

# Digitalize your operations

## TaqOne

## Attendance monitoring, incident management and customer satisfaction

### Features and characteristics

#### Customizable buttons

1 to 5 customizable buttons, or up to 3 no-touch.

#### Badge

A nominative or anonymous (NFC or magnet) tag.

#### Long battery life

2 to 8 years battery life with 6 AA batteries.

#### Safe and hygienic

Anti-bacterial film on the device for safety and comfort.

#### Customizable front panel

Customizable front panel according to your needs.

#### Connectivity

LTE-M, NB-IoT and GSM. Device works without a WiFi connection.

#### Fota

Remote firmware updates.

#### Notifications & alerts

Program alerts, reminders and schedule interventions.

### Customizable front panel per type of operation:

#### Enhance traceability

Simplified tracking of services provided by your team.

#### Schedule reminders

Notifications are sent to selected people in the event of omission or absence of cleaning.

#### Inform and reassure

Occupants are able to see the last 6 cleaning operations on the screen.

### Planning creation and tracking :

**Import your team schedules** into the online platform.

**Track your cleaning requests** easily.

**Create alerts and reminders** to track cleaning operations.

#### COLOR LEGENDS

#### Operations monitoring

Solved

Solved  
but outside scheduled time range

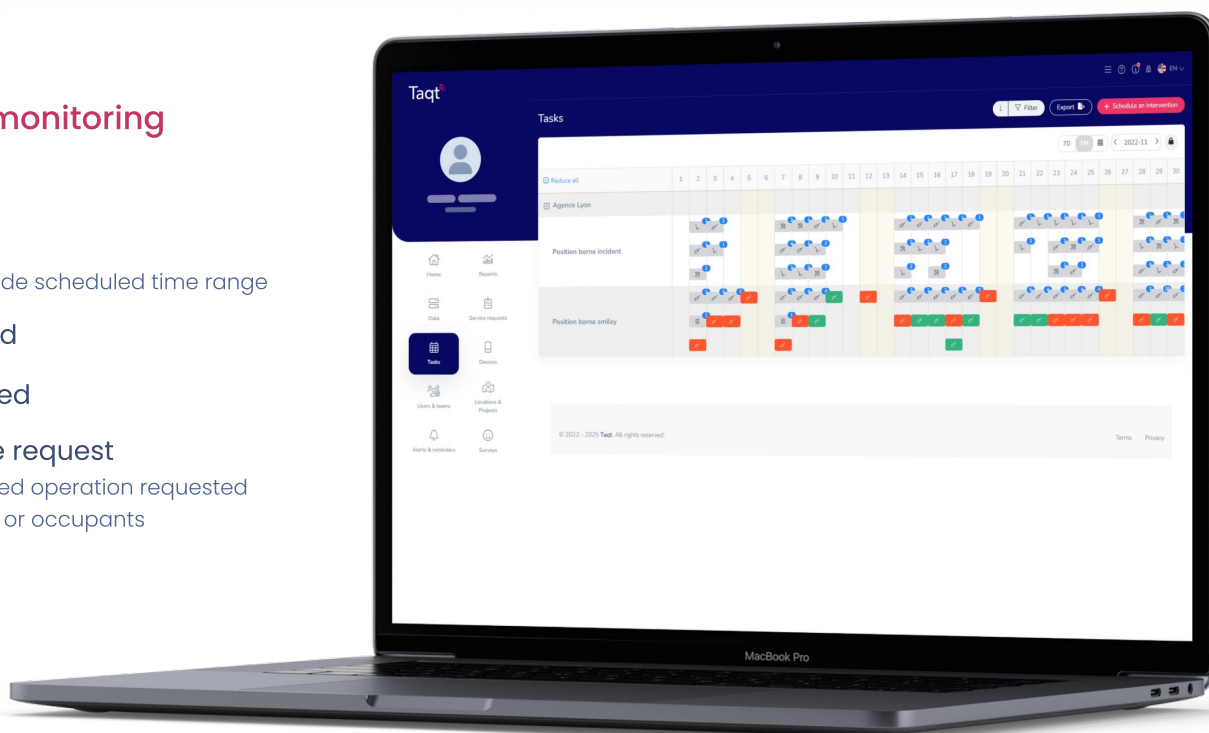

Planned

Unsolved

Service request  
Unplanned operation requested  
by client or occupants

### Customizable front panel per type of operation:

#### Dissatisfaction detection

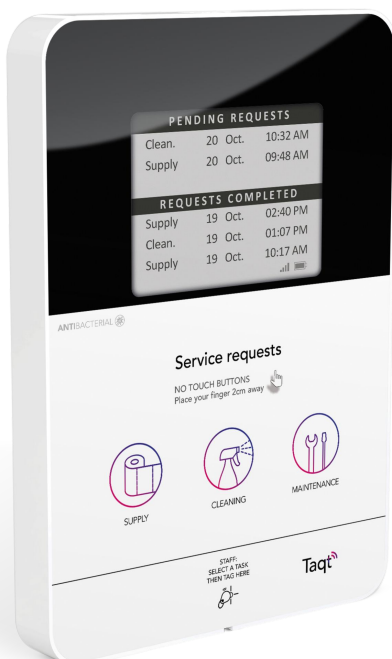

Occupants assess their level of satisfaction easily.

#### On-demand request

A notification is sent when a button is pushed.

#### Monitor incidents remotely

All requests are available 24/7 on the platform.

### Solve requests quickly and easily:

Receive an email or an SMS as soon as an occupant requests an intervention.

A 'pending' ticket is opened, requesting the intervention of an agent and the solving of the request.

The agent swipes their badge, the ticket closes, and you receive a notification by email to inform you.

