1. As shown above, first bury F (Inner thread) in the side hole of the front bar (screw hole is connected to the hole of the front bar), use E (wood plug) to make a preliminary connection to front bar and one end of the "7" shape frame, align the hole position, and pass A (screw) through C (washer) Insert into the hole where F (Inner thread) is just installed and twist with a wrench,tighten firmly. Fix the other end in the same way.

2. Embed F (Inner thread) into the side hole of the rear bar (screw hole is connected to the hole of the rear bar), align the hole position, pass A (screw) through C (washer) Insert it into the hole where F (Inner thread) is installed, and tighten it with a wrench.

3. Finally, align the left and right corner hole positions with the sofa hole position, pass B (Short screw) through C (washer), insert it into the hole and tighten it with a wrench.
