A minimum fuss panel mounting system

1. Complete flexibility

From mounting stone panels to louvres, the Versa is adaptable and able to handle most unique systems

2. Zero complexity

A three-part system, the Versa support system ensures efficiency and time saved on-site

3. Unique design

Suits most common undercut anchors

4. Full project support

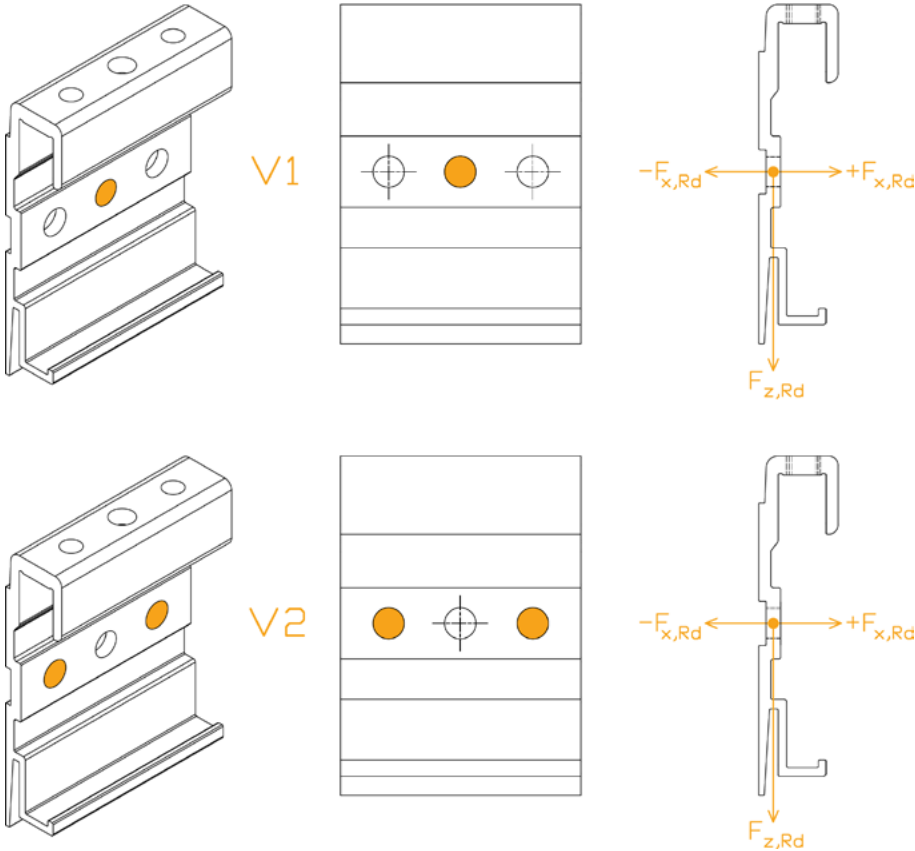

Maximum product reliability and trusted expertise, backed up by verification and years of experience in the façade industry

In detail: Versa hanger clip

Innovative mounting assistance within the hanger clip prevents tilting of the panel once inserted, even with a heavy front panel (e.g. stone), ensuring a secure installation when hanging the panels within the support profiles.

With a bolt at the top of the clip, the hanger can be adjusted to the correct position before being permanently fastened with a stainless steel self-drilling fastener, to ensure the clip stays secure on the profile.

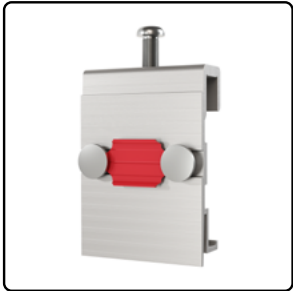

Most common undercut anchors are compatible with the Versa hanger clip, giving you freedom over which fastener best suits your specific panel system.

