

**B**ind Mycotoxins to effectively adsorb and block their entry into the bloodstream.

**D**eactivate mycotoxins by transforming them into non-toxic metabolites through enzymatic action.

**S**upport liver function and detoxification with a specialized binding complex.

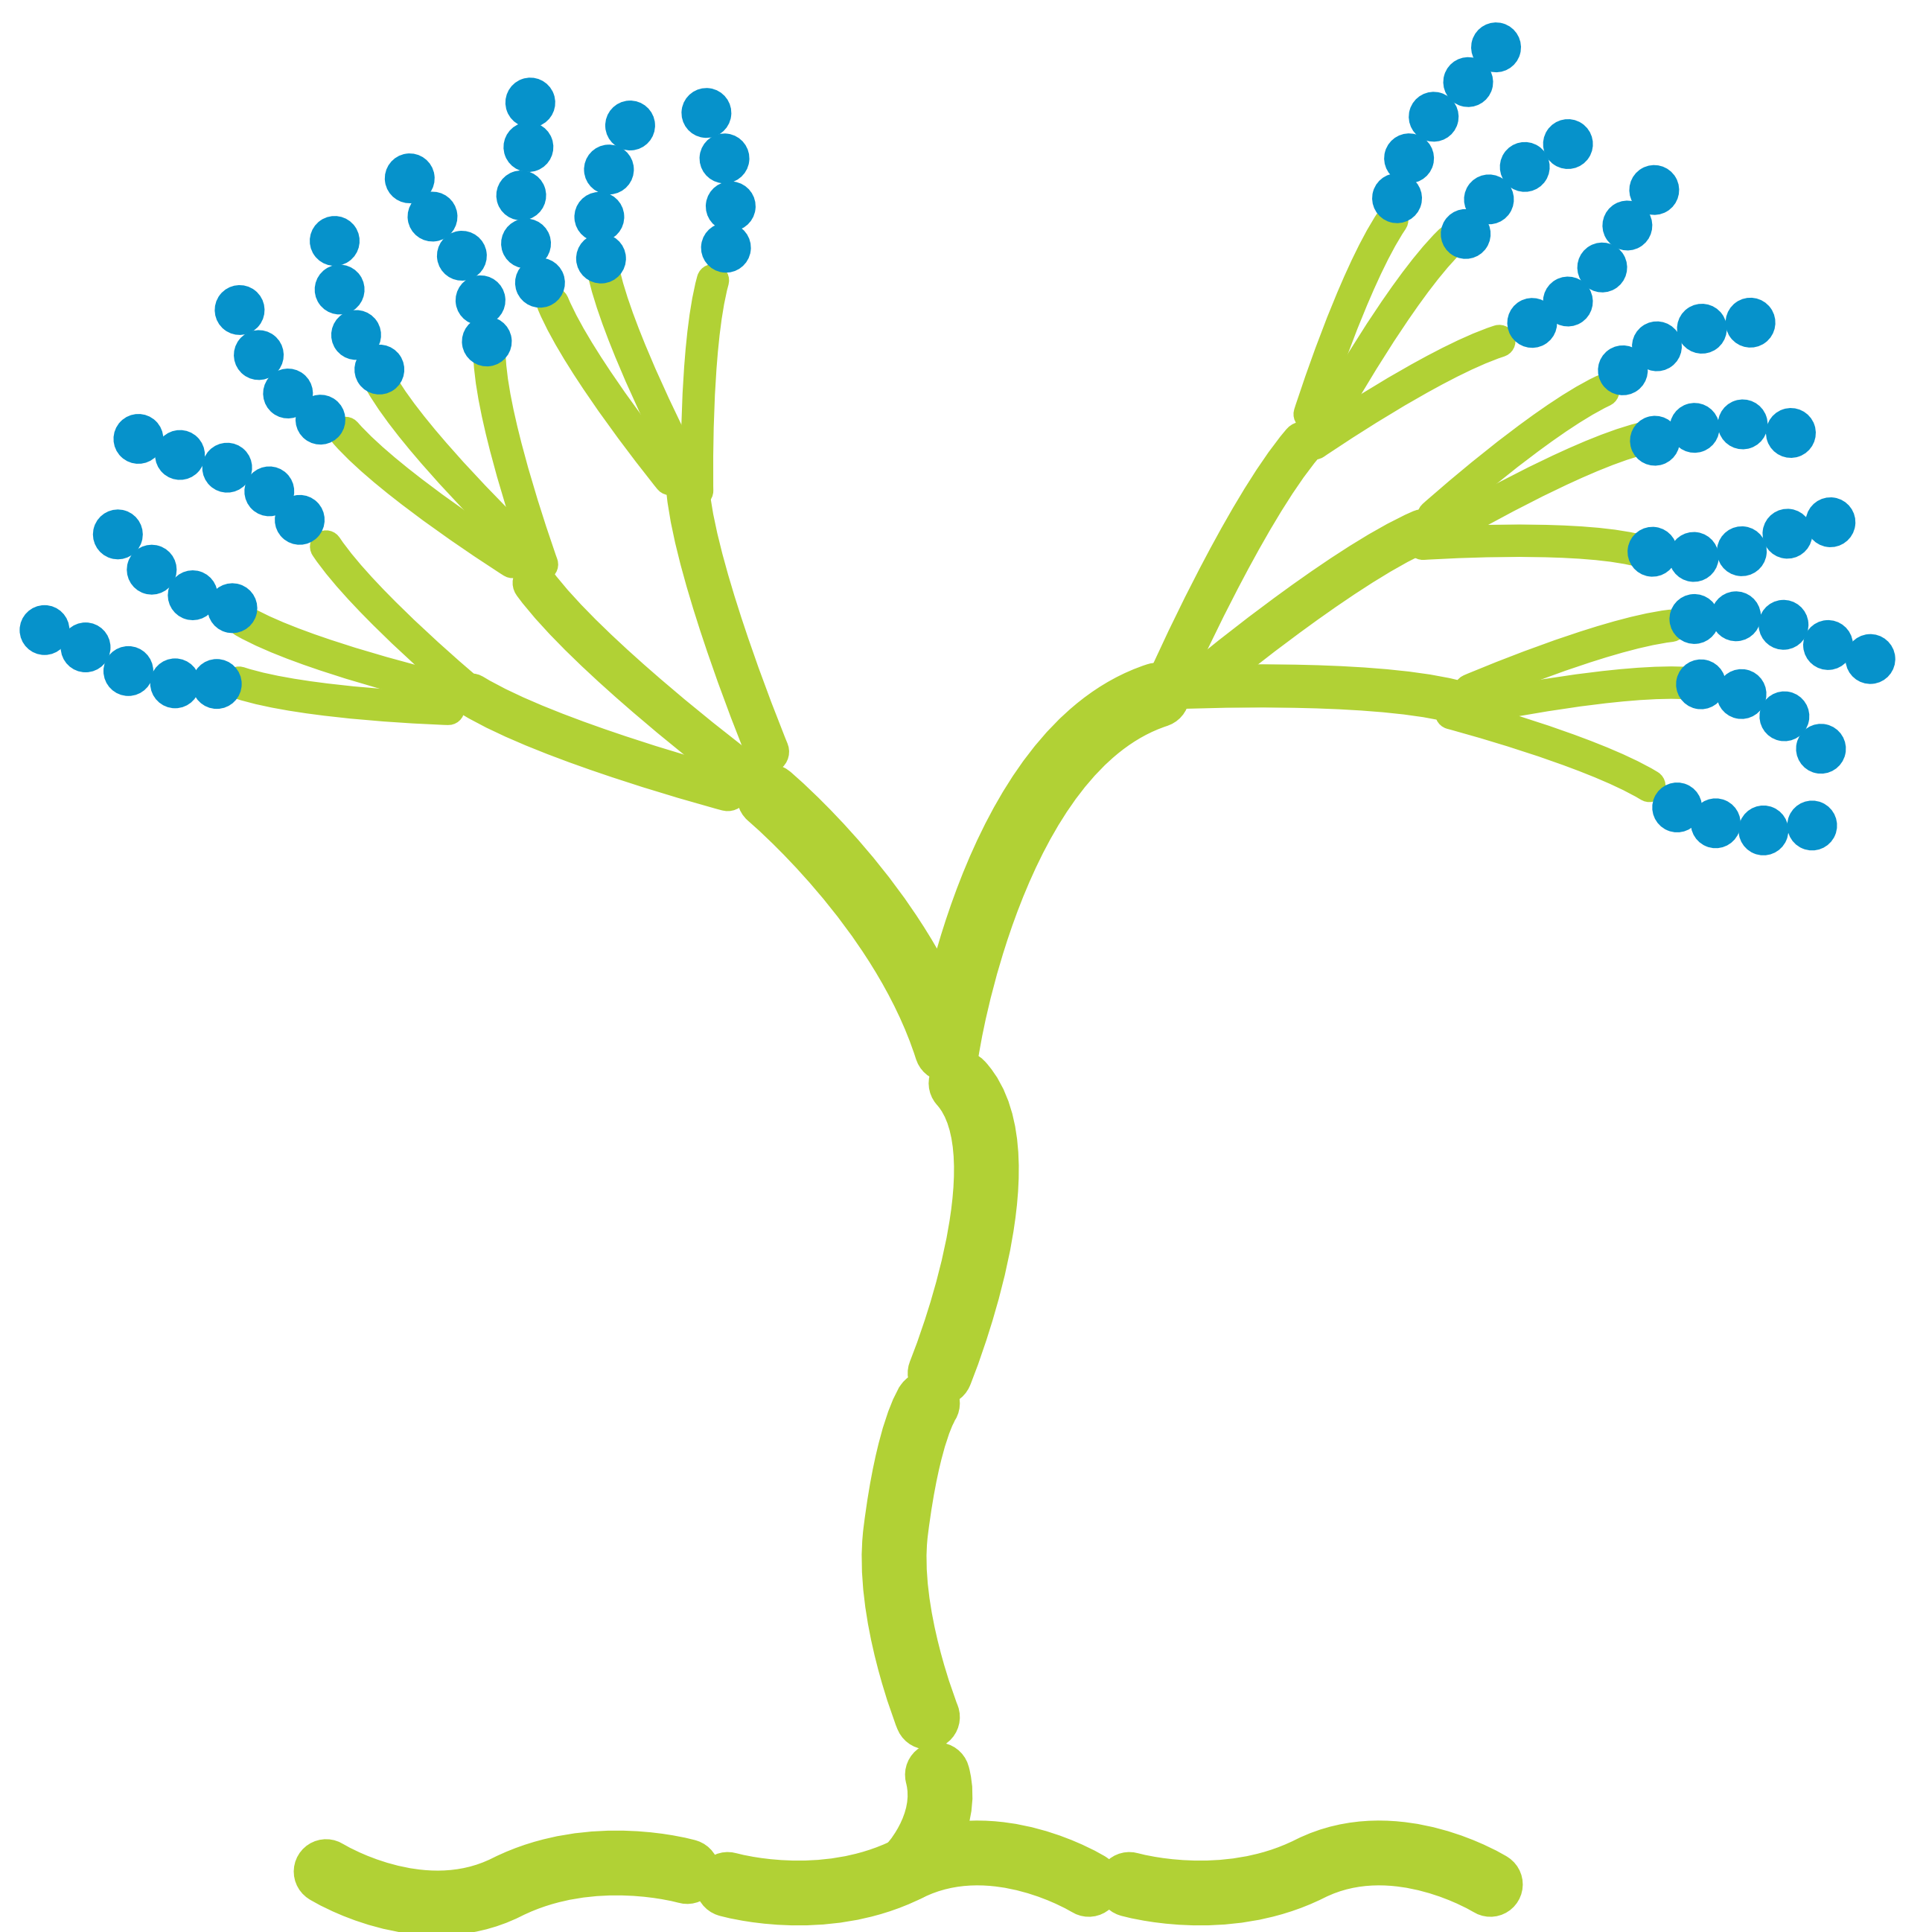

**E**nhance Immune Function by bolstering the body's defenses & reducing mycotoxin-related immune suppression.

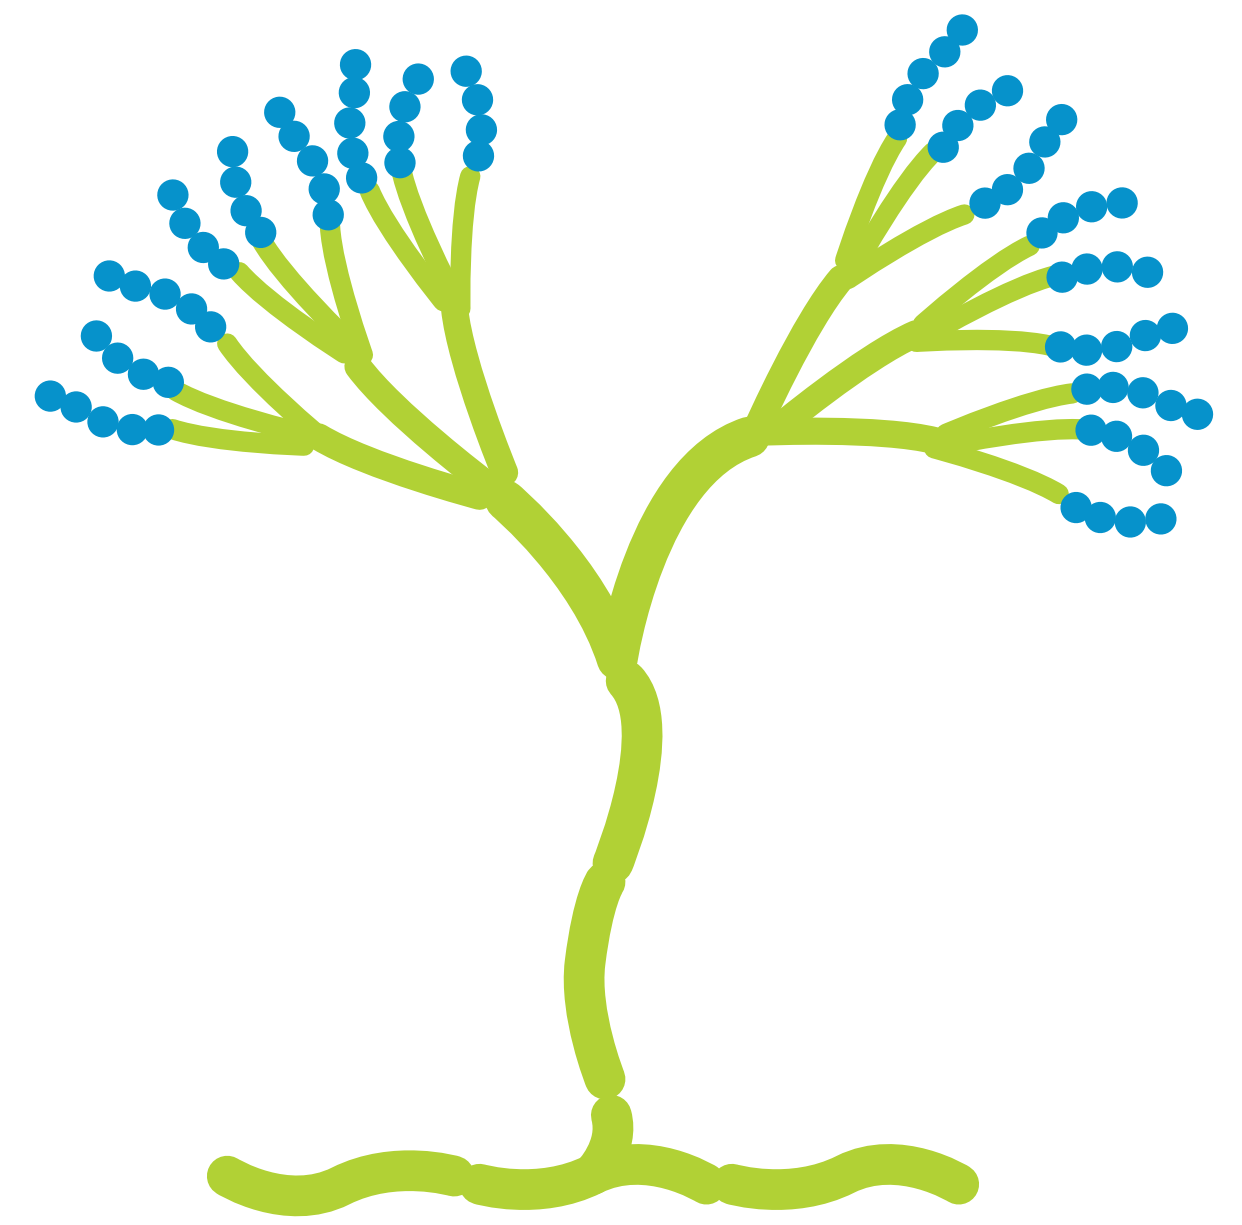

**P**romote Gut Health by supporting intestinal integrity, balancing microbiota, and reducing toxin absorption.

Your First Line of Defense Against Mycotoxin Risks

