---

Throughout my career, I have always tried to ensure that the passion and enthusiasm for my work has shone through. Despite my success as an independent designer, I have found that it is through a team that I have achieved my greatest potential.

I have learnt that having a platform to question and develop ideas harnesses greater creativity - although realising creative inspiration doesn't come without its obstacles!

Time management and working to tight deadlines are important in any industry, but the foundations and biggest challenges of design lie in communication.

*My goal is to generate value for both creatives & art alike.*

To enhance my professional portfolio as well as my personal. To work diligently in an advertising company and to further my career in graphic design. To grow my graphic design skills and create functioning pieces that will work for real life situations. Use these skills to establish my career.
