

My restoration:  
Biocompatible,  
naturally!

## Admira Fusion – The first pure ceramic for direct fillings.

Nothing but impressive advantages:

- 1) No classic monomers, no residual monomers
- 2) Unrivalled low level of polymerisation shrinkage
- 3) Universal range of applications and completely familiar handling

## Admira® Fusion

### THE BEST FOR EVERYONE!

Imagine having the option of placing purely ceramic-based restorations chairside, and in just the same straightforward way as you are accustomed to from working with a good restorative composite.

All of this has now become reality with Admira Fusion!

#### Nothing but impressive advantages

##### What your patients like

- Fast and reliably comfortable thanks to the most modern restoration material in ceramic quality
- Invisible: Optimally adapts to natural teeth
- Long-term aesthetics: Maximum shade stability against discolouration
- Optimum tolerance thanks to a reduced allergenic potential

##### What dentists appreciate

- Familiar handling – just like a good composite
- Perfect for everyday in-practice use
  - broad spectrum of indications, universal for the anterior and posterior region
  - compatible with conventional bonding agents and composites
- Can be used flexibly in the single- or multilayer technique
- Extra secure: Shrinkage of 1.25 % by volume sets new standards

Dr. Yassine Harichane, France / Canada:

« Dans ma pratique quotidienne, Admira Fusion me donne la tranquillité d'esprit. Ce composite est facile à manipuler, le polissage est très aisé et il s'intègre parfaitement avec le tissu dentaire. »

*In my daily work, Admira Fusion provides me with peace of mind. This resin composite is user-friendly, polishing is so easy and the final result blends in perfectly with the natural tooth structure.*

**Get to know Admira Fusion** – be it the packable or the flowable version, for 2 mm increments or as a bulk fill material.
