INSCAPE ANNOUNCES ROCKIT™ BENCH ENHANCEMENTS AT NEOCON 2019

Chicago, IL. June 10, 2019– Inscope has announced two significant upgrades to the popular RockIt™ Bench to be showcased at NeoCon 2019. The enhancements include the addition of 90-degree planning capability and SkyRockIt™ electronic height adjustment technology that is seamlessly integrated into the sleek RockIt™ design.

RockIt™ is a light scale bench design that supports personalization, adaptability on demand and wellbeing even in the most demanding environments. With clean visual lines, a compact spine and a canted universal leg, RockIt™ Bench embodies simplicity that fits into virtually any work environment, but with the functional capabilities of high-powered benching platforms. Visually light with authentic wood details that elevate the modern design, RockIt™ uses sophisticated materials to ground the space and evoke a sense of calmness with its users.

Speaking about the upgrades, David Gerson, Chief Brand Officer at Inscope said: “We wanted RockIt to feature the most innovative technology that enhances productivity and comfort without sacrificing the simple, compact design that our users love. Both the 90-degree planning and SkyRockIt features enable flexibility, practicality and wellbeing in any office environment.”

The addition of 90-degree planning offers users complete customization abilities, from collaboration to concentration. New screens and modesty panels provide visual and acoustic privacy, power is easily accessible on the core or through a power module on the worksurface, and several personalization accessories like slide-in planters to brighten and oxygenate the space. This new feature will be available in Fall 2019.

SkyRockIt™ was innovatively integrated into the Bench frame to provide height flexibility for a sit-stand workstation without compromising the sleek aesthetic. Activated with just a click of a button that is intelligently hidden from the eye and requires no additional legs or accessories, the cantilevered pneumatic lift is a revelation for those looking to add height adjustability to the signature RockIt™ design. This new feature will also be available to retroactively add to fixed RockIt™ bench installations with the existing frame.

“Sit-stand workstations have become a staple for many office spaces due to the numerous healthy behaviours they promote, such as improved postures and increased physical activity. Incorporating this feature with the latest electronic technology and into RockIt’s clean architectural lines has allowed us to give our users the flexibility and performance they require without compromising design.”

RockIt™ is BIFMA level® 3 and SCS Indoor Advantage Gold certified.
