

# MANTEL WITH SURROUNDS INSTALLATION INSTRUCTIONS

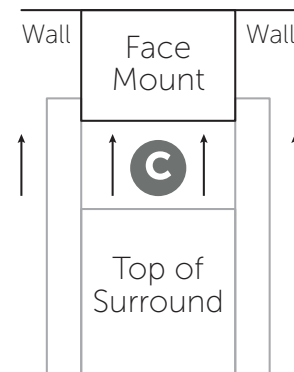

Follow the instructions on installing your mantel at <https://rusticahardware.com/instructions> **EXCEPT** you will need to be sure you add 1/8"–1/16" to the distance between the bottom of the mantel and your floor to allow for some clearance so that the surrounds will fit under your mantel when installed.

**A** Anchor supplied face mounts to your wall where you want your surrounds to sit under your mantel. Install one set just below the mantel and one set along the floor.

**B** Slide your surrounds over the face mounts. The mounts should rest nicely in the grooves inside your surrounds. **C** See top view below.

**D** Finish by screwing in the supplied grabber screws through the pre-drilled holes in your surrounds to secure them to the face mounts. Repeat for the face mounts installed along the floor.
