Background & Objectives

Background

Following the comprehensive Provincial Analysis of Gender-Based Violence (GBV) in Pakistan – 2024, the provincial report highlights the prevalence and patterns of GBV across Punjab, Khyber Pakhtunkhwa, Sindh, Balochistan and Islamabad Capital Territory. The provincial report provided the insights into the overall scale of the issue.

This report provides a district-wise breakdown, a closer look to individual districts to understand the localized trends, assess variations in reporting and response, and develop more targeted interventions at the grassroots level. By focusing on district-specific data, the report uncovers nuanced and hidden realities of GBV that may be masked by the provincial level.

To be more precise, the report comprises the number of GBV cases and the crime rate per 100,000 population. The number of registered cases was obtained through Right to Information requests. Meanwhile, the rate of GBV was calculated using the standard crime rate formula:

$$\text{Crime Rate} = \left(\frac{\text{Number of GBV reported cases to the Police}}{\text{Population of the Province}} \right)$$

In some cases, less populous districts report high number of GBV cases, indicating high magnitude of GBV incidents in smaller districts.

Each section is accompanied by the thematic maps that represent the rate of GBV incidents in each district. The legend categorizes the crime rates into distinct color-coded intervals. Light shades signalling lower rates and dark shades indicating high prevalence. The visual representation allows to easily recognize the high-risk clusters.

Focusing on Punjab, the province recorded the highest number of GBV cases in 2024 among all regions, with 4,641 rape cases, 20,720 kidnappings/abductions, 225 honor killings, and 1,167 incidents of domestic violence. These figures, as documented in the provincial report by SSDO, reinforce the urgency of dissecting the data further at the district level to uncover the specific areas most affected.

