

# Empowering the care sector for sustainable care: a federation perspective

Peter Raeymaekers

27/10/2025

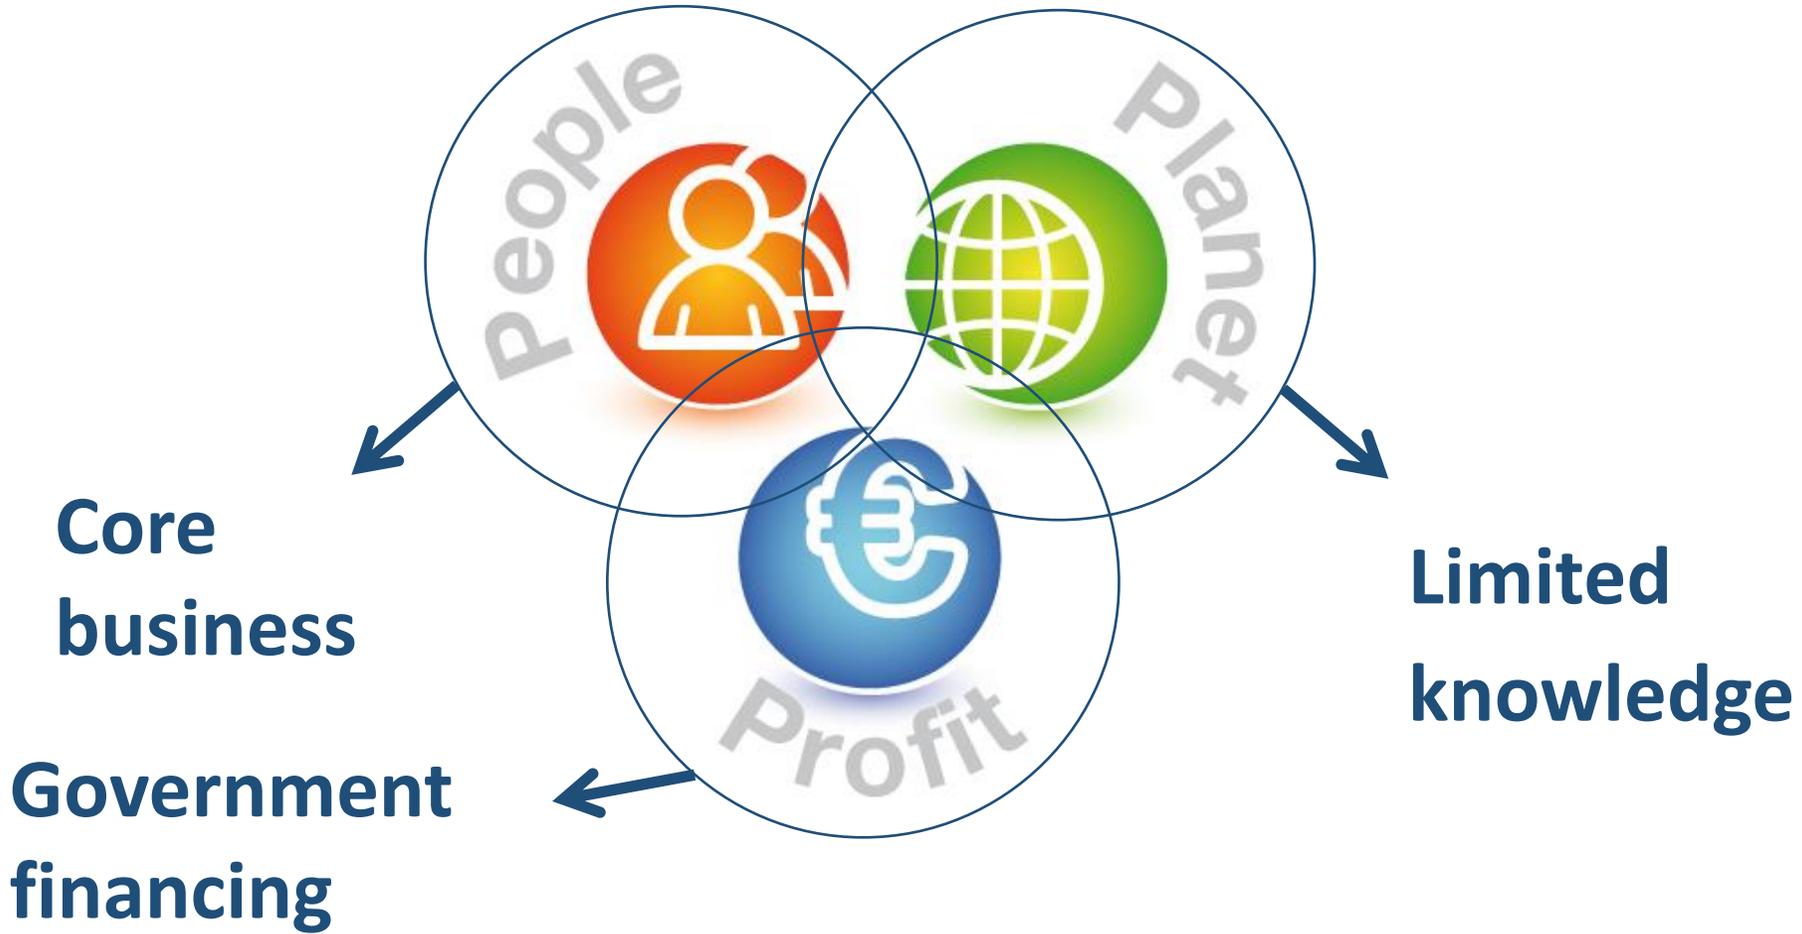

# Sustainability: a broad concept

Wanted: balance

- Ecological
- Economical
- Social
- Governance

# Sustainability: a broad concept

# Sector considerations

- Societal image and impact
- Substantial economic weight
- A lot of room for improvement
- Far investment horizon
- Government intervention and financing
- Budgetary constraints
- Capacity and competences
- Interesting energy consumption profile
- ...

# Current situation

- No CSRD (?)
- Awareness on the work floor
- Employer profile is vital
- Awareness in board rooms?
- Long term goals are clear
- Limited urgency for short time action

