	
For use with 96" surface							

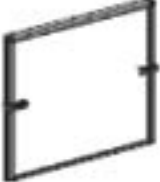

- Table mounted screens mount to worksurfaces
- Adjustable Framed Table Mounted Screens have height adjustment for above worksurface privacy and below the worksurface modesty. It is recommended that this screen be installed with a max of 20" above the surface.
- Table Mounted Screen/Modesty has 14" of the tackboard mounted above the surface and 13 ½" below
- Table Mounted Acrylic Screens have approx. 16" of screen above the surface and approx. 3" below the surface
- Freestanding Table Screen is made of 6mm thick frosted acrylic which is 13" H, seated in a painted aluminum extrusion, which can be painted any of Inscape's standard colors. This screen is 5" less in depth than depth of worksurface it will be placed on

- Grommets must be field installed
- Round Grommet = 2" diameter
- Rectangular Grommet = 3" x 5.25"
- Power Modules mount to the back edge of a surface and are accessible by the user above the surface
- Power Modules plug into the duplexes
- The Clamp-On Power Module is available in a black or white finish. It has a 96" long power cord and LED surge protection indication. It attaches to 1" and 1 ¼" thick worksurfaces and the mount includes a device holder.
- The Clamp-On Power Module with Colored Components comes in many different configurations with receptacles, USB (1 type A and 1 type B) ports and availability lights. Power Modules come in black, white or gray and have colored options for the lid; Black, White, Teal, Red, Purple, Blue, Green, Gray. The availability light is user controlled and requires free software download.
- All electrical components on this page are field installed

# Finishes

June 2021

**inscape**

work for tomorrow

## INSCAPE SYSTEM FRAMES

Inscape System frames are powder-coated in scuff-resistant Eco-black epoxy. Clips, plates, plugs and bracketry are finished in black.

## TRIMS

Trims are available epoxy powder-coated in a smooth or textured finish.

## WORKSURFACES

Worksurfaces are available in Nuform Classic, Nuform Select and Laminate.

## NUFORM

Nuform is a thermofoil sheet that is continuously bonded to an MDF substrate. The sheet is surface-coated with a scratch resistant film. The underside of the worksurface is finished with low-pressure melamine. Nuform worksurfaces have optional pencil groove. No edge banding is required with Nuform because of its unique design, which wraps the foil to the underside of the worksurface. This eliminates the need for edge banding. Nuform is also available on tiles (ensure the application is reviewed for rules).

## NUFORM CLASSIC

Colorways	Product code
Sandstone	F123
Frosty White	F127

Aurora Marble	F56
Pure Oak*	F57
Holland Hickory*	F58
Essential Oak*	F59

\*Pattern is directional and will have limitation. 48"W standard and split corners are not possible.

## LAMINATE

Laminate is bonded to 1.25" thick particleboard. The underside of the worksurface is finished with a wood-fiber veneer backer. Worksurfaces specified with a laminate finish include a 2mm edge banding in a coordinating color. Plastic laminate tops do not have optional pencil groove.

Standard laminate finishes are prefixed with 'LCC' and standard low laminate storage finishes are prefixed with 'MCC'.

Code legend:

- LLC = HPL with matching edge band
- L1C = HPL with matching or plywood edge band
- OCC = HPL with self edge
- O1C = HPL with self edge
- MCC = LPL with matching edge band

Etched 2 Sides	ET2
Grey	GRY

## TILES

Inscape System and Bench tiles are available fabric wrapped, epoxy powder coated and in Nuform finishes. Nuform tiles may be specified in finishes same as worksurfaces. Grain direction in Nuform is vertical. Tiles may be covered with our standard fabrics, or covered with COM.

Use of any COM must be approved by Inscape prior to acceptance of order. Refer to “Conditions of Sale, Orders involving Customer’s Own Material (COM)”.

Fabrics with an asterisk\* below, as well as any transparent (typically light colored) COM fabrics, will be subject to an upcharge due to additional costs associated with the manufacturing of the tile to eliminate transparency. The upcharge is included in specification tools, or through your Client Services Representative.

