

Isaac Winner

Senior Full-Stack Developer

Enugu, Nigeria | 08119188295 | github.com/IsaacWinner18 | x.com/cyberwon_1

About me

Results-driven full-stack developer with **4+ years of experience** designing, building, and shipping production-grade web applications and digital infrastructure. Strong command of the JavaScript/Typescript ecosystem (React, Next.js, Node.js, Express) paired with a systems-thinking approach to architecture, performance, and developer experience. Proven ability to work across the full product lifecycle, from ideation and API design to deployment and analytics with a track record of founding and shipping SaaS products in the African creator-economy space.

CORE SKILLS

Languages and Frameworks: TypeScript, JavaScript, [Nodejs](#), Tokl, React, Next.js, Express.

Databases and Backend: MongoDB, PostgreSQL, RESTful APIs.

Tools and Deployment: Dev environment tools, Vercel Edge, Git branching, cloud deployment workflows, Telegram Bot / Automations, Tg Mini-app, and frontend styling libraries.

PROFESSIONAL EXPERIENCE

Founder & Lead Engineer — Earnstak

2025 – Present | Lagos, Nigeria

- Designed and built a headless creator commerce platform enabling digital-product sellers to embed frictionless checkout directly on custom pages, no redirects, no third-party stores.
- Architected a multi-tenant SaaS backend with Next.js, Node.js/Express, MongoDB, and Vercel Edge for sales page hosting.
- Engineered an AI-powered sales-page generator (Ern AI) backed by the Anthropic Claude API, resolving token-overflow at scale through a per-section streaming pipeline.
- Integrated Paystack / Korapay Checkout Standard for payment processing.
- Built a real-time analytics layer with session tracking, conversion funnels, and creator-facing dashboards. • Applied for and prepared materials for the South East Venture Capital Program (SEVCP).

Lead Developer — Exam Preps

2025 – Present | Remote

- Developed a comprehensive preparation platform for major Nigerian examinations.
- Scaled the user base to 289 students, successfully converting and managing 8 paying customers.
- Designed and implemented the core application architecture to handle exam simulations and student performance tracking.
- Implemented an Intuitive analytics and grading system, coupled with a strategic streak functionality to keep students engaged.

Freelance Full-Stack Developer

2022 – Present | Remote

- Delivered production web projects for clients including **Dben Real Estate** (dbenrealestate.com), **Moevan** Data Subscription Platform (moevan.com), **SnapCash** Academy, and multiple marketing/sales pages.
- Built **Buychow** — a food-delivery web app tailored to students of Achievers University, featuring restaurant listings and order workflows.
- Developed high-conversion landing pages for digital-marketing agencies (Meta Ads Nigeria, AdMasters Nigeria).
- Delivered Telegram bot integrations and TON blockchain mini-app projects, an undersupplied niche in West Africa.

Full-Stack Developer Trainee — Oracus Digital Agency

2023 – 2024 | Nigeria

- Completed an immersive full-stack development programme covering React, Node.js, RESTful APIs, and cloud deployment workflows.
- Built and shipped real-world client projects as part of an agency team, gaining exposure to professional code review, Git branching, and agile delivery.
