Profile

Software Engineer with 3+ years of experience building scalable web, mobile and cloud applications. Passionate about distributed systems, DevOps, workflow automation and UI/UX.

Skills

Languages

Python • TypeScript • JavaScript • SQL • Dart • C++

Frontend

React • Next.js • Flutter • HTML • CSS • Tailwind

Backend

Django • REST • GraphQL • PostgreSQL

DevOps

Docker • Linux • Jenkins • Nginx • Git

Cloud

AWS • Firebase • Supabase

Graphics

Three.js • WebGL • GLSL • Blender

Design

Figma • UI/UX • Graphic Design

Education

B.Sc. Software Engineering

ICT University
Expected Sept. 2027
GPA: 3.1 / 4.0

Certifications

- IBM Full Stack Software Developer Professional Certificate (2026)
- Linux Foundation LFCA Preparation

GitHub

- 20 repositories (19 public)
- 441 contributions (last year)
- Pull Shark ×2
- Pair Extraordinaire

Experience

Freelance Software Engineer

2023 – Present

Designed, developed and deployed production software for startups, businesses and independent clients.

- Delivered software solutions for **10+ freelance clients**.
- Built full-stack web and mobile applications using Django, Next.js and Flutter.
- Designed REST APIs, GraphQL services, authentication systems and CI/CD pipelines.
- Configured Docker, Linux, Jenkins and PostgreSQL production environments.
- Contributed to the production platform **Nkwel**, supporting **100+ users** and **20+ businesses**.

Engineering Projects

RunAm

Flutter • Django • GraphQL • PostgreSQL

- Real-time errand marketplace connecting users with nearby students.
- Built 17 application screens with live tracking, escrow payments and dispute resolution.
- Successfully tested with 200+ concurrent users.

OmniFlow

Django • Docker • Jenkins • PostgreSQL

- OCR-powered workflow automation platform using a six-service microservice architecture.
- Automated CI/CD deployment and reduced paperwork processing by approximately three days.

VentureCore

Next.js • Django • Docker

- Collaborative workspace integrating meetings, document editing and project management.
- Microservice architecture with nine third-party API integrations.

Molio

Django • Tailwind • Neon • Cloudinary

- Portfolio platform with automatic GitHub synchronization and custom CMS.
- Built using PostgreSQL, Cloudinary and responsive UI principles.
