## ARCHITECTURALLY DESIGNED, SEAMLESS GLASS WALL.

The modern workplace landscape increasingly recognizes the need for a multitude of spaces, including shared breakout spaces, private work, relaxation zones and more traditional work settings. Adaptable multi-zone configurations which create 'neighborhoods' allow for convenient evolution of spaces to flex to new and emerging workplace trends.

### Features & Benefits:

- Unique in the industry, strong and durable 18-gauge Steel frame construction (Built to order)
- Highly customizable, modern, slimline aesthetic with 2" x 2-3/8" profile
- Seamless butt-joined glass offers a clean, uninterrupted aesthetic
- Available glass thickness (3/8", 1/2", 9/16", 13/16")
- One-piece welded corners provide a high-end custom finish
- Half inch height adjustability
- 10'ft. maximum ceiling height - (Able to reach 12ft, with structural muntin)
- Structural muntin and Mullions available
- Single glazed solution with STC capabilities from 32 - 40 STC Rating
- Extensive door & hardware options to fit building standards or design requirements
- 8 Standard finishes and an endless variety of custom solutions

### Sustainability

Responsible choices matter - from beginning to end, and over again.

Acme 50 is level® 3 certified and Living Building Challenge compliant for spaces with rigorous environmental standards.

Acme 50 is made of steel, so the recycled content is extremely high (steel is 100% recyclable), contributing to LEED credits.
