LEICA PIPER 100 PIPE LASER

The Leica Piper 100 is a small but mighty pipe laser. Housed in a sturdy aluminium body, the Piper 100 operates in the toughest environments and conditions without sacrificing performance. Featuring a highly visible red beam laser which gives the Leica Piper 100 four times better visibility and vastly improves accuracy. The highly visible beam also allows the Piper 100 to work at much greater distances, in sunnier conditions, and even in water.

KEY FEATURES

- Compact yet powerful
- Automatic grade compensation
- Heavy duty trivet
- Multi-function remote
