RE: Wish granted for Lucas G.

To Whom it May Concern:

We wanted to send a small note expressing our gratitude for the thoughtful gesture of granting this wish for Lucas. Being able to have a tablet that will allow Lucas to communicate with others as well as build his independent living skills is a huge blessing for Lucas and the foster family. Lucas will be so excited to have his very own tablet that he is able to also take to school when he goes back. Not only will this help Lucas, but this is also a big help to the foster parents and private workers that help assist with Lucas' daily tasks. Lucas has recently been enjoying being online for school and watching various educational cartoons, both of which he will be able to do on this tablet. This wish being granted means so much to Lucas and everyone on his treatment team.

Thank you thank you thank you! :)