#### COLOR LEGENDS

#### Operation monitoring

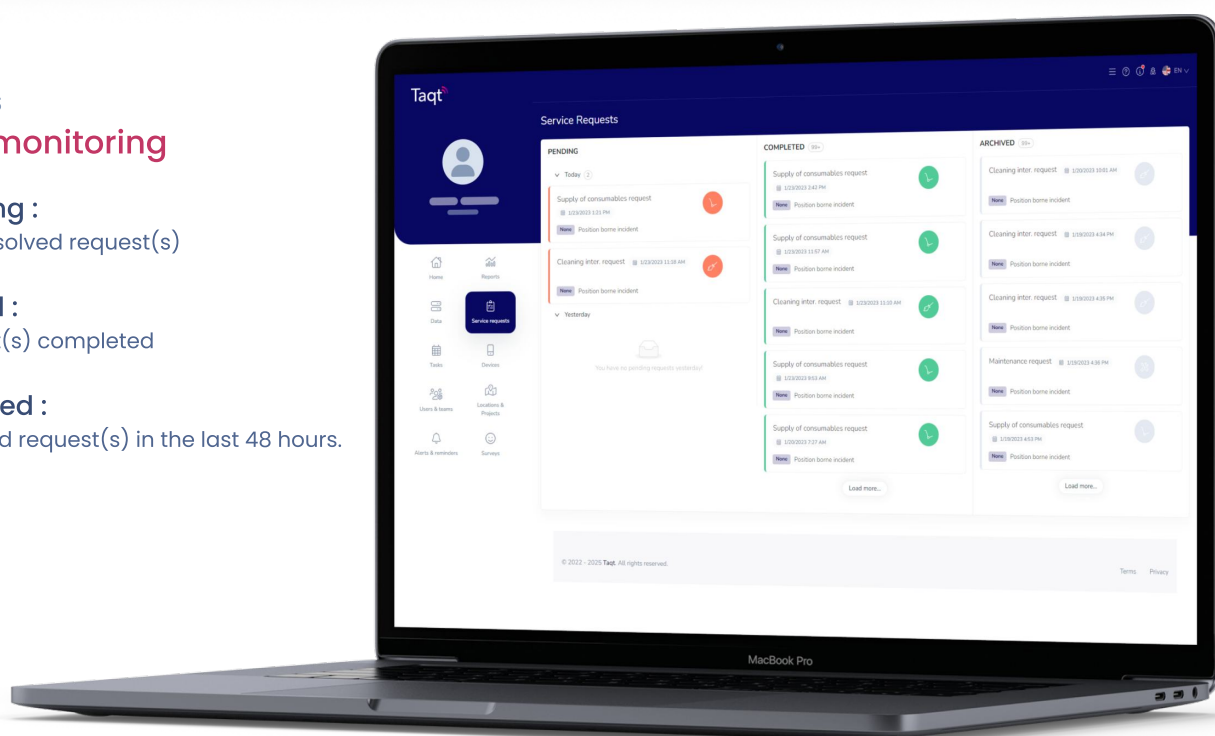

**Pending :**  
New unsolved request(s)

**Solved :**  
Request(s) completed

**Archived :**  
Unsolved request(s) in the last 48 hours.

### Customizable front panel per type of operation:

#### Measure satisfaction

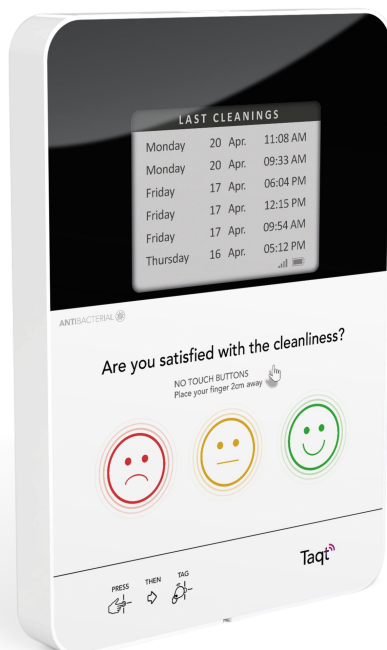

Occupants can easily assess their level of satisfaction.

#### Improve the quality of services

The system identifies key moments for intervention to reinforce quality of service.

#### Track client satisfaction from anywhere

Real-time updates on the platform are available 24/7.

