

SUESS MicroTec SE

Germany | Technology | MCap EUR 731.2m

10 April 2024

UPDATE

Conference presentation confirms positive view; BUY

What's it all about?

Sven Köpsel, Head of Investor Relations & Corporate Communication of Suess MicroTec, gave a presentation at mwb research's German Small Cap Select Conference. The presentation highlighted Suess MicroTec's exceptional positioning in high-growth areas of the semiconductor equipment market, particularly driven by Al applications, which accounted for over 30% of FY23 orders. Despite industry challenges, the company delivered 17% revenue growth in FY23, in stark contrast to the decline in the wafer fab equipment market. Margin expansion is expected in FY24, with gross margin and EBIT margin expected to improve by 240bp and 190bp, respectively, at the midpoint of the guidance range. The company's valuation presents a compelling opportunity, with margins still below industry standards and a significant discount to peer group multiples, suggesting potential for both earnings growth and multiple expansion, reinforcing our BUY recommendation with a DCF-derived price target of EUR 44.00. A recording of the presentation is available at https://research-hub.de/events.

Conference presentation confirms positive view; BUY

Presentation at German Small Cap Select Conference. Sven Köpsel, Head of Investor Relations & Corporate Communication of Suess MicroTec, gave a presentation at mwb research's German Small Cap Select Conference. The event was well attended. The presentation and discussion focused on the business model and the associated growth and margin potential. A recording of the presentation can be viewed under https://research-hub.de/events.

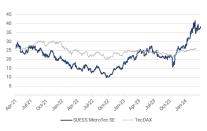

Growth driven by AI. In FY23, Suess MicroTec's revenues increased by 17% compared to a decline of approximately 4% for the wafer fab equipment market (source: SEMI), highlighting Suess MicroTec's exceptional positioning in high growth areas of the market. More than 30% of the FY23 orders are directly related to Al applications, where the systems are mainly used for high-bandwidth memory production, but also for packaging in TSMC's CoWoS process for the production of Nvidia's latest Al chips. Suess MicroTec expects revenue to continue to grow in 24E, increasing by 17% at the midpoint of the guidance range.

Margin expansion planned. At present, margins are still weighed down by the costs of capacity expansion, such as the ramp-up of a new facility in Taiwan and the qualification of new partners. However, as these costs are absorbed by continued growth, Suess MicroTec is forecasting an improvement of 240bp in gross margin and 190bp in EBIT margin in FY24 (both at the midpoint of the guidance range). A further, even steeper improvement is targeted for FY25.

Double lever for valuation, reiterate BUY. We value Suess MicroTec on a DCF model, which leads to a price target of EUR 44.00. Investors who prefer to look at a peer group will notice two things: 1) Suess MicroTec's margins are still below par, e.g. EBITDA 25E only 16% (mwb est.) vs. 33% for the peer group. 2) The discount to multiples is significant, e.g. 9x EV/EBITDA 25E (mwb est.) vs. 22x for the peer group. This results in a potential double leveraging effect on the valuation: if Suess MicroTec succeeds in further closing the margin gap, this would not only lead to earnings growth but also to a multiple expansion. We reiterate our BUY recommendation.

Major Shareholders

SWOT analysis

Strengths

- Domination of niche markets with limited competition
- Innovative, almost 20% of personnel in R&D
- Growth possible with limited capex
- Transparent capital market communication
- Clear commitment to short-, medium- and long-term goals

Weaknesses

- Boardroom reshuffling
- Shrinking market for mask aligners

Opportunities

- Hybrid Bonding and Wafer Cleaning with disruptive potential
- New platform strategy improving margins
- Decoupling and nearshoring driving U.S. and European invest
- · Addressing the high-growth subsegments of the backend

Threats

- Inherently cyclical semiconductor equipment market
- Failure of new products

Valuation

DCF Model

The DCF model results in a fair value of EUR 44.12 per share:

Top-line growth: We expect SUESS MicroTec SE to grow revenues at a CAGR of 6.7% between 2024E and 2031E. The long-term growth rate is set at 2.0%.

ROCE. Returns on capital are developing from 13.5% in 2024E to 14.6% in 2031E.