## SCRIM

Fabric wrapped tiles, including tackable tiles, are available in a variety of standard fabrics as well as COM. COM fabrics are subject to approval. White or extremely light colored COM fabrics will incur an upcharge of 25% to the tile pricing with which the fabric is being applied. This is due to special handling of the fabric and tiles, in addition to painting of the tiles. Light colored fabrics include; but are not limited to:

HOW TO CALCULATE COM YARDAGE REFER TO 'COM FABRIC CALCULATOR'

INPUT

1. Select cushion width and depth appropriate to your specification
2. Select cushion thickness
3. Select fabric orientation (refer to 'Cushion Layup' sketches)
4. Find the corresponding fabric quantity in 'running inches' from the table

CALCULATION

1. Multiply the number of cushions required by the fabric quantity in 'running inches' off of the table
2. Divide the number of running inches by 36 to convert to yardage required. Round up to the nearest half yard.
3. If a pattern repeat is required, ordering a sample cushion is advised to determine fabric yardage and any applicable upcharges. A layup instruction will also be required for review.

EXAMPLE:

- Storage with Handles Pedestal

- Quantity – 31 cushions

- 15" wide x 22" deep x 1.25" thick

- COM fabric is a solid colour and has no directional weave; best fabric usage is 'off the bolt' orientation.

Note: Highlighted areas on the COM Calculator indicates 2 cushion yield per piece.

CALCULATION:

32 running inches x 16 cushions = 512" of fabric required

512" divided by 36 = 14yds, 8"

Total fabric required = 14 ½ yards (rounded up)

ADDITIONAL SPECIFICATION INFORMATION:

1. Pedestal Cushion Depth options vary by product profile and application. Ensure you are referencing the correct dimensions
2. Lateral Cushion Depth options vary by application Ensure you are referencing the correct dimensions
3. Fabric Quantity is based on a 54" wide roll
4. Highlighted rows yield 2 cushions per fabric quantity listed
5. All directional/patterned fabrics (Graded or COM) require cushion layup instructions with order placement. Depending on layup additional fabric may be required and upcharges may apply. If layup instructions are not provided the layup that maximizes the production yield will be chosen. (Refer to the layup diagrams)
6. For any cushion sizes not listed on the COM Calculator or for further information please contact your Client Service Representative for assistance

FABRIC LAYUP

LATERAL CUSHION FABRIC LAYUP

PEDESTAL CUSHION FABRIC LAYUP

For COM fabric testing on Adjustable Framed Table Mounted Screens (MST37XX) and tiles, please provide the following to your SRT – Customer Experience specialist:

- (1) memo sample of the fabric to be tested
- (1) yard of fabric to be tested
- Product Code that the fabric is to be applied to

Testing turnaround times are 3 to 5 days upon receipt of memos samples/yardage. Your Customer Experience specialist will provide the results of the application testing.

For COM fabric testing on all other products including cushions, divider screens and risers, please provide the following to your SRT – Customer Experience specialist:

- (4) memo samples of the fabric to be tested
- Product Code that the fabric is to be applied to

General testing turnaround times are 48 to 72 hours upon receipt of memos samples. Your Customer Experience specialist will provide the results of the application testing.

**PAINT CODE MATRIX**

Painted System and Bench components include; tiles, trim, support brackets, accessories, legs and storage.

The following prefixes will be referenced on order acknowledgements:

<b>E</b>	indicates standard paint on all filing and storage items
<b>ET</b>	indicates standard textured paint on all filing and storage items, a 10% upcharge is applicable to the net value of the product
<b>EA</b>	indicates standard accent paint on all filing and storage items
<b>P</b>	indicates standard paint on all other items
<b>PT</b>	indicates standard textured paint on all other items, a 10% upcharge is applicable to the net value of the product
<b>PA</b>	indicates standard accent paint on all other items

**CUSTOM (NON-STANDARD) COLORS**

Inscape offers colors matched to a customer's specification when possible. This matching is done through a database of over 3,000 existing color formulas or the development of a new custom color. A \$324 net fee applies for each custom color per order. In addition, Custom Premium colors (bright whites and bright colors; textured paints; and reflection paints that use mica, aluminum or special chemical to create their reflective properties) will be subject to a 10% upcharge to the net value of the product per order.

**MULTI-COLOR CABINETS**

For multi-color cabinets where the case is one color and the drawer fronts are a second color, a \$270 net fee applies per color per order. (Tie bars and reference shelves will be painted the same color as the case.). This charge is applicable for multi-colour applications using Neutral, Accent or Custom paints. If using an Accent paint on a Multi-color cabinet, the standard Accent paint upcharge for the unit will also be applicable.

**NOTE: Multi-color cabinets are not available on Storage with Handles.**

**TEXTURED COLORS**

- Available
- Unavailable

**NOTE: A 10% UPCHARGE IS APPLICABLE TO THE NET VALUE OF THE PRODUCT FOR TEXTURED COLORS.**

# Care & Maintenance

The following information provides general guidelines for cleaning and maintaining Inscape products including: Worksurfaces, Tables, Supports, Tiles, Trim, Screens, Storage and Accessories.

