

**For a smarter, faster and more efficient dentistry!**

**ALL-IN-ONE**

**HEALBOND MP**  
single-component

**2-STEPS**

**HEALBOND MAX**  
2-components

## UNIVERSAL

Powerfull shear bond strength to all surfaces: tooth structures, ceramic, composites, metal and zirconia

## MULTI-MODE

Self-etching, selective etching or total etching

## MULTI-INDICATION

Direct & indirect restorations

## COMPATIBILITY

Use within ELSODENT product range WITHOUT ACTIVATOR for dual-mode.

## BIO+

BPA-free, no BisGMA, BisEMA, TEGDMA, HEMA

### HEALBOND MP

8<sup>th</sup> generation adhesive system (self-etching one step), which can also be used as an etch & rinse, 2 steps bonding system (with partial or total etch). Regardless the technique used, the results are always exceptional.

### HEALBOND MAX

6<sup>th</sup> generation adhesive system (self-etching 2 steps) which can also be used as an etch & rinse 3 steps bonding system! Comparative tests show equivalent or better results in both cases.

## > TESTS RESULTS

Premium products with innovative formulations whose clinical performance has been demonstrated by tests carried out in world-renowned universities.

Comparative tests demonstrate equivalent or superior results, against SE one step, for HEALBOND MP, or against SE 2 steps, for HEALBOND MAX. When SE 1 steps universal adhesives are used as E&R 2 steps, HEALBOND MP still demonstrates its superiority. It is the same for HEALBOND MAX against a true E&R 3 steps.

Pr Bart Van Meerbeek  
KU Leuven BIOMAT

### Bonding effectiveness on dentin of bonding systems HEALBOND MP & HEALBOND MAX with and without etching

1 week & 2 months (50 000 cycles) values in distilled water by Micro-tensile bond-strength ( $\mu$ TBS) testing. Data extracted from report KU Leuven BIOMAT, Van Meerbeek et al., 2020.

## &gt; DENTIST OPINION

"I have been using HEALBOND MP for 3 years, for my direct restorations. Without addition of an activator, when used with INNOCEM for cementing indirect restorations, and with CORE D, for core build-up. I switched to HEALBOND MAX 6 months ago for some indications, such as composites at the root junction, still with the same level of satisfaction: no staining of the joints, no postoperative sensitivities."

Dr Christian Moussally  
Paris

## &gt; BIO +

Formulations developed without endocrine disruptors or controversial degradable resins. BPA-free, no BisGMA, BisEMA, TEGDMA, nor addition of HEMA.

For dental products with innovative formulations, more respectful of patient health. Biocompatibility is the core of our research!

## &gt; SMART

## MULTI-INDICATION WITHOUT ACTIVATOR

Within ELSODENT product range, bonding systems HEALBOND MP & HEALBOND MAX can be used without activator whatever is the material: light-cure, self-cure, dual-cure composites and dual-cure universal resin-cements.

RESTORATION

BONDING

CEMENTATION

CORE BUILD-UP

NO ACTIVATOR

- + FASTER
- + SIMPLE
- + ECONOMICAL

&gt;&gt;&gt; SO SMART !

## &gt; MADE IN FRANCE

For 25 years ELSODENT has been developing and manufacturing, exclusively in France, a complete range of premium dental products, with innovative formulations, high clinical efficiency and improved biocompatibility. A single site, integrating the R&D, production and logistics departments based close to Paris (France).