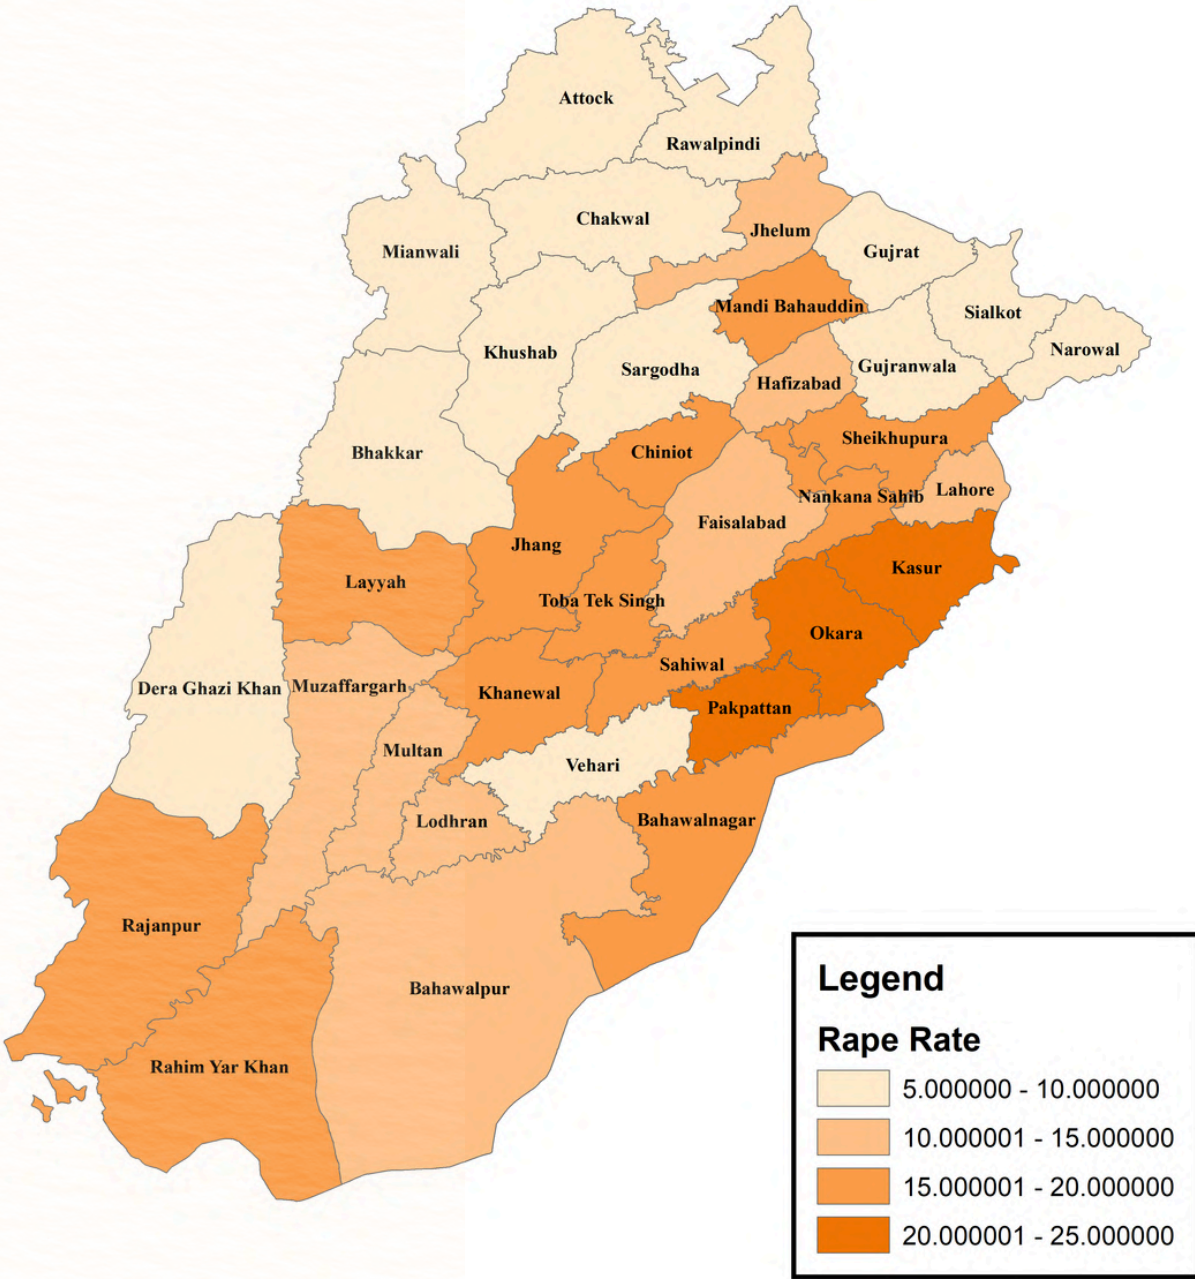

Objectives of Research

This version of the report is the sequel Gender-based-Violence Provincial Analysis published in February 2025. The objectives of this report are:

1. Identifying the GBV hotspot districts (districts with the highest number of reported cases) in Punjab.
2. Analysing conviction in these districts whether registered cases are leading to convictions or not.

Rape

Rate of Rape in Punjab (2024)

Top 5 Districts in Punjab with the Highest Number of Rape Cases			Conviction
1. Lahore	532		2
2. Faisalabad	340		0
3. Kasur	271		6
4. Rahim Yar Khan	250		0
5. Okara	213		0