### Receive an alert in the event of dissatisfaction:

Define alert triggers: consecutive red pushes, dissatisfaction % ...

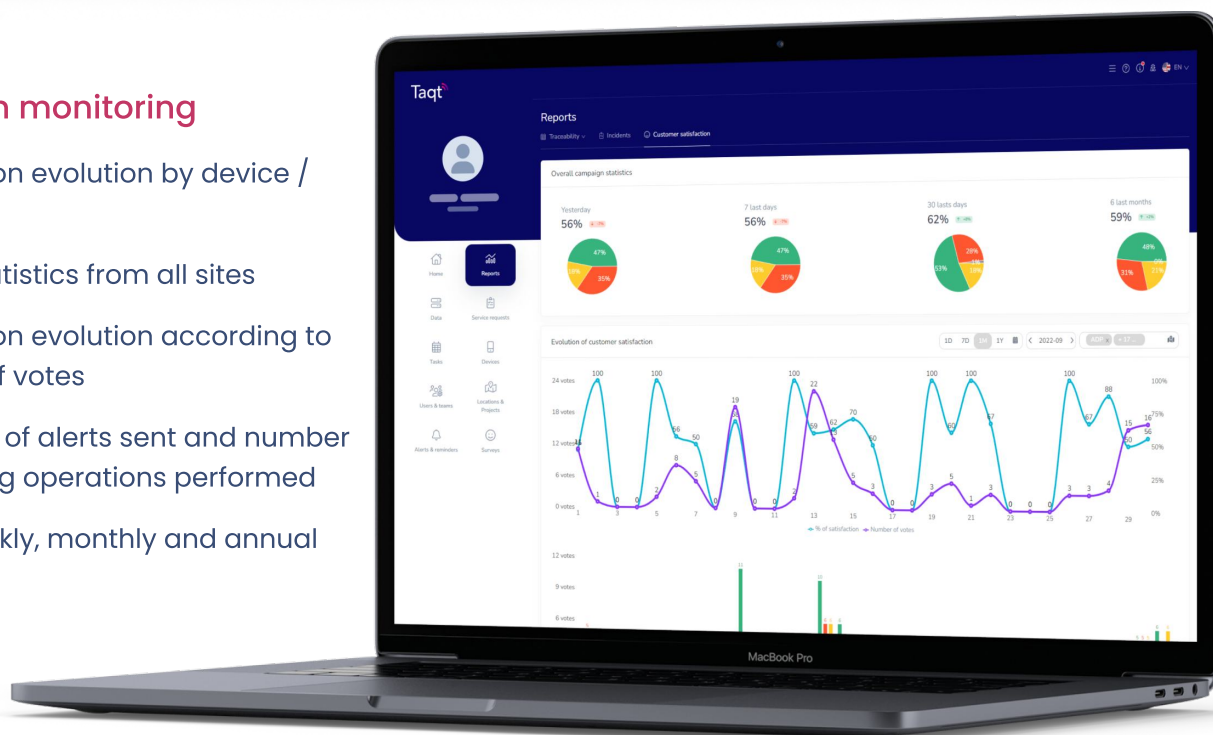

Analyze agents' responsiveness, their impact on satisfaction levels and the duration of the operations.

Agent badges in, ticket closes, and you receive an e-mail notification to inform you that the operation has been completed.

### Satisfaction monitoring

- ✓ Satisfaction evolution by device / position
- ✓ Global statistics from all sites
- ✓ Satisfaction evolution according to number of votes
- ✓ Summary of alerts sent and number of cleaning operations performed
- ✓ Daily, weekly, monthly and annual filters