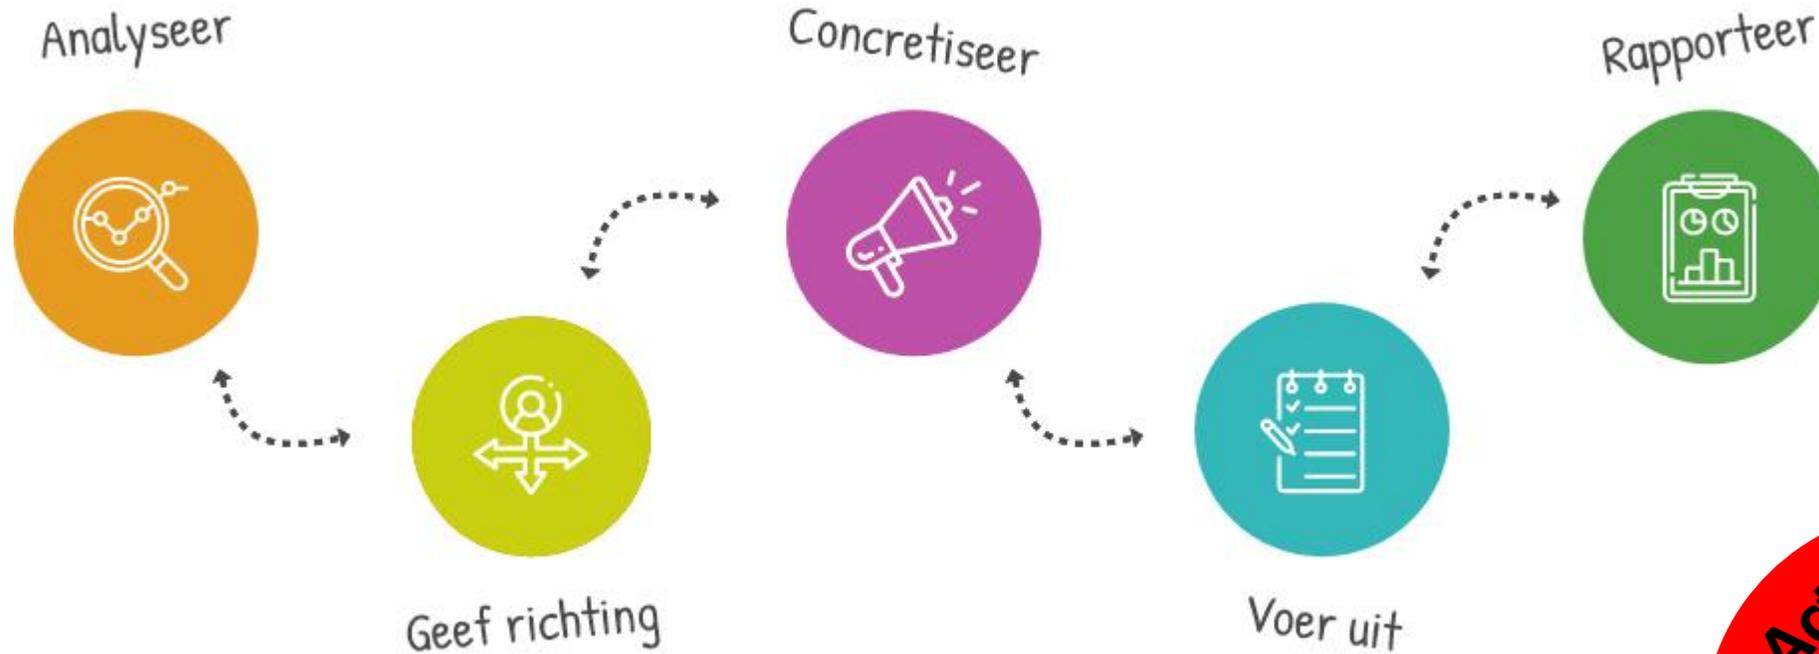

# Sector federations

- Proactive stance and vision building
- Raise awareness
- Promote collaboration
- Harmonize
  - Sustainability tools
  - benchmark
- Involve other stakeholders
- International alignment
- Government interaction
  - Financing
  - Legal
  - Helping digest government action and requirements
- Plead for long term vision on transition