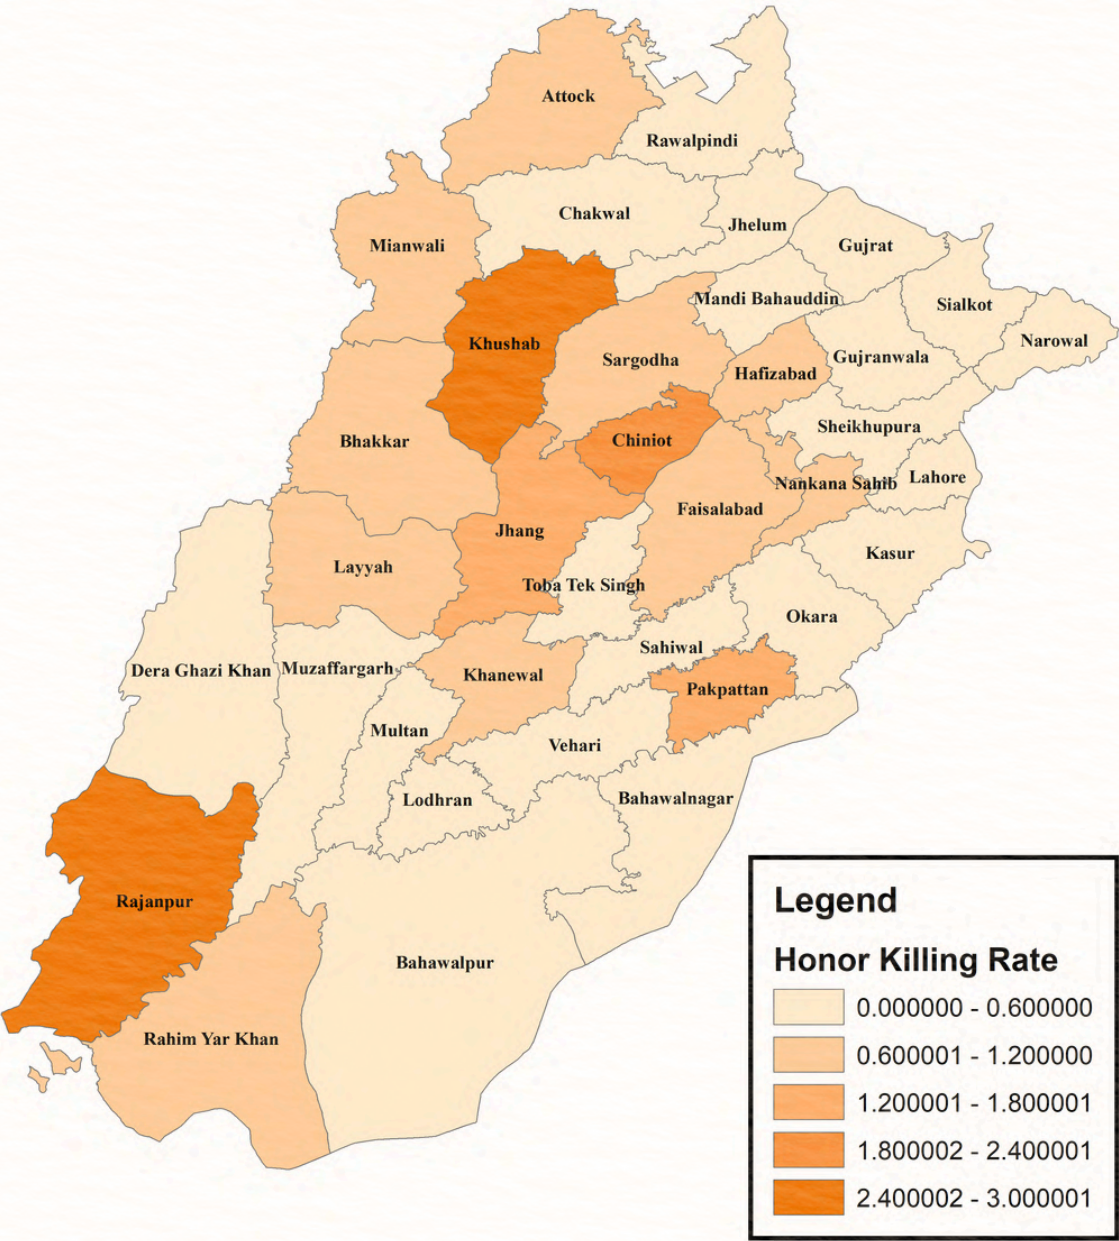

Top 5 Districts in Punjab with the Highest Rate Rape Cases (per 100,000 women population)			Conviction
1. Kasur	25.5		6
2. Pakpattan	25		0
3. Okara	22.7		0
4. Jhang	19.9		0
5. Toba Tek Singh	18.1		0

