

Briefly AI

A Global News Intelligence Platform

Clarity and trust in current affairs

Built with ❤️ by Tanmay Tiwari

PROBLEM

Staying informed today is harder than it should be

- News is noisy, repetitive, and overwhelming
- Clickbait headlines reduce trust
- Important global updates are buried in long articles
- Users rarely verify news across sources
- Professionals don't have time to cross-check information

Result:

- People consume more news, but understand less.

SOLUTION

Briefly AI curates and verifies global news intelligently

- Collects global news from reliable sources
- Uses AI to filter what actually matters
- Converts long articles into clear, concise summaries
- Adds context with “Why this matters” insights
- Allows users to verify news credibility before trusting it

Less noise. More understanding.

TECH STACK

Technology Stack

Frontend

- HTML, CSS, JavaScript
- SaaS-style, distraction-free UI

Auth & Data

- Firebase Authentication
- Firebase Realtime Database

News Source

- newsdata.io (global coverage)

AI Layer

- OpenRouter API
- AI for summarization, insights, and trust verification

CORE FEATURES

Key Features

Daily Intelligence Brief

- A short executive summary of the day's most important news

AI-Generated Summaries

- Clear, neutral explanations of what happened

Why This Matters

- One-line insight explaining the impact of each story

Smart Highlights

- Key names, numbers, and dates extracted automatically

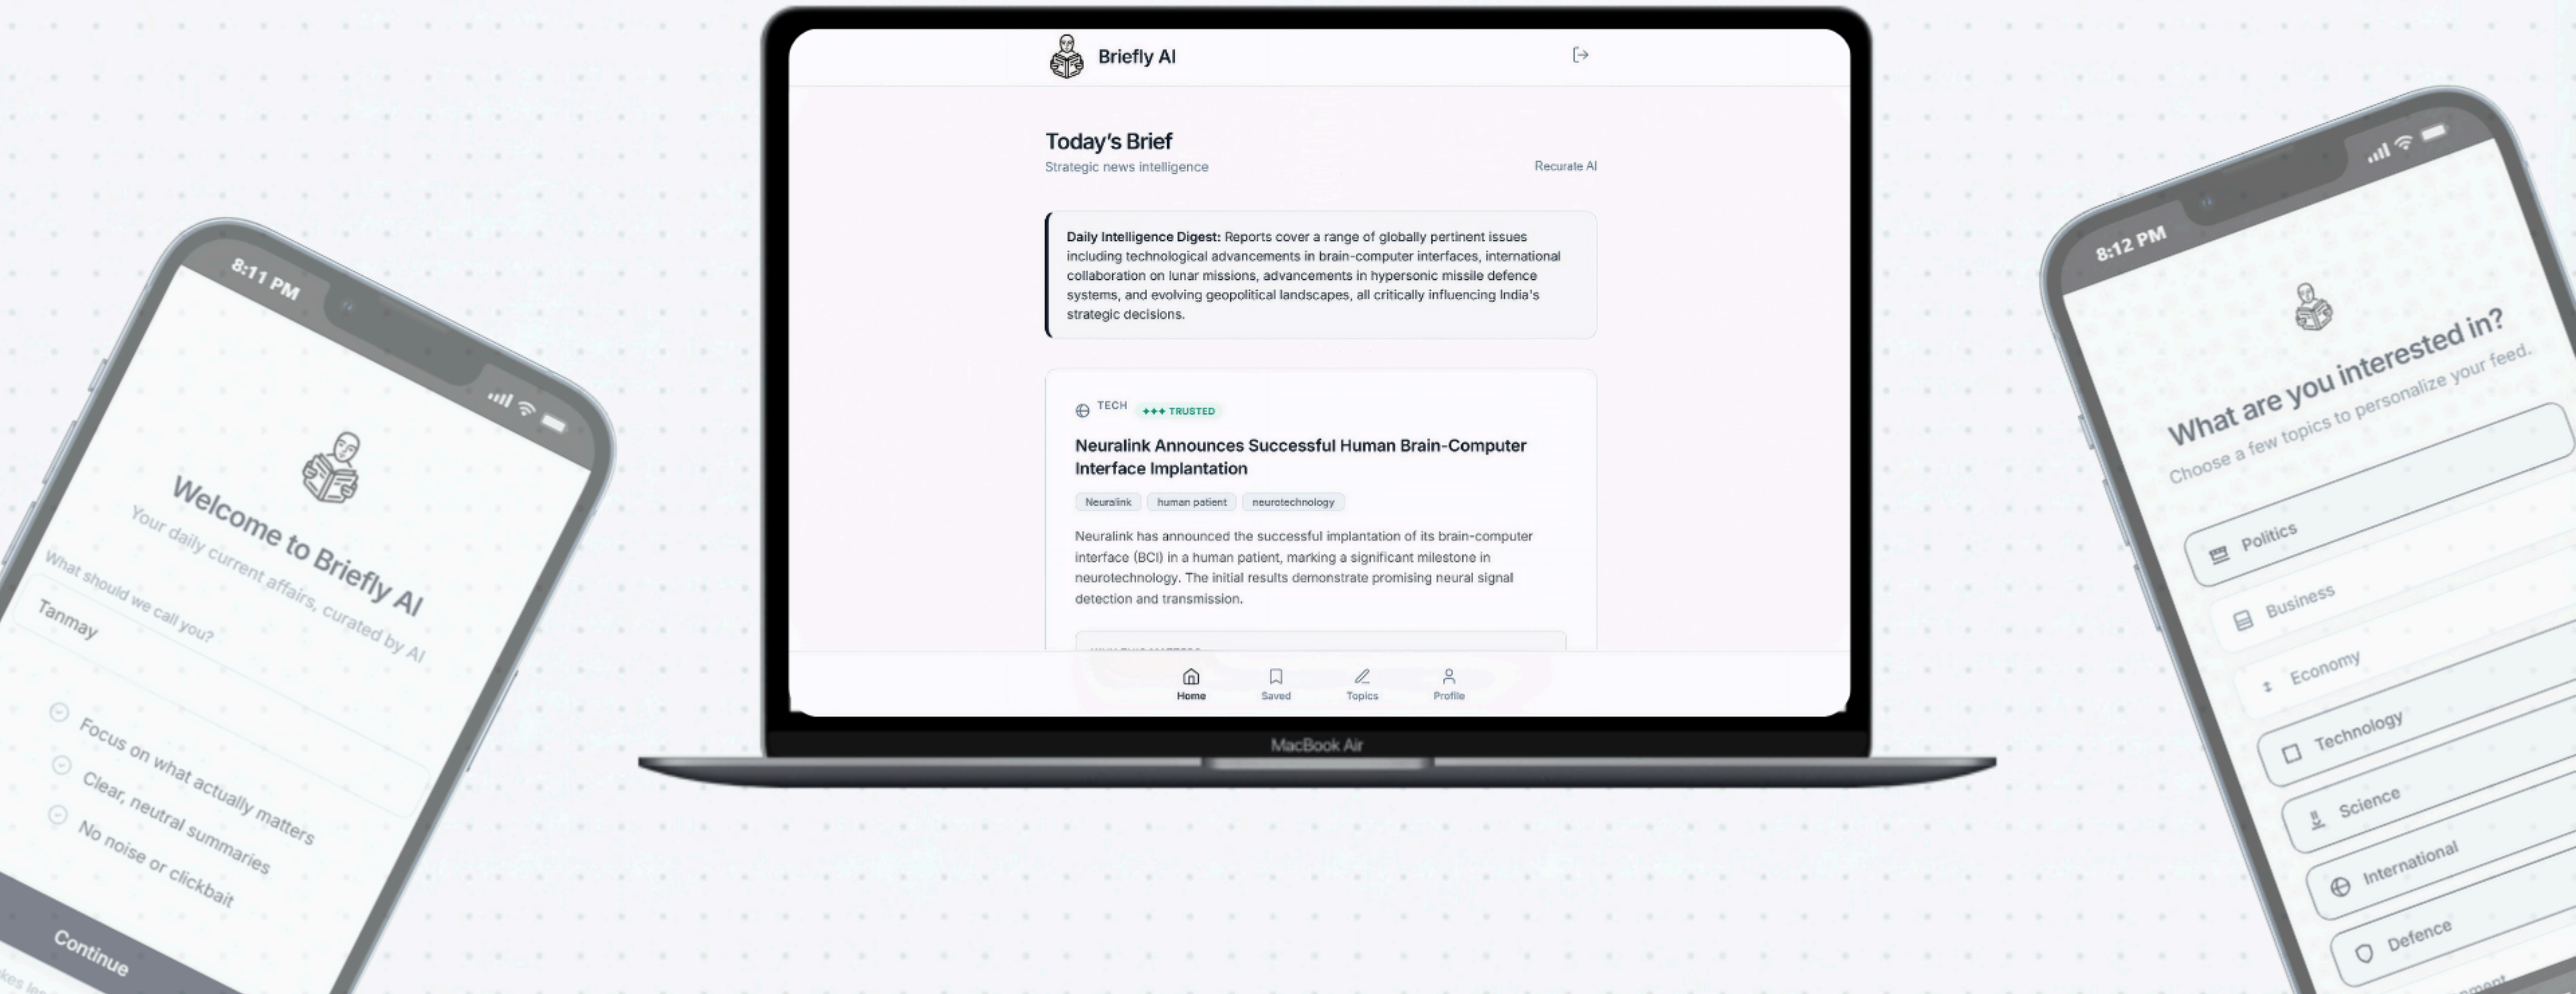

Bookmarks & Sharing

- Save important news or share clean summaries

From interests to AI-curated summaries

TRUST FEATURE (NEW)

Trust Check — Verify news before believing it

- Users can paste any news headline or claim
- AI cross-checks information across multiple reliable sources
- Returns a calm, neutral credibility assessment
- Clearly shows which sources were used
- Avoids absolute “true / false” judgments

AI assists verification — users stay informed decision-makers.

WHY BRIEFLY AI / IMPACT

Why Briefly AI is different

- Focuses on understanding, not engagement
- Combines news curation with credibility verification
- Neutral, calm, and distraction-free
- Global perspective, not algorithmic outrage
- Built like a serious SaaS intelligence tool

Impact

- Saves time every day
- Reduces misinformation risk
- Improves confidence in news consumption
- Encourages responsible sharing
