

Mycotoxin Binding Efficacy effectively captures & neutralizes mycotoxins, preventing their harmful effects.

Reduced Toxin Bioavailability limits the absorption of harmful substances, minimizing their impact on the body.

Great Bulk Stability preserves the product's quality and potency during storage, transportation, and throughout its shelf life.

High pH Resistance safeguards the product from degradation or loss of efficacy in challenging environments, ensuring long-lasting effectiveness.

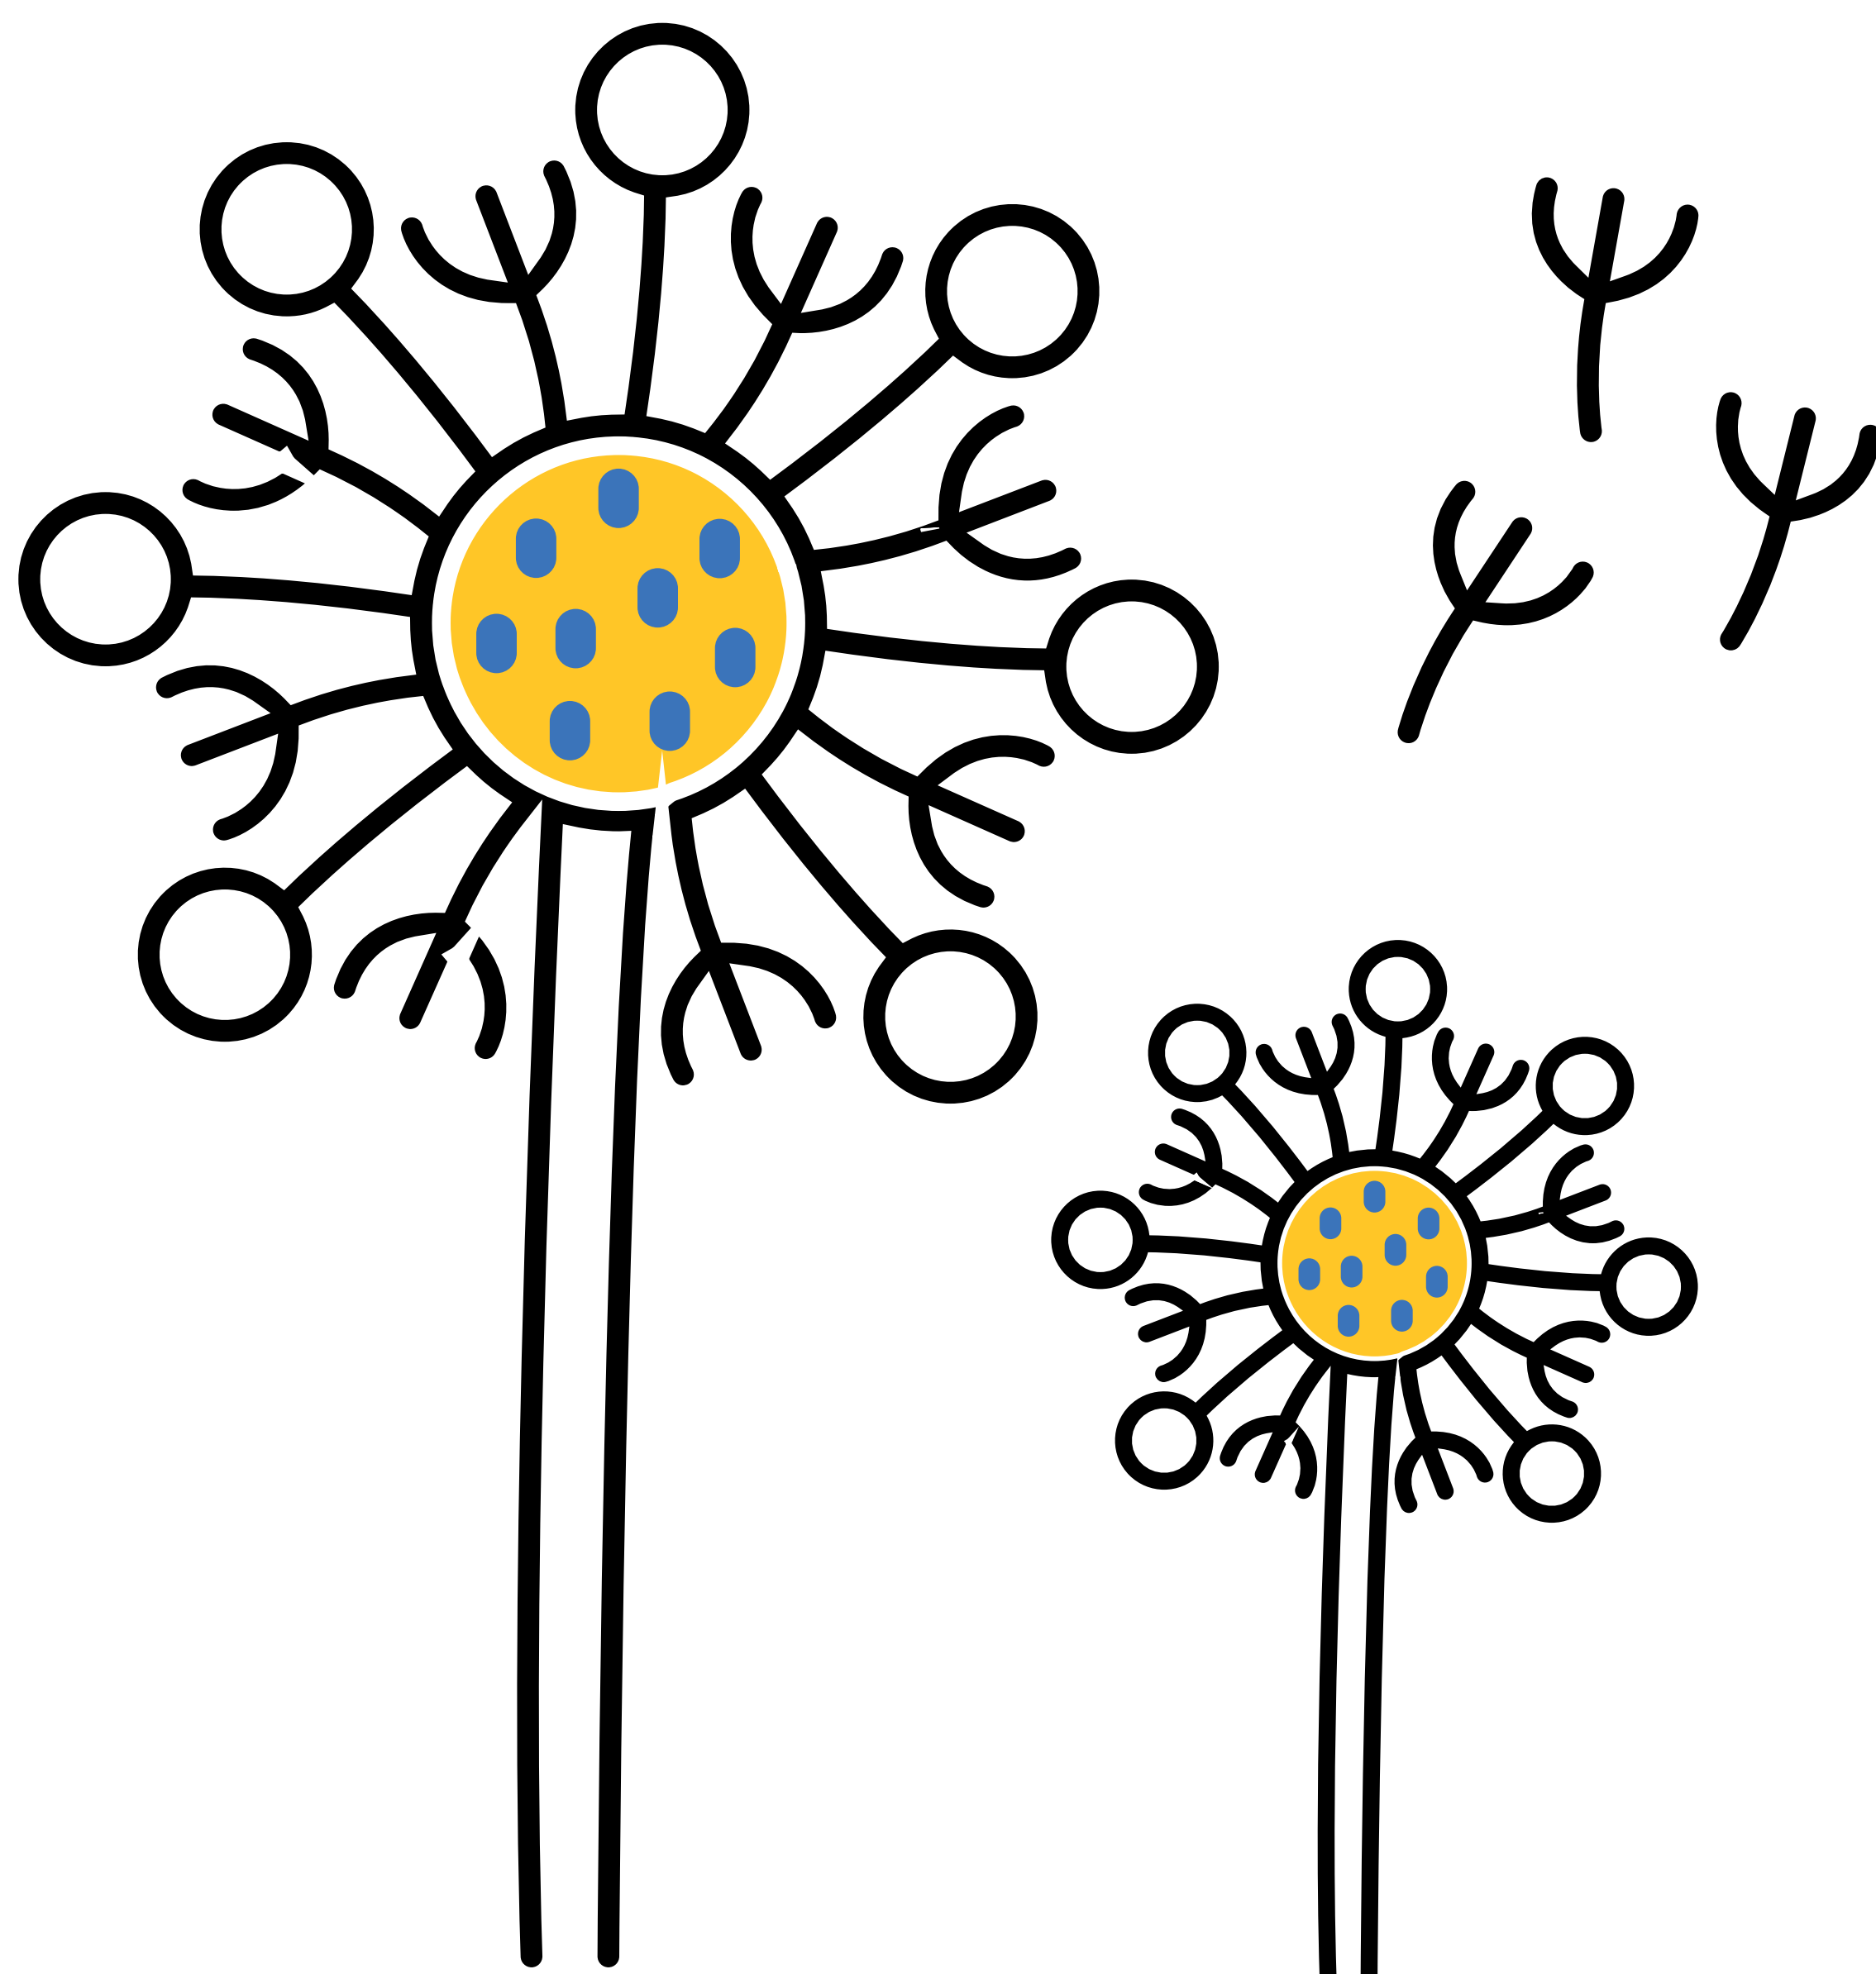

High Heat Stability ensures reliable performance and effectiveness even under elevated temperatures, maintaining product integrity.

