

Ecco!

**When basic
meets chic**

STUDIO AREA

Ecco!

Dental Art presents Ecco!, the new modular system with a hip look and price, easy to choose in its standard colours and configurations. Bring a touch of fashion to your surgery with the best Italian design. Because basic can be chic!

Love at first sight

Its simple beauty and modern, sleek design will win you over at first sight. What makes it outstanding is the green tag on the handles that makes Ecco! a unique and original unit.

An unexpected surprise

Ecco! stands out for its essential design that hides an innovative spirit and a personality out of the ordinary, which emerge right from the first time you use it. When you open its drawers, you will be surprised by the colour of the seals and of the drawer inserts. An exclusive feature resulting from Dental Art's creativity.

Unmatched quality

Ecco! has a young and trendy look, but make no mistake. Its quality and reliability are those of a high-end product: top quality materials, perfect details, standard soft closing system, anti-dust seals...
Guaranteed by Dental Art.

ECCO02 _ 2 wheeled modules + sink module _ white WA005 + green mat WAS2060 + red mat RAL3001

Said and done, Ecco!

You can easily picture Ecco! in any surgery, whether you are thirty-year-old, or celebrating your thirty-year career. Available in standard or custom versions. You can choose between the two standard colours, white and mat grey for the fronts and handles, or you can choose other colours, whichever you like!

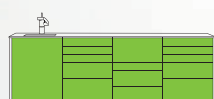

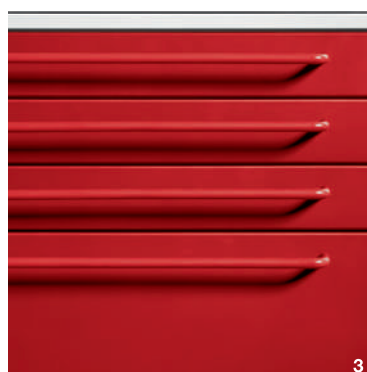

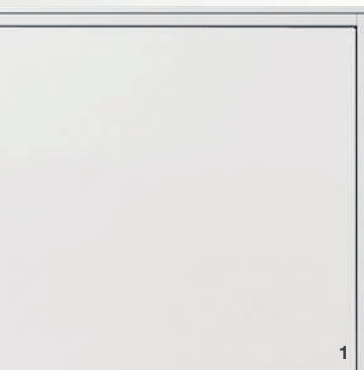

The heart of the surgery

With Ecco! you can be sure to be working under full safety conditions. But there's more. In line with the latest trends Ecco! makes the sterilisation area the "heart of the surgery", bringing it to a more visible position, thereby reflecting the high level of organisation of your facility.
