Original air Polisher and Ultrasonic Scaler

A51491

€ 7.968,00

**Made in France.
Trusted worldwide.**

**OPUS® is fully engineered
in France,**

with our Made in France quality seal and our
commitment to handmade precision.

Our French craftsmanship allows us to
proudly master:

- Full design and development manufacturing
- Supply chain processes
- Customer care service

The choices empowering you to work the way you want

OPUS® device offers user-friendly experience with:

- Instant treatments to contribute to **efficient and safe operations** with its responsive color-guidance interface
- Simplified mode adjustments
- Power level regulation for various clinical indications

You won't waste time or product with continuous pressure put into the bottle ensuring powders' residues to stay inside the tube and allow the usage of all the powder until the very last grain.

Our **single-use recyclable SILKY® powder bottles** eliminate the need for refills and problematic powder dust for faster powder handling with less downtime.

Our **single-use recyclable SILKY® powder bottles** eliminate the need for refills and problematic powder dust for faster powder handling with less downtime.

Keep your practice running smoothly with single-piece pressurizer **EasyLock:**

- Eliminate frustrating clogs
- Ensure consistent powder flow
- No diver required
- Guarantee safety and instant polishing

Quick powder insertion and removal
Grab & Go mechanism for instant polishing and switch between powders.

"The air polishing is a nice experience for a patient."

DH Carlotta Becciani (Italy)

Experience a new symphony with continuous flow...

OPUS® device is combining our legacy ultrasonics technology, reinvented air polisher with **clogging control by design** and new powders' offering to **provide versatility at your fingertips**.

Our new SILKY® powders embody **minimally invasive, gentle yet effective treatments**. This new range of powders is designed to provide an effective polishing solution for supra- and subgingival procedures.

SILKY® Perio

Prijs
123,00

Glycine-based powder

Grain size: 25µm

Gentle yet effective cleaning

Ensures gentleness on tissues while its low abrasiveness enhance safety

SILKY® pen: our lightest and slimmest handpiece ever made

As a dental professional, you strive for efficient, effective, and comfortable patient care.

SILKY® pen, our new air-polisher designed to **effectively treat both sub- and supragingival indications** combined with its 4 dedicated SILKY® nozzles offering a unique combination of **versatility, precision, and ease of use.**

Featuring an **ultra-light and slim and clogging control by design**, the SILKY® pen handpiece provides a **secure and comfortable grip for enhanced control.**

"Having a device for air polishing can be of big added value in the practice."

Dr. Joseph Sabbagh (Belgium)

SILKY® nozzles:

- Precise and continuous spray for supra- and subgingival biofilm removal
- Designed to control clogging and reduce interruptions and maintenance
- High-quality chrome cobalt made for durability and corrosion resistance

SUPRA Nozzle

120° wide angled spray for fast and efficient supra-gingival prophylaxis.

PERIO MAINTENANCE Nozzle

Refined 0.6mm powder outlet for gentle and precise periodontal maintenance.

PERIO EASY Nozzle

Innovative shoe-horn design for easy insertion and targeted cleaning of moderate pockets.

PERIO Nozzle

Automatic pressure reduction (<1 bar) for safe and effective deep pocket decontamination.

"First impressions were very positive... It performs outstandingly. Having the air polishing unit gives practitioners flexibility"

Dr. Rajan Nansi (UK)

ColorDrive system

The RFID tracking mechanism enables **automated powder recognition** with colored spotlight and pressure selection for SUPRA and PERIO modes allowing **effortless handling with complete peace of mind.**

C20

A51758

Easy to use. Easy to master.

More than just a tool, The C20 enhances the diagnostic process by creating an engaging and interactive experience for both the dental team and their patients.

By streamlining communication and boosting chairside efficiency, the C20 helps transform practices into high-performing, patient focused environments.

Frontal

PSPiX²

is AUTONOMOUS

The fully automated process free yourself from constraints

Just drop the plate inside the slit, the PSPiX² will automatically detect the size, scan the plate, optimize the image, and send it instantly to your imaging software.

In the meantime, it will automatically erase and eject the plate for an immediate reuse or switch to standby mode.

STUNTPRIJS
4890,00 euro

***Bij inruil van eender
welke fosforscanner !***

Fully automated process

5890,00

1

Auto-access:

The door only opens when the imaging plate is inserted.

2

Auto-detect:

PSPiX² automatically detects the size of the inserted imaging plate.

3

Auto-scan:

PSPiX² scans and optimizes the image before displaying it into the right workstation.

4

Auto-eject:

The imaging plate is automatically erased and ejected for an immediate reuse.

5

Eco-mode:

PSPiX² automatically switches to economic mode when not in use for an extended period of time.