CLAYTO

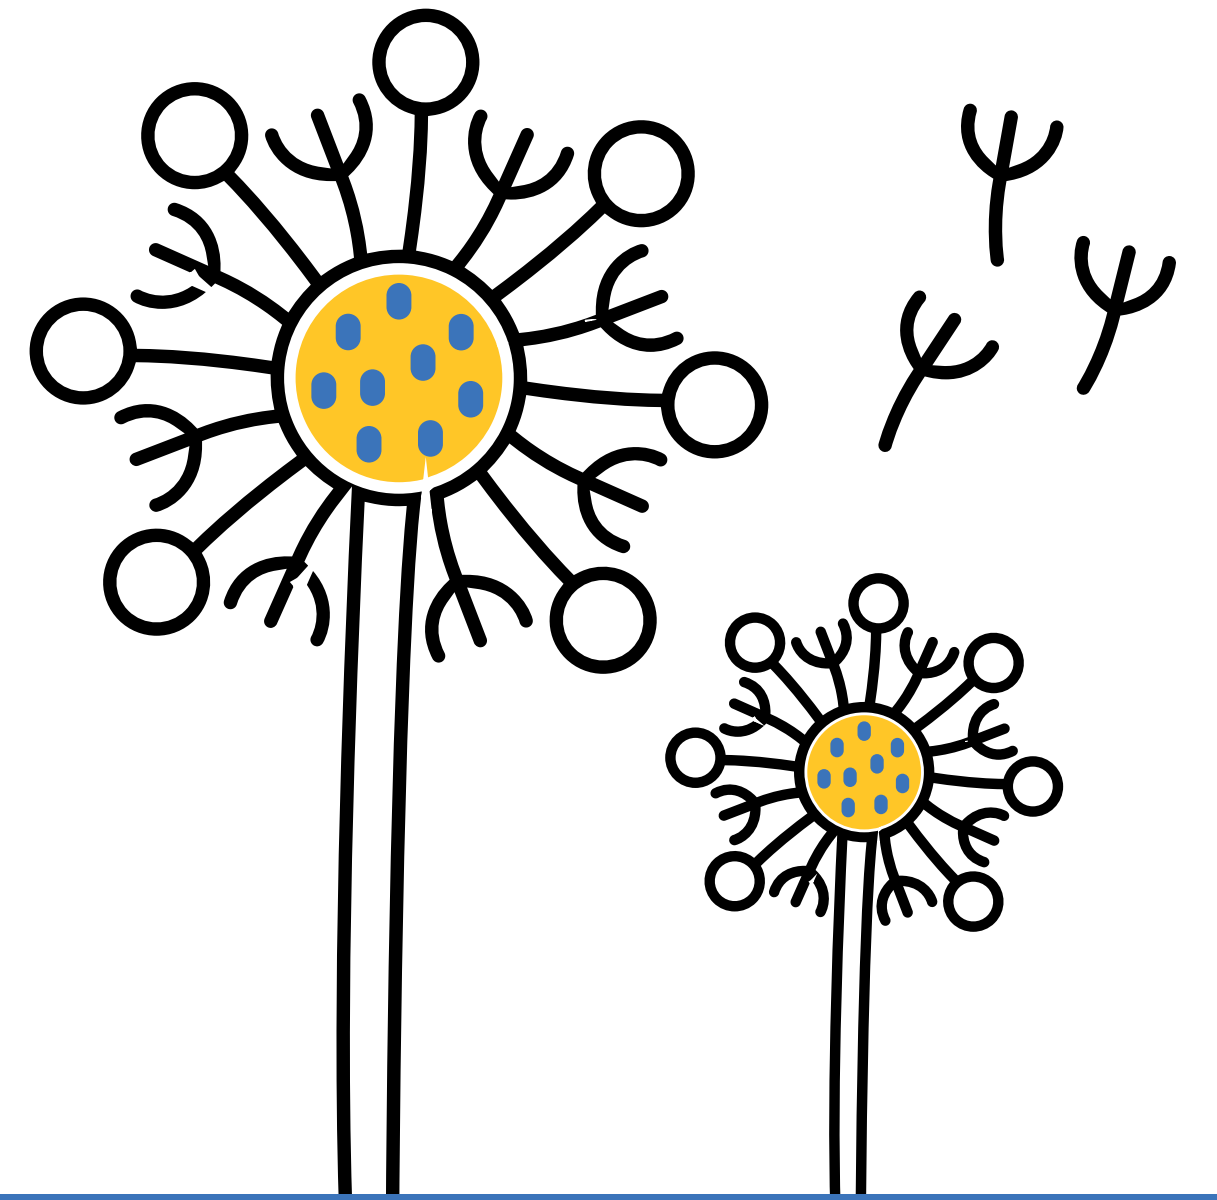

Mycotoxins Out, Health In.

Clean Feed, Sustainable Development,
Healthy Livestock, Thriving Ecosystems.

A balanced mix of anti-mycotoxin agents, designed for mycotoxin protection and risk reduction with reduced environmental impact contributing to a more sustainable and environmentally friendly agricultural system.

Product Description: Featuring high-performance clay minerals, Claytox offers higher absorption capacity of other clays, effectively neutralizing mycotoxins. It helps enhance growth, production, and reproduction while promoting overall health.

Additionally, it supports better feed efficiency, boosts immunity, and maintains safety and environmental friendliness, making it a comprehensive solution for effective mycotoxin management.

Product Profile

Nano Montmorillonite: 90%
 β -glucanase, xylanase, protease: 10%

Recommended Feeding Rate

Cow & Buffalo: 10-30g/head/day.
Sheep & Goat: 05-10g/head/day.
Horse: 10-20g/head/day
Poultry: 0.5-2Kg/MT of feed

Product Application

Claytox should be used in cases of mycotoxin contamination in raw materials or complete feed. Claytox can be incorporated into the feeding program via premixes, feed, or in TMR.
