| Company Overview

WorkingMouse is a Queensland-based small-to-medium enterprise specialising in modernising legacy systems and delivering innovative software solutions for government and enterprise clients. Guided by the principle of Jidoka—automation with a human touch—their mission is to simplify complex software development, making it more efficient, less risky, and enjoyable. Empowered by their proprietary platform, Codebots, and ISO-certified processes, WorkingMouse supports clients through every stage of digital transformation. Recent accomplishments include modernising systems for the Department of Defence, Queensland Health, and Transport and Main Roads, showcasing their ability to tackle complex, large-scale projects with measurable impact.

| Our Values

At WorkingMouse, our four core values guide our actions and decisions:

1. Balanced with Direction: We recognise when something is out of balance and have the courage to change direction.

2. Play with Purpose: Through experimentation, we can play with purpose and unleash our creativity.

3. Mastery with Practice: Through practice, we gain knowledge, but through teaching and sharing this knowledge, we can attain mastery.

4. Connection with Empathy: Our culture thrives when our connections are nurtured and strong.

These values shape our approach to software development, fostering a culture of continuous improvement, creativity, and meaningful relationships.

| Key Milestones

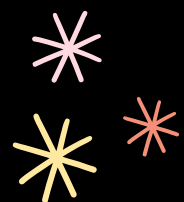

- Launch of Codebots to streamline software development.
- Successful project delivery for government and enterprise clients.
- Industry recognition for thought leadership and innovation.

| Our Expertise

- Legacy System Modernisation: Re-architecting unsupported technologies or applications.
- System Optimisation: Enhancing systems limited by manual processes or offline databases.
- System Integration: Developing connected solutions for disparate applications.

| Capabilities

- Legacy Modernisation
- DevOps
- Mobile and Web Applications
- Design
- Automation

| Team and Expertise

Dr. Eban Escott

Founder and CEO

Visionary behind Codebots with a PhD in software engineering. Expert in automation and digital transformation.

David Burkett

Director and Chief Growth Officer

Leads projects with a focus on agile development and legacy system modernisation, particularly for government and enterprise clients.

| Case Studies

WorkingMouse has successfully delivered software solutions for government and enterprise clients, including:

Department of Defence: Modernised procurement workflows, improving visibility, efficiency, and data integrity.

Transport and Main Roads: Migrated legacy systems to modern platforms, enhancing reliability and scalability.

Police NSW: Modernised systems to boost performance, reduce costs, and support future advancements.

Hitachi: Redesigned the Map Authoring Tool interface, improving usability and integration with autonomous systems.

Master Electricians Australia: Developed ME Hub, a safety management platform enhancing industry compliance and standards.

UniLodge Australia: Built a mobile app to improve resident engagement and streamline communications.

Our eight cross-functional teams, including delivery leads, architects, designers, analysts, and developers, drive these impactful projects.

| Client Testimonials

Liz Hemmens

CEO Moreton Island Adventures

"Since launching our application, our online bookings rose from 68% to 98%, paying for itself in just 18 months—it was the best investment we made."

Lynne Walton

CEO Access Intell

"WorkingMouse delivered all milestones on time, with an organised project management style and a team of reliable, creative experts."