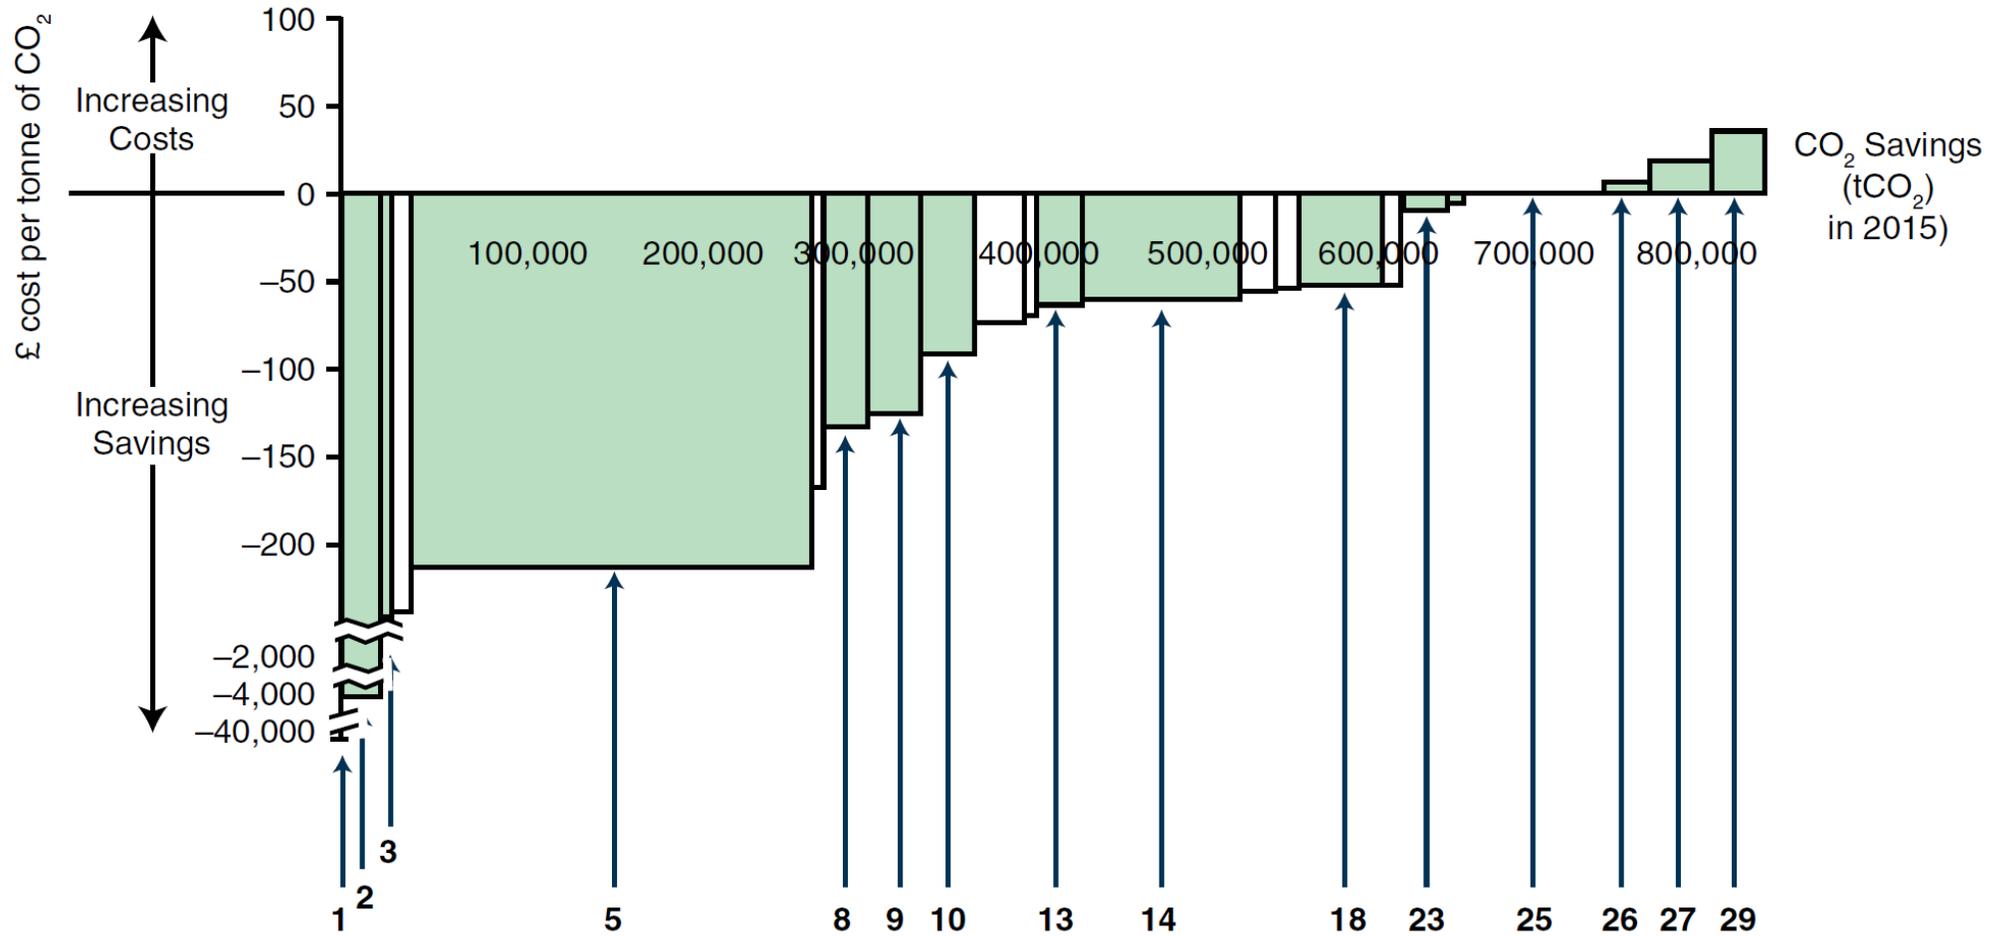

# How?

- Sustainability working groups
  - Share insights
  - Share (government and other) information
  - Policy suggestions
- Report to top management
- Green Deal Sustainable Care
- Sustainability instrumentation
  - Sustacare
  - HCWH tools
  - ...
- International alignment

# Sustacare

# Cost vs added value