Reduced Feed Waste, Enhanced Nutrient Absorption,  
Reduced Environmental Impact, Sustainable Farming.

*A balanced mix of anti-mycotoxin agents, designed for both narrow and wide spectrum mycotoxin protection and risk reduction with reduced environmental impact contributing to a more sustainable and environmentally friendly agricultural system.*

## Product Description

Xtra Bind is broad-spectrum mycotoxin binder, designed to effectively adsorb a wide range of mycotoxins in livestock as well as cattle feeds. This powerful product not only relieves immune suppression caused by mycotoxins but also enhances overall immunity, helping to keep cattle healthier and more resilient.

By forming a protective layer on the intestinal mucosa, Xtra Bind reduces the risk of mucosal damage and prevents thickening of the intestinal wall, which supports better nutrient absorption and overall digestive health. In addition, Xtra Bind supplements the body's digestive enzymes, aiding in the breakdown of anti-nutritional factors and improving feed efficiency. Its natural formulation ensures safety and environmental friendliness, making it a reliable choice for effective mycotoxin detoxification.

## Product Profile

Yeast Cell wall: 30%  
Montmorillonite: 60%  
 $\beta$ -glucanase, Xylanase,  
Protease: 10%

## Recommended Feeding Rate

Cow & Buffalo: 10-15g/head/day.  
Sheep & Goat: 05-10g/head/day.  
Horse: 10-15g/head/day  
Poultry: 0.5-2Kg/MT of feed

## Product Application

Xtra Bind should be used in cases of mycotoxin contamination in raw materials or complete feed. Xtra Bind can be incorporated into the feeding program via premixes, feed, and in TMR.
