WG-900 LT Synea Power Edition: For the hardest materials

The Synea Power Edition is especially designed for heavy-duty applications, such as the removal of decayed materials, cavities, fillings, crowns, and bridges. These new high-speed contra-angle handpieces with a unique black push-button are built extra strong and durable.

They are the optimal solution for advanced ceramic material like zirconia that is increasingly being used in restorative dentistry. Thus, this up-to-date addition to the Synea family is the perfect complement to your existing handpiece range.

Osstell Beacon

De Osstell Beacon van W&H is een draagbaar, draadloos apparaat dat wordt gebruikt om de stabiliteit van tandheelkundige implantaten en osseointegratie te beoordelen. Het maakt gebruik van Resonantie Frequentie Analyse (RFA) om een Implant Stability Quotient (ISQ) te geven, een numerieke waarde tussen 1 en 100 die de stabiliteit van het implantaat weergeeft. Deze technologie helpt tandartsen bij het bepalen van het optimale moment voor het belasten van het implantaat.
