

Inscape System, Bench & RockIt

Contributions to LEED v4

Inscape System/Bench products contribute to the following LEED Certifications:

- BD+C - Building Design and Construction
- ID+C - Interior Design and Construction
- O+M - Building Operations and Maintenance

MATERIALS AND RESOURCES CREDITS (MR)

ID+C, BD+C and O+M

Construction and Demolition Waste Management Planning (Prerequisite Expanded)

- Inscape packaging material contains high recycled content and they are recyclable. Inscape provides the weight of packaging to meet this prerequisite if required.

ID+C, BD+C and O+M

Building Product Disclosure and Optimization: Sourcing of Raw Materials.

Option 2 "Extended Producer Responsibility" criteria.

- Inscape products contribute to the "recycled content"
- FSC wood products contribute to Wood credit

ID+C and BD+C

Building Product Disclosure and Optimization: Material Ingredient Reporting.

- Inscape level® certified System and Bench achieved 3 credits through section 7.5.1.3 of the ANSI-BIFMA e3-2014 Furniture Sustainability Standard. This contributes to LEED credit.

ID+C and BD+C

Interior Life cycle impacts: Design for Flexibility

- Most Inscape products are designed for flexibility. Inscape System, Bench are demountable and reconfigurable

INDOOR ENVIRONMENTAL QUALITY CREDIT (EQ)

ID+C, BD+C and O+M

Low-Emitting Interiors (EQ)- Furniture evaluation

- Inscape System and Bench are "SCS Indoor Advantage Gold" certified and contribute to ANSI/BIFMA Standard Method M7.1 and ANSI/BIFMA e3 Furniture Sustainability Standard, Credits 7.6

IEQ: Daylight & IEQ: Quality Views

Inscape products contribute to this daylight credit. When building design allows natural light access into the space's interior, Inscape products with variable height contribute to interior design to maximize the light access to individual cubical.
