

TAO

evolve your second nature

dentalart

sculpted, austere, intriguing
a form that appears to vanish in space

mystery surrounds a series of guarded secrets that anticipate your future needs

colour: WA7021 matt
worktop: Corian® "Glacier white"

you'll find yourself asking questions
that you've never asked before

TAO technologies

perfectly oiled and precise mechanisms, silent as a breeze.
whispered innovation

4mm thick panels

74% thinner structure

4-way adjustment

3D-true alignment

Drawer

Furniture

truly airtight

Local and centralized storage

Smart storage

ULTRA-SLIM FRONT & SIDES

Carved from a single 4mm thick metal sheet, drawers, door and side panels are 74% thinner than the standard 15mm. Space has also been reduced between drawers, giving a minimalist look that means more space for you and a lower total volume.

FULL EXTENSION WITH MICRO-ADJUSTMENTS

Every drawer extends completely to permit full access to content. Multiple micro-adjustments can be made in 4 directions to achieve perfect alignment.

PENTA SEAL: A STOP TO CONTAMINATION

We have used the same gaskets that we use around the frame, around the whole perimeter of the closing edge of each drawer. TAO's exclusive gaskets, similar to those found on refrigerators, are designed to collapse and adhere completely to all surfaces, ensuring an effective airtight barrier.

MAGNETIC TAGS

Say goodbye to sticky labels. TAO repositionable Tags are available in 6 colours and can be used to code drawer content or just for looks. it's up to you.

it may look familiar, but everything has changed
hidden strength

colour: beige PANTONE 7528 matt, grey WA7018 matt
worktop: Corian® "Clay" (beige)

D-Box

a multi-functional tray or *SmartStorage* device?

D-Boxes can have many functions: a drawer insert, a removable tray, or a closed container in which to store or transport material

D-BOX CUPS

Cups give additional organization for D-Box spaces. Available in 3 sizes and 2 heights.

D-BOX LABEL

D-Boxes can be recognized by an external colour Label that identifies its content.

D-BOX SEPARATORS

D-BOX COVER

Protects the contents during transport. D-Boxes can remain open inside a drawer as they are sealed by Penta Seal airtight gaskets.

D-BOX SEPARATORS

The 2 modular elements can enable multiple compartments – large or small – to be arranged to suit the demands of each user.

D-BOX HANDLES

More than a drawer insert, D-Box has handles that turn it into a very practical tray, easy to move so all materials are always close at hand. The handle shape offers a firm and safe hold, and, because every drawer extends completely out, extraction is simple and secure.

D-BOX LABEL

You can add an external colour Label that identifies content and is always visible even in storage cabinets or a SmartWall

D-Box

"zero tilt" extraction

simplifying actions, everyday – that's innovation

D-Box lifts vertically

THE VERTICAL GESTURE

TAO's fully opening drawers eliminate hidden zones, exposing the whole content, making it easily reachable. With D-Box, extraction is a fluid and natural as well as a "vertical gesture" that avoids obstacles or tilting.

Tags

say goodbye to sticky labels and say hello to magnetic Tags - the **most practical** way to identify and recognize drawer content

A

identify **content**

TAO's magnetic Tags can serve the function of coding space for specific content

conservative hygiene endodontics

user 1

user 2

B

identify **users**

Beyond identifying content, you can reserve dedicated spaces for different users within the same treatment room. Colours can even be associated with those used in appointment software

More than TAO's trademark look, TAO's magnetic TAGS also serve the specific function of coding space

TAO MAGNETIC TAGS These re-positionable TAGs are available in 6 colours

Labels

expand the functionality of D-Boxes by adding coloured Labels and matching them to the same colour Tag

You'll find the learning curve to colour coding rapid and intuitive, a natural way to group and store products.

