NATIONAL STEM DAY

by Charlize Amper

Did you know that November 8th is national STEM day? Celebrate it by encouraging those around you to get curious about math and science activities! Try finding out which hobbies of yours are rooted in STEM subjects and brush up on your own STEM related skills.

FINDING YOUR PLACE IN STEM

by Julia Carrasco

Although STEM as a whole does include multiple different career paths, there are multiple ways to figure out what STEM path you would like to pursue. One of the easiest ways is to learn about members in your own community who's career lines up with STEM. This is a great way to not only learn about/ better your community but better understand STEM as a whole!

PICKING A PROJECT

by Haley Morsorjak

There are so many projects between middle school and high school to choose from! Here are 3 tips to make sure you choose the right ones for you!

1. **Think about your interests, skill sets, and what you may want to do as your future career**
2. **Decide if you want to do individual or group projects**
3. **Organize your time and figure out how much of a TSA workload you can handle with school, your job, etc.**

From there you will be able to narrow down and choose the best project that is right for you! Don't forget to enjoy this year of TSA and make so many fun memories!

THE CABIN TRIP

by William Reisner

In October, the State Officer Team traveled to Sinnamahoning for a cabin retreat along with several members of the Board of Directors. We filmed tons of social media content and did lots of team bonding, so make sure to check the official PA-TSA YouTube and Instagram accounts for new videos coming soon!
