

**ALIVIA**UW DIGITAAL
ZORG- EN ONDER-
STEUNINGSPLAN

Alivia is on its way.

Alivia is the indispensable digital tool for all those who need or offer care and support. People with long-term or intensive care needs often receive assistance from multiple care providers simultaneously. For instance, professional care providers and welfare workers as well as family members or acquaintances.

How does Alivia work?

Thanks to Alivia, all these care providers can easily create a care plan through the website or app allowing them to set goals, divide tasks and share information. The focus is, at all times, on the care-dependent person.

What does the care-dependent person consider important in their daily routine, what exactly is needed to achieve this and who takes on which tasks? Thanks to Alivia, it is clear to everyone what is expected. The person needing care is also involved at all times and remains the most important voice in any decision.

As such, Alivia ensures a real and close-knit care team.