Match Tags to D-Box Labels to facilitate organization of products in the treatment room

D-BOX LABELS available in the same 6 colours

the newly found beauty that you feel has
forever been part of your world

colour: red RAL 3001, grey RAL9006 (plinth)
worktop: Fenix NTM® "Bianco KDS" (white)

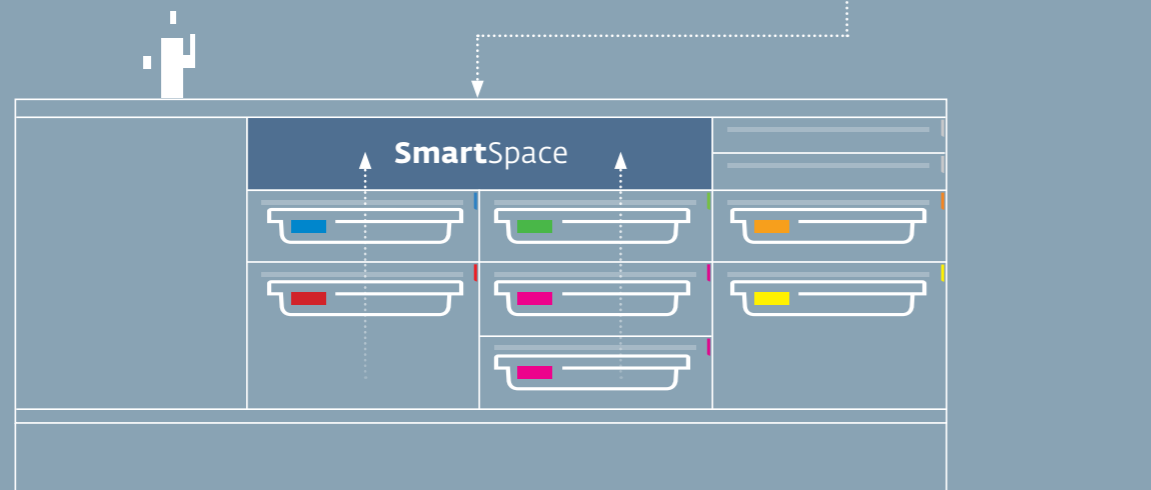

SmartStorage™: local

increase efficiency by creating a “**SmartSpace**” through which you can organize the passage of D-Boxes from **any** other drawers or wall cabinets

D-Box makes local storage faster, efficient, practical and protected. Every drawer, even the most distant, is now close at hand.

SMART SPACE
A transition area for placing content moved from other drawers. A central position, at the right height and distance from which you have access to what you need.

THE SMART REVOLUTION
The invention of D-Box has made Smart Storage™ possible. **Before** D-Box, a high-capacity container that doubled as a tray simply did not exist

SmartStorage™ : centralized

SmartWall is the perfect pairing of D-Box and centralized storage, creating a range of custom cabinets for holding a large number of D-Boxes

set up a single storeroom that supplies all treatment rooms

SmartWalls are available either open fronted or with glass door panels – transparent or smoked

TAE7/TAE7G
up to 24 D-Box Type 1
Door: smoked glass finish mirror (TAE7) or transparent glass (TAE7G)

VT2/VT2G
up to 8 D-Box Type 1
Door: smoked glass finish mirror (VT2) / transparent glass (VT2G)

TACOL4
up to 24 D-BOX Type 1

TA1DB+TX6
D-Box holder wheeled cabinet up to 8 D-Box Type 1

Metal:

the irreplaceable hygiene companion

metal is an informed choice: an environmentally friendly material that provides the highest levels of hygiene

Metal is notoriously a very challenging material, but Dental Art have built themselves a reputation –in every fold and weld – for metal “designer” furniture with a distinctly “warm” feel.

WOOD exposes medical environments to the risk of cross-contamination during cleaning and maintenance. It is porous, so absorbs liquids, therefore encouraging the growth of bacterial colonies and mould on its surface and in cavities.

METAL is a non-porous material, forming a natural barrier that prevents environmental contamination, so dirt and liquid residues cannot penetrate the furniture and can be eliminated by normal cleaning operations.