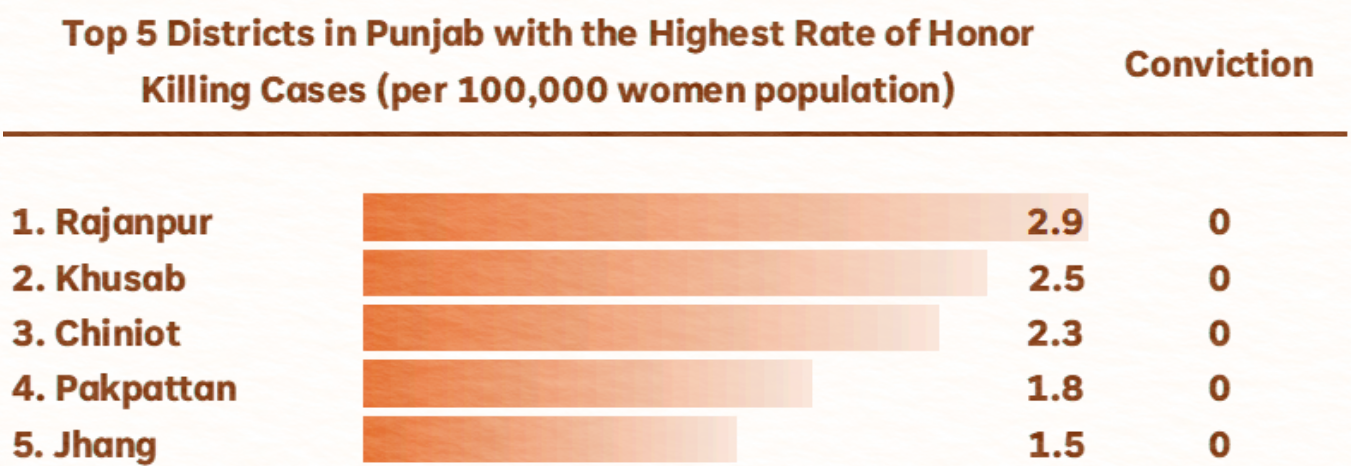

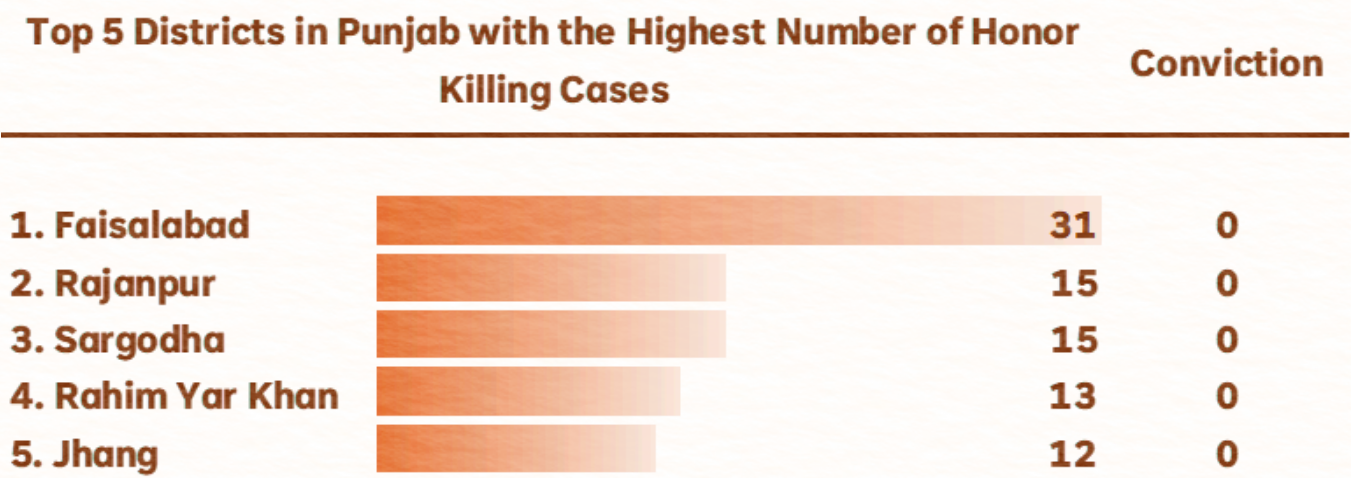

The 2024 data on rape cases depicts an alarming picture, especially in urban and densely populated districts. Lahore recorded 532 cases of rape in one year, followed by Faisalabad (340), Kasur (271), Rahim Yar Khan (250), and Okara (213). Lahore only showed 2 convictions out of 532 cases. In Kasur conviction in 6 cases out of 271. The rest showed no convictions.

When viewed through the lens of population-adjusted rates, smaller districts show an even more disturbing trend. Kasur and Pakpattan top the list with rape rates of 25.5 and 25 per 100,000 people, respectively, despite their smaller populations. Other high-rate districts include Okara (22.7), Jhang (19.9), and Toba Tek Singh (18.1). These figures suggest that less populous districts may face more severe or concentrated incidents of sexual violence.

Honor Killing

Rate of Honor Killing in Punjab (2024)