Keil undercut anchor

Fischer Zyklon FZP II and Tergo+

Swisspearl Sigma 8 Pro System

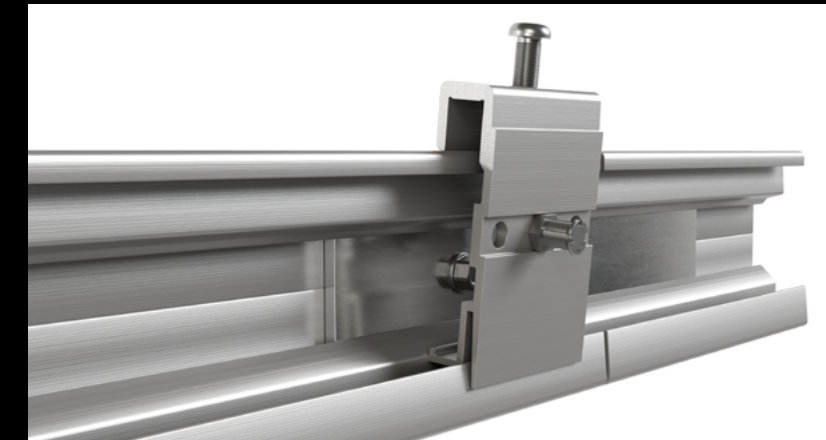

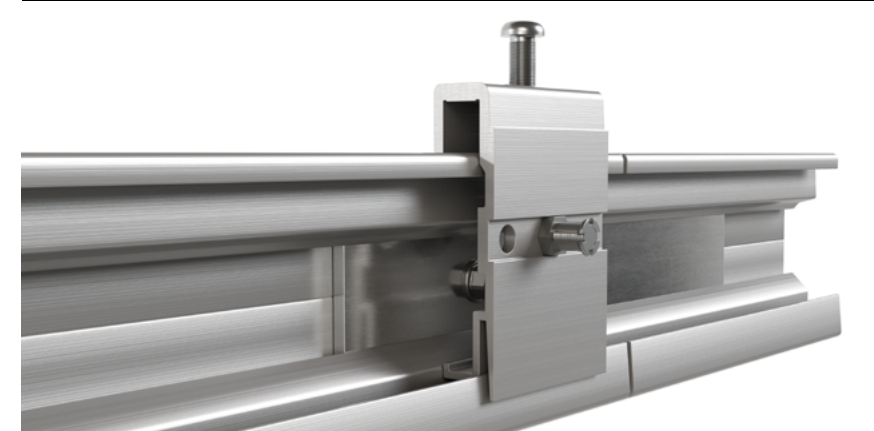

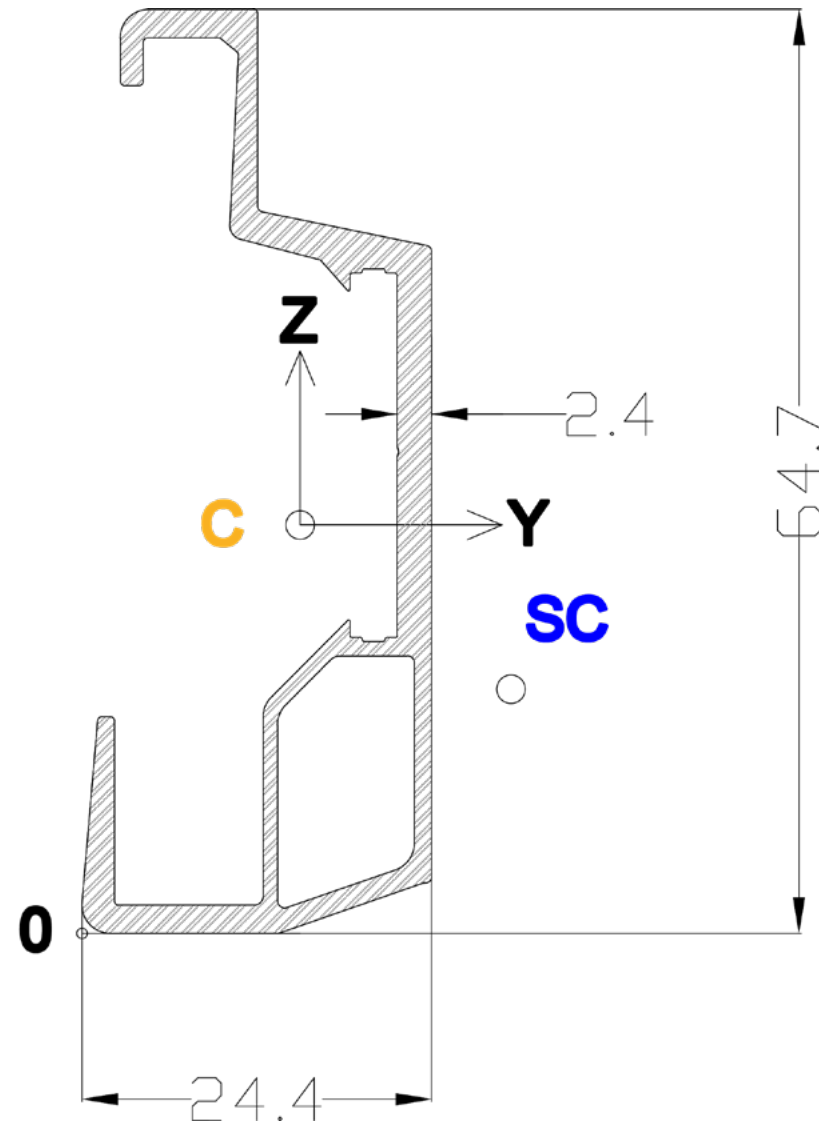

TUF-S anchor

In detail: Versa hanger profile

Specifically optimised to achieve an ideal ratio between high section modulus and low weight, the Versa hanger profile achieves high torsional stiffness without exerting additional tensile forces on the undercut anchors installed within the hanger clips.

Additionally, connector pieces can be utilised to join and extend the rails across the full application width, reducing wastage during installation. Fitting within the middle of the profile, the connectors enable precise horizontal profile alignment when extending the support profiles.

Adaptable in application

The SPIDI Versa system truly is the support system for any panel. From stone panels to mounting louvres, or standard cladding panels, the Versa hanging clips combined with the support rails provides the strength and versatility to fasten façades securely and simply, taking away the complexity whilst providing you with peace of mind.
