

HARP

INSCAPE

Harp

A NEW WAY TO DIVIDE.

The modern workplace landscape increasingly recognizes the need for a multitude of spaces, including shared breakout spaces, private work, relaxation zones and more traditional work settings. Adaptable multi-zone configurations which create 'neighborhoods' allow for convenient evolution of spaces to flex to new and emerging workplace trends.

Sustainability

Sustainability within design and manufacturing is critical in ensuring the health of our planet today and in the future. The environmental impact of a product and its effect on the planet is ultimately set into motion at the very first phase of design, with the selection of materials, processes and the factors required to bring a complete version of the initial concept to market. This is why we pay close attention to all facets of our process, starting with an idea and ending with an innovative piece of commercial furniture that effectively supports our sustainability goals, as well as make our customers happy. Our approach to sustainability is simple and underpinned by three key pillars: Manufacturing, Materials and Design.

Features

- Powder coated steel frames available in matt black only.
- Frame available in 39 3/8" W and 94 1/2" H
- Bungee cords available in 5 x colours: Black, White, Light Grey, Olive and Yellow.
- Accessories include: planters, shelves, whiteboard, AV unit.
- Planter, shelves and AV unit elements available in 7 x MDF colours.

Benefits

- Harp helps define the evolving and fluid workplace evolution. Available to configure as an individual workspace or a multi-zone format, Harp can be designed in an infinite number of ways to create a multitude of settings and space division solutions.
- Harp creates spaces that can be changed and adjusted by the users themselves, without an install team. The shelves and whiteboards can be easily inserted and removed from the frames. This connections to home office experiences: While working in home office, a lot of people were used to the flexibility of adapting their own workspace in the comfort of their own home. Harp aims at bringing this element back to the actual office.
- The modern workplace landscape increasingly recognizes the need for a multitude of spaces, including shared breakout spaces, private work, relaxation zones and more orthodox work settings. Adaptable multi-zone configurations which create 'neighborhoods' allow for convenient evolution of spaces to flex to new and emerging workplace trends.
- Distinctively designed with use of unorthodox bungee cords to construct 'walls', Harp acts as a space divider and an enclave without obstructing visibility or creating a permanent wall structure.
- The bungee cords make a bold design statement, providing a unique contrast between the strong industrial finish of the steel frames and the more subtle touches of detail given by the accessories.
- Available with planter modules to support zoning settings, as well as multiple accessory options to personalize the design's required functionality.
- Harp is fresh aesthetic designed to define the new way of work. Rich in uniqueness of the design, material, numerous applications it addresses and freedom it provides.
- Each Shelf is designed to have a maximum load of up to 80 lb. Each Harp frame can be equipped with up to 5 maximum load shelves.
- Harp Bungee cords are made with UV and water resistant exterior.
- The Harp product offering is BIFMA compliant.