WACC. Starting point is a historical equity beta of 1.32. Unleverering and correcting for mean reversion yields an asset beta of 1.20. Combined with a risk-free rate of 2.0% and an equity risk premium of 6.0% this yields cost of equity of 9.2%. With pretax cost of borrowing at 5.0%, a tax rate of 35.0% and target debt/equity of 0.1 this results in a long-term WACC of 9.2%.

FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR 31.00 per share based on 2024E and EUR 57.92 per share on 2028E estimates.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in El	JRm	2024E	2025E	2026E	2027E	2028E

Source: Company data; mwb research

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 7.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable.** A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.

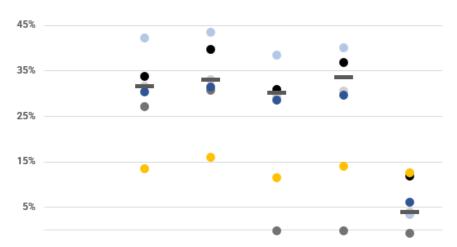

Peer group analysis

A peer group or comparable company ("comps") analysis is a methodology that calculates a company's relative value — how much it should be worth based on how it compares to other similar companies. Given that **SUESS MicroTec SE** differs quite significantly in terms of size, focus, financial health and growth trajectory, we regard our peer group analysis merely as a support for other valuation methods. The peer group of SUESS MicroTec SE consists of the stocks displayed in the graphs below. As of 10 April 2024 the median market cap of the peer group was EUR 117,524.2m, compared to EUR 731.2m for SUESS MicroTec SE. In the period under review, the peer group was more profitable than SUESS MicroTec SE. The expectations for sales growth are lower for the peer group than for SUESS MicroTec SE.

Comparable company analysis operates under the assumption that similar companies will have similar valuation multiples. We use the following multiples: EV/EBITDA 2024, EV/EBITDA 2025, EV/EBIT 2024, EV/EBIT 2025, P/E 2024 and P/E 2025.

Applying these to SUESS MicroTec SE results in a range of fair values from EUR 61.12 to EUR 155.14.

Risk

The chart displays the **distribution of daily returns of SUESS MicroTec SE** over the last 3 years, compared to the same distribution for ASML Holding NV. We have also included the distribution for the index DAX. The distribution gives a better understanding of risk than measures like volatility, which assume that log returns are normally distributed. In reality, they are skewed (down moves are larger) and have fat tails (large moves occur more often than predicted). Also, volatility treats up and down moves the same, while investors are more worried about down moves. For SUESS MicroTec SE, the worst day during the past 3 years was 26/10/2023 with a share price decline of -17.7%. The best day was 08/11/2023 when the share price increased by 20.0%.

Conflicts of interest

Disclosures regarding research publications of mwb research AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures It is essential that any research recommendation is fairly presented and discloses interests of indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if mwb research AG

- or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the term of such an agreement,
- or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of mwb research AG or its affiliate(s),
- or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Important disclosures

- 1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by mwb research AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of mwb research AG. Reproduction of this document, in whole or in part, is not permitted without prior permission mwb research AG. All rights reserved. Under no circumstances shall mwb research AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report - neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.
- 2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.
- 3. Organizational Requirements mwb research AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of mwb research AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.
- 4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow - DCF model. Furthermore, a peer group comparison is made. The adi. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC). which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interestbearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at https://www.mwb.-research.com.

mwb research AG uses the following three-step rating system for the analyzed companies:

- Speculative (Spec.) BUY: Sustainable upside potential of more than 25% within 12 months, above average risk
- BUY: Sustainable upside potential of more than 10% within 12 months
- SELL: Sustainable downside potential of more than 10% within 12 months.
- HOLD: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of mwb research AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by mwb research AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of mwb research AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies

5. Date and time of first publication of this financial analysis 10-Apr-24 11:04:18

6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no
 or very little actual trading there and that published prices are not based on
 actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.
- **7. Major Sources of Information** Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. mwb research AG has checked the information for plausibility but not for accuracy or completeness.
- **8. Competent Supervisory Authority** mwb research AG are under supervision of the BaFin German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.
- **9. Specific Comments for Recipients Outside of Germany** This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.
- 10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under https:// www.mwb.-research.com.