## NUFORM

Nuform surfaces are manufactured by thermoforming a polymer sheet around an MDF substrate. The polymer sheet is surface-coated with a scratch resistant film.

- For general cleaning, use warm soapy water, a mild, non-abrasive household cleanser or a 10-20% Bleach solution
- To remove stains like permanent marker use a cotton ball dampened with Acetone
- On tougher stains, use a cotton ball dampened with methyl hydrate
- Do not use abrasive cleansers or highly solvent based chemicals such as gasoline, acetone or toluene as they may scratch or affect the surface appearance
- Do not place hot appliances directly on Nuform surfaces
- Although Nuform is scratch resistant, avoid dragging sharp objects across the surface
- Light scratches may be buffed from the foil surface by using a 400-600 grit wet sandpaper under light hand pressure in circular motions or by using a 3M Scotch Brite Pad (green color only) under light hand pressure in circular motions. Note: Under no circumstances should power buffing tools be used
- Chips and deep scratches may be repaired by a professional touch-up service. Minor imperfections should be addressed immediately as neglect can result in more serious problems that could void the warranty
- Optimal storage temperature range for Nuform surfaces is 41°F to 86°F
- Avoid exposure to extreme heat, cold and humidity

## LAMINATE

High pressure laminate is available for use on surfaces, selected accessories and is optional on laminate storage door fronts. Low pressure laminate is available for use on laminate storage cases and door fronts. Both laminate options are laminated to particleboard and includes a color coordinated edge banding.

- Dust off laminated surfaces prior to cleaning
- For general cleaning, use a damp cloth with warm soapy water or a mild, non-abrasive household cleanser. Do not use a cleanser with acids or alkalis as this will damage the surface. Remember to wipe the surface with the grain using a dry soft cloth.
- An eraser may assist with removing ink marks
- Isopropyl Alcohol or Rubbing Alcohol may be used to clean laminate surfaces
- Do not use abrasive cleaners or bleaching cleansers as they may scratch or affect the surface appearance
- Take note that any product with Hydrochloric, Sulfuric, or Phosphoric acid may permanently damage the surface
- Although high pressure plastic laminates are resistant to scratching and wear, avoid dragging sharp objects across the surface
- Do not place hot appliances directly onto laminate surfaces
- Avoid exposure to extreme heat, cold or humidity

# Care & Maintenance

## WOOD

Wood is an option on legs and supports. Like all natural products, wood legs may vary slightly in grain, texture and color. For this reason, minor variations between pieces can be expected.

- Dust surface with a dry cloth in the direction of the grain
- For dirtier surfaces, use warm soapy water and a soft cloth
- Do not use abrasive cleaning products as they may scratch or affect the surface appearance
- Although waxing and polishing is not necessary, waxing and polishing products may be applied if care is taken to avoid wax build-up which may cloud the finish
- Exposure to strong sunlight should be avoided since fading may result
- Avoid exposure to extreme heat, cold or humidity
- Avoid dragging sharp objects across the surface
- Chips and scratches may be repaired by a professional touch-up service

## FABRIC

- Vacuum or lightly brush panel fabrics to remove dirt build-up
- Promptly remove stains by blotting, not rubbing the fabric to retain pile texture
- Fabric may be cleaned with mild water-free solvents or water-based cleaning agents or foam
- Always follow the manufacturer's instructions and test clean a non-visible area first

## PAINTED METAL

- Clean with a soft damp cloth and warm soapy water
- Gently rub tougher grime away with a mild, non-abrasive household cleaning product
- Paint touch up kits are available for minor repairs
- **Note:** Most consumer cleaners may be used, always spot test products to ensure no hazing or softening of the coated film takes place

## GLASS

- Clean glass with a mild window cleaner

## ACRYLIC

- Clean acrylic with a clean soft cloth and warm soapy water

## WHITEBOARDS/DRY ERASE BOARDS

- Use only dry erase markers on boards
- Clean boards with an eraser or microfiber cloth and cleaner that is formulated for whiteboards
- Inscape recommends using "Sanford Expo Dry Erase Markers" and "Sanford Whiteboard Cleaner"

## BIN/SHELF-MOUNTED TASK LIGHT FIXTURES

- Include a 120V/60HZ magnetic ballast. Replacement ballasts can be purchased from any electrical supply store