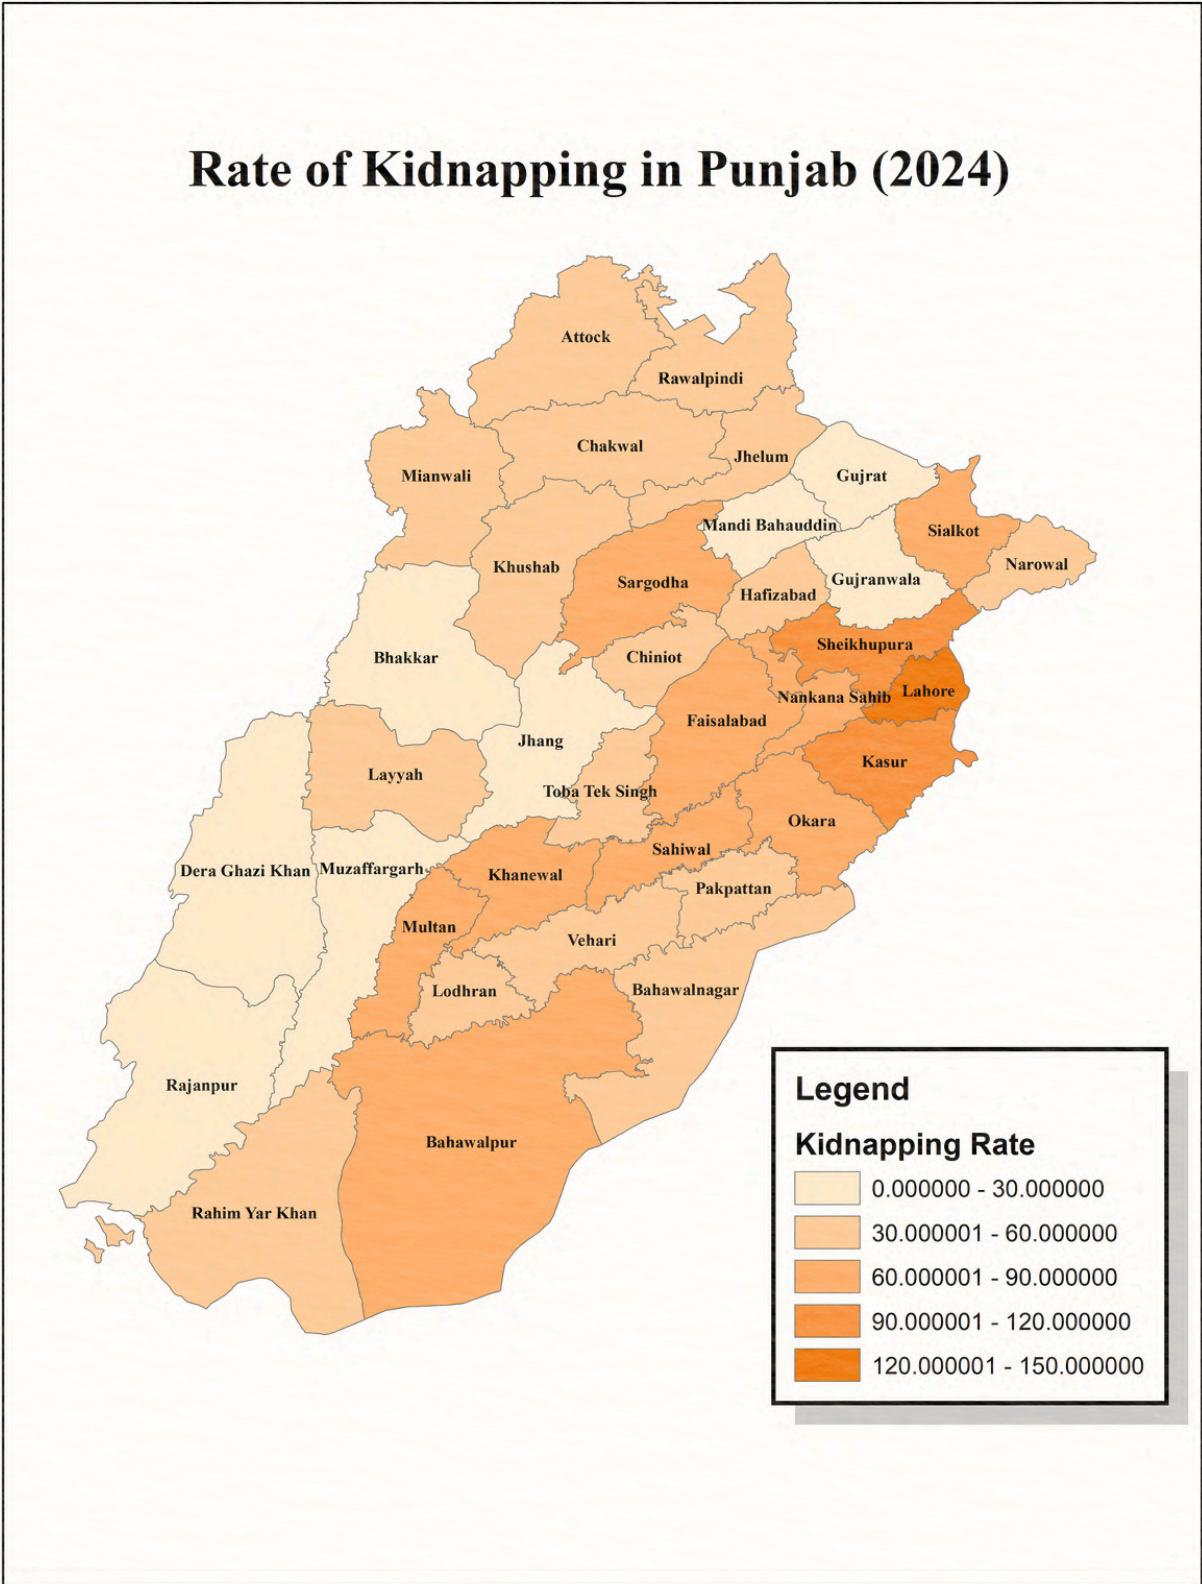

The data on honor killings in Punjab during 2024 reveals trends not only in term of number of cases but also the complete absence of convictions in top five hotspots districts. Despite the severity of crimes, none of these districts reported a single conviction. Faisalabad recorded the highest number of cases (31), followed by Rajanpur and Sargodha with 15 cases each. Rahim Yar Khan and Jhang registered 13 and 12 cases. When adjusted for population, a different picture emerges. Districts such as Rajanpur, Khushab, and Chiniot—which have relatively smaller populations—show the highest rates of honor killings per capita, with Rajanpur leading at 2.9, followed by Khushab (2.5) and Chiniot (2.3). The disparities are visually represented using five-tier, color-coded map. Lighter shades indicate districts with lower rates, while progressively darker tones highlight areas with higher prevalence.

