

Stainless Steel Tactile Tiles for Accessible Public Spaces

Enhance safety and accessibility in transit hubs and walkways with our durable stainless steel tactile tiles. Manufactured to withstand heavy footfall, these tiles offer reliable guidance for visually impaired pedestrians while withstanding daily wear in busy urban environments. Ideal for airports, stations, malls, and outdoor paths, they combine practical traction with sleek, vandal-resistant finishes. Partner with us for customised scales and patterns that align with your project's design, reliability, and long-term performance goals.
