RE: Wish granted for Lucas G.

To Whom it May Concern:

We wanted to send a small note expressing our gratitude for the thoughtful gesture of granting this wish for Lucas. Due to his autism diagnosis, Lucas struggles with expressing and communicating his needs which often leads to self-harming or aggressive tendencies towards others. Lucas will often hit his head against objects or people, so having a helmet will protect himself and others. This helmet is used for therapeutic and behavior supports and will be a huge benefit. Thank you!!