Kidnapping

Rate of Kidnapping in Punjab (2024)

Top 5 Districts in Punjab with the Highest Number of Kidnapping Cases

Conviction

1. Lahore	4510	5
2. Faisalabad	1610	0
3. Kasur	1230	0
4. Sheikhupura	1111	0
5. Multan	970	0

Top 5 Districts in Punjab with the Highest Rate Kidnapping Cases (per 100,000 women population)

Conviction

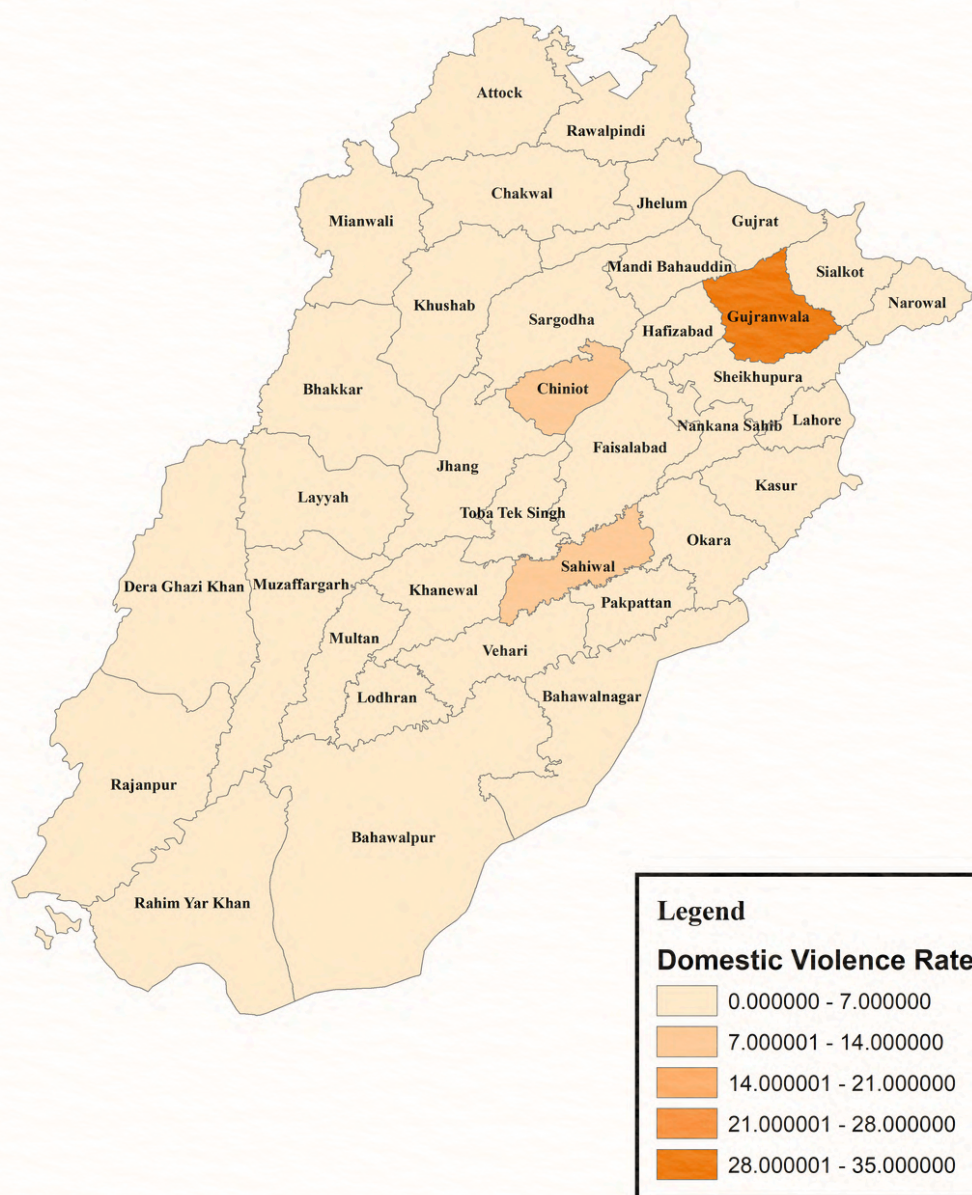

1. Lahore	128.2	5
2. Kasur	115.8	0
3. Sheikhupura	103.6	0
4. Khanewal	84.9	0
5. Okara	77	0

The crime of kidnapping emerged as one of most reported forms of Gender-Based Violence in Punjab. Lahore alone reported 4,510 cases, with only five convictions. Making it the district with the highest number of reported kidnappings by a significant margin. Faisalabad (1,610), Kasur (1,230), Sheikhupura (1,111), and Multan (970) followed as the top five districts, with zero convictions.

Lahore still tops the list with a kidnapping rate of 128.2 per 100,000 people, closely followed by Kasur (115.8) and Sheikhupura (103.6). Importantly, districts like Khanewal (84.9) and Okara (77)—which are less urbanized also appear among the highest in terms of kidnapping rate.

Domestic Violence

Rate of Domestic Violence in Punjab (2024)

Top 5 Districts in Punjab with the Highest Number of Domestic Violence Cases			Conviction
1. Gujranwala	<div></div>	561	0
2. Sahiwal	<div></div>	68	0
3. Lahore	<div></div>	56	0
4. Chiniot	<div></div>	47	0
5. Multan	<div></div>	47	0

Top 5 Districts in Punjab with the Highest Rate Domestic Violence Cases (per 100,000 women population)			Conviction
1. Gujranwala	<div></div>	34.8	0
2. Chiniot	<div></div>	11	0
3. Sahiwal	<div></div>	8.6	0
4. Mandi Bahaddin	<div></div>	6.1	0
5. Vehari	<div></div>	4.8	0

Gujranwala reported the highest number of cases 561, followed by Sahiwal (68), Lahore (56), Chiniot (47), and Multan (47). Despite the magnitude of cases, not a single conviction was recorded.

In terms of rate per population, Gujranwala once again leads with a domestic violence rate of 34.8 per 100,000 people, followed by Chiniot (11), Sahiwal (8.6), Mandi Bahauddin (6.1), and Vehari (4.8). The appearance of both urban and smaller districts among the highest rates indicates that domestic violence is not limited to one type of setting.

Recommendations

Recommendations

1. The low conviction rates for rape, honor killings, and kidnapping across Punjab highlight gaps in the legal and judicial systems. Specialized GBV courts should be established in high-risk districts to ensure faster trials and better handling of sensitive cases. Gender-sensitivity training for law enforcement and legal personnel is crucial to improve understanding and handling of GBV cases, ultimately leading to better outcomes for victims.
2. The absence of convictions, particularly in domestic violence cases, signals the need for stronger support systems for victims. Emergency shelters, legal aid, and counseling services should be expanded in districts with the highest rates of violence, like Gujranwala and Lahore. This will provide victims with the necessary resources to report crimes without fear of retaliation and assist them throughout the judicial process.
3. The high rates of GBV in less urbanized districts suggest underreporting due to stigma or lack of awareness. Community-based awareness programs should be implemented to educate residents about their legal rights and available support services. Additionally, anonymous reporting mechanisms should be introduced, especially in districts like Kasur and Faisalabad, to encourage victims to come forward without fear of societal repercussions.
4. Districts like Rajanpur, Khushab, and Kasur, which show alarming GBV trends, need targeted interventions. These should include increasing police presence, enhancing victim support programs, and organizing community dialogues to address the root causes of gender-based violence. Engaging local leaders and religious figures in these efforts can help shift cultural norms that perpetuate violence and discrimination against women.
